Late in the summer of 1878 something happened on the planet of Jupiter which immediately excited the attention of asronomers the world over. A veil seemed to have been drawn over it, and all its outlines grew faint. Like a fiery monster which only come to the surface to breathe, it

that it has practically ceased to be visi-ble. The astronomical monthlies have stooped printing tables giving the time of its meridian passage, and only the most gigantic telescopes are able to give glumpses of the disappearing monster. But while one wonder is going off the stage another comes on. Of late the glospacs of the disappearing monster.

But while one wonder is going off the stage another comes on. Of lare the general appearance of Jupiter's surface has greatly changed. Some power appears to be at work changing not only the forms but the colors of the planet's belts and spots; and Jupiter is now exciting universal admiration by the brilliant apprarance of his broad disk, streaked and mottled with delicate that of now red some and steel blue. In this country clover is a standard crop. It not only makes the best and most nutritious hay, but can be produced without cost. There is no doubt an outlay to be incurred when seeding to clover hu: when it is considered that clover acts as a renovator and actually enriches the soil, it confers a benefit greater than the pearance. It was so large and its color expenses attaing the growth of the crop. When cut for hay it leaves in the soil a mass of roots equaling in weight the hay produced, and the shade it affords is of

This may be explained by the converting the free nitrogen of the atmosphere into available food, and this supposition is borne cut by the lact that from no other source could such large quantitities of nitrogen be obtained. No farmer incurs the risk of failure who makes clover a specialty in a system of rotation, but the trouble is that they do not give every portion of the farm a seeding of it, as they should do, instead of confining it to chosen locations. On sandy soils the seeding is best don in the fall, just when the danger of drouth is over, as the prospects of a stand ful, darable, strong, adjustable, automatic, will be better, but on wheat land there is anti-friction, noiscless, self-regulating, and a saving of time from spring seeding. Poor soil should first have a crop of cow pease turned under, treated with a broadcasting of lime and ashes, and then sown to clever. When once a stand of clover is secured the soil will improve every year .- Philadelphia Record.

A large headed dwarfish individual, of smoke-bleared aspect, shambles forward, opening his blue lips, for there is sense in him; and croaks: "Alight, then, and give up your arms!" The Hussar-Captain is too happy to be escorted to the Barriers, and dismissed on parole. Who the squat individual was? Men an sver, it is M. Marat, author of the excellent pacific Aris au Peuple! Great truly, O thou remarkable Dogleech, is this thy day of emergence and new-birth: and yet this same day come four years-But let the curtains of the Future hang.

What shall de Launay do? One thing only de Launay could have done: what he said he would do. Fancy him sitting, from the first, with lighted taper, within arm's length of the Powder-Magazine; motionless, like old Roman Senator, or Bronze Lamp-holder; coldly apprising Thuriot, and all men, by a slight motion of his eye, what his resolution was:-Harmless he sat there, while unharmed; but the King's Fortress, meanwhile, could, might, would or should, in no wise, be surrendered, save to the King's Messenger: one old man's life is worthless, so it be lost with honour; but think, ye brawling canaille, how will it be when a whole Bastile springs skyward !- In such statuesque, taper-holding attitude, one fancies de Launey might have left Thuriot, the red Clerks of the Basoche, Cure of Saint-Stephen, and all the tagrag-and bobtail of the world, to work their will. And yet, withal, he could not do it.

Hast thou considered how each man's heart is so tremulously responsive to the hearts of all men; hast thou noted hea omnipitent is the very sound of many men? How their shriek of indignation palsies the strong soul; their howl of contumely withers with unfelt pangs? The Ritter Gluck confessed that the groundtone of the noblest passage, in one of his noblest Operas, was the voice of the Populace he had heard at Vienna, crying to their Kaiser: Bread! Bread! Great is the combined voice of men; the utter ance of their instincts, which are truer than their thoughts: it is the greatest a man encounters, among the sounds and shadows, which make up this World of Time. He who can resist that, has his footing somewhere beyond Time. Launay could not do it. Distracted he hovers between two; hopes in the middle of despair; surrenders not his Fortress; declares that he will blow it up, seizes together, and thesource eloquent music.

A CLOTHING ARGUMENT.

KEWHY WE CAN SELL CHEAP.

