THE OCEAN BURIAL.

Silently—tearfully,
Cover that brow!
Gone in the night
Of his manliness now;
Cold is the bosom,
Gleams the eye,
Far on the blue wave
He wandered to die!

Silently—tearfully,
Fold the dark pall,
Sternly old Ocean
Shall close o'er its fall;
No dirge but the wild wind,
No tomb but the sea,
Deep 'mid its treasures,
His lone sleep shall be.

Afar o'er the billow
There's gladness to day,
In the green sunny vale
Where his young children play,
And the thought of their sire
Is coupled in glee,
With the joy of a greeting
That never shall be.

And long shall those dear ones
Await—but in vain—
The step that will gladden,
Oh! never again.

They'll list for the loved tone,
So gentle—so gay—
Alas! the Death-Angel
Hath stilled it for aye.

O wave of the ocean!
What tale canst thou tell
Of all o'er whose slumbers,
Thou soundest the knell;
O wave of life's ocean!
Thy merciless surge,
O'er all we have treasured
Is sounding the dirge.

Silently—tearfully—
Leave him to sleep,
Where coral is gleaming,
And dark sea-weeds weep;
Yet know that the spirit—
The deathless, the free!
Bows not to the spoiler,
Rests not in the sea!

It is customary in some churches for the men to sit on one side of the church and the women on the other. A clergyman in the midst of his sermon, found himself interrupted by the talking of some of his congregation, of which he was obliged to take notice. A woman immediately arose, and said, "Observe, at least, your reverence, it is not on our side." "So much the better, good woman, so much the better," said the clergyman, "it will be the sooner over."

A windy orator once got up and said: Sir, after much reflection, consideration and examination, I have calmly and deliberately and carefully come to the determined conclusion, that in those cities where the population is very large, there is a greater number of men, women and children, than in cities where the population is less.

The Klamath News says that a gentleman from Hongkong, working on Six Mile Creek, a tributary of the Salmon, picked up one day last week, a nugget weighing twenty-five pounds. The lucky Chinaman left for the Flowery Empire immediately. It is the largest piece ever found in that country.

A chap out West, who had been severely afflicted with palpitation of the heart, says he found instant relief by the application of another palpitating heart. Another triumph of homeopathy: "Like cures like."

Young ladies who read newspapers are always observed to possess more amiable dispositions, invariably make good wives, and always select good husbands. Fact.

BARNUM has ten beautiful Circassian girls on their way to this country for exhibition in his new museum. That will be a "ten-strike," as ten-pin rollers say.

The study of literature nourishes youth, entertains old age, adorns prosperity, softens adversity, is delightful at home, and unobtrusive abroad.

SHAKESPEARIAN quotation for Helmbold, Harpud and Bonner: "Sweet are the uses of Advertisment."

THE FENIANS.

These people, of whom we have recently heard so much, if we believe the early historians so far as to allow them an historical existence, were a body of Irish militia, forming a kind of standing army, which was employed to defend the coast of Ireland from the invasion of foreign foes. They were billeted upon the inhabitants during winter, and obliged to maintain themselves by hunting and fishing during summer. Each of the four provinces had its own band of these warriors and champions, but Leinster was the most fortunate province in incorporating distinguished names in the list of its Fenians. Fingal himself was one of the illustrious band, which included also the ever-memorable Ossian. When St. Patrick came to Ireland, Ossian related to the Apostle of Ireland the exploits of the valiant Fenians. The record of their conversation, which is still extant, is called the "Dialogue of the Sages;" but it seems that the sage and the bard, sage as they both were, were sometimes on the point of quarrelling. Our readers may remember the version of an ancient Ossianic poem which, according to Sir Walter Scott, Hector McTear gave to his uncle, the antiquary. Sir Patrick there complains that his devotional meditations and psalms are disturbed by the old woman's tales of Ossian; and Ossian, annoyed at the implied comparison of psalms to the tales of the bare-armed Fenians, declares, in no measured terms, that he should think it no great harm to wring the saint's old bald head from his shoulders.

WHO WERE THEY?—ARIZONA was once the theatre of a civilization, which has left monuments, but not history. Well constructed houses are existing there, unattended, and evidences of extensive mining and agriculture. It was evidently not Aztec, Toltec, nor ante-Toltec civilization. The Apaches, a species of Indian analogous to the Malays of India, now overrun that Territory, and cannot be civilized. The Mokes are a more interesting people. They live upon the mountains and cultivate the land in the valleys, for which they pay a tribute to the Apaches. They now number about twelve hundred; are of a fair complexion and somewhat European features. Some Welch colonists of Utah visited them, and found remarkable similarities of language—the same intricate system of connotational words and other dialectic peculiarities belonging to the Cymraeg.—There is a theory that Prince Madoc, who left North Wales in the reign of Henry II of England, was the founder of an American colony, of which the Mokes are the descendants.

