money in land speculations.

FROM PORTLAND TO SPORANE VIA YAE, MAL—Rallway Engineer Ogilbe, who has been surveying the route from Portland through Yakima to Spokane Falls, left for Portland, Tueeday to await further orders. He has completed the map of the country traversed by himself and party and submitted his report. When interviewed by a HERALD reporter previous to leaving he stated that the route was entirely feasible for economic railroad building and operation and that there were no more difficulties to be overcome than prevented by a travel to the process of the horse and arrived home in an almost insensible condition and was met by his family who had heard the shots. All that night Mr. Stone was speechless and had a hard tusele for his life but finally pulled through all right.

AN EASTERN SCIENTIST.

He Writes of the Wingless Locust From Washington Territory.

A small box containing an insect, also a letter of date 25th ult., were received by me from North Yakima, Washington. They were sent by my friend, Mr. George S. Courter, formerly of Jamesburg, N. J. Says the letter, "the bug was captured by me to-day, and no one around here knows what it is." Can you enlighten us on the matter?" I had never seen a specimen, and the anomalous thing threatened to elude identification. But in detective parlance—

It is pretty hard to play the quiz, If but a fellow shows his phiz.

So I must look my object in the face, despite the saying, one should not look a git horse in the mouth. With glass in hand the mandibles and oral armiture were examined: When tracing the name of a natural object it is something to be of a natural object it is sometima; to be positive as to what it is not, since that brings ua nearer to what it is. A mere glance got the creature down to the Or-thoptera, and soon it was landed into a restricted family of the same, the Locustididæ. And here science is ortnodos where the people are not; for it applies the word locust exactly as does the Bible, to certain of the grasshoppers, and not to the cicadas, as is done in popular

speech.

But there are fully six genera of the But there are fully six genera of the lougust proper. So on looking farther a peculiarity of the feet is noticed, which throws our stranger into the group known as the Stranger linto the group known as the Strangelmatic. The term is built up on two Greek words, and is intended to mean the "narrow-soled locusta." This will bring us to the genus; but as this contains several sprc.es, which of these is it? Looking at the specimen again we observe its ornamentation; the abdomen is banded with alternate rings that a special white. The code the quest for it decides the species, namely, fasciarius, the banded. Thus the search for title is closed, and the scientific name of our interesting stranger is found to be strongelments fasciants, the (thund to be

our interesting stranger is found to be stenopelmetus fasciatus, the "banded nar-row-soled locust." Hence the technical term is really pictorial if only understood. The specimen sent me is a male, and wingless. This is true, also, of the fe-males, for the species is entirely apterous. And mark the interesting fact which here And mark the interesting ince which neer comes out. In our wast country we have some forty kinds of true locusts. Of these twenty-three spe, ies are wingless, or have these organs abortive, so that flying is impossible. Hence the usual habitat of these apterous ones is in treeless regions. these apperous ones is in treetees regions. Prof. Thomas, who first described this insect, says the species is found in Wyoming, Utah, Southern Utah, Southern Idaho and Texas. They are, however, rare. The conditions of life are somewhat hard with them; hence they cannot be uncareable housessee becomes a source.

must go into the cabinet in such a mutili-ated condition. But even thus—how ang-gestive of the wisdom of the creator! "Sermons in stones?" Yes, verily! But in this bit of defunct animation is a treat-ise on the relation of the environment, and the economy of the forces in nature. Usually science is too soher-faced to countenance the puinter. Yet this heav-enly-even one has her tender, hunger enly-eyed one has her tender humor. This, now the "banded narrow-sole" of them to be extended flat or with head rests when prepared for bedding, and the tribe locustide, had to wait the coming of the Wise Men of the East, the tenderloots of the colleges, to give it such early section there is also provided a moyenteened, and make it another contributor to the understanding of the divine ways in nature—for the correct knowledge of even an insect may reveal "things unattempted in prose or rhyme."—S. L., in Monmouth (N. J.) Democrat.