A great many people when buying Clothing lose sight of son e very radical arguments which would materially assist

" Every Man that Pays Cash theald Buy Where He Can Buy Cheapest."

This maxim is so well established in the public mind

Where Can You Buy Cheapest?

There are several reasons why we can sell goods lower han any house in this Territory. In the first place we sell exclusively for cash

ON A CASH BASIS

If you consider the fact a little you can readily understand why selling goods for cash enables us to sell Clothing as low as you could buy it in America. We offer you a suit of clothes for eleven dollars cash that if we gave credit we could not sell less than fifteen because when we sell for eash we can replace the goods again and its better for us and for you, to sell three suits of clothes at a small profit than one suit at a large one. If we sold goods on credit we would have to make calculations on a certain amount of loss, and and when a cash buyer comes along, don't you understand we would have to make up on him what we expected to lose on the other. No man cares to be paying other people's debts and there is no friendship in buying goods-its business all the time. We only commenced to keep clothing a few months ago, and what is the reason that to-day we sell more clothing than any house in the Territory? Simply because the public know that we sell everything at the lowest living

This department is one of the special features of our establishment, and the immease extent to which this trade "He is to be hoped," says The Public, with the reacher gloomy prognostications of the burster gloomy prognostications and the prognostication and the prog has grown with us has not been a surprise. We say it has

Ask any man that has ever bought a hat in our establishment, and we think he will bear testimony to the feet that our prices are always the lowest. Every day we meet men who have paid four dollars for hats, and when we show tnem the same hat for three dollars they naturally feel bad.

MAGNIFICENT LIGHT.

Have you ever purchased goods in a dark store where you didn't have light enough to distinguish the colors ? Have you ever noticed how easy it is to hide the defects in a suit of clothes when the light is bad? How can you tell goods are not faded or shop worn if you haven't good light? In our establishment the light is just the same as in the middle of the street and you can see precisely the shade and texture of

COUNTRY ORDERS.

There is no branch of our business that receives more scrupulous attention and care than country orders. We neve lose sight of the fact that if we send a man a good article for the money we invariably gain a customer. We get his confidence and public confidence is what we are aiming for. If a man orders a suit from us and gives the size, the price and an idea of the color, we guarantee to send him better good for the money than he could personally select in Portland or any city in the northwest. Our prices are marked on all goods in plain figures and it makes no difference whether a purchaser is personally p esent or whethor he olders by letter the price is precisely the same.

THIRD STREET, NEAR MAIN.

SATURDAY, JULY 21, 1883.

In the Wrong Pew.

Billy Sloman, the general agent of Day Cast-llo's Nickel Plate circ is now in town, is a sleek, dapper little fellow with a some what sanctimonious look. He was standing in the Stine House office last evening, med itating on the virtues of Walla Walla gin cocktails, when he was approached by onof the ministerial fraternity in attendance upon the Congregational Association now in ion, and asked in what field he labored for the Lord. Billy was somewhat taken aback, but recovering his self-possession he informed the reverend gentleman that he had a general circuit-in fact he worked wherever the Sabbath happened to catch him. "Would you not like to lead in prayer at our meeting to-morrow evening?" asked the minister. This was a scorcher, but Billy was equal to the emergency. "Well, I wouldn't mind," said he, "I think I could do a double summersault in the prayer line that would astonish the natives." "You don't exactly catch my meaning," said the reverend gentleman; "We don't do double summersaults in church." "How would you like to have a bareback act, with the Lord's Prayer backwards for an encore," queried the circus headlight. The minister straight ened up, and with an injured air asked,
"Are you a minister of the Gospel, sir?"
"No, str." and Billy, "I am the advance
agent for the great Nickel Plate Circus, and
anything I can do in my line"—but the
panic stricken man of divine inspiratious
had disappeared through the door.

Epidemic Among Horses.

An epidemic of some kind has made its appearance among the horses belonging to the livery stables in this city, says the Dayton Chronicle, that is different from snything we remember to have seen before. The animals become stiff without apparant cause, the cords on the inside of the arm become rigid and the limbs swell more or less from the feet to the body. The animals act as if foundered, except the feet are cold, while in a foundered horse they are always hot. Mr. Bramlette has four and M. M. Learn, two affected this way and they are at a loss to account for it. They have had no hard drives toat would likely make them suffi-have not been watered or over-fed while hot, and it is a disease that puzzles our local horsemen a great deal.

