SOME DAY.

You smooth the tangles from my hair,

With gentle touch and tender care,

And count the years you shall mark

Bright silver threads among the dark—

Smiling the while to hear me say,

"You'll think of this again some day!"

Some day!

I do not scorn the power of time,

Nor count on years of fadeless prime;

But no white gleams shall ever shine

Among those heavy locks of mine.

Ay, laugh as gaily as you may,

You'll think of this again some day—

Some day!

I know how long your loving hands

Will linger with these glossy bands,

When you shall weave my latest crown

Of thick masses long and brown;

But you will see no touch of gray

Adorn your shining locks that day—

Some day!

And while your tears are falling hot

Upon my lips, I answer not,

You'll take from these one treasured tress,

And leave the rest to silence;

Remember that I used to say,

"You'll think of this again some day!"

Some day!

THE MANNISH WOMAN.—The mannish

woman wears a double-breasted coat with

big buttons, of which she flings back the

lapels with an air, understanding the sug-

gestiveness of a wide chest and the need of

unchecked breathing; she wears unmis-

takeable shirt fronts, linen collars and plain

ties, like a man; she folds her arms or sets

her fists akimbo, like a man; she even nurses

her feet and cradles her knees in spite of her

petticoats, and makes believe that the attitude

is comfortable because it is manlike. If the

excessively womanly woman is affected in her

richly sweet, the mannish woman is af-

fected in her breadth and roughness. She

adores dogs and horses, which she places far

above children of all ages. She boasts of how

good a marks-woman she is—she does not

call herself a marks-woman—and how she

can hit right and left and bring down both

birds flying. When she drinks wine she holds

the stem of the glass between her first two

fingers, hollows her underlip, and tosses it

off, throwing her head well back—she would

disdain the lady like sip or the closer gesture

of ordinary. She is great in cheese and bitter

beer, in claret-cup and still champagne, but

she despises the puerilities of sweets or of

effervescing wines. She rounds her elbows

and turns her wrist outward, as men round

their elbows and turn their wrists outward.

She is fond of carpentry, she says, and boasts

her powers with plane and saw; for charms

to her watch chain she wears a cork-screw,

a gimblet, a big knife, and a small foot rule;

and in entire contrast with the womanly

woman, who uses the tips of her fingers only,

the mannish woman when she does anything

uses the whole hand, and if she had to thread

a needle would thread it as much by her

palm as by her fingers. All of which is affec-

tation, from first to last affectation; a mere

assumption of virile fashions utterly inhar-

monious to the whole being, physical and

mental, of a woman.

HORRIBLE STORY.—A murder of peculiar

anxiety was lately committed near Limoges,

France. A shoemaker's wife strangled her

husband in his sleep and afterwards cut his

body in pieces. For four days successively

she went into the woods and lanes scattering

little bits of her husband's body in various

directions far and wide. Every night she re-

turned to her house and lay down to sleep

by the side of what was left. Six days after

she put on her best gown and danced at a

village fete. She has been sentenced to penal

servitude for life.

AN OLD FASHION.—A Paris fashion

letter says that "an attempt is being made

to restore the high tortoise shell comb of

our grandmothers."

## Minute Wonders of Nature and Art.

Lewenhoeck, the great microscopic observ-

er, calculates that a thousand millions of

animalcules, which are discovered in common

water, are not altogether so large as a grain

of sand. In the milt of a single codfish there

are more animals than there are upon the

whole earth; for a grain of sand is bigger

than four millions of them. The white mat-

ter that sticks to the teeth also abounds with

animalcules of various figures, to which vine-

gar is fatal, and it is known that vinegar

contains animalcules in the shape of ovals. A

mite was anciently thought the limit of lit-

tleness; but we are not now surprised to be

told of animals seven million times smaller

than a mite. Monsia de l'ele has given the

computation of the velocity of a little

creature scarce visible by its smallness, which

he found to run three inches in half a sec-

ond; supposing now its feet to be the 50th

part of a line, it must make 500 steps in the

space of three inches—that is, it must shift

its legs 500 times in a second, or in the ordi-

nary pulsation of an artery. The itch is

known to be a disorder arising from the irri-

tation of a species of animalcule found in the

pustules of the aliment; it is a very mi-

nute animal, in shape resembling the tortoise,

of a whitish color, but darker on the back

than elsewhere, with very long and thick

hairs issuing from it, some nimbly in its

motion, having six legs, a sharp head, and

two little horns. The proboscis of a butterfly,

which winds round in a spiral form, like the

spring of a watch, serves both for mouth and

tongue, by entering into the hollows of flow-

ers and extracting their dew and juices. The

seeds of strawberries rise out of the pulp of

the fruit, and appear themselves like straw-

berries when viewed by the microscope. The

farina of the sunflower seems composed of flat

circular, minute bodies, sharp pointed round

the edges; the middle of them appears trans-

parent, and exhibits some resemblance to the

flower it proceeds from. The powder of the

lily is exactly shaped like the seeds of cum-

bers and melons. The farina of the poppy

appears like pearl barley. That of the lily is

a great deal like the tulip. The hairs of men

are long tubular fibres through which the

blood circulates. The sting of a bee is a horny

sheath or scabbard, that includes two bearded

darts. A wasp's sting has eight beads on

the side of each dart, somewhat like the

beards of fish-hooks. The eyes of gnats are

pearled, or composed of many rows of little

semi-circular protuberances ranged with the

utmost exactness. The wandering or hunting

spider, who spins no web, has two tufts of

feathers affixed to its fore paws, of exquisite

beauty and coloring. A grain of sand will

cover 200 scales of the skin, and also cover

20,000 places where perspiration may issue

forth. Mr. Baker has justly observed with

respect to the Deity, that with Him "an atom

is a world, and a world but as an atom."

