THE FARMER AND THE BAHLEOADS.

The farmer, in the paper, Read the editorial mentions That the public welfare rested On political conventions. But the trees had leaved and blossomed,

An I the grass continued growing;
All the sprouts of corn were starting,
And the farmer went on hoeing.

The wheat grew ripe and yellow,
And the corn was nicely growing;
The farmer smoked his pipe in peace,
And bout his turnips went to beeing. All this time the rat road men Were busy, shapin; things political. Why, apparently no one knew— The farmer least of all was critical:

For the earth was filled with plenty, And the time was past for booing. Market- everywhere were bare— Surely prospects now were glowing. But when the former shipped his grain, Little caring, little knowing,

The price was high, but so were freights; Instead of rich, it left him owing. Then wouth the farmer quick became; Quoth be, what is the use of rowing? We laws must have to fair decide What share the carrier, what the grower;

But when he came to get the laws
He found 'twas quite beyond his power. The railroad men had busy been Shaping and not lding things political; The reason why now plain to all, The situation son ewhat critical.

Is it not about time that the farmers, who constitute by far the largest single interest in this country, and whose productions are the basis of all our prosperity, should have something to say about the amount they are taxed for transportation? In England the Farmers Alliance held the islance of power at the last general election. What is to prevent their orgonizing in every assembly and concressional district here, an itake an interest in politics which would not only notice; their own interdistrict here, an i take an interest in politics which would not only protect their own interests but it a melficient check upon the encroachments of corporations which have been so great of late that all patriotic citizens must view the r increasing power with alarm?—N. Y. Grendie.

Investing in Western Enterprises

From the financial reports of our Eastern exchanges we learn that Oregon Rulroad & Navigation and Northern Pacifi: Company stock is in great demand in primaries; and likes still less, with such speaks well for the good sense of Eastern investors; the thorough advertising which Oregon and Washington have both received have benefited not only the counou" process of packing conventions and t y itself, but also all enterprises either irectly or indirectly connected with i .

The failure of the North Pacific Rui road in earlier times was due in the main "ring rule."

Every voter seeks to know how and why each name occupies the place it does on a ticket; why this or that convention acted as it did. "Straws show which way the wind blows," so trifles indicate the movive which animated this or that convention.

It is not strange that the Presidential party never even mentioned him while they were among us. The reason is he was beneath their notice, even as he will be on the second day of November to those whom he has, with sublime impudence asked to again sent him, apparently, for no other purpose, than misrepresenting us in the Halls of the Nation. Tom Burke is the only man who can do our country justice and he the best men of both parties intend shall represent us as we have the right to demand. Solution of the more so because every Republican knows it. As for the statement that the loaves and fishes are necessary to the exstance of our Demecrats, the statement brings strength to our party which has now with all other Democrats in the United States been debarred for the last twenty years from participation in Federal offices which have been none too many to go around the numerous theives and rascals who have been only too willing to sell not only their carcasses but even what may be termed their consciences to axist in the perpetuation of the Republican party. The Intelligencer's article was evidently written under the poor miserable Brents' inspiration and will have no effect. Not only are the Democracy united but even the Republicans are oppesed to our advanced Territory being again represented by a tricky igo-oranus, who has never performed a good deed for his Territory, but has besides brought us into such ridicule that we are now the laughing stock of the nation at large by reason of the poor n ental calibre of our so called in the postoffice department by the discovery that a good sized subsidy was sunggled through the last congress by the least congress by the last congress by the last congress by the last congress by the last congress by which the last congress by which they are virtually given \$22.5,000 to \$2.5,000 to ke p the place and get his ranch fencer It is time for this shooting business to be stopped, especially on the Subbath. MISERABLE TASTE. -On the occasion of the visit of the Presidential party to Walla Walla, the citizens with one accord, turned out irrespective of party feeling, and buried all political animosities in order to give the Clifet Magistrate of the nation a hearty wel-come. Not an Hancock diag or any party emblem was shown by the democrats, and emblem was shown by the democrats, and the only instance on the republican side was the covering of the Union office and another adjoining stable with Carfield and Arthur emblems. To have made the affair effective there should have been a picture of Garfield "borrowing" \$329 of Oakes Ames, and a sample of the DeGolyer pavement. The O. R. & N. Co. have completed the rock work in the vicinity of Waitsburg.

Mr. Fred Read, who has been superin-tending a gang of Chinamen for some time past, had a row with the bookman of his gang who drew a revolver on him. Mr. Reed premptly knocked the obstroperous celestial down and administered a severe chastisement at which the Chinamen left in force.

With a view to correct, as much as possi ble, the evil of desertion, the following in. ons are published for the guidance of all officers in this department : Commanding officers will promptly make

rough investigation, with a view of ascertaining the causes which lead to descrition These are often local, and the result of abuse that can and should be at once corrected.

They will require company officers to inspect daily the meals of the soldiers, and to exercise proper care that the food is of good quality, and that the variety is as great a the resources of the post will admit.

The indifference to his trust, of an officer who is ignorant of the internal workings o his company, is highly reprehensible, and anders are required to keep company officers fully alive to their responsibilities, and prevent the evils that too often arise from he abuse of power by non-com

In order that the obligation of their eath of enlistment, and the heinous crime of its violation, may be constantly kept before them, it will be read to the troops once in see months, preferably at the regular muster, and its force and extent be fully explained.

