NORTHERN PACIFIC RAILROAD.

THE AGRICULTURAL AND MINERAL RESOURCES.

The agricultural resources and mineral wealth of the country along the line of this road are not surpassed, if they are equaled, by any other part of the public domain. Jubn Wilson, Third Audistor of the Tressarry, and late Commissioner of the General Land Office, an eminent asthority on all questions appertaining to the topography and resources of the country, says:

**The lands along the Northern are all fit for cultivation, and consequently the local business will support the road. In fact, it is one of the most beautiful sections of the country in the world; and you travel comparatively a short distance west from St. Paul till you feel the influence of the Pacific winds and strike the isothermal line of south-

ern Illinois, and where cattle can pasture the whole year. The mineral wealth along the Northern is almost incolsuble."

Georence Tasse I. Stevens, who surveyed the entire route, and spent several years in exploring the country tentiquous to it, says: rides that the issue of Government boads and forty-four miles, the route passes through only about three hundred and tweety miles of "moultivated country. East of Breckee-ridge to St. Paul and Lake Superior the country is exceedingly rich and inviting to the settler."

country is exceedingly rich and inviting to the action."

Lewis and Clarke, under date of May 17, 1805, and while encamped on the Rocky Mountains, etate in their journal:

"The country along the Rocky Mountains, for several bunder dulles in length and about fifty wide, is a high level plain, in all its parts extremely fartile. This plain is chiefly interrupted near the streams of water, where the hills are steep and lofty, but the soil is good. Nearly the whole of this wide spread tract is covered with a profusion of grass and plants, which are at this time as high as the fines,"

tract is covered with a profusion of grass and plants, which are at this time as high as the fines, "

Grass and plants as high as the knees on the 17th of May! Gentlemen from New England and the northern parts of the Middle States will please note this date. But the agricultural character of the northern part of our Territory is so well known that it is amnecessary in adduce further evidence. There is, however, upon our northern border, a vast territory capable of making eight States the size of New York, the whole of which would be tributary to this road, about which there is less general information, and to which I may briefly refer. The English explorer, Hind, writes of this sounstry:

"Of the valley of the Bed river, I find is impossible to speak in any other terrae than those which may express astonishment and admiration. I entirely concur in the brief but expressive descripting given to me by an English extler on the Assinatoine, that the valley of the Red river, including a large portion belonging to its great affluents, is a paradise of fertility,"

So the State of the State of the State of the course. So saild is the climate on the vast region drained by the St. Lawrence and all its tributaries from Lake Superior to the Gulf, is navigable by either the north or the south branch for more than a thousand miles north of the line of this road) that the Indians hunt the buffale on horseback all winter, and so little smow is said to fall that snow sheet are seldom used. That this extensive territory drained by the Saskatohawan and its tributaries is fit for settlement, in as far as regards climate, is fully proved by the saccess which attends the farming operations which are carried on, though on a small scale, at the various trading posts, and by the fact that

tory drained by the Saskatohawan and its tributaries is fit for settlement, in as far as regards climate, is fally proved by the sascoss which attends the farming operations which attends the farming operations which are carried on, though on a small scale, at the various trading posts, and by the fact that cattle and horses at these establishments are generally left to foreign for themselves during the winters. As regards the soil, from what is known of the country there is not, perhaps, on the globe so great an extent of country so little broken by barrens tracks. Regarding the territory in its general sepect, there is not in the universe a finer field for colonization. It has a salubrious climate, and the soil in many places, as at Red river, is uncurpassed for fertility. Ir.n ore, lead and salt are to be found in abundance, and the whole territory, from Lake Winnepeg to the base of the Rocky Mountains, is intersected by navigable rivers and lakes."

He mentions some specimens of farming on the Assinaboine river, ond says that one farmer had "fifty-six measured bashels of wheat to the scre. Forty bushels to the screvis a common return on new land. His turnips were magnifecent; four of them weighed seventy two pounds. A portion of the potato crop was still in the ground. They far surpassed in quantity, quality, and size any I had ever seen before. I counted thirteen, fourteen and sixteen, potatoes, averaging three and a half inches in diameter, at each root." 'Indian corn, if properly cultivated, and and early variety selected, may always be relied on. The melon, growe with the unmost luxuriance without any artificial aid, and ripens perfectly before the end of August."

This fertile district, which is destined at to distant day to be the whest transay of the

All this has been done at enormous cost and great disadvantage. Mining in Montana and Idaho has hardly begun. They are doubtless im vensely riph in minaria but a long as it costs \$600 per ton to transport mining machinery there was may not expect a thorough development of this wealth. But novembranding all these advantages of distance, gradients, climate, soil, wasse communications, and piperal wealth, the

question still remains. "Is it asfe, expedient and necessary for Congress to grant the proposed loan of national credit at this time?"