Mr. Power says he saw a golden chain at

Tredescant's Museum, South Lambeth, of

three hundred links, not more than an inch

in length fastened to and pulled away by a

flea. And I myself (says Baker, in his es-

say on the microscope), have seen very

late, near Durhamyard in the Strand, and

have examined with my microscope a chain

made by Mr. Boverick, a watch maker, hav-

ing four wheels, with all the proper appar-

atus belonging to them, turning readily on

their axles; together with a man sitting in

the chain; all formed of ivory, and drawn

along by a flea without any seeming diffi-

culty. I weighed it with the greatest care. It

was able, and found the chain, man and flea

were barely equal to a single grain. I also

weighed, at the same time and place, a brass

chain made by the same hand, about two

inches long, containing two hundred links,

with a hook at one end and a padlock and

key at the other, and found it less than the

third part of a grain. I likewise have seen

a quardrille table with a drawer in it, an

eating table, a sideboard table, a looking

glass, twelve chairs with skeleton backs,

two dozen plates, six dishes, a dozen knives,

and as many forks, twelve spoons, two salts,

a frame and castors, together with a gentle-

man, lady and footman, all contained in a

cherry stone, and not filling much more than

half of it. At the present day are to be

purchased cherry stones highly polished, with

ivory screws, which contain each 120 perfect

silver spoons, an ingenious bauble worthy the

patronage of the juvenile part of the commu-

nity. We are told that one Oswald Merlinger

made a cup of a pepper-corn, which held

twelve hundred other little cups, all turned

in ivory, each of them being gilt on the

edges and standing upon a foot, and that, so

far from being crowded or wanting room, the

pepper-corn would have held four hundred

more. One penny worth of crude iron can

by art be manufactured into watch springs,

so as to produce some thousand pounds.

PAY OF THE FIRST CONGRESS.—The

Continental Congress met on the 16th May,

1775; the number of members was 64. At

this session a member appeared from St.

John's parish, Georgia, and afterwards the

colony of Georgia sent an entire delegation.

Each colony paid its own delegation. New

Hampshire allowed to each, all expenses, a

servant, two horses, and a guinea a day;

Massachusetts, expenses and three dollars a

day; Rhode Island and Maryland, forty shil-

lings a day, with nothing for expenses;

Pennsylvania, twenty shillings a day and

expenses; Virginia a half Johannes per day;

North Carolina, \$2500 per annum; South

Carolina, \$1500 per annum; Georgia, \$500

per month while in session.

THE English telegraph companies pay

their female clerks five shillings per week.

The poor girls must be restricted at meals to

a certain number of mouthfuls in order that

their weekly rations hold out.

BUTTERMILK is an excellent remedy for

the gut. Ten gallons a day for ten years,

it is said, will cure any man.

## Behind the Scenes.

WHAT THE STAGE LOOKS LIKE.

What a queer old place it is, to be sure,

behind the scenes of a theater? How the

actors ever can take the illusion and sentiment

of the play in the midst of such disenchant-

ing material, I often wonder. In private

study they may go to the ideal conceptions

of the poet, but on the bare, dreary, dingy

stage, where everything is false and unreal,

I should think every fancy would fly from

them. On every side are stacks of scenes to

be used in the play; some painted on both

sides and representing a fairy grotto and a

demon's cavern with strange inconsistency.

They are grimy with the prints of the scene-

shifter's hands. They are torn in some

places and patched in others. There stands

a "golden throne" made of rough planks,

and, like many other things in this world,

with its best side turned out. Here are

heaps of stage properties, of such names and

appearance, it is impossible for an outsider

to tell for what purpose they are used. There

are dragons' tails, heads of fishes, drinking

cups, wreaths of gay, impossible flowers, gilt

crosses, badges for knights, trappings soiled

and faded, dishes of fruit which require un-

bounded imagination to decide what they are

meant for, red hot poker for the funny man,

which lie quite harmless now, and don't even

scorch the lazes by their side—all stage de-

ceptions, which the audience will take as

real as the play goes on. There are some

"mossy banks," upon which bright, sunny

beams will recline; they are rude boards

covered with painted cloth, and are hard as

a brick to the touch. How I pity the poor

girls in thin dresses who will do the reclining!

Talking in groups are fairies and evil-

looking monster with great, glaring eyes;

FRIDAY EVENING, October 16, 1868.

## National Democratic Nominations.

FOR PRESIDENT,  
HORATIO SEYMOUR, of New York.  
FOR VICE-PRESIDENT,  
FRANK P. BLAIR, of Missouri.

The vote of San Francisco is estimated at twenty six thousand.

UNITED STATES troops are now used in Kentucky to enable the civil officers to execute civil processes.

Efforts are being made in New Orleans to have the State courts deprived of the power to naturalize foreigners.

STATE ELECTIONS.—Pennsylvania, Ohio, and Indiana had their State elections on Tuesday last. The vote of these States practically settle the Presidential election.

CROPS DAMAGED.—California exchanges of the 1st inst., speaks of a heavy fall of rain the day previous, which materially damaged the wheat which was exposed to the peltings of the storm.

So short of ties is the Union Pacific Company, that it has been seriously proposed to lay a temporary railroad thirty-six miles in length to the head of Laramie, where they can be had in abundance.