seized one out of a number of foresters who were sleeping together in a hut, carried him off, and deliberately made him over to her cube to play with, while she protected their innocent gambols from being disturbed. His companions were eventually forced to take refuge in a tree from her savage attacks. The tigrees went back and stood over the protected strom her savage attacks. The tigrees went back and stood oyer the prostrate form of her vietim and parred in a calike and self-complacent manner, rulling over the apparently lifeless body. She then lay down a few yards off, and with blinking eyes watched the gambols of her young progens. In a few moments the man sat up and tried to beat the young brutes off. They were too young to hold him down so he made a desperate attempt to shake himself free, and started off at a run; but before he find gone twenty yards the tigress bounded out and brought him back to her cubs. Once more the dozmed wretch had to defend himself over again from their playful attacks. He made rewretch had to defend himself over again from their playful attacks. He made reviewed attempts to regain his freedom, but was seized by the old tigress and brought back each time before he had gone many yards. His groans and cries for help were heartrending; but the men on the tree were paralyzed with fear and quite unable to move. At last the tigress hereelf joined in the gambols of her cubs, and the wretched man was thrown about before beginning to feed on them. The man's efforts at escape grew feebler. For the last time they saw him try to great way on his hands and knees towards a ligited part of the weight of the body, mucus and milky discharges, eligible to the body, mucus and milky discharges, of the body, mucus and milky discharges, of the body, mucus and milky discharges, to see the seed of the hidneys. If you have any of these symptoms do not delay, but save time, money and health by using Oregon kidney Tea—a safe and speedy remedy.

—Thousands have been relieved of ingestion and loss of appetite general elevite of ingestion and loss of appetite yet a single greater than the complex of the —Thousands have occurrenced a single large fig toes, with the cubs clinging to his limbs. The final attempt was as fulle as the rest. The tires brought him back once more, and then held him down under her forepaws, and began hellving mea nefore their eyes.

And There Shall Be No More Poisons,

The darkness shall pass away. Pol-aons shall no longer be given to the sick. The laughing babe shall be a joy to its parents, for it shall be fed with the prin-ciples of life when sick and not with the seeds of death, and health shall be its guardian angel. The wife shall walk along the pathway of life and she shall be beautiful. She shall be happy, con-tented, for no disease shall lurk within the sacred temple of her humanity, and the sacred temple of her humanity, and the sacred temple of her humanity, and her husband shall walk by her side in manhood's vigor, with step firm, nerves steady, eyes clear, mind self-poised. No alcohol shall fire the blood or scorch and burn tissue. No quinine shall debit the membranes, dest.c; the wonderful mechanism of the ear or the beautiful windows of the human soul—the eyes. Quarrels, bickerings and senseless strife shall cease and in its place calm reason shall sit enthroned. Wars and epidemies and distempers and racking fevers and rheums tempers and racking fevers and rheums shall, together with their prototypes quince, calomel, aconite, alcohol, optum, belladonna, chloral, be gathered to that place described by Shelley, thus: "Immediately before his eyes appeared a place, asd, noisome, dark—a lazar-house it seemed—wherein were laid numbers of all diseased. All maladies of ghastly spasms or racking torture, qualms of heartsick agony, all feverous kinds, convulsions, epilepsies, fierce catarrhs, intestine stone and alcer colic, pangs, pangs, demoniac frenzy, moping melancholy, madness, and wide-wasting pestilence."

—Exchange. tempers and racking fevers and rheums

A New Style of Cars.

The Northern Pacific has just received twenty new colonist sleepers from Barney, Smith & Co. that are models of beauty, convenience and comfort, and contain many improvements over the ordinary colonist sleeper, or so-called tourist car, generally in use.

Each car has fourteen sections with gentlemen's toilet room in one end, and the ladies' room, supplied with marble-topped washstand and force pump, in the

insect, says the species is found in Wyoming, Utah, Southern Utah, Southern Idaho and Texas. They are, however, rare. The conditions of life are somewhat hard with them; hence they cannot, by increase, become a scoarge.

I find myself much interested in this lift of very homely animated nature at which I am looking for the first time, and even seem to be writing about it on time simple impulse of instinct, and not without regret that the interesting thing must go into the cabinet in such a utalitated condition. But even thus—how suggestive of the wisdom of the creater! eight Acme lamps exactly similar to those

eight Acme lamps exactly similar to thos in use on Pullman sleepers. The section are divided by sliding head-boards, effect are divided by shoring head-boards, effecting a privacy not possible in the present style of cars, where the the sections are separated by a wire netting. An ingenious arrangement of the seats enables them to be extended flat or with head

Notwithstanding the fact that the Northern Pacific employs a porter to look after these sleepers, all holders of second class Montana and Pacific coast The Man-Eater.

The notorious Jounear man-eating tigress has at last been killed by a young forest officer. This tigress has been the scourge of the neighborhood of Chakrata for the last ten years, and her victims have been innumerable. On one occasion abe sefzed one out of a number of foresters who were sleeping together in a hut, carried him off, and deliberately made him over to her capte to slare any tide. en zers, leads all its competitors.—The