PROBLEMS BY PUNCH.—If 5½ yards make a perch, how many will make a trout?
If 2 hogheads make a pipe, how many will make a cigar?
If 2 gallons make one peck, how many will make one thirsty?
If 3 scruples make a dram, how many will make a drama?
If 2½ inches make one nail, how many will make a screw?
If 3 feet make a yard, how many will make a garden?
If 63 gallons make one hoghead, how many will make the "whole animal?"
If 12 inches make one foot, how many will make one leg?
If 5 quarters make one ell, how many will make the whole alphabet?

I have sat upon the sea shore and waited for its gradual approach, and have seen its dancing waves and white surf, and admired that He, who measured it with his hand, had given to it such life and motion; and I lingered till its gentle waters grew into mighty billows, and had well nigh swept me from my firmest footing. So have I seen a heedless youth gazing with a too curious spirit upon the sweet motions and gentle approaches of inviting pleasure, till it has detained his eye and imprisoned his feet, and swelled upon his soul, and swept him to swift destruction.—Basil Montague.

ARTEMUS WARD.—Charles F. Browne, the great American humorist, who is reported to have been smothered by coal gas, lately at Worcester, Massachusetts, was a printer, having learned the art of his brother, in Norway, Maine. His mother, whom he made comfortable, is still living near that place. Mr. Browne first attracted the attention of the public while serving in the capacity of local editor of the Cleveland Plaindealer.

THE Second Controller of the Treasury has just rendered the following decision with respect to the authentication of evidence from State officials. Those transmitting documentary evidence here will bear this in mind: "Affidavits taken before a Notary Public, after the first of October, 1865, must have a certificate of the Secretary of State, or of a clerk of a court of record, to the official character of the notary."

A fellow being asked if the liquor he was drinking was a good article, replied, "I think it is, though there is one queer thing about it; when I wipe my mouth on my shirt sleeve, I burn a hole in it."

LITERARY GOSSIP.

Victor Hugo is reaping a golden harvest in his old age. He received 400,000 francs (£16,000) for *Les Misérables*. He has sold a prose work, *Les Travailleurs de la Mer*, to La Croix, of Brussels, for £6,000, and five volumes of poems, *Les Chansons des Rues et des Bois* (the first of which is announced to appear soon,) have been disposed of to the same firm for £8,000. Thus, within five years, Victor Hugo has made £30,000 by his pen. The *Fagaro* gives some curious particulars about his mode of composition. It seems that he has made it a rule never to allow a single line of his writing to go to the printer. He has all his "slips" copied out by his wife or daughter, and forms a kind of autographic museum of all his original works. From that rule, however, he has departed, as regards the new poems, which were chiefly in pencil on an album; the slips were torn out of the book and taken directly to the printer at Brussels, where they are being set up under the author's own eye. It is a curious fact that Victor Hugo should labor under the delusion that he has mistaken his vocation, and that, as a painter, he would have achieved great fame.

"I WILL."—Who does not admire that strong, manly expression? No one, having truly and truly said, "I will be a man," was ever a mean, grovelling creature, to be pitied and looked down upon. The trials of this world do not trouble him. He speaks and his will overcomes all obstacles. He goes forth only to conquer. Young man, would you stand up prominent in society, would you be respected by the community, look not at your lot and daily routine. Be up and doing with "I will" upon your tongue, emanating from the heart, and you must, you will prevail.

Point out the man whose influence died with his last word, and I will show you the weak, faltering wretch, who would run from fear of approaching hills, would gasp at the sight of a dark cloud portending a shower.

Let the spirit of energy course through the veins, and your ambition lead in the right direction, and you can leave a name that will be remembered with respect; after the narrow home shall be your resting place.

THE Territorial Enterprise thinks Charles F. Browne was not the Artemus Ward that was suffocated at Worcester, lately, and assigns the following reasons:

First, Charles F. Browne is not a married man; secondly, he does not live in Worcester; thirdly, the name of Ward is a common one in Worcester, and, in the adjoining town of Srewsbury, are buried the remains of Gen. Artemus Ward, who was Commander-in-Chief of the Continental army previous to the appointment of George Washington to the supreme command. The deceased General has many descendants, and it is altogether probable that the Ward smothered by coal gas was one of them, as well as a namesake.

THE Free Masons of Holland have addressed a communication to the Holy Father protesting against the recent papal allocation, and remarking that Free Masonry soars above all sects and creeds, inasmuch as it tends to elevate and to benefit humanity. They add that any religious denunciation that attempts to deviate from that great social mission, and to assert its supernatural superiority of the duties of practical Christianity, places itself thereby outside the pale of humanity.

THE Idaho Legislature has passed a bill repealing the law by which the Territorial officers were allowed compensation in addition to that paid them by the General Government. The pay of the Territorial Judges, for instance, was \$2,500 per annum, and to this was added \$2,500 that came out of the Territorial treasury. The Legislature has relieved the people of this burden.

WE cannot censure a man in business who does not advertise if he has nothing worth advertising; but readers must know that the man who puts out his sign in a newspaper, and is not ashamed of his goods, can always furnish a better quality at lower prices than those who either through shame or penuriousness, never let the public know what they are doing.—Ez.

