SOUTH DAKOTA DIVORCES.

A New York court has given a severe blow to South Dakota divorces in a devis-ion just rendered by Judge Pratt of Brook who were married in New York in 1875 who were married in New York in 1875, taking up their residence in Brooklyn abortly afterward. They separated early in 1891 for some unexplained cause. In the asummer of that year the husband went to live in 810nx Falle, 8. D., and in September obtained an absolute divorsthere from his wife on the ground of descrition. Six days after the decree warganted he was married to a young lady of Newark, N. J. Failin in her efforts to have her husband prosecuted in New Jersey for bigan-y and in Brooklyn for abandonment, the first wife brook, ht will Brooklyn for abandonment, the first wife brook, the will Brooklyn for abandonment the divors. The abandonment, the first wife bra_ht suiin Brooklyn for absolute divorce. Thsupreme court has pronounced judgment
in her favor, and likewise declared in its
decree that the divorce obtained by her
husband in South. Dakota is absolutely
void, because the wife was not served
with any ammons or notice in the proceedings instituted there.

The decision is considered sound by
competent legal opinion. It presents the

competent legal opinion. It presents the anomaly of a person being married in one state and single in another. The decision is a notice to persons who try to take ion is a notice to persons who try to take improper advantage of the lax divorce laws of South Dakots that they may be subject to criminal proce- ution or divorce proceedings in the state in which they really reside.

How dear to this heart is the high turiff system, when fond recollection presents it to view; we love it because it makes dupes of the millions, and benefits truly are reaped by the few. 'Tis the well springing up from the fountain of labor; springing up from the fountain of labor; we've got naught to do, e'en our fingers to soil; the lots in the city, and the lands that are nigh it, e'en all of most value we've bought with the spoil. That blessed old tariff, we surely have reasons for loving it well. That time-honored system is truly a treasure, for often 'for-lection, is the heat of the fray, when called on for lunds we chip in with pleasure, for the people, after all, will have it cause on or runos we crip in with peas-ure, for the people, after all, will have it to pay. How bravely we fight whene'er its in danger, and quick on the voter we instantly fall; we staff his dull noddle, to which brains are a stranger, with ideas patriotic, and it only takes gail. That blessed old tariff, that iron-hound tariff. we surely have reason for loving it well.

ols Were the Speakers

Mason's opera house was filled to over-flowing on Monday afternoon to listen to the exercises in commemoration of the fallen heroes. Mr. J. T. Sinclair, chaplain of Mease Post, offered prayer, music was rendered by the choir, and then Capt. J. M. Thomas introducts on Mason Nick. H. Thomas introduced ex-Mayor Nichol s the first speaker for the after all know Mr. Nichols' capab.lities, and on this occasion he did not fall short. He on this occasion he did not fall short. He cited the encotion aroused by such recurrence of the 3.th of May, and paid a very fitting tribute to the women who gave their sons, husbands and brothers to carry the flag we all love to the front. The inequation remained with the men, and the same flag, although rent and torn, came has k more glorious than ever. He closed, impressing upon the youth the value of impressing upon the youth the value of patriotism and the duty they owed the old soldiers for services rende

This address was followed with music by the choir, after which Capt. Thomas introduced Col. T. V. Eddy, of Jlympia. Seldom has North Yakima been treated to so able and eloquent an address. After a neat introduction Col. Eddy took f r his first silvision the effect of death from life, beginning with the foundation of this great republic—the pure blood shed, the noble bodies alian to establish a principle. That same principle still lives, and today, though a peaceful country, with no compulsion as to military duty, our men are ever ready to maintain it it costs again the bone and sinew—the-best of the land. He vividly portrayed the condition of our country when the This address was followed with musi best of the land. He vividly portrayed the condition of our country when the call for arms was made during the rebeliton, coming to men of every occupation; how it was listened to with sadness at first on account of the disruption, yet the noble response it met with and the will ingness with which men seemed ready to give their lives if necessary. He, like Mr. Nichols, pointed out the duty of young men to make the pathway of our veterans as free from caree and tangers as possible, and repeated a well-known truth: that those best adapted for this duty were those who are morally, physically and spiritually in good condition. The Colonel then related incidents of his home life, and the tale of the enlistment The Colonel then related incidents of his home life, and the tale of the enlistment of his old father brought tears to the eyes of the majority of his listners. He closed with a touching tribute to the herces who have fought their last fight, whose good that they have done lives after them, and whose faces and memories are as well known to our children as they are to the men who were with them on the field.