WHY don't the radicals tell us how they have disposed of the almost countless millions of taxes, without paying a dollar of the public debt? Do they know? If they do, let them tell. Which of them dares undertake to tell?

WM. F. JOHNSON, ex Governor of Pennsylvania, always a republican, recently made a speech at Pittsburgh, in which he took strong ground for the election of Seymour, declaring that the peace of the country and the perpetuity of free government depended upon the triumph of democratic principle at the coming election.

WEST POINT, since its first establishment in March 16th, 1807, has admitted 4,899 cadets, of whom 2,218 were graduated. The total appropriations for the Academy for the period of sixty years have amounted to \$8,552,339. This includes the cost of the grounds, improvements, and educational apparatus, as well as the pay of the professors and the subsistence of the cadets.

ANOTHER \$47,000 RADICAL THIEF.—The news from Washington discloses the fact that one Olmstead, disbursing clerk in the Postoffice Department, has absconded, and that investigation reveals a defalcation of \$47,000. Every day one or more of the radical thieves are being smoked out. Isn't 'loyalty' too expensive a blessing, or curse, to the country? Is it not time to have a change?

RECOVERING.—A few weeks since Garfield got into a row over a game of cards, in a saloon at Port Townsend, and feeling that his character was seriously compromised, forthwith left the Territory. He now turns up as an itinerant orator, and is found stumping Oregon and California for the radical ticket. It is stated that he hopes in this way to recuperate his character and improve his chances for the next Delegation.

LOYALTY PAYS.—John Logan, 'Dirty Work John,' as the republicans were wont to call him, was a poor man when he was a democrat. When he went into the army his whole property only inventoried \$2,000. Now, John owns property in Chicago alone worth \$100,000. How did he make it? Most certainly not by his pay in the army. It was not left to him, for his family and relatives are all poor. How then did dirty work John come by this \$100,000 worth of property? His is not the first instance where rampant 'loyalty' paid, and where loud professions of patriotism were made to cover up dishonest speculations.

WHISKY SWINDLE.—It has been discovered at the Internal Revenue Department that a new and ingenious mode of cheating the Government out of the tax on whisky has been devised by some unprincipled distillers. To do this a machine has been invented which will split oak heading of whisky barrels into strips as thin as a piece of mahogany or rosewood veneering. A sheet of this kind can be put on the barrel head and fitted to the groove inside, so as to form part of the heading outside. Upon this are placed the revenue stamps and the gauger's marks, and when the barrel is emptied the thin heading can be removed intact, the barrel refilled, and the old heading placed upon it.

RETRENCHMENT OR REPUTATION.—Calling up the wonderful fact, that since the last vestige of war had disappeared, war taxation was still kept up, which the people still paid without shrinking, and that, although three years of peace have passed, the taxes are still over \$460,000,000 a year—a larger sum than that raised and expended by the most costly monarchical government in the world—the New York Herald emphatically declares that the people are becoming restless and disgusted, and will certainly seek a remedy, either in a change of public servants or in the repudiation of the debt.

Unless able or more honest men are elected to Congress, men who will see the necessity of economy, and have the courage to cut down all unnecessary expenditures and bring them to something like they were before the war—it will not be long before we shall hear significant and deep mutterings of repudiation from one end of the country to the other.

DISTRICT COURT.—The District Court is still in session. The ninety-one civil cases have been disposed of excepting some eight or ten cases. In the case of Patrick McNamara vs. S. M. Wait, which has excited a good deal of interest, the jury, on Wednesday, brought in a verdict for the plaintiff for \$150. The plaintiff, it will be remembered, sued for damages for an assault and battery. In the case of the Territory against Thomas McLaughlin, charged with grand larceny, the jury brought in a verdict of guilty, and the Court sentenced the prisoner to twelve months imprisonment. In the case of the Territory against two Indians, charged with petit larceny, the Indians were sentenced to six months imprisonment. In the case of the United States against James Good, charged with giving liquor to Indians, the Court sentenced the prisoner to six months imprisonment. The Grand Jury are still in session, and are now, we are informed, engaged in an examination of the affairs of the county. The Grand Jury have returned about six o'clock, some on the part of the United States, and some on the part of the Territory. The Grand Jury will probably adjourn on Saturday, and the Court will probably complete the business of the term by the middle of next week. In our next issue we will publish the cases determined for the term.

HOMICIDE AT HELENA.—A telegraphic dispatch, published two weeks since, stated that Governor Beall, formerly of Wisconsin, had been shot and killed by Geo. Pinney, business manager of the Helena Post. Late Helena papers furnish full particulars of the tragedy. It appears that Pinney had published an article that was offensive to Beall, and that the latter armed himself with a pistol, and went to the Post office for the purpose of demanding satisfaction. Pinney declined any explanation and told him to go away. Gov. Beall then drew a pistol, but did not discharge it. Pinney fired twice, the last shot proving fatal. An examination was had, and after hearing the evidence, Pinney was discharged, on the ground of self-defence. Gov. Beall had many friends, and his funeral was the largest ever witnessed at Helena.

NEW GOLD DISCOVERIES.—A correspondent of the Cincinnati Commercial, writing from Clermont county, Ohio, speaks of some gold discoveries in that region, and the consequent rise in the value of land and all kinds of property. Elk Lick seems to be the favored place, and throngs of speculators are rushing thither, all intent on making their fortunes in a moment. Gold has also been found on several other farms near the town of Batavia, but not in such quantities as at Elk Lick. In the latter place it seems to abound almost on the surface. One farm near that place was purchased two years ago for ten dollars per acre, and two weeks ago could have been purchased for thirteen dollars per acre, but now seven hundred dollars have been offered and refused. Three farms have been sold at the rate of three and four hundred dollars per acre. There are four companies at work in the vicinity. It is reported that one nugget weighing one hundred and fifty dollars has been found.