THE interminable divorce case of Edwin Forrest, the actor, has taken a novel shape. He appeals to the Supreme Court of the United States to set aside the action of the New York Supreme Court which granted his wife a divorce, his grounds being that the marriage occurred in Great Britain, and the courts of this country have no business to meddle with it.

SPAIN has blockaded Chile and otherwise commenced war upon the Chileans for some imaginary offence. To get even with the Don, Chile has authorized "privateering," and, last week, a naval captain arrived at San Francisco, duly authorized to purchase and fit out a privateer to prey upon Spanish commerce.

ALL the rats disappeared from Marseilles when the cholera came.

DETAILS OF EASTERN NEWS.

Dates to Feb. 1st.

New York, Feb. 1.—The gunboat *Narcissus*, from Pensacola, for New York, was totally lost at the mouth of Tampa Bay with all on board.

Washington, Feb. 1.—Pursuant to a call issued in December last by the Secretary of the Interior, the board of Government Commissioners, Directors and Engineers of the Union Pacific Railroad, convened to-day for the purpose of adopting a uniform standard of road, to which the several companies organized under the acts of July, 1862, and July 2d, 1864, shall conform. The Secretary of the Interior was present. The convention elected Col. Simpson President, and John R. Merless Secretary.—The representatives of the connecting roads were James Ames, of the Sioux City and Pacific; C. A. Huntington, of the Central Pacific; R. M. Shoemaker, Geo. McCook, and Hugh J. Jewett, of the Union Pacific Eastern Division; S. C. Pomeroy, of the Atchison branch; W. B. Allison, of the Sioux City and Pacific railroad. The convention adjourned till to-morrow.

New Orleans, Feb. 1.—An engine exploded on the Jackson Railroad, near Antie, killing three persons including Col. Forney, late Chief of Police, and wounding four others.

Annapolis, Jan. 31.—The Maryland Legislature has appropriated \$15,000 to complete Antietam Cemetery. The remains of 8,000 soldiers are now lying where they fell but will, next summer, be collected in one inclosure.

Boston, Jan. 31.—A meeting of capitalists was held this evening to consider the Northern Pacific Railroad. Speeches were made by Edward Toly, ex-Gov. Smith, of Vermont, the President of the Company, Hon. John F. Briggs, of Michigan, and others. The policy of the Company was announced to be the immediate construction of about seven hundred miles of the road, to connect Lake Superior with the Yellow Stone river; proceeding thence to the Columbia, by which steam communications will be opened. It is proposed to complete this work in three years.

The reported destruction of the city of Caracas by an earthquake, on the 15th of December, is confirmed. The shock was felt all along the South American coast. The oscillations were from east to west. Caracas was one of the largest cities in South America, and was nearly destroyed in a similar manner in 1812.

Chicago, Jan. 31.—The telegraph brings news of two shocking disasters by the explosion of steamers on western waters.

The steamer *Missouri* exploded on Green river, Kentucky, yesterday morning. The wreck floated down to Evan's Mill. It is supposed that 80 lives were lost. The steamer *Miami* exploded on the Arkansas river on the 28th. 130 lives were lost.

Cincinnati, Jan. 31.—The last dispatch from Evansville says, that the loss of life by the explosion of the steamer *Missouri*, is one hundred. The steamer was valued \$100,000. The steamer *Miami* had two hundred and fifty passengers on board, and the loss of life was between one hundred and fifty and two hundred. The explosion occurred just after supper, while the cabin was full of people, and was with such force that the cabin floor was torn asunder and all those in the forward part, fell down into the mass of fire and steam below.

Chicago, Jan. 28.—A Washington correspondent of the Detroit Tribune gives a different version of the story of Judge Field and the infernal machine. He says the Judge received a package carefully done up and about the size of an ordinary ambrotype case. He proceeded to undo it supposing it to be a picture. Noticing that it opened very hard, a suspicion flashed across his mind that there must be something wrong about it and he threw the package against the wall. In striking it broke open and disclosed an ingeniously constructed machine. The package contained several conical balls made somewhat like fixed ammunition for the Spencer rifle, but so arranged as to be discharged by the application of fire. The construction of the infernal machine was such that when opened, a match would ignite on a piece of prepared cardboard, and communicating fire to the ammunition, scatter death in every direction.

New York, Jan. 29.—Gen. Sickles, commanding in South Carolina, has issued an order declaring the laws shall be applicable alike to all inhabitants. No person shall be held incompetent to sue, make complaint or testify, because of color or race. No penalty or punishment, different from those to which all persons are amenable, shall be imposed on the freed people.

Police officer Stelleg was on duty in Commerce street yesterday, when a man dressed in police uniform came and told him he had been detailed to arrest counterfeiters, and that assistance would be required. Shortly afterwards the Porter of the Greenwich Springs Bank came by with a box containing \$30,000 in money, and was at once arrested. The bogus officer got the regular to take the man to the station house while he proceeded to head-quarters and reported the arrest. This was done, the strange man making his escape with the

cash box and contents.

Washington, Jan. 31.—In the House to-day the representation amendment to the Constitution was reported back, the words, "direct tax," having been stricken out.—After some debate the amendment was passed by the requisite vote. Ayes 172, noes 46.