Capt. Thomas then made a few remarks, and after three rousing cheers for the speakers one of the best meetings

First, there was Vancouver. A pretty town. A place of green, bejeweled with dowers. But it was a long way around and when one hasto pass through another state to reach the convention in our own it is annoying and called forth much comment.

The people of Vancouver were hospita ble and anxious to give the visitors enter tainment, but the feeling of the delegate was that important business had the right-of-way, and that pleasure must be side-tracked for the time being, and this

favor of Cleveland and the mention of his name was sufficient to induce rou-ing cheers and other demonstrations of publicapproval. After the adjournment Secretary Hazzard sent a misteading and untruthful despatch to Senator Hill whi has brought down on his bead the bitteest of denunciation, and the general seng timent of the state democracy now is
that he must be shorn of his official,

There is a strain of courseness in papa, or perhaps I should say-for the impression it leaves is primarily nega-tive of scorethics means an iconhave to blush for it before strangers. But

is so splendidly healthy. Tussnay—I am learning to walk. More-over I have fancied in myself during the day a tendency to fall in love with my nurse. On the pretense that walking might give me bandy legs she caught me up and pressed me to her boson. We have no affinities; indeed, beyond clean-liness and a certain unreasoning honesty, she can be said to possess no attributes at all. I am convinced that a serious af-fection for her would be nothing short of intellectual suicide; and yet for a while I abandon myself. I must not fight agains

The Papacy and France.

One of the most remarkable of recent European events is the action which the Pope has taken in regard to republican government in France. Not in man-generations has any Roman Pontiff take a step so contradictory of ancient and established principles, so contrary to the established principles, so contrary to the past of the church and in every way so worthy to be called a new departure at that which Pope Leo has taken in regard to the relations of church and state.

Never before has it broadly and unmistakably stated from the chair of St. Peter that it is the duty of the church to recognise and work in barmony with any governies and work in barmony with any government.

nise and work in harmony with any government, be it monarchical or republican which has been established and which is maintained by the will of the prople. Hitherto republics have been tolerated Hitherto republics have been tolerated rather than approved, as in the south-rap parts of this continent, and as until now in Europe. The divine right of kines has for a long time been inseparably connected with the Catholic church. The anolating oil had its virtue from Rome; and where the Lord's anointed was not it was a schismatic government. This latest papal manifesto amounts to revolution. It vests the sovereign power in the popular will. Whatever may be individual views of the papal system,

FRANK J. CHERKY makes outh that he is the senior partner of the firm of F. J. Some months ago I had occasion to visit South Dakota, and while in the valiev of the James river spent some time in examining the irrigation enterprises unde development there from water obtained by sinking artesian wells. I was favor-iably impressed with what I saw. Here in the Moxee valley, which extends east and northeast from North Yakima, to-ward the Columbia river for many miles, the same method of securing water has been successfully applied. The moving spirit in this enterprise is the Yakima Land Company, who purchased from the Northern Pacific railroad, and by desert filings, a large body of arid land in this valley. The officers of the company ar-as follows: President, A. K. Hiscock, our of Senator Hiscock; whe president, ent there from water obtained son of Senator Hiscock; vice presiden Fred R. Reed; treasurer and general man er, Henry B. Scudder; secretary, W.

L. Steinweg.

The Yakima Land Company have been reward by finding an abundance of water.
One of the fi wing wells is 314 feet deep, the other 34 feet deep. They are within 330 feet of each other, and when water found in the second very little difference was seen in the flow of the other. A renarkable fact is that the temperator markable fact is that the temperature of the water in each is 74 degrees. The combined flow of the two amounts to 1, 15,800 gallons every 24 hours, and this is enough water, Mr. Scudier says, to ir-ri. ate 500 acre of land. Other wells are being rapidly sunk and the process of applying the water carried rapidly forward. The land under these wells is being sold for 440 per acre, on terms of one-axth cash and the balance in five annual owments at 8 per cent interest, the pur-

payments at 8 per cent interest, the purchaser being given a perpetual water right by the payment of \$1.00 per acre per annum. Hundreds of neat farmhouses will soon dot this fertile valley, now covered only by a sparse growth of sags brush. Hop yards and orchards will be planted here in the near future; all the results of nature's wise provision for these arid regions—a wonderful underflow of water. People are coming from far and near to see these fi-wing payments at 8 per cent interest, the pur from far and near to see these flowing wells, and all invariably, express themelves as well repaid for the trip and a irm believers in the feasibility of irrigs tion by artesian wells

She was certain that her mother would not approve of such a sudden acquaintance, for Aunt Virginie went on talking the this stranger as though he were an old friend.

