The Seattle & Walla Walla Rail-

Newcastle, with its rolling stock, shops, wharves, etc., is \$360,000. As we all know, the Oregon Railway & Navigation Company is a very strong corporation. It occupies a field of untold resources and unlimited profit. Its credit is good, and it pays heavy dividends with strict regularity, and its bonds are above par. They have brought much money into the country and have been the sole cause of the great obligations to them for their enter-prise, and the gratitude of our citizens is shown in the fact that they appear only too willing to advance their interest by anting right of way and other privileges. er our people willingly grant it. The late dispatches say that the road is to be ex-tended to the Carbon Hill coal mines, which is we believe more on the North Pacific road toward Natchese Pass than towards the Suoqualamie, which is the pass mapped out for the Seattle & Walla Walla road to become in fact as its name implies. We know that Gen. I who consummated the sale is favorably so far as he himseif is concerned nothing we must have direct communication. The talk about the Columbia being "the na-tural highway to the sea" is all humbug. Such talk is good for children and ignorant or bigoted people who cannot or will not understand that there can be no "natural

even to that malarious s ot and so long as the people of the upper countary remain content, just so long and no longer will they have to remain with that sole outlet. Now our millers ship Walla Walla flour to Portland, from thence by reason of its superiority it goes still further to San Francisco, and from thence it is shipped back again to Seattle in our Territory to within 250 miles of the locality where it grow. It is only one instance of a terriwithin 250 miles of the locality where it grew. It is only one instance of a terrifice waste of time and money which could be saved by means of a railroad direct. Our country could supply the whole of the Sound with case if provided with this road. All their cured meats and bread-stuffs to the extent of nearly a quarter million tons are at present purchased either in the Williamette valley or electrons. road. Until we have direct business com-Sound, just so long shall we be in a measure alientated, but when they receive our grain, flour, live stock, fruit and a hun-dred other of our natural products and in return they send us their coal, iron, lum ber, fish and direct freight we can begin to think that our interests are identical. As it now stands we might just as well be seperated by the Pacific Ocean for all the use we are to each other. Will the O. R. & N. Co. build it? We think they will in self-defense.

In his recent speech at New Tacoma, Thos. Burke gave the following as his sentiments on the railroad question. We ask, what do the people, settlers in a new country ask more. Mr. Burke has placed downwent, shall be faithfully and economically expended for that object, and

"The building of a railroad across the prosperity to this region. Nor would this prosperity be confined to any one lo-cality; it would deffuse itself throughout the entire Territory. Every quarter of this Territory—even the most remote parts—would receive naw life by the construction of such a road. I repeat, there fore, that the man, who, at this time, seeks to awaken a feeling of hostility between the people on one hand and the railroad on the other, is an enemy to both. I am not then an obstructionist. I am not opposed to the Northern Pacific rail-road. The sooner a railroad is built across the mountains the better for all parts of the Territory. But I am oppose. across the mountains the better for all parts of the Territory. But I am opposed, as I always have been, to the policy of withdrawing, for long periods of time, large areas of the public domain from settlement. The policy is an unwise one; an unjust one. When a grant of land is given in aid of a railroad it should be coupled with the condition that the land should remain open to settlement at the minimum government price. In this way substantial aid is given to the railroad and the rights and interests of the settler are protected. But, while I am not opposed to the Northern Pacific railroad, I would certainly, if elected, insist upon its construction on the Tarrisonial. road, I would certainly, it elected, insist upon its construction on the Territorial side of the Columbia river. The Terri-tory is entitled to this; and I believe the company will concede as much."

Larrabee, who fought for the Union and only retired through physical disability, mes out for Hancock he is hounded down by petty would-be republican journals like the Oregonian. There is no lie or statement too barefaced but what they statement too barefaced but what they will publish. Tactics these worthy of the organ of a party represented in the United States treasury by a functionary, a boe m friend of the late vice president Wilson, who condones the stealing of family mementoes and money found on the bodies of dead Union soldiers. The late Auditor of the treasury revelled in luxury on these stealings while the widews and orphans of the brave dead were crying for their own in order to sustain life. "Copperheads" and "Confederate Brigadiers" have kinder words for those who fought to sustain the

Our Public Lands.