The committee on commerce reported a bill repealing the fishing bounties, and it was passed.

The bill regulating the registry and restoring vessels sold under foreign flags during the war, was debated and opposed as a bad precedent. Ship-owners should not desert a tonnage of freight and change it to foreign flags.

The Constitutional amendment which passed the House to-day, apportions the representation in Congress upon the aggregate population, excluding classes not allowed the suffrage and civil rights by State laws. The second section relating to direct taxes was stricken out in committee. Stevens in reporting the amendment from the committee took occasion to say that the President had put forth a remarkable proclamation while the question was pending in the House, being a violation of the privileges of this body, which, if done some centuries ago by a British King, would have cost the monarch his head. Now, however, we are tolerating usurpation. Smith, of Kentucky, called for the reading of the paper alluded to. The paper was then read, being the reported conversation between the President and Senator Dixon.

Schneek's amendment, that the apportionment be on the basis of qualified electors, was rejected by a vote of 89 to 130.

The House then voted on the main question. Ayes 120, Noes 45.

The Herald's Richmond correspondent says an effort is making in the Virginia Legislature to declare the election of Senators Underwood and Segar illegal as well as force the resignation of Gov. Pierpont.

Union citizens are being persecuted in Northern Alabama. Reliable information from that quarter indicates that the bitterest feeling exists towards the Unionists and the whole civil authority is turned against them.

New York, Jan. 27.—Wm. Everts has begun preparations for the trial of Jeff. Davis, having been retained as Government counsel, with a fee of one hundred thousand dollars. He is overhauling the records of treason trials since the days of the Stuarts.

Denver, Jan. 27.—The Colorado Territorial Legislature has granted liberal charters to Ben Holladay. One is for a road through Middle Park, shortening the distance to San Francisco 200 miles, and the other for Holladay's Mail and Express Company.

Chicago, Jan. 29.—In the Senate to-day, Stewart of Nevada, offered a memorial from the citizens of Colorado, asking admission under the present Constitution. A funny imbroglgio exists in Colorado. Governor Cummings has seized the seals of the Territorial Secretary, Elbert, because the latter seeks to encourage the admission of Colorado as a State. Elbert is a son-in-law of ex-Gov. Evans, United States Senator elect. Gov. Cummings has addressed to Congress a protest against the admission of Colorado as a State.

Stewart of Nevada, inquired of the House for what length of time the Southern States should be held as Territories. Howe replied that he would keep them in a territorial condition until a Congress composed of loyal men chose to admit them into the Union. Stewart said that he held that the oppression of the Southern freedmen and loyalists, was no reason for keeping the Southern States out of the Union, because Congress has full power to protect these people, and there is a bill now pending for this purpose. He was in favor of the measure, and he was in favor of the freedmen's bill passed yesterday. He would say to the Democrats, that they were retarding reconstruction by their opposition to such measures as that passed yesterday.

Generals commanding military departments in the South have been directed to issue stringent orders for the protection of freedmen against the negro vagrant laws passed by Southern Legislatures. In consequence of hostile legislation towards the freedmen, it is probable the Judiciary Committee of the House will report a bill granting the right of suffrage to every negro in the land. Most of the Members of the Committee are of the opinion that Congress can do so under the second section of the amendment abolishing slavery.

Washington, Jan. 29.—Raphael Semmes of the pirate *Alabama* notoriety has, himself prepared an argument, which was presented to the President on Saturday evening by his counsel, Judge Hughes. In this he claims the benefit of Sherman's parole.

Seward and party returned to Washington on Saturday night, on steamer *De Soto* having made the complete tour of the West Indies, visiting St. Thomas, Santa Cruz, San Domingo, Port au Prince, Havana, etc., spending a few days at each, being cordially received. The Secretary's health is now better than during the past year.

A bill will shortly be introduced into Congress, abolishing offices of naval officer and surveyor of customs at all the ports.

SEATTLE GAZETTE.

SEATTLE, W. T.

Friday, February 13th, 1866.

L. P. FISHER, is the authorized agent for the GAZETTE at San Francisco, California.

M. W. WAITE, is agent for the GAZETTE at Victoria, V. I.

TO OUR PATRONS.—As the time of our lease upon this office will expire on Monday, March 5th, 1866, we would respectfully call upon subscribers and others, in arrears, to come forward and settle their bills, as it is necessary for us to square our books before turning over the office. We trust all, who are indebted to us, will act justly by the printer.

PUT ON SHORE.—A number of persons who had purchased a ticket at Victoria and paid their passage through to California, assured that they should leave Astoria or Portland on or about the 2d of January, with no specified steamer, took passage by the Pacific on its last trip from Portland, but were put ashore a few miles below Portland, the officers deciding that they must go by the Sierra Nevada, which had been lying on the rocks above St. Helen for two weeks.—Statesman.