CHARLES BEN DARWIN publishes a card in the S. F. Bulletin, in which he tenders his professional services to the people of that city somewhat in the style of a quack doctor. For the purpose of "getting into practice" he will give advice free, and will undertake cases and "make his fee contingent upon success." This seems to be rather low down for a man of Darwin's lofty aspirations, and will rudely shock some of his admirers in this Territory, who regarded him as standing at the head of the profession.

AFTER A POSTMASTER.—We notice by the Helena papers that Postmaster Potter is receiving a severe drubbing; his offence is charging \$1 per package of stamped envelopes, when the government price is 75 cts. The Herald demands the Postmaster's removal on this account, and says that representations have been made at Washington that will at once lead to the desired change. The practice of over-charging, without doubt, is a violation of the law, but on this coast nothing is more common.

PUBLIC OFFICIALS.—Men who hold positions under Government, at stipulated salaries, have the rare faculty of making their money go further than any other class of citizens. We read of clerks in the New York Custom House, who get only \$3,000 per annum, and yet manage to have all the way from \$15,000 to \$20,000 to spend. On this coast, we have known Indian Agents, who off an annual income of \$1,500, managed in a few years to accumulate handsome fortunes. Strategy, my boy.

GRAND DEMONSTRATION.—The democracy of New York had a grand demonstration on the 5th inst. The number of men that marched in procession was estimated at 90,000. No such display had ever before been witnessed in New York, and it was held to indicate an overwhelming triumph in November. The State is considered good for sixty thousand majority for Seymour and Blair.

BRIST BUTLER has received the republican nomination for a second election to Congress from his district. If the people of Massachusetts have any sense of decency remaining, they will see to it that this unprincipled demagogue and charlatan is not the second time allowed to disgrace the halls of legislation.

DEMOCRATIC ARGUMENTS.—The New York Tribune has a Washington correspondent who recently wrote from that city, rather exultingly, that 'republican Committee are sending out documents at the rate of more than 100,000 per week.' The New York Express, in noticing this little enterprise, says, with great truth, that everywhere on every side, in every home and household is a democratic argument—such as—

The double price of tea.  
The triple price of sugar.  
The double price of clothing.  
The velocity and volume with which property in almost every part of the country is running from the poor to the rich, in consequence of the inequality and injustice of taxation.

The destruction of our foreign commercial marine.  
The banishment of all gold and silver as coin, and the universality of paper.  
The downfall of the Constitution everywhere.

The substitution of a consolidated for a federal form of government.  
The overthrow of the right of trial by jury, and of the habeas corpus among 10,000,000 of our people.

The subjugation of eight millions of white men in the South to three or four millions of negroes.  
The reign of carpet-baggers in Congress (generally runaways from the North), assuming to represent the whites and negroes in the South.

All these are democratic arguments in every man's mouth, and are present, more or less, everywhere, in every house, cottage and cabin.

REVENUE REGULATIONS.—The Internal Revenue Bureau has issued supplemental regulations or instructions concerning the tax on distilled spirits. No distiller's bond can be approved unless his distillery warehouse has been provided under the act of July 6th. No distillery is permitted to start until the storekeeper has been assigned. Such warehouse stamps for distilled spirits are required to be used in all cases as provided by law. These stamps are engraved and bound in book form in books. Tax is paid on the stamps. They contain 300 stamps each; another class, four hundred each. The stamps range from 14,350 to 20,850, according to the number of gallons represented. Instructions are specific, both as to the duties of distillers and the Government officers. The Commissioner says the abolition of the offices of Revenue Agents and Inspectors throws an increased responsibility upon the local officers in the several districts, and it depends mainly on their action whether or not the provisions of the new law shall be carried out against illicit distillation of spirits, and they will be held to strict accountability for the enforcement of the law in their several districts.

MISSOURI POLITICS.—The latest advices from Missouri inform us that in many of the counties, particularly in the southwest, and other thickly inhabited sections, there are more votes registered in each township, on an average, than were cast at the election four years ago. This is alarming the radicals, and well it may, for if the democracy comes within forty thousand votes of polling its full strength, John S. Phelps will be the next Governor of Missouri, and the electoral vote will be given to Seymour and Blair. Frank Blair's name is a tower of strength in that State, and 'that's what the matter' with Fletcher and his cohorts. Thousands of men who voted for Lincoln four years ago, have followed Blair into the democratic ranks, and will assist in swelling the vote of Missouri.

CONDITION OF THE SOUTH.—'Horace Greeley in commenting upon the Roerach-Lee correspondence, says of the present condition of the South, 'emigration is arrested; capital, shrinks from the citizens and sea ports; commerce seeks less congenial but more secure climates; credit is dead; there is no industry, no enterprise, no natural progress, no public spirit; nothing but political chaos and social anxiety.'

THE Omaha Herald says that Mr. Spade, the new contractor, has perfected arrangements whereby, on and after the 1st of October, he will transport passengers over a first class stage line, complete in every appointment, with celerity, certainly and dispatch, between the western termini of the Union Pacific and the eastern termini of the Central Pacific.

ROBERT T. LINCOLN, eldest son of the late President, was married at Washington a few weeks since, to a daughter of Senator Harlan, of Iowa. Reporters for the press were invited to view the bridal arrangements previous to the marriage ceremony. The reporters very properly rebuked this species of snobbery by remaining away altogether.

