This statement, although not embodied in the Potter report, the Post says is tabulated from the origina. ulated from the evidence elicited by the committee, and is as reliable as can be made up, considering the motive of the administration for concealment. It shows there is distributed from the United States Treasury among the conspirators of the presidential theft, as the wages for service rendered and the price of secrecy, the extraordinary sum of \$254,000 annually, which will aggregate in the four years of his Fraudulency's administration considerably over one million dollars! It reversed the honest and le-gal vote of two states, and revolutionized the will of 4,300,000 American citizens, who cast their ballots for Tilden and Hen-dricks. Nor does this extraordinary ex-hibit show the full expenditure in the interest of the Great Fraud Part of the army of the United States and thousands of officeholders, in the closing months of Grant's reign, were active agents in making it possible. The Hayes administra-tion is permeated by a system of rewards for participation in it or to secure silence as to the methods adopted. It has tainted every department of the Federal Government. The Judiciary has felt its blight, and the National army its disgrace. It is not possible to estimate the cost in money or guage the injury and dishoner it has inflicted on our system of government. It is to make impossible a repetition of this gigantic crime in 1830 the democrats in Congress have exercised the righteous and constitutional power of the representatives of the people, in demanding the repeal of the odious system of iaws under which the Hayes usurpation and theft worked its shameless way into American History.

ROBERT E. LEE!

THE HORSEMEN OF WALLA WALLA

Valley now have the opportunity to breed
from two of the finest Stallions on the Pacific
coast. These homes were brought from California last year, and are widely known among
leading horsemen as animals of superior qualities in every particular.

SAN FRANCISCO PATCHEN is a beautiful dapple bay; stands sixteen hands high,
and for bones and muscle we doubt whether he
can be excelled by any horse in America. He
was sired by Geo. M. Patchen, Jr.; he by the
celebrated trotting stallion Geo. M. Patchen;
dam by Top Bellfounder, a well known mare
for speed and decility; g. d. by Messenger.
Echipse, This horse comes of the best stock in
the world, and is a worthy representative of
his ancestry. His owner may be justly proud
of so noble an animal. San Francisco Patchen
is ten years old, and is therefore just in his
prime.

GEN R. E. LEE is a chestmut sorrel; four GEN. R. E. LEE is a chestnut sorrel; four

years old; stands bitteen hands two inches; and is a marvel of horse flesh. For style and action he cannot be excelled by any colt of his action he cannot be excelled by any colt of his age. The owner refused twenty-five hundred dollars for this colt when he was in his three-year form. Gen. Lee was sired by San Francisco Patchen; dam by the thoroughbred mare Fleita; she by Belmont, dam by Lady Charmer; she by Leviathan and Eclipse. No mare ranks higher in this country than Lady Charmer.

The need of thoroughbred stock has been long felt in Walla Walla, and it is fortunate for those who desire to breed fine animals, that for those who desire to breed fine animals, that they now have the best blood in America to

they now have the best blood in America to breed from.

These horses are permanently located at the Walla Walla Driving Park, where they will both make the season. They can be seen every Saturday at Mr. Tom Tierney's livery stable, where horsemen are invited to call. Those who are breeding horses will do well to examine these horses and their colts. Patchen has proved hinself a sure foal getter in this place. Some of his colts can be seen next month. Will commence their season on April 1st.

23' As it has been reported by enemies of these horses that they are going to leave Walla Walla at the close of the season, the owner wishes to contradict that statement, as it is his intention to make this the permanent home of Patchen and Lee.

FARM WAGONS.

The Bain Wagon is so well known to the farmers and freighters of this coast that it seems needless for us to say anything in its praise. We have sold them for the past thirteen years, and warranted every one sold, and the total claims for defective material or workmanship during that time have not amounted to one cent on each wagon sold. This fact speaks louder than anything we can say in their praise. The

PATENT "SKEIN TIGHTENER"

On the Pain Wagon is a very valuable improvement, and is on no other wagon. For On the Rain Wagon is a very valuable maprovement, and is on no other wagon. For the coming season all farm wagons will have the new PATENT OIL TUBES with brass screw caps, which avoid the necessity of taking off the wheels to oil the axlessin arrangement which teamsters will fully appreciate. We feel safe in asserting that there is no other wagon in the market that will compare with the Bain as now made, in QUALITY of MATERIAL USED and in completeness and excellency of workmanship. Our wagons are made to order, especially for our trade, and we pay extra to have all the timber "EXTRA SELECTED" out of thoroughly seasoned stock. All the wheels are put through—soaked in—boiling linseed oil before setting of thes, making shrinkage impossible. Mr. Bain does this in a more thorough manner than some others, who simply make a pretence of doing it, and make the application, if at all, only in "homocopathic doses." The wood work, tires and ironing are extra heavy, but at the same time everything is well proportioned.

Bayliss' Patent Wheel Harrow.

THE ONLY HARROW FIT FOR SOD GROUND,

And the best in use for preparing land for scetling. Good as a plow to prepare summer follow ground for wheat. Covers seed nearly equal to a Drill. A small boy can operate it and do twice the work of a Drag-harrow, with less labor. The Gangs are flexible to conform to a rough surface, and will fill a dead furrow so that it cannot be found. The twelve Dies act as so many little plows, turning the dirt over and making the soil mellow to the depth of six inches. It will pulverize shallow or does by changing a bolt. Suitable for all kinds of soil, raving Time, Labor, Money, a d Thee-Leather. It is simple, durable and warranted.