PRIZE FIGHT.—A prize fight, it is said, will take place at or near Victoria, on the 23d inst. between a champion named Elen on the one side, and another of the name of Baker, on the other. There is to be \$500 "up" on a side. The champions have been undergoing a most rigid course of training, and are already in excellent condition, and are models of manly strength and vigor. The affair is creating considerable excitement.

PICKED UP.—Six men of the bark Mustang were picked up by the bark Corlotta and carried to Seabeck. When found, the men were in a very bad condition. We learn that a schooner was to have been sent to the wreck, to secure a part of the cargo if possible. It is apprehended that the Indians have plundered extensively upon it.

SECRETARY EVANS has received orders to draw on the United States Depository, at Olympia, for funds to pay the Members of the Legislature, and the incidental expenses of the recent session. This order has long been expected. It was, doubtless, delayed on the way.

DISSOLVED.—From the late numbers of the Democratic Review, we learn that the partnership heretofore existing between C. B. Bellinger, U. E. Hicks and A. Noltner, has been dissolved. Mr. Noltner is now the sole proprietor of that paper.

SOLD CHEAP.—The steamer Alexander with boats, tackle, sails, etc., was sold at auction recently in Victoria, to the Hudson Bay Company for the small sum of five thousand dollars. This vessel cost, when built, thirty thousand dollars.

VALENTINE'S DAY.—Day before yesterday was Valentine's day, and, judging by our observation though somewhat limited in extent, we are inclined to think that friend Pinkham did a "land office" business in the valentine trade.

The steamship London, for Melbourne, foundered at sea and 270 lives were lost. Only sixteen of the crew and three passengers were saved from the wreck.

We have received from Mr. T. F. McElroy, one of the Public Printers at Olympia, a copy of the School Laws passed at the last session of the Legislature.

ERRATION.—It is reported that one of the "Three Sisters," east of Eugene City, Oregon, has been seen lately emitting volumes of fire and smoke.

We desire to call attention to the advertisement of Mr. William De Shaw's store at Point Agate, which appears in our columns this week.

NEW PAPER.—We see it stated that Messrs. M. H. Abbott and N. Butler will shortly start a new paper in Portland, Oregon.

The steamer Labouchere sailed, yesterday, from Victoria, for San Francisco, on her first trip under the subsidized arrangement.

SAILED.—The steamer Active sailed from Victoria for San Francisco, on the 12th inst., carrying passengers and freight.

Olympia's elephant, that fire engine, has at last been housed, and an "alarm" is hourly expected.

See the Magic Oil advertisement in another column.

Another Marine Disaster

LOSS OF THE BARK MUSTANG

Yesterday afternoon, Capt. M. Toby, late of the American bark Mustang, with his second officer, Mr. Scammon, arrived at this port in an Indian canoe from Port San Juan, and announced the loss of his vessel on the west Coast of this island, about five miles south of the entrance of Clayoquot Sound. The Mustang had about 170 tons of goods on board, and left San Francisco for Victoria on the 14th of January. At 2 o'clock on the morning of the 21st of January, during the prevalence of a thick fog, the bark struck a reef at the point above mentioned, losing her keel, and, running over the reef, rested finally on a sandy beach.—Here the boats were lowered and started for the shore which they succeeded in reaching, and on their return, in half an hour, the tide having fallen, the men were enabled to walk almost to the ship. The vessel in the mean time had made considerable water, and at the next high tide was half filled. Abandoning all hope of saving her, the captain turned his attention to preserving the most valuable portion of his cargo, which he piled on the beach with some provisions. On the 30th ult, the vessel was abandoned, the captain, with the second officer and two men in one boat, and the first mate with six men in the other, started for Victoria. Shortly after leaving the wreck, three canoes filled with Indians were met approaching for the purpose of plunder. On the second day the two boats parted company, and the captain's boat, having stopped at an Indian village eight miles south of Barclay Sound, was robbed of every article on board, including provisions and clothing. The two men, afraid to venture again in the boat, owing to rough weather, remained with the Indians, while the captain and second mate continued on in the boat to Port San Juan, where they arrived three days afterwards, subsisting meanwhile on muscles. They were treated with great kindness by Capt. Spring, and brought on to Victoria yesterday in a canoe. The consignees of the vessel (the Hudson Bay Company) were communicated with, and we believe that a steamer will be dispatched to the scene of disaster. Capt. Toby and Mr. Scammon (who have been kindly cared for by the American Consul) desire to return unbounded thanks to Capt. Spring who has within two years rescued the crews of three wrecked American vessels from starvation, and is deserving of a public testimonial for his humanity. Capt. Toby thinks that the mate crossed in his boat to Neah Bay, on the opposite side of the Straits. The Mustang was 300 register and 12 years old. She was insured for \$15,000. Her cargo consists of 100 tons rice, 50 tons hay, 50 barrels of flour, 14 cases of tobacco, and a small quantity of general merchandise. The heaviest losers are Chinamen.—Chronicle.

