PUGET SOUND ARGUS.

FRIDAY, APRIL 21, 1876.

Ex-Attorney-General Williams, recently before a sub-committee of the House investigating the expenditures of the Department of Justice during the period of his office, attempted to justify the free use of money through the Secret Service free without any vouchers of the objects for which the expenditure. Mr. Williams admitted the records showed that there was occasion to receive the laws for the protection of life, but we fail to see without rendering an account for it. There is no reason why men employed in the secret service should not be required to render an exact account of every dollar that they use. To permit them to do otherwise is to allow great scope for abuses.

Of all the hangers on about the present administration we know of none who occupies a more undignified position, to put it with extreme mildness, than Mr. Oryille East, brother of the President. He has held no office, but has always been hanging about to have good things tossed to him in the shape of post-travelling contracts for somebody who had retained him on a regular salary or with liberal fees, to look after him at board of a party. It seems to have been picking up fall things here and there for some years, and must have laid up quite a snug little sum. And this is a man who can hardly be pretended was not within the President's knowledge. He must have known the profitable use his brother was making of his relationship and probably considered it all right.

It cannot be denied that there is a wide-spread feeling that the expenditures of the national government from year to year are all out of proportion to the results obtained. Last year the appropriations made by Congress reached the total of \$897,168,177—a sum which exceeds the average citizen would dictate that a representative government should present its citizens in their economy as well as in their politics, and that when the people spend less the Government should spend less.

monument, \$17,000, and the other incidental expenses have all been paid by subscriptions from colored people. The last Congress appropriated \$3,000 for the pedestal, and the statue was allowed to pass the Custom House free of duty. The statue, which is of bronze of colossal size, being twelve feet high, rests upon a pedestal ten feet high. It represents Lincoln standing erect with the proclamation of emancipation in his right hand, and his hat thrown outstretched over a kneeling figure of a slave, from whose limbs the shackles have just been freed. Upon the base of the monument is the word "Emancipation." After music, prayer and reading of the proclamation, Prof. Langston formally accepted the statue in behalf of the nation, and then called upon President Grant to unveil it. Applauding the words of the speaker and increased when the President stepped forward and grasped the rope that was draped to the flag-rigging statue. The President gave one firm pull and the "starry banner" came down, and the cheering and cheering of the multitude, the playing of music and the booming of cannon, the beautiful monument was unveiled to the eyes of the nation, and then called upon President Grant to unveil it. When a Boston girl breaks her engagement with a man and her friends expect her to get married, she says his view on the theosophic doctrine of concubinage are loose; and they realize at once how impossible it is for any woman to risk her happiness with such a person.

An usher in one of the Eastern churches when he observes a gentleman coming in with a lady, whispers "Is he married?" If the gentleman says yes, the usher sees the two as he best can, even if it five rods apart. If the answer be in the negative, he gets both of them in one paw if he has to split some one in two to do it.
