

SYDNEY DEATH.

The coroner's jury in the case of Mrs. M. S. Simonds, met and adjourned for further evidence to 12 o'clock this P. M.

Dr. Wells, in his official capacity as Coroner, summoned a jury consisting of A. B. Banks, E. Smith, G. D. Coffin, J. E. McMillan, W. G. Langford and H. D. Chapman, to examine into the sudden death of Mrs. Simonds, who fell dead yesterday.

Without making any comments upon the matter as it now stands, unassisted by the additional testimony which the examination of the deceased's brain and stomach will afford further along in the day, we will simply give the material parts of the testimony as adduced at the examination, and point out the principal points of discrepancy and contradiction.

DR. HALLACE. Testified that he was called at 12 o'clock Saturday night by Mrs. Nye to attend Mrs. Simonds. He found the patient in a spasmodic condition, and so insinuate that medicine could not be given through the mouth.

DR. ALBION. Testified that he was called at 12 o'clock Saturday night by Mrs. Nye to attend Mrs. Simonds. He found the patient in a spasmodic condition, and so insinuate that medicine could not be given through the mouth.

DR. WILSON. Testified that he was called at 12 o'clock Saturday night by Mrs. Nye to attend Mrs. Simonds. He found the patient in a spasmodic condition, and so insinuate that medicine could not be given through the mouth.

DR. WILSON. Testified that he was called at 12 o'clock Saturday night by Mrs. Nye to attend Mrs. Simonds. He found the patient in a spasmodic condition, and so insinuate that medicine could not be given through the mouth.

TOWN AND COUNTRY.

There are 10,000,000 horses in the United States. The wheat crop of the United States is estimated for 1883, at 400,000,000 bushels.

New York City expends over \$5,000,000 per annum in the oyster market, for house consumption.

Dr. Wilson, of Woodland, Cal., is in the city the guest of Mr. Eugene Buchanan. He will perhaps locate here.

Mr. Upton is having his fine residence and grounds, corner of Park avenue and Birch streets, enclosed by a neat fence.

Mr. James H. Ritchie and Al. Price, from Centerville and Weston, are in the city on their way to the States, as old pros.

Mr. McDonald, of the First Cavalry, arrived on Sunday's train, and will take station here. He is a number one gentleman.

Emil School, of Palaha City, is in the city, and says that his rheumatism is much better since he has been in this Vale of Health.

Kansas turns out this year 35,000,000 bushels of wheat, and 500,000,000 bushels of corn. Not so bad, considering the circumstances.

Capt. N. B. Humphrey, a prominent lawyer of Pennington, was in the city Sunday attending to some legal business. Ever genial, ever welcome Cap.

Dr. Alban is fitting up his office in fine style. The painters and paper hangers are now at work, preparatory to the upholsterers taking possession.

File diving is going on famously on Mill creek, on the line of East Alder. The council are doing their best to make that unruly stream behave itself in the future.

One hundred acres, opposite Spokane Falls, was sold last week for \$125,000, to a capitalist. It will be laid out in lots, houses built and sold on the installment plan.

AN OLD RED CENT.

The First Penny Colored in America in the "Statesman" Cabinet.

There is in possession of the proprietor of the STATESMAN an old copper penny that he prizes every bit as highly as did the thrifty fellow of the scriptures his own talent, which he wrapped up so carefully in a napkin and hid away until a fabulous interest should accrue at compound rates.

The history of the red cents, in common use before the war, is attracting much attention at this time. The honor of the invention of this species of coin is given to Mr. Robert Moore, the great financier of the revolution.

The writer then proceeded to describe the coin. His description is a picture of the penny in STATESMAN'S possession, the type of which is described by Dr. Monteville Wilson Dickeson in his "American Numismatic Manual."

Then Dr. Dickeson continues and what he says still further enhances the historical interest that clings with the red to Mr. Parker's old penny and to all others of its class.

Such was the first cent, with its saucy injunction to tyrannical government's monarchies and things in general to mind their business with its symbol of the flying hours and motto, "I Flea" with its thirteen interlocking circles that declared to the world the nature of the irrefragable union of the triumphant and independent commonwealth of America.

A Philadelphia special says: "The great attack on the Northern Pacific has lasted a week and resulted in a fearful depreciation of all the properties which are known in Wall street as 'Wallaces'."

There is a fine lot of fresh fish at our fish market this morning. Over three hundred pounds of fish at one consignment! One fine salmon weighing forty pounds.

There were 221,25 of fines levied in the police court during the last month. \$101.75 of this was earned in jail, the balance paid into the city treasury as cash.

We have received from Newburgh, N. Y., a very handsome card commemorating the closing events of the Revolution. It contains a picture of Washington's headquarters, and a drawing around it of the last scene that ended the war.

It is denied by friends of Judge Winard that he ever made such a decision as is attributed to him in regard to the taxation of railroad property. The papers comment upon his action have simply made looks of themselves. -Atticus Standard.

In obedience to the request of Governor Newell, who sent his message to the papers of this city in advance of his reading the same, the STATESMAN has deferred any comment until to-day. One so-called newspaper has again dishonored itself by publishing extracts daily.

A COWARDLY HERO.

The Body of John Frazier Found in Moose Lake.

On the 24th day of last month Mr. Frazier, partner of H. Patterson in the stock business near Badger Mountain, left Sprague with their supplies for their camp, since which time nothing has been heard from him, and his sudden disappearance remained a profound mystery to everybody until last week, when a clue was found that explained it all.

The Mosonlian is responsible for the following: "While a party of the recent Villard tourists were engaged in climbing to the heights of McDonald's peaks, another party, accompanied by several ladies, took carriage for the Mission lake, some eight miles up the valley. The road was quite rough, and as so many of our mountain roads, and in crossing a particularly bad place, a high diphthery of the British Crown was hounded out of his seat and thrown head first into the soft mud. The man was not hurt, but damned the "blasted country" to his heart's content.

Then Dr. Dickeson continues and what he says still further enhances the historical interest that clings with the red to Mr. Parker's old penny and to all others of its class.

Such was the first cent, with its saucy injunction to tyrannical government's monarchies and things in general to mind their business with its symbol of the flying hours and motto, "I Flea" with its thirteen interlocking circles that declared to the world the nature of the irrefragable union of the triumphant and independent commonwealth of America.