It is, and for these reasons: the bill provides that the issue of Government bonds shall spec facto constitute a mortgage upon the road and all its apportenances; and upon the failure or refusal of the company to pay the interest, or to redeem the bends or any portion of them when due, the Secretary et the Treasury is to be authorized to take possession of the road, with all the rights, functions, immedites, and appurtenuous sherves belonging, and also all the lands granted to said company which at the time of such default shall remain in their ownership, and hold the ame for the full indemity of the United States. The Secretary of the Treasury is also required by the Pacific Railroad law to retain one half of the componention for services rendered by the read as a function the redemption of the principal of the bonds, and size as as additional sinking fund, five per pout. on the net caraings of the road it can be shown conclusively that if the Querement aboulf actually dones the suiter amount of bonds asked for, and thereby ancers the construction of the road, it would be a most profitable investment for the United States; but fortenately the Pacific roads already postary that it is treasury from that company more than the interest on all the bonds issued to it, added to a sinking fund that will estinguish the principal at maturity. This is altogether interestion of mail for wagon road in the transportation of mail, temps, and sepplies for the Government."

THE VOTERS OF WASHINGTON

My Country as :

The very late date at which the Union Republican Convention was held this year renders is impracticable for me to visit all the counties, without the loss of so much time as to seriously impair the efficiency of the canvass through the Territory. Had the Convention been held at an earlier day, so it should have been, it was my purpose earnest desire to visit every see for freely with the people. As it is, only such portions as can be reached through rapid channels of communication will be canvassed.

A residence of twelve years in the Territory, and frequent visits to, and a careful study of its various localities, their character, caps ty, wants and necessities, enable me, in the by the tof my election, to understand and pro-mote the interests of the people wherever resident; and to this end I pledge my ear-nest end untring efforts. Being in harmony with both the Executive and Legislative deaving made an active canvass through Ore gon and Ca ifornia last year for Genera Grant, I feel justified in saying that I shal be able to bring more influences to bear in tory than the Democratic nominee possibly

of the political convictions of the voter is an mperative duty in every State of the nat it is a well understood fact that the people of the Territories have no sole in Congress, and their Delegates are but the representatives of This being the case, our peojurisdictions. This being the case, our ple will find it to their interest, in the pr entrass, to elect the man whose sympa are with the government, whose services | placed the whole Pacific coast under ob one to bim, whose travels and investigations through the Territory have made its necessi-ties familiar to him, and whose long residence in your mirlet affords a guarantee that his erests are identified with yours, and that he is not a transient visitor who to feast upon your bounties and leave you in time of sorest need.

Notice has already reached me that every rottee has aready reached me will be used to compass my defeat. Misrepresentations, slanders, vilifications and abuse will be printed and mouthed all over the Territory, both by c_ndilates cml litered by former de have partisan success more at heart than the growin, prosperity, early development and wealth of our Territory. Against such let the honest men of the country be upon their

ocrats can pay their debts or not, but Bepublicans always must, or be disarrded. A Democrat can be a bilk, nothing, better can be expected of him, but a Republican must be bonest, because it is a party whose corner stops is luster and virtual. stone is justice and virtue.

THE DEMOCRATIC DELEGATE IN TROUBLE .-Dr. Robertson, the democratic delegate who got into a little difficulty the other day in Portland about a little unliquidated account, is realizing that "the way of the transgressor He was kept away from the first meeting of the convention, by "unavoidable circumstances," 'twas said. (We suppose eireumstances," 'twas said. (We suppose they might have been avoided by his paying his debts.) But he came in the afternoon. He had scarcely landed when a man rushed up to him and demanded a gold chiefe which the Dr. was we.ring. He said the Dr. nut seduced his wife away from him, and she had stolled the chain from him and given it to the Dr. The Dr. demurred to giving it up, when the stranger administered a few well directed spats on the side of the face, which soon overraled the Dr.'s demurrer. The c'ain was given up, and the virtuous delegate took his cent in the convention and voted for Moore.

The Democrats are in troub e. They has counted largely on the dissensions which the predicated would occur in the Re, ublica Convention, in case to rifield were monimated But their hope have deceived them. The confinence was unisplaced. The pledges of But their hopes have deceived, them, There coult ielece was misplaced. The pledges of heavy support with which the kepublic not the Territory, and of this place are responding to Mr. Garfielde's continution, and the harmony's good feeling and unnaimity which characterized the Republican Convention presage another victory to the hin er of the Union party, and another of feet to the Demogracy. They have suffered affects action in this Territory that they take thing with the resignation of despair. The lass of office is strong in the Convention, if it's nothing more than the honor of he ng a candidate. This is evined by the moments standidate who are resented, or who pre-get themselves' before the Convention. Governor Moore seems to be the most prominent condidate before the Convention Judge Miffadden is perhape the next un prominent man. It mis record of being true to the Democracial party. If I were to make a guesa, as to who would be the nominee, I would select his name.

Next comes the "sage from Lewis River," Judge Lancaster. He has three counties to support him, and will, as ureal, to beaten before the Janwaniton. The Judge was a delegate from this Territory many years agifor one term, and he and his frier as have forgotten the old but true aftige, that "highting never strikes twice in the name plare."