BLACKFOOT.—The snow on the road in the direction of blackfoot is so deep that all those who have started within a week or two have returned. A recent letter from Blackfoot says that no new discoveries are being made; that the ground is all taken up and that already there are ten men to every claim that is worth having. Helena has an average of over seven persons to every house, and a strong probability exists that the camp is 20,000 sacks of flour short of a winter's supply. Notwithstanding these drawbacks the town is very lively and every body has greenbacks in great profusion. Red sand in any considerable quantity has not been as yet discovered.

COPPER IN CALIFORNIA.—The Campo Seco Copper Mining Company, shipped from their mine, says the Stockton Independent, during the year 1865, 1,902,501 pounds of copper ore. The Taunton Copper Smelting Company, whose works are located at Campo Seco, and have been in operation during the past forty-three days only, have within that time shipped 198,605 pounds of copper regulus. From the 1st to the 8th inst., inclusive, seventy tons of ore have been shipped from the Campo Seco mine to Stockton at a cost of \$7 per ton for freight.

THE BRITISH COLOMBIAN STEAM SUBSIDY.—The government of the sister Colony has signed an agreement with Capt. Thorn, of the steamer Active, for carrying the mails between New Westminster and San Francisco. The government agrees to pay \$2000 per trip for the service, a trip to be made every twenty days, or oftener if possible, the captain to suit his own convenience with regard to touching at Victoria either going or coming.

SANDWICH ISLANDS.—A recent election for members of the Legislature in Honolulu resulted in favor of the Government Ticket, Godfrey Rhodes, an Englishman, T. C. Henck, a German and two natives, being chosen. Mr. Rhodes, we believe, is a brother of Hon. Henry Rhodes, of this city, and was lately here on a visit.—Chronicle.

The Jacksonville Sentinel, of the 30th, says that new discoveries in quartz are constantly being made in that region. "A general confidence is felt throughout the community that Jackson county will rival Boise and Owyhee in the richness of her silver mines."

Governor Meagher, of Montana, has made urgent application to the Department at Washington to have troops stationed in the Territory. The object is to guard against Indian outbreaks in the Missouri, Yellowstone and Big Horn valleys.

An Irishman who had witnessed the effect of whisky for many years, said a barrel of whisky contained a thousand songs and fifty fights.

Miscellaneous Items.

The great opera of Paris employs altogether seven hundred and fifty persons, comprising four first, and four secondary tenors, six baritone, seven basses, six first, and seven secondary lady singers, eighty-three members of the orchestra, and twenty-three ladies and fifty-five gentlemen among the members of the ballet.

On the 22d of December last, the Anniversary of the landing of the Pilgrims was observed at Boston by a grand military demonstration, and the imposing ceremonies connected with a transfer of the numerous battle-flags of Massachusetts regiments to the State, and their deposit in the Capital.

It is stated by manufacturers of artificial wooden limbs, that they make eight left legs, for soldiers, to two right, and about the same proportion of right arms to left ones, showing that about four times as many lose left legs as right, and four right arms to one left.

A Company, styled the Pacific Transportation Company, has been formed in California, with a nominal capital of five hundred thousand dollars, for the purpose of transporting freight to all parts of California, Nevada and Idaho.

The total number of emigrants arrived at New York, for the year ending November 30, 1865, is one hundred and seventy eight thousand and three, which number is an excess of fifteen thousand over that of the year previous.

A mortgage deed of \$300,000 was lately recorded in Warren, Ohio. It required \$1,000 worth of stamps, and was from the Atlantic and Great Western Railroad to John R. Peen, of New York.

The Virginia City Enterprise says the estimated cost of timbering, in the Comstock ledge, during the year 1865, was six hundred and forty thousand dollars. The cost this year will be much greater.

An exchange comes to us with the notice that "Truth" is crowded out of this issue. That is almost as bad as the up-country editor who said: "For the evil effects of intoxicating drink, see our inside."

Hon. Lewis D. Campbell, of Ohio, has been appointed by the President, Minister Extraordinary to the Republic of Mexico, in place of General Logan, who declined the office.

Never look at girls. They can't bear it; they regard it an insult. They wear their furbelows, feathers and frills merely to gratify their mamas,—that's all.

A new road from Boise City to the Middle Boise quartz district has been surveyed. It runs up that stream and is a cut-off of forty miles on the old road by Rocky Bar.

In Richmond, Virginia, there are eight daily papers,—the Whig, Enquirer, Examiner, Republic, Sentinel, Dispatch, Times and Commercial Bulletin.

The largest lake in the world is Lake Superior, which is truly an inland sea, being four hundred and thirty miles long, and one thousand feet deep.

The telegraph wire spanning the Willamette at Portland, and also at Milwaukie, has parted, and cannot be repaired until the river falls.

Hon. Phil. Wassorman, of Portland, member of the Oregon Legislature, has left for Germany, to be absent one year.

The Mountaineer learns that Graham's and Nix's bridges across the Deschutes river have been swept away by the freshets.

A Fire and Marine Insurance Company has recently been organized in Portland, with a capital of three hundred thousand dollars.

In Leeds, England, whitewash and brushes were furnished gratuitously during the cholera excitement.

A country girl, speaking of the polka, said that "the dancin' was nuthin', but the huggin' was heavenly."