RADICAL HONESTY.—The people of Walla Walla have been amused for over a week at witnessing the efforts of a high Federal official to prevent an investigation of the funds practiced by one of his subordinates. It is possible that this will help the gentleman in his Congressional aspirations, but we can't see how it will do it.

DESERTERS.—A number of "bread and butter" democrats in New York have issued a call for a Grant and Colfax meeting. In looking over the list of signers we find the names of persons who were conspicuous at the "bread and butter" convention at Philadelphia two years since.

THE radicals have captured a young son of the late Stephen A. Douglas, and are making as much cackle over him as a hen with one chicken.

## Premiums at the Agricultural Fair.

## Meeting of the Walla Walla Valley Agricultural Society.

Society met at Council Grove, October 9th, 1868. The President being absent, the meeting was called to order and presided over by T. P. Denny. Owing to the absence of the President, the society was deprived of the regular annual address. By request, J. H. Blewett addressed the Society briefly, apologizing for the President's absence, and his own want of preparation to address the Society on so important and pregnant a subject as the agricultural resources of the Walla Walla Valley. The election of officers being in order, several nominations were made for President, which resulted in the election of Anderson Cox. Mr. Cox took the chair, assuring the Society, that while they might have selected a more suitable man for President, they could not have selected one who would strive more to carry out the objects of the Society. W. S. Gilliam was elected First Vice President; W. M. Shelton, Second Vice President; D. M. Jesse, J. Drumheller, Orley Hull, Executive Committee; L. B. Berry, Treasurer, and J. H. Blewett, Secretary. A Cox, President, J. H. BLEWETT, Secretary.

TIGHT ROPE PERFORMER.—Prof. Dan de House, the one-leg tight rope performer, had his rope stretched across Main street, on Friday last, and in the evening performed his dangerous feat. How he manages to balance on his wooden leg is a marvel, but this thing is certain, he manages to accomplish a feat that would puzzle most people who are blessed with two legs. For a man disabled as he is, the Professor exhibits great energy and deserves to be liberally patronized.

THE GRAIN MARKET.—Advices from San Francisco represent the grain market as looking up. The demand for shipment is large, and operators look for an advance in prices. Flour is quoted in San Francisco at \$5 25 @ \$6 25 per bbl. Wheat, \$1 90 @ \$2 00 per bushel. At Portland, the quotations are \$5 50 @ \$6 for Flour. Wheat, 70 @ 75 cents. In our own market we have no change to note.

EVEN BETS are being made that Pennsylvania on Tuesday last went democratic. All parties feel that the old Keystone State is the battle ground of the contest, and as a consequence the result of the election in that State is looked for with breathless interest.

EXTENSIVE IMPROVEMENT.—We learn that it is the purpose of the Oregon and Washington Navigation Improvement Company, the incorporation of which we mentioned a few days since, to improve the navigation of the Columbia river by removing the obstructions at the Cascades. It will be remembered that according to Indian tradition, a great natural bridge once spanned the chasm from the north to the south mountain underneath which the waters of the Columbia found their unobstructed way. Once upon a time, far back in the past, the pent up fires in the bowels of Mts. Hood and St. Helens convulsed the whole coast and shook down this bridge. As to the amount of truth in the legend we have no scientific means of determining, but we are informed by those who have made examinations that the depth of the water is much greater above the falls than below, the bed of the river being almost on a level at the two points, and that the huge rocks over which the waters rush with such force are all loose and appear to have been thrown there by some extraordinary natural occurrences. If this be true there is much more reason to believe the tradition alluded to than the incredulous would suppose. At any rate investigation has given some assurance that by proper means all obstructions to navigation at the Cascades can be effectually removed, so that steamers can reach the Dalles without difficulty. It remains for enterprise to determine this important fact, which has a material bearing upon the interests of the people of the Willamette valley, as well as of Eastern Oregon.

THE Seattle paper learns from a gentleman who has been on San Juan Island lately that there has been splendid crops there this year. Little or no smoke has been in the vicinity, and from what we learn it is the only place on the northern coast where a person can breathe pure air. Col. Thomas Gray and his men have been ordered away to Fort Wrangle, about 170 miles from Sitka, and it is stated that Capt. Ross, U. S. Infantry, is to take command.

DEATH FROM SCALDING.—A young child of Mr. H. Cook, Jr., who lives on Sixth Street, died yesterday afternoon from the effects of a severe scalding received last Saturday. The child was just old enough to walk about the house, and reaching up on a table tipped over a kettle of boiling water, which poured all over the body of the little one, burning it terribly. The sufferings of the child were extreme until death terminated them. —Oregonian.

THE largest sales of land ever made at the Olympia Land Office in a single month were effected in September. The sales amount to about 20,000 acres. The Puget Mill Company purchased about 12,000 acres of timber lands.

THE Fenian organization which was expected to revolutionize Ireland consisted of 200,000 men, not counting the Fenians of America.

MARRIED.—At Walla Walla, on the 8th inst., by O. P. Lacy, J. P., Chas. W. Fries to Elsie Moway, all of this county.

A LECTURE ON MUSIC at the United Brethren Church, on this (Friday) evening, at 7 1/2 o'clock. See card.

APPLES.—We are indebted to J. Drummiller, Esq., for a box of apples, embracing many different varieties, and all very fine.

WOOD.—Parties who have contracted to deliver wood at this office, are notified that unless the same is delivered before the end of October they will be expected to pay cash.

THE RACES over the Walla Walla Race Course will commence on Wednesday next and continue four days. Quite a number of fast horses are expected to be in attendance.