According to the report just published oner Williamson, of the general land office, the area of public lands surveyed in the different states and ter ritories during the last year is as follows: Arizona, 308,533 acres; California, 3,782, 630; Colorado, 2,775,601; Dakota, 2,131,-808; Idaho, 225,637; Louisiana, 80,504; supplied from S. okan at one third the Minnesota, 296,253; Montana, 303,413; Nebraska, 709,170; Nevada, 928,604; New Meyico, 1,624,156; Orango, 1,652.

Our country could supply the whole of the Sound with case if provided with this road. All their cured meats and breadstuffs to the extent of nearly a quarter million tons are at present purchased either in the Williamette valley or else in California, while our own products up here are retting for the want of a market. It is our firm belief that the company know all this and much more and that at a no very distant day we shall all be congratulating each other in this city on the completion of the Seattle & Walla Walla railroad. Until we have direct business complete to the whole of your court-house, and see it with their glasses.

There were surveyed during the fiscal year ending June 30th, 1880, 15,699,258 acres of public land and 652,151 acres of trees so that visitors that do not wish to go in your rail cars or beautiful carriages to the Whituran cemetery may go to the d.me of your court-house, and see it with their glasses.

Our Historical Society has waited several years to see if any general move would be made to protect even the humble mound that covered the bones of the massacred dead. It was not undertaken the provided with military bounds by land warrants, 85,522 acres; swamp 184 acres, 1280 acres; locations with military bounds by land warrants, 85,522 acres; swamp lands patented to the states, 3,757,888 acres; lands certified for railroad purposes, 1,157,375 acres. The total area of public land surveyed from the beginning operations up to the close of leaving, as estimated, yet to be surveyed, 1,062,231,727 acres.

THE editor of the Union publishes a column report of Col. Larabee's speech, Washington territory—a strange sort of republican sentiment:

Resolved, That we heartily indorse the present administration of our general government. Such sentiment is altogether irregular and out of order according to the republican plan of campaign. But the people of Vancouver are an aberiginal set anyhow; they are the descendants of old Hudson Bay trappers, and the broad Columbia rolla between t em and the flickering civilization of Orgen. They can't be expected to understand that the republican party east had long ago resolved to preserve a contemptatous silence on all questions that might however remotely refer to R. R. Hayes. There is, however, a view which might be taken of this novel resolution from Vancouver which is this: Hayes has occupied the presid-uhal chair now almost four years, and somebody must write his biography. Few will care to undertake the job, and as we like to see everything utilized and nothing thrown to waste, we suggest to let this resolution stand as a biography of a fraudulest president written by the republicans of Vancouver.

The above from the Kansas City Times, the leading suwapapers of the west, is rather "off" in its ideas. The resolution was not offered solely by Vancouver republicans but by the flower of republican chivalry who at tended their party convention at Vancouver.

Mr. Times, allow us alease to correct you in the content of the present and the president of the content of the content of the present of the content of th mean Quartermaster Johnson's speech—

The Court d'Alene-Like Country is cap-able of supplying it with all the cedar and able of supplying it with all the cedar and other timber it is ever likely to require, but it is to Pen 'd Oreille that railroad men look for their ties and timber for sappying the whole Territory for a cen-tury. The railroad crosses the Lake at Sandy Point following up the north side of the Lake for 30 miles. Brents as a Delegate

Those of the republican press who clair that there is a probability of Brents' election tread upon dangerous ground when they make such statements. Many members of the republican party might, perhaps, vote tency, as long as there was no probability of his election, if they really believed that such an event was within the range of possibilities. Both houses of congress are democrat ic, and are liable to remain so, and whatever favorable legislation Washington Territory receives, must come from the ruling major