"I shall tell her." Madelaine thought, "that German story mother gave me to read, where the heroine dances and talks with a stranger all through the evening of a masked ball, and then after super, when every one unmasks, the unknown cavalier turns out to be the common hangman. hero: it was very, very sad that death had stepped in to part such a pair of lovers.

The girl wondered, while she listened, whether apecial qualities belonged to special features, and whether Monsieur Henri, who, according to Mademoiselle Chaumelle, was the living portrait of her dead Marrice, possessed his heroic nature.

Since that first day it had been difficult for either annt or niece to think of any one but Monsieur Henri, he had taken such complete possession of them both. He came to see them every evening, and before he left them he planned one delightful expedition for the next day.

One morning he persualed them to drive to Jumieges, and they had dined at the little inn there, and driven home in the dusk beside the river. Another day they were embarked on a much longer journey.

They had driven over to Lillebonne, and after seeing its lions they were now bound for Tancarville, a pretty little village with an old castle beside the Seine. Monsieur Henri had assured them the days they give the morning the pretty little village with an old castle beside the Seine. Monsieur Henri had assured them they could lodge at Tancarville, as the days

Monsieur Henri had assured them they
ould lodge at Tancarville, as the days
were now too short for them to return
to Caudebec the same evening. Madelaine thought the plan delightful. It
seemed to her like some happy fairy tale.
When they were leaving Lillebonne,
Mateuniselle Chaumelle had greatly
surprised Monsieur Henri.

"Do you mind exchanging places with
me, monsieur? I will sit beside the
driver," asid the old lady; "I shall get a
better view of the country."

Madelaine felt pleased: ahe had grown
tried of her role of listener. Since that
first day Monsieur Henri had talkel exclusively to her aunt, answering any remark of her own as briefly as possible
and ealine of the chance of showing
that she knew how to behave. Monsieur Henri toloted as if he also liked the

Madelaine thought he said this a little sadly.

"Glad—oh, dear, no. I am so fond of being at Caudebee with my aunt. Beddes"—She hesitated, and there came a panse of silence.

"Do you mean," he said presently, "that you are happier here than you would be at Rouen?"

Madelaine gave an impulsive sigh She longed to tell the trouble to Monsieur Henri. In these four days spent together she had seen as much of him as ahe would have seen in a much longer series of occasional visits; she liked him very much, though he did not seem to care about her, and she was sure that he might be treated.

"That was a heavy sigh," he said at last: "It sounded as if some trouble were waiting for you at Rouen."
Madelaine darted a swift glance at him,

Madelaine darted a swirt grance at man, and she saw that he was smiling.

"You say that as a joke," she said.
Suppose it happens to be real earnest?
Suppose there is trouble—something horrible waiting for me when I go back to Ronen?

There was such a pathetic reproach in her dark eyes that Monsieur Henri looked grave at once.

"I am so corry." he said: and Madelane thought how fail of sympathy his voice was. "I wish I knew the nature of this horrof thing: because I might perhaps be able to help you."

"Thank you ever so much."

"She gave him a grateful glance, and Monsieur Heart thought he had never seen her look so sweet: till today he had had so little talk with her, and it was when she talked that Madelaine's accebecame expressive and sweet. Every moment be grow more fascinated with his companion.

Mademoiselle Chaumelle protested a little, but she allowed herself to be helped down and placed by the side of her niece. It was really a great relief to her to find herself once more in her proper place. It had seemed to her only kind and natural to give Monsieur Heart of the bance of talking to the bright young girl incread of always being perched up in the box seat, but while she sat there in silence it had occurred to Maleuod-selle Chaumelle that, although Monsieur Heart evidently admired her niece, he had not spoken to her on the subject, and her brother and sister-in-law mixth justly blam her for giving him this or the proportion of the sampson, N. Madelaine remem-bered ever so many things she would have liked to talk to Monsieur Henri have liked to talk to Monsieur Honri about: perhaps they might not be left together again; and though Annt Virginie was so nice, it was quite different to talk before a third, person, the girl thought.