QUARTERLY MEETING.—The quarterly meeting of the M. E. Church will commence on to-morrow (Saturday). Religious service at 11 A. M., when Rev. J. B. Callaway is expected to preach.

SAFE.—The young man Hobbs, who was missing from his ranch on the Palouse, and who was supposed to have been murdered, has returned home safe and sound. He had simply gone off on a visit to some friends.

NEW STOCK.—Adams Brothers, of the "Brick Corner," are opening a new stock of the latest styles of ladies' and gentlemen's dress goods. Those who want good goods, at low rates, should give them a call.

COMPROMISED.—The suit brought against the city for two thousand dollars by the Water Company has been compromised and the suit withdrawn. We understand that the basis of the compromise is the payment of a certain amount annually to the Water Company by the city.

PER UP ON SHUT UP.—A sturdy democrat, named Frederick Kelly, living at Fort Colville, offers to take a half interest in his ferry, on the Pen d'Oreille River, against \$1500 cash, on the election of Seymour and Blair. The interest in the ferry is valued at \$2500. Mr. R. says that he wishes his radical friends either to "put up or shut up."

UNATILLA COUNTY SEAT.—In accordance with the law passed at the present session of the Oregon Legislature, the people of Unatilla county, at the election on the 3d November, will vote on the question of re-locating the county seat. The landing is too remote to suit the convenience of the great body of settlers and hence the proposed change. It is thought that Swift's is quite sure to be the place the voters will select.

SPLENDID ANIMAL.—Hon. Dan'l Stewart exhibited his thorough-bred Jack "Orestes," at the Fair. Unfortunately he was entered too late to compete for the premium, but in point of size and other qualities that go to constitute a valuable animal, was pronounced by judges one of the finest Jacks that has ever been brought to this coast. Mr. S. is one of our most extensive stock owners, and spares no expense to secure the very best breed.

COAL.—Philip Ritz has left on our table a chunk of coal, taken from a mine recently discovered on the Skookum Chuck, distant about 11 miles from Olympia. So great is Mr. R.'s confidence in the value of the mine that he has bought the land on which the coal is found. The mine is on the line of the proposed Columbia River and Puget Sound Railway, and with its completion there will be every facility for getting the coal to market. Those who are curious in such matters are invited to call and examine the specimen.

PHOENIX PAVE.—The old "Cain Mansion" was destroyed by fire at an early hour on Thursday morning. The building was insured in the Pacific Insurance Company, and before 10 o'clock the owner was reimbursed the whole amount of his loss, as will be seen by his certificate:

I hereby acknowledge adjustment of Policy No. 5717, Pacific Insurance Company, in liquidation of loss by fire, on the morning of October 15th, 1898, through J. H. Blewett, Agent of said Company. Walla Walla, October 15, 1898. S. SWANBERG, For Schwabacher Bros. & Co.

HORSE TRAINING.—Messrs. Wallace and Wilson gave an exhibition of their system of horse training, at Kraft's stable, on Friday and Saturday last, and succeeded in convincing those present of the merits of their system. A vicious horse was taken, and under their manipulations in less than half an hour rendered perfectly docile. Their mode of treatment combines firmness and gentleness, and under it the most stubborn horse must yield. To those who would learn how to manage the horse with ease to themselves and kindness to the animal, we cannot too highly commend the new system of horse training.

HIGH PRICES.—Quite a number of strangers who came to Walla Walla, direct from the State Fair, did not hesitate to say that one Valley Fair was vastly superior to the Oregon State Fair. The vegetable and other productions of the farm were pronounced in every way superior, and when it came to stock, the comparison was altogether in our favor. This was the judgment, not of one or two persons, but of all those who had visited both fairs, and had the best opportunity for forming a correct estimate. The Oregon State Fair had the advantage of us in horse races, but in all else was taken the lead.

IGNORANCE.—The Grand Jury ignored the bill presented against S. M. Wait, charged with assaulting and beating a man named McNamara. The circumstances attending this affair are as follows: McNamara, had gone to Mr. Wait's store, and being drunk and disorderly, was ordered to leave. He finally went away, but returned again, "spilling for a fight." On being requested to go off for the second time, he made a demonstration as though to draw a weapon, when Mr. Wait used a pick handle in self-defense, and broke McNamara's arm. On this statement of facts, the Grand Jury, as we are informed, ignored the bill by a unanimous vote.

A SENSIBLE REPUBLICAN.—The following note to the editor contains so much of good sense that we give it entire:

WHATCOMB, Sept. 28, 1898.  
Dear Sir:—In accordance with the polite and delicate hint you gave me by stopping my paper, I enclose \$10, which you will please place to my credit on your subscription books. I believe that no man can judge correctly on any subject unless he hears both sides of the question, consequently I take all the papers published in the Territory, and the leading papers of both parties in the States. As I file all my papers, I would like if you could fill my file—the last No. I received was July 17th. As long as I have a dollar I will pay the printer. EDWARD ELDRIDGE.

FIRE.—About five o'clock yesterday morning, an out building in the rear of what is known as the old "Cain Mansion" was discovered to be on fire. The alarm was at once given and the firemen were promptly on the ground, but not until the fire had extended to the main building. The house was occupied by Mr. A. H. Reynolds, who succeeded in saving the most of his furniture. The building was owned by Mr. Louis Schwabacher, and fully insured. The origin of the fire is involved in mystery, although most persons believe it to have been purely accidental. This fire illustrated the necessity of a hook and ladder, inasmuch as the firemen say that with an apparatus of this kind they could readily have saved the main building. As it was, the Fire Company rendered great service and deserves high praise.