Upon the receipt of information that a desertion has occurred, immediate, and if possible telegraphic, information and full description should be furnished all military commanders whose posts are located on routes likely to have been taken and convenient. likely to have been taken, and commanders d will use all available means to se cure such deserters. The efforts made for their capture must be immediate, energetic,

Severe Accident — May be Fatal.—Late on Friday evening a man named Webster, who has been employed hauling wood out of the mountains above Mr. W. Davis camp, while descending a steep pitch with a heavy load let bis foot alip off the brake and was thrown from his seat, falling under the wagon one of the hind wheels passing over his left shoulder and head, crushing the former and almost scalping him. The skull was laid bar 4 by 5 inches, one car and one eye almost forn away. Mr. Davis who was working near by had the young man conveyed to his place and is doing the Good Samaritan to him. He is not expected to recover.

Hubble Pre-The Palouse Garite is suffering from a severe attack of indigestion owing to having been forced to swallow the Brents crow, feathers, claws and beak. This is the price paid to support Mr. Brents. It is common talk on the Sound that Brents had expressed his int intion to remove Marshal Hopkins directly he returned to Washington for the reason of the attempt of the Hopkins family to have Allen nominated. It is a butter dose for the poor little innocent Gazette chap, but he cannot help himself.

Montana Silver.—There were deposited at the United States Assay Office, says the Helena Independent, during the month of August \$9,656,740, gold and silver coin and better the summary and the cannot help himself.

Helena Independent, during the month of August \$9,656,740, gold and silver coin and bullion. Of this amount, \$9,236,740 were gold, of which \$8,400,000 were foreign coin and bullion. The silver deposited amounted to \$420,000, and of this amount nearly one-half came from Mostana and Utah, each of these territories being credited with \$100,000. Colorado sent \$50,000, New Mexico \$14,000 and Arizona \$11,000. Vermont has

HANGED.—Tim Connor, or Tim McCu!-lough as he finally confessed his real name to who was the first man ever hanged at Salmon City, Idaho, was executed in a differ ent mode from that heretofore practised on the Pacific coast. Instead of dropping from a scaffold, he was jerked off the ground by weights. At the expiration of twenty-five minutes the dead body was lowered and it was found that the weck was broken. This is acknowledged, beyond question, to be the most humane mode of hanging.

ACKER'S HORSE WINS .- At the races in Baker city last week, B. R. Acker's horse neer Kennedy, of the O. R. & N. Co., has "Richard the Third," won the mile and a quarter dash in 2.14. "Richard" was pushed by "Trade Dollar" who was but a short neck behind. There were 2000 people on the grounds, and considerable money changed hands. A number of the China gangs have broken up lately and more are expected to leave in a few days, complaining that they cannot stand the cold nights in tents on the Touchet. From other sources we understand that if the winter is not too severe the work will be a divergence in the line; one road going on to Moscow in Idaho, and the other striking of in another direction.

The engineers have surveyed the line to Moscow, a place on the very top of the mountains, and they report the line as actually surveyed, entirely practicable and have sent the report for its adoption to headquarters in Portland. The talk along the line of the road is that Gould has ordered a connect to be made in Idaho territory with the Utah Northern, and will next year probably see the consummation of this project to give us an independent eastern route.

After the show the manager generally has a row with five or six of the "stars," such as the

the aerial artist or the leading dansense.
Then comes the stuffing of tights and tinsel into the hand bag and the marching away—net to walk the floor and "study their lines" in the watches of the night or to pine over sentimentalities, but to go to some "beer joint" or chop house and satisfy the "inner man." There are few sights in this great world so full of tenderness, so calculated to wake up the emotions of the heart, as that where the bald headed man trudges along with the "traveling bag "in hand belonging to one of these sprites, leading the way to a lunch stand. If there is one thing in which these artistes excell in, it is their appetites.

It is the duty of every officer, upon learning of the whereabouts of a deserter, to either secure him, or immediately furnish the information to these headquarters.

In order that deserters who have been recaptured may be made to pay the full pensity of their crimes, the greatest diligence will be exercised both before and after trial to prevent their escape.

Experiment with Winter Wheat.—Mr.

James Benton, living on Rebel Flat, says the Colfax Tribune, experimented this year with winter wheat with such results as will be a valuable suggestion to wheat growers in this country. Last tall on about twenty acres of summer fallowed land he sowed with a drill. He has just harvested it, and reports a yield of forty-five bushels per acre. We have been and still are of the opinion that winter wheat properly drilled in will yield more and better grain than can be produced by the usual methods of late spring sowing, and there are other advantages to be cained besides those either advantages to be cained besides those.

MECHANICS' FAIR. - The mechanics fair which will open at Portland on the 7th proximo, promises to supass any previous exhibition of the kind ever given in that eivy. Already 200 applications for space have been made to the secretary. The pavilion is being decorated and put in readiness for the coming exhibition.

GROWING. -Grange city contains six buildings used for warehouse purposes, two dwellings one livery and feed stable, one blacksmith shop, one hotel, one saloon and fise water privileges. Another hotel and saloon will be in operation as soon as the necessary buildings can be completed. It is also expected that the steam ferry will be running before snow!falls.

Dr. SPINNEY will guarantee to forfeit \$200 for every base of Seminal Weakness or private disease of any kind, or character which he undertakes and fails to cure

MIDDLE-AGED MEN There are many at the age of thirty to sixty who are troubled with too frequent evacuations of the Bladder, often accompanied by a slight smarting or burning sensati n, and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of a thin milkish hue, again changing to a clark and torpid appearance. There are many who dies of this difficulty ignorant of the cause, which is the second stage of seminal weakness. Dr. Spinney will guarantee a perfect cure in all such cases, and a healthy restoration of the penitodrinary organs.

Cases, and a nearny restoration of the pento-minary organs.