Now, if Mr. Brents possesses any quality in an eminent degree, it is the art of thor oughly antagonizing his political opponent He was not in congress three weeks before he made a miserable failure in his endeavor to be recognized as one of the most extreme politicians in that body. The man who wields an influence in tions, and the adoption of the measures he We have no idea of making a personal warfare upon Mr. Brents. But the interests of our wonderful Territory imperatively demands that a man imbured with elements of popularity, who will work for all interest as respective of party, be sent to represent ma so our attorney or delegate. If we were inclined we could dig up the dead past and show up Mr. Brents as a most unscruptions politician, who has hesitated at nothing to beselfit the republican party. The Canyon City election returns are an instance that would disgust every man possessed of any sense of honor. Sufficient at the present to discuss him from a purely political studgoint. It is sufficient for our purpose to show that it is unwise for a Territory to send to a democratic congress an artreme republican partisan, who charges the democratic party. The Demorcacy of Walla Walla County

have presented an unusually good ticket this year. The candidates, without exception, are upright, reliable and conpetent men. For representatives in the Territorial Legislature, Judge B. L. Sharpstein, R. R. Rees and L. K. Pierce are well known to our people and just as favorably as well known. They are the only candidates for the important sales flice on whom the people can absolutely depend. They are decidedly opped d to "no fence" law and will prevent any such legislation for the benefit of a few land monopolists as was attempted by the epublicans at the last session. No men stand higher for integrity and ability in the community at large than these gentlemen. It is not often that the people have such an opportunity to elect such men ey have it, it is to be hoped for the well being of the county that they will embrace it. For Prosecuting Attor-ney, W. C. Langford is well known to be the only one on the two tickets who has only one on the two tickets who has not been mixed up with affairs which will undoubtedly be a bar in the way of the undoubtedly be a bar in the way of the other candidate to the proper administration of his duties. We refer to the recent land jumping business. In this Mr. Langford's hands are perfectly clean. For Auditor, Mr. A. W. Sweeny is the man who will do his duty without fear or favor, he is no wire worker, no political trickster all the time on a still hunt, but and definition who is perfectly canadie of an old citizen who is perfectly capable of doing the work himself. He understands doing the work himself. He understands figures and is a representative of the working population and therefore he needs no commendation. He is entirely deserving and should be elected by a large majority. For Sheriff, James B. Thompson will undoubtedly be elected for he has filled the office before to the entire has filled the office before to the entire satisfaction of the tar payers and we have yet to hear of a single instance where he has taken advantage of opportunities which has certainly been in his power to line the pockets of himself and friends at the symmet of the content. the expense of the people. He is a man to be trusted and the voters know it. Samuel Jacobs for Assessor is an old citi-zen renowned for ability and honesty. He saved the tax payers much trouble and annoyances after the revenue act became annoyances after the revenue act became a law by doing his work in the same good old fashion way and they will remember it at the polls. For Probate Judge, Judge R. Guichard has no opposition and should have nore. The Commissioners are men who can be depended upon and the tax payers may depend that their juterests will be closely looked after.

Russell for School Superinten-dent is the man for the place. He has a practical knowledge of his duties and has educational abilities of a very high order. Dr. Marion is a necessity for the Coro-ner's office and will undoubtly fill the pos-ition. Jesse Drumheller as Sheep Com-missioner will bring a knowledge of his duties derived from extensive experience in sheep to assist him. In fact the demo-cracy of Walla Walla County ought to be congratulated for the high character and capacity of the gentlemen they have put

Judge Burke's Speech.

On Wednesday afternoon Judge Thoma H. Burke, of Seattle, democratic candi date for the important office of delegate to congress, addressed his constituents at sentative to Gen. Garfield to obtain authe City Hall. Large as is the hall it was none too large to hold the large concourse of citizens who flocked in there to listen to one, of whose eloquence they had heard itively refused to answer the last ques so much. Whatever may have been their expectations they were not disappointed. The Judge commenced his speech by taking up the different political issues of the day, and more especially did he devote imself to sectionalism, and when he told his hearers that the republicans were trying to make the people believe that the democracy of the country were traitors, he told them if that was the case, then 250, soldiery, in Mexico. SEATTLE AND WALLA WALLA RETURNAL.