FIRE EXTINGUISHER.—P. D. Moore, Esq., made an exhibition of the working of the new Fire Extinguisher or Self-acting Fire Engine, on the Public Square, last Tuesday evening, and although there was some hindrance and delay arising from some sawdust in the hose, they having been packed in that material, and the precaution to clear them before attaching to the machine, yet when they were got in order they performed admirably and were entirely successful. They are efficient in speedily extinguishing fires in their earlier stages, and as they are kept ready for use at a moment's notice, if dwellings, stores, mills, &c., were provided with them, much valuable property could be saved, by their use promptly when a fire is first discovered.

AGRICULTURAL FAIR GROUNDS.—The grounds on which the Valley Fairs have heretofore been held having been found inconvenient and utterly unsuited to the purpose, the members of the Society have determined to procure a suitable lot of land and fence the same in and make such other improvements as are required for the purposes of the Annual Fairs. The intention is to apply to the Government for a cession of one hundred acres of land from the Military Reserve immediately adjoining town. This land is no longer required by the military, and it is believed that our Delegate can readily secure its cession for the purpose indicated. The money to make the necessary improvements, plant trees, &c., can be raised by private subscriptions. The success that has attended the Fairs, and the growing interest in all that relates to improved stock, improvements in mode of farming, &c., all give assurance that the Agricultural Society is a permanent institution, and hence it is desirable that the Society should own fair grounds and be in position to make the necessary improvements for the convenience of those who attend the annual exhibitions.

## LATEST EASTERN NEWS.

Dates to October 10th.

[COMPILED FROM THE OREGONIAN.]  
LAWLESSNESS IN THE SOUTH TO BE SUPPRESSED.

Washington, Oct. 9.—Gen. Mead has issued an order distributing the forces under his command to the points where he considers it necessary to enforce and preserve order until after the election. The military are instructed to aid in the suppression of insubordination to the civil authorities. They are to exercise their discretion and judgment unbiassed by political or other prejudices. He also appeals to the people to cooperate with him and the civil authorities in sustaining law and order.

Governor Bullock has issued a proclamation commanding each and every officer, in every country, to see that the lives and property of the citizens are preserved, that all persons are protected in the full exercise of their civil and political rights and privileges, and charging upon every person resident in the State to render a prompt and willing obedience to the sheriff, and obey the civil officers under all circumstances whatever.

New York, Oct. 9.—Howell Cobb, of Georgia, fell dead this morning, on the corridor of the Fifth Avenue Hotel.

## NEW YORK ITEMS.

New York, Oct. 9.—The Mozart democracy are again in the field. They urge Fernando Wood to accept the Congressional nomination for the Ninth District.

New York, Oct. 10.—Horace Greeley has been nominated to Congress from the Fifth District.

## ALABAMA MATTERS.

Montgomery, Oct. 9.—Both houses have adopted a resolution to adjourn to-morrow, to reassemble on the 24th November. It is generally understood that registration cannot be completed in time for the election. No election bill has been passed, and they will probably adjourn without passing one.

Chicago, Oct. 10.—The New York Tribune, of the 9th, throws some light on the frightful increase in the deficits for the postal service, which the reports have shown. It says that about two months ago the Post Office Department awarded the contract for carrying the mails in the country beyond the Pacific Railroad to Mr. Spaid. There were three bidders—Spaid at \$350,000, the second person at about ten thousand more, and Wells, Fargo & Co., who made a bid in the neighborhood of one million. Spaid's bid was accepted, and the bonds given for the faithful performance of the contract. The Post Office Department, several days ago, learned that Spaid had disappeared, and thrown up his contract. The Department is said to have called on Wells, Fargo & Co., to do the work. Many complaints and unpleasant stories are in circulation in regard to the transaction. It is well known here that the way the Government is swindled on contracts is to have a number of irresponsible bidders who under bid and give worthless bonds, and then throw up their contract, when they are awarded to another member of the ring, who puts in a higher bid.

New York, Oct. 9.—The Protestant Episcopal Convention passed the entire session in discussing the question of admitting the diocese of Nebraska. Opposition was made on the ground that the delegates were appointed by a body calling itself the Council of Nebraska, instead of the Diocese of Nebraska. No conclusion was reached.

The Board of Consulting Engineers of the Hudson & Highland Suspension Bridge Company met to-day to examine the river to secure a favorable site for the erection of a bridge.

Robert J. Walker has published a letter stating that there has been an annual increase in the public debt of \$40,000,000, which he charges as the result of radical extravagance. The republicans state that he omits to mention that this increase was

caused by back payments due on soldiers' bounties and pensions.

Washington, Oct. 10.—Reverdy Johnson sends a cable telegram that he has signed a protocol with the British Government, recognizing the rights of naturalized citizens. No particulars are given, but it is inferred that the compact is similar in its features to the Bancroft treaty with Germany.

St. Louis, Oct. 9.—The Union Pacific Railroad is forwarding ninety cars and construction materials to the end of the road. A large number of snow plows are also being placed in the mountains ready for use.

A fire at Cheyenne, on Monday night, destroyed an entire block of stores, on Sixteenth street, and several buildings on Ferguson street.

Philadelphia, Oct. 10.—Rev. Thomas Stockton, formerly chaplain of the House of Representatives, died to-day; aged 60.