Walk Walks county is modest. It presents only six aspirants for the nomination, fire of whom are delegates. They are B L. Starpstein, J. D. Mis, J. II. Lesster, F. P. Dagan, J. E. Wyobe and W. H. Nowell.—Two years ago dudge Wyobe was a prontent aspirant before the Heputhican Concentration. Being defeated then, he has sorred over, "buly, boots and breeches," to the Democracy, and is now fawning to them for a nomination. The others, except Newsil, are lawvers and old line Democracis, who are it of gy imbued with that Democratic doctrine, for the good of their constituents by serving them in office.

Frank Clark, the "Orphan Boy," who was nominated two years ago, would serve if the pop led deaire it.

The Convention was called to order by J. P. Dugan, when J. Lassater was elected tempersy Chairmane, J. Miller Murpbey and A. J. Kane timporary Secretaries.

A committee, consisting of Frost, Mix, Brazee, Ostrander and Longwyre, was appointed on credential, who reput d the names of Delegate, with a submession to the Convention of the question as to what her productions of the decision and the secondately consisting that Dr. Robertson was kept away from the Convention by unfortuitous groundatives," What those 'unfortuitous groundatives, "Was those 'unfortuitous groundatives," who are our adverse, when our and a discussion on the principles of parliamentary law, induged in hy varrous members, when a

appeared that Dr. Robertson was kept way from the Convention by unfortuitous arcumstabees. What those 'unfortuitous circumstabees,' What those 'unfortuitous circumstances' were, was not stated. After a dissustant on the principles of parliamentary law, indulged in by various members, whose views would doubtless do much to enlighten the author of Cushing's Manual, it was hoally decided to admit the proxice.

A motion was made to admit Mr. Simmons to cast the 'vote of Klichtat coun'y. This raised a question as to Mr. Simmons' loyalty to Democracy. Simmons raid he had never voted any other than the Democratic ticket and never expected to vote any other. But he was required to undergo a still further examination and to pledge binnell for support the uominee, and then he was admitted.

The temporary organization was made permanent. Committee on order of business:

EVENING SESSION.

After the recall of the Convention at 71, M., there was a continuous struggle in the Convention, Mix. Lancaster, Dugan, McFad ded and Newell bobbing like drowning men to the surface as the roll was called. When he "Orphan Boy" received a telegram from McFadden absolutely declining, and Newell aw there was no chance for his ponderosity with voice choking with emotion, like a fat school-boy, he blubbered out "Moore." The Walla Walls delegation nearly strangled with excitement, but yielded to the force of circumstances, the Moore ners holding them down to their seats by their contrails.— Moore was nominated by thirty-eight vote ut of sixty. Then followed speeches the Democratic style, full of mis-statement and abuse. Many of their own party present were disgusted. The Moore-ners soon adjourned, going about the streets and into the salcons for a wee bit drop of comfort to wash down the nomination, as they would when taking a dose of medicine, deemed necessary, but highly unpalatable.

and sell it in the United States.

The result of his labors was a glorious success for himself and suffering humanity, for the celebrated FLANTATION BITTERS was thus made known to the world. FLANTATION BITTERS being an article of real merit, founded upon new principles, and relying wholly upon the vegetable world for its medicinal effects, worked a supid revolution in the history of medicine, and became as a household word all over the civilized world. The cabalistic S. T.—1860—X. was a fallenan of health, and the demand for the FLANTATION BITTERS soon far exceeded the shillties of the projectors to supply. Motwithstanding the large importation of St. Ordix Rum, made expressly for the compounding of these Bitters, the quantity was inadequate. It therefore became necessary that arrangements upon an extensive scale abroad should at once be made, and an agent was dispatched to St. Thomas for that purpose. He was fertunate in securing and

that evangements upon an extensive scale abroad should at once to make, we was dispatched to St. Thomas for that purpose. He was fortunate in securing and leading several plantations on some of the largest and most productive estates on the island. Houses, stills and presses were erected as if by magic, which utterly "astonished the natives." The services of experienced men and natives of the island were promised to the PLANTATION EXTENS were in a position cured, and very soon the proprietors of the FLANTATION EITTERS were in a positic to supply their laboratory with all the perfectly pure St. Creix Rum needed in manufacturing the GREAT DISPETIC TORIC AND INVIGUATOR. The above out represent the natives crushing the sugar-cane and otherwise propering it for the stills and present. As an antidote to Fover and Ague, Intermittent and Malarious Fovers, Dyspepsia, and other kindred diseases, the use of the PLANTATION EXTENSE is unsurpassed in the history of the world. Over five million bottles are disposed of annually. They are adapted to old and young, male and female. They are agreeable in taste, and always produce an immediate beneficial result.

If the patient be a female, the approach of the menses is flooked for with anxiety, as the first symptom in which Nature is to show her saving power in diffusing the circulation and visiting the cheek with the bloom of health. Alas! increase of appetite has grown by what it feeds on; the energies of the system are prostrated, and the whole economy is deranged. The beautiful and wonderful period in which body and mind undergo so fascinating a change from child to woman, is looked for in vain; the parent's heart bleeds with anxiety, and fancies the grave but waiting for its victim.