The O. R. & N. Co. who recently purchased the Seattle & Walla Walla regread, says the Seattle & Walla Walla regread into a contract with the Seattle Cod Company to transport the product of their mines over the road at a stated price per fon, for great or small quantities. The rates for the first year will be some higher than the succeeding ones, in order to enable the new company to make the necessary improvements in and about the coal wharves. We understand the new company will take charge of the road to-day. T. P. Oakes, vice-president and general manager of the O. R. & N. Co., and George J. Ainsworth, superintendent of one division of the company, were out over the road on Monday, and expressed themselves as quite well pleased with it.

Warnisoros, Sept. 22.—The Treasury bepartment was in the receipt some time since of a communication from the chief of the detective corps of San Franciso containing state ments which road like a highly wought-up bery and marital in5delity. The story in brief as follows: Two gentlemen, friends of each other, with their wives, were traveling in California. One of them had in his possession a number of registered U. S. bends. The sight of the bonds excited the capidity of his friends who also coveted his neighbor's wife. The two men walked out together one afternoon to view the mountain scenery. The owner of the bonds was never seen again, and his companion reported that he had accidentally tumbled down a frightful precipice. Subsequently, while in the recesses of a vast forest, the man tied his own wife and burned her to death. Then, in company with the wife of the missing man, he made his way back to San Francisco, and with her consivance personated the owner of the bonds and endeavored to negotiate the sale of them. The two were shadowed and found to be living as husband and wife, the man assuming the name of the friend whom he was believed to have murdered. Such is the outline of the detective's story, and as may readily be imagined the treasury officials wight come for the transfer of the bonds to be another service, Nothing was heard until quite recently, when a letter was received from the attorneys of a lady living in Kamass. The lady states that she had any abasquent knowledge of the movements of the mandere. The first comptreller has decided that before the bonds can be transfered to be one of the bonds, but there is nothing to indicate that the was an accessory, or that she had any absequent knowledge of the movements of the mandered. An account is then given in the proposal between the real story and the somewhat mixed report which we here publish.

A BOOK POR THE STOCK FARMER. - We tions were not be the possessed of sheep, swine and poultry. It is a handsomely bound volume of over 1000 pages and called "Manning's Illustrated Stock Doctor and Live Stock Encyclopedia," Brock all facts concerning the various breeds in the present tariff which should be re-adjusted. The democratic executive committee of Indiana, issued an address to democratic and independent voters on the result of moving south. Meteors and northern lights may now be looked for.

Mai Brocke of Whiteparty is a disappointment to us all. It was as much a surprise to themselves as a mechanism and stock raiser; the time is now come when better stock is looked upon as a necessity and therefore the more valuable the stock the greater care must be taken of them. The book has 400 illustrations and 2 charts illustrating the ages of horses and cattle. While it is not written in the interest of any particular broad of stock great care is taken to give a systematic idea of the best kind for investment. It is a handbook for both study and reference for the farmer and will enable him to turn the industry of stock raising to profit. A sample copy can be seen at the Statesman office. Four good agents are required as the book will only be sold by subscription. Mr. P. O'Neil is the agent here to whom canvassers must apply. We predict a large sale for this first-class work.

Among others were Grafton Thomason, Chan Lyons, W. M. Cook. J. Lackey, Joseph True, James Cannon, Richard Falks and Thos. Walker. It appears that Thomason, a lad of about 16 years of age, was detailed to cook for the party, and on the morning in question Lyons, before starting to look after his rattle, called Thomason to get up and prepare breakfast, when angry werds passed between them, in which Lyons return to camp Thomason. Upon Lyons return to camp Thomason opened fire upon him, inflicting a flesh wound in the left side, whereupon Lyons fired killing him instantly. Lyons is from Texas and has a bad counten ance. Both the dead and wounded were removed to a point near Fort Hall agency, where a physician dressed the wounds of the latter and the dead man was buried. The murderer was arrested and conveyed to jail at Malad.