The damage done by the earthquake in San Francisco, last October, was near five hundred thousand dollars.

Circuses, hitherto forbidden in Vermont, are now admitted there on paying three thousand dollars for a license.

The Eugene Journal learn from a Mr. Luce, that cinabar has been discovered at or near Canyon City.

During the late storm, the aggregate depth of the snow-fall in Portland, amounted to two feet eight inches.

It is a wonder that the women don't take cold from standing so continually under waterfalls.

The crop of wheat in the Northern States for 1865 amounts to 148,622,829 bushels.

DEATH OF CAPTAIN PEASE.

The New York papers announce the death, at Charleston, of Capt. William C. Pease, of the United States Revenue Steamer Keweenaw. For many years, this gentleman commanded the Revenue Cutter Marey, at San Francisco, and subsequently, the Cutter Jeff Davis, on the Puget Sound Station. When last on the Sound, he was in command of the Cutter Shubrick, when, through the influence of a higher Government officer, he was relieved, and ordered to report at Washington. The Government gave him its confidence, and continued him in the Revenue service on several important stations.

Captain Pease was born on the Island of Martha's Vineyard, in that singularly named County of Dukes County, Massachusetts. His acquaintances were his friends, and they will long remember him as a man of commanding presence, and an intelligent gentleman, kind-hearted and generous to a fault. He was every inch a sailor, and as an officer in the Revenue service, had few equals, and no superiors.

GREAT SPRINGS.—There is a spring in the centre of the town of Huntsville, Alabama, from which flows a stream of water sufficiently large to float a thirty ton bateau. It is said to be the largest spring in the world, and is an object of great interest to the people of the neighborhood as well as to visitors. Another spring, near Florence, in the same State, throws out a body of water estimated at seventeen thousand cubic feet per minute.

INDIANS AND BLOODHOUNDS.—The people of Minnesota had long been troubled by the depredations of hostile Indians. As the savages could not be punished by the ordinary modes of warfare, a pack of bloodhounds was brought from the South to track and kill them. It was most excellent sport for the Indians, who shot the fierce canines and ate them up at a grand pow-wow.

IMPORTANT.—Superintendent Huntington, of Oregon, has just received a dispatch from Washington City, which limits the extent to which the Reservation at Yaquina Bay is to be thrown open for settlement. The Indians are to be protected in their homes and farms, and the Government property is not to be disturbed.

CHARTERS.—The Colorado Territorial Legislature has granted liberal charters to Ben. Holladay. One is for a road through Middle Park, shortening the distance to San Francisco about two hundred miles, and the other is for Holladay's Mail and Express Company.

THERE is a boot establishment at San Francisco that employs about one hundred men, each of whom earn from eighteen to thirty dollars per week. The shop turns out about nine cases of boots, eight dozen ladies' boots, and ten dozen misses' and children's shoes.

A new office is being built for the New York Herald, on the site of Barnum's Museum, corner of Ann and Broadway streets. The cellar is to be over thirty feet deep to accommodate the Hoes presses used in printing the large edition of that paper.

It is rumored that a company has been organized in New York City, with a capital of five millions, to run a line of steamers on the Sacramento river, and also on the coast routes, in opposition to the California Steam Navigation Company.

CURE FOR SORE THROAT.—Mix a quarter of an ounce of saltpetre, finely pulverized, with three ounces of pure honey. Dilute it with pure vinegar, and use it as a gargle. Or take a small spoonful of it into the mouth occasionally and let it dissolve slowly.

Good humor is the only shield to keep off the darts of the satirical railler. If you have a quiver well stored, and are sure of hitting him between the joints of the harness, do not spare him. But you had better not bend your bow, than miss your aim.

WEATHER AT BOISE CITY.—The Idaho Statesman, of December 24th, says that the snow is one foot deep, and the sleighing excellent. The weather is clear, and the thermometer sixteen degrees below zero at eleven o'clock last evening.

The total number of cattle, sheep and swine killed in the State of Oregon, for the entire year of 1865, as furnished by the United States Assessor, are as follows: Cattle, 9,102; Calves 1,420; Swine, 7,106; Sheep, 13,828.

GEN. WM. S. SMITH, late of Buffalo, is engaged in writing a life of Lieutenant-General Grant. He is said to be a vigorous writer, possessing literary talents of a high order.

The celebrated Maine sculptor, Simmonds, has received an order for a colossal statue of President Lincoln, for Philadelphia. It is to cost thirty thousand dollars.

A PRINTER'S TOAST.—Woman—the fairest work of creation. The edition being so extensive, let no man be without a copy.

EX-PRESIDENT PIERCE was lately baptized and confirmed in the Episcopal Church, at Concord, New Hampshire.

A marriage is thus noticed by an exchange: "Married, last week, John Cobb to Miss Webb. Look out for little spiders."

It is upon the smooth ice we slip—the rough path is safest for our feet.

TREATY WITH THE BLACKFEET INDIANS.