## THE INDIAN PEACE COMMISSION.

Chicago, Oct. 10.—The Indian Peace Commissioners at their session yesterday, adopted a resolution declaring that in their opinion the Bureau of Indian Affairs should be transferred to the War Department. They also resolved that this commission recommend to the President of the United States and to Congress that full provision be made at once to feed, clothe and protect all Indians of the Crow, Blackfoot, Apaches, Arapahoe, Apache, Kiowa and Comanche nations who now live on or shall hereafter locate permanently on agricultural reservations; that the treaties of said tribes with the United States, whether ratified or not, shall be considered so, and be in full force as to all Indians of such tribes as now have or may have their homes on agricultural reservations described in these respective treaties and no others; that in the opinion of this committee the time has come when the government should recognize Indian tribes as domestic and dependent, except so far as may not be requisite to recognize them as such by existing treaties and by treaties made but not yet ratified; that hereafter all Indians shall be considered and held to be individually responsible to the laws of the United States except where it is otherwise provided in said treaties, and that they shall be entitled to protection from said laws as other persons owing allegiance to the Government; the recent outrages and depredations committed by Indians on the plains, justify the Government in abrogating the clauses of the treaty made in October, 1867, at Medicine Boat Lodge, which secures them the right to roam and hunt outside their reservations. Also that the Indians should be required to move at once to said reservations, and remain within them, except that after peace shall have been restored, parties may be permitted to cross the boundaries with written authority from the agent or superintendent.

### LAW OF THE UNITED STATES.

Passed at the Second Session of the Fortieth Congress.

#### [PUBLIC RESOLUTION—No. 54.]

A Resolution to carry into effect the resolution approved March two, eighteen hundred and sixty seven, providing for the exchange of certain public documents.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congressional Printer, whenever he shall be so directed by the Joint Committee on the Library, be, and he is hereby is, directed to print fifty copies, in addition to the regular number, of all documents hereafter printed by order of either house of Congress, or by order of any department or bureau of the government, and whenever he shall be so directed by the Joint Committee on the Library, to send one copy of each additional copy of all documents ordered to be printed, in excess of the usual number; said fifty or one hundred copies to be delivered to the Librarian of Congress, to be exchanged, under direction of the Joint Committee on the Library, as provided by joint resolution approved March two, eighteen hundred and sixty seven.

Sec. 2. And be it further resolved, That fifty copies of each publication printed under direction of any department or bureau of the government, whether at the Congressional Printing Office or elsewhere, shall be placed at the disposal of the Joint Committee on the Library to carry out the provisions of said resolution.

Approved, July 25, 1868.

#### [PUBLIC RESOLUTION—No. 55.]

A Resolution granting permission to officers and soldiers to wear the badge of the corps in which they served during the rebellion.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That all who served as officers, non-commissioned officers, privates, or other enlisted men in the regular army, volunteer militia forces of the United States, during the war of the rebellion, and have been honorably discharged from the service or remain still in the same, shall be entitled to wear, on occasions of ceremony, the distinctive army badge ordered for or adopted by the army corps and division, respectively, in which they served.

Approved, July 25, 1868.

#### [PUBLIC RESOLUTION—No. 56.]

A Resolution to admit certain persons to the Naval Academy.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Navy, and he is hereby, authorized to receive for instruction at the Naval Academy, Annapolis, not exceeding six persons, to be designated by the government of the empire of Japan; Provided, that no expense shall thereby accrue to the United States; And provided further, That the Secretary of the Navy may, in the case of the said persons, modify or dispense with any provisions of the rules and regulations of the said academy which circumstances may, in his opinion, render necessary or desirable.

Approved, July 25, 1868.

#### [PUBLIC RESOLUTION—No. 57.]

A Resolution relative to lighting the streets of Washington City, District of Columbia.

Whereas, the municipal authorities of the city of Washington have failed to carry out the arrangements for lighting the streets of said city, in accordance with the provisions of an act entitled "An act making appropriations for sundry civil expenses of the government," approved July twenty-eight, eighteen hundred and sixty-six; It is resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the mayor and city council of the city of Washington, be, and they are hereby, authorized and directed to levy and collect a tax from the property holders of the city of Washington sufficient to defray the expenses of lighting the streets and street lamps of said city with six feet burners, twenty-one nights in each month, from dark until daylight, and keep said lamps so lighted each year.

Sec. 2. And be it further resolved, That the mayor and city council of the city of Washington, be, and they are hereby, authorized to contract with the Washington Gas Light Company for the term of one year, and so from year to year until otherwise provided by law, at such rates as may be agreed upon not exceeding the maximum now fixed by law, for all the illuminating gas required for the streets and street lamps, and public offices of the city and public grounds under the control of said city.

Sec. 3. And be it further resolved, That the mayor and city council of the city of Washington, be, and they are hereby, authorized and directed to increase from time to time, as the public good may require, the number of street lamps on any of the streets, lanes, alleys, public ways and grounds, in the city of Washington, and to do any and all things pertaining to the well lighting of the city, and to levy and collect a tax from the property holders thereof.

Sec. 4. And be it further resolved, That nothing herein contained shall be construed to relieve the said Washington Gas Light Company from paying the internal revenue tax imposed by law.

Approved, July 25, 1868.

#### [PUBLIC RESOLUTION—No. 58.]

JOINT RESOLUTION relative to printing specifications of patents.

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of War shall cause to be prepared and submitted to Congress, in connection with the reports of examinations and surveys of rivers and harbors hereafter made by order of Congress, full statements of all existing facts tending to show to what extent the general commerce of the country will be promoted by the several works of improvements contemplated by such examinations and surveys, and to what extent such improvements shall tend to subvert the general commercial and navigation interests of the United States.