Captured in Portland.

It now looks as though Dr. Boyd has dropped back to his old business-that of detective and thief catcher. The doctor left a few days ago, and ere he de-disease have a deli parted Mr. Cox, whose store was robbed pr last week of over \$500 worth of valuables, asked him to keep an eye open for the stolen goods below. Yesterday our worthy mer chart received a telegram from Dr. Boyd in Portland, stating that he had bagged the thief, and, giving a full description of the stolen goods, said he had recovered every-thing. Acc-roingly Sheriff Thomp-on-will send a requisition to the Governor of Origin for the prisoner, and Mr. Cox started for below this morning. Tally one for Dr. Ravd. for Dr. Boyd.

The Congregationslists.

The Oregon and Washington Association will continue its interesting meetings at the Congregational church over Sunday. This evening the subject is, "Foreign Missions. Rev. Cushing Ealls, D. D. will preside. An address will be delivered by fiev. D. B. Grav. Te-morrow at 11 a. M. Rev. C. Fells. will preach, after which a communion service will be held

At 3 P. M. there will be a childrens' meeting, at which addresses will be delivered by Miss Willard and Miss Gordon. At S.F. M. Subject "Home Missionary Work," Rev. Dr. Atkinson and others will deliver short

Grain Samples.

We are pleased that our farmers very gening great interest in the exhibit the STATESMAN is getting up for the Bureau of Immigration of samples of grain, in stalk and threshed, of the harvest of 1883. Mr. A. J. Evans. of Dry Creek, brought us in Saturday morning some very fine Australian wheat which we think will take the Blue Ribben, Mr. C. Newcome of the Walla Walla river has broacht samples of timoth v. blue top, alsike clover, alfalta and wheat that are remarkably good. The tops of the timothy are a foot long.

The Right Men.

Sheriff Thompson yesterday received a telegram from Mr. Cox, now in Portland, to the effect that the stolen property re-covered from Anderson and Goodwin at that place belongs to him. Mr. Thom that piace belongs to him. Ar. Home-son will swear out a complaint against the two prisoners and send a requisition on the Governor of Oregon for the pri-oners.

No Gongs, No Banners.—"A Summer Idyl." From a Providence Merchant.

MR. GEORGE H. DAVIS, a fruit dealer at 27 Westminster Street, bears his grateful testimony to the unequalled excellence of the production of one of our most skilful Providence Pharmseists. Mr. Davis says, "Last spring I was very greatly troubled with severe inflammation of the kidneys, and it became so had that at times I urinated blood, and my sufferings wers intense. My condition was so painful that for a while I was scarcely able to attend to business, and the severe pains would come so suddenly and severely that I would be obliged to leave a customer whom I might happen to be waiting upon. During a part of the time I was unable to walk, and scarcely knew what to do or which way to look for relief. At this time a friend recommended Hunt's MR. Gronge H. Davis, a fruit dealer at 297 At this time a friend recommended Hunt's Remedy. I took two bottles of it, and it took right hold of my disease and cured me very speedily, and I have experienced no trouble with

Suffered for Twenty Years.

Hox Joshua Turnilli, of East Saginaw, Mich., says, "Count me among the enthushastic friends of Hunt's Remedy. It has proven in my case all you claim for it. Having suffered for about twenty years with severe disease of the kidneys (which our local physicians pronounced Bright's Disease), I made a journey East to consult the eminent Dr. Haven, of Hamilton, New York, of whose fame in this speciaty! I had heard much. Pr. Haven examined me carefully and simply said, "Go and get a bottle of Hunt's Remedy and take according to directions." After lawing travelled so far for treatment, it struck me as rather funny to be directed to take a medhaving travelled so far for treatment, it struck me as rather funny to be circued to take a nec-ticine which I might have bought within a stone's three of my earn door; but I was in the dector's hands, and of course I followed his advice, and right glad was I that I did so, for before I had taken Hunt's Remedy half a dozen times I found immense benefit from it, and by continuing the use of it for a limited time I recovered from my trouble entirely, and am to day, I think, one of the nost remed of runcat Mildisonders.