From the Montana Post, we learn that a treaty was concluded with the tribes composing the Blackfoot Nation, in November last, by which a vast extent of country, embracing between two and three hundred thousand square miles, in which are situated the largest towns in the Territory, and containing all the rich mines and agricultural lands, in fact, all that have proved to be of any worth, was secured to the white settler. On the part of the Government it is agreed to distribute among the tribes of the Nation, in addition to the annuities allowed by the treaty of 1855, \$50,000 worth of goods annually for twenty years. Such portion of this money as deemed advisable by the President, is to be expended in promoting civilization among them. Perfect good feeling prevailed at the gathering which took place at Fort Benton.

THE LATE HEAVY FAILURE IN THE LUMBER BUSINESS.—Speaking of the failure of Amos Phinney & Co., the San Francisco Bulletin says: "Attachment suits have been commenced in the District Courts, amounting in the aggregate to \$118,616.71 as follows: In the Fourth District Court for \$91,000, Twelfth District Court, \$7,536.45, and in the Fifteenth District Court, for \$20,079.26. The largest attachment is for \$66,000 and the smallest for \$1,600. The attaching parties are particularly sensitive on the subject of their probable losses and at their request the clerks of the courts have been instructed to withhold their names. Most of the losses will fall upon the Stuart street lumber dealers."

THE FAILURE OF AMOS PHINNEY & Co.—We learn that the principal creditors are three capitalists of this city, whose united claims exceed \$100,000. There is also a heavy debt due operatives at the lumber mills, situated at Port Ludlow, Washington Territory. The assets—consisting of lumber on hand, two or three ships, the saw mill, a large quantity of saw logs, etc., are supposed to be sufficient to pay off a large portion of the liabilities. The entire debts are estimated at from \$180,000 to \$200,000.—S. F. Bulletin.

HOLLOWAY'S PILLS.—Impaired Constitution.—The infirm are unfortunately most prone to become the victims to dangerous maladies unless the purity of the blood and functional regularity of the vital organs be carefully guarded. Holloway's Pills can be recommended with the most truthful earnestness as the best purifiers, alteratives, and aperients, when the body is naturally weak or accidentally disordered. They never create disappointment, and do not cause the weakness and oppression too often consequent on the frequent repetition of the ordinary drastic drugs, when are sometimes thoughtlessly, though most disastrously, prescribed. These Pills, in truth, carefully guard the constituents of the animal frame; they enrich the blood when poor in quality; they increase that fluid when deficient in quantity, and always strengthen.

HOLLOWAYS PILLS.

HOLLOWAY'S OINTMENT

THE EFFECT OF THE OINTMENT ON THE SYSTEM.

To the very core and centre of all diseases which affect the human body, this remarkable preparation penetrates. It disappears under the friction of the hand as salt disappears when rubbed upon meat. The unclean performs its healing errand rapidly, safely, and without pain. Simple eruptions, open sores, hard tumours, scrofulous developments of all kinds, abscesses, cancers, old wounds, and in fact, every species of inflammation or suppuration, whether in the skin, the flesh, the glands, or among the muscles, can be arrested in its destructive course and permanently cured without danger, by rubbing in this inestimable

remedy. In many Hospitals this celebrated remedy is now used for the cure of old wounds, sores and ulcers; in Spain and Portugal, and in many parts of Italy, the first remedy daily prescribed is its use. It is a sovereign remedy for bad breasts and bad legs; and likewise for all skin diseases. It is to be found in the chests of every sailor, soldier and emigrant.

PILES, HEMORRHOIDS, STRUCTURES.

The above class of complaints is surely removed by nightly fomenting the parts with warm water, and then by most effectually rubbing in this Ointment. Persons suffering from these direful complaints should lose not a moment in arresting their progress. It should be understood that it is not sufficient to merely smear the Ointment on the affected parts, but it must be rubbed in for some considerable time, two or three times a day, that it may be taken into the system, whence it will remove any hidden sore or wound as effectually as though it were palpable to the eye. Bread and water poultices, after the rubbing in of the Ointment, will do great service. This is the only proper treatment for females in cases of cancer in the stomach, or for those who suffer from a general bearing down.

IMPRUDENCIES OF YOUTH:--SORES AND ULCERS.

Blisters, as also swellings, can with certainty be radically cured if the Ointment be used freely, and the Pills be taken night and morning as recommended in the printed instructions. When treated in any other way these complaints only break up in one place to break out in another; whereas this Ointment will remove the humour from the system, and leave the patient a vigorous and healthy being. It will require time, aided by the use of the Pills, to insure a lasting cure.

DIPHTHERIA, BRONCHITIS, SORE THROATS, COUGHS AND COLDS.

Any of the above class of diseases may be cured by well rubbing the Ointment three times a day upon the skin covering the throat, chest and neck of the patient. The unguent will soon penetrate the pores and give immediate relief. To allay the fever and prevent inflammation, eight or ten Pills should be taken night and morning. The Ointment will produce perspiration, which is so essential for removing fevers, sore throats, and those oppressions of the chest which arise from Asthma, Bronchitis, and other causes.

BOTH THE OINTMENT AND PILLS SHOULD BE USED IN THE FOLLOWING CASES:--
