SEMI-WEEKLY MAIL.

Among the memorials passed by the Leg-Port Townsend is one of the most important. The convenience of the people and the growing interests of trade demand an init is to be hoped that Congress will grant the unaided exertions of its own citizens saving what has been wasted on an ineffiwill follow, and in a few years a flourish-

ing state will be formed.

Governor Cole, the newly appointed guardian of our Territory, arrived at Olympia on the 8th inst. The old Governor has not yet yielded the keys to his to-be successor, and it is rumored that he intends to wait until after being apprised of Mr. Cole's confirmation by the Senate before retiring to private life, so that in the event of the Senate's refusal to confirm, he will still be on the pay-roll. The Honorable Legislature, par contra, has, by committee, signified to the new appointee its readiness to recognize him as its legitimate head, and is ready to receive any suggestions he may have to make. The attitude of the parties has somewhat of the belligerent about it, but we trust, for the reputation of our fair Territory, that all parties

" Will live to fight another day," and not embroil us, in a war, at presen even of bad words and hot blood.

Gov. Cole is presumed to ne a representative of the Johnson policy, and not of the Radical class. If such is the case, it is not likely the Senate will confirm his appointment.

The Legislature, in receiving the new Governor as the legitimate one, gives Gov. Pickering the laboring oar. His vetoer will go under the table, and his proclamations to the wind, unless he can prevail upon

the military to back him up. It is not difficult to conclude " under which king" the Honorable Secretary of the Territory will array himself, and when the Territorial records and seal are transferred to the new regime, it will matter hat little indeed how Gov. Pickering conducts himself, as the incoming Governor will have it all his own way.

We beg the gentlemen to keep cool. The position is not worth a quarrel, and the people of the Territory are not just now prepared to gird on the armor of the soldier and weste their substance in victores living !

N. B .- Our voice is still for peace.

The Union Central Committee of Washington Territory met at Olympia, Dec. 29, 1866, and fixed upon Vancouver as the place, and the 18th of April, 1867, as the time for bolding the convention to nominate a candidate for Delegate to Congress.

Nearly all the communities on this coast were fortunate enough to have elements of wealth that were easily developed with but little expenditure of capital, which caused them to be quickly populated, and their political importance made it easy to obtained for them favors from the general Government; while this Territory, with as many or more elements of wealth, but which require more capital and time to develop, must struggle up slowly by This, it seems to us, is not the proper policy to be pursued by the general Government as a fair proportion of patronage extended to us would enable us to make such public improvements as would open the channels of commerce and lead to a speedy settlement of the country. California and Oregon have received hundreds of thousands of dollars in money and large grants of lands to aid in public works and for mail purposes, while this Territory has received next to nothing, cient administration of Indian affairs, and was a benefit to none but the officials in charge. Let our mail services be increased and assistance given to aid in opening and improving public highways, and the development of the latent wealth of the country

THE OCEAN'S BOTTOM.

Mr. Green, the famous diver tells singular stories of his adventures when making search in the deep waters of the ocean. He gives some new sketches of what he saw at the "Silver Banks" near Hayti:

The banks of the coral on which my div. The banks of the coral on which my dirings were made are about forty miles in

two to three hundred feet, when submerged, and with very little obstruction to the sight. The bottom of the ocean in many-places is as smooth as a floor; in others it is studed with coral columns from ten to one hundred feet in height, and from one to eighty feet in diameter. The tops of those more lofts support a myright of preprints. lofty support a myriad of pyramidal dants, each forming more, giving reality to the immaginary abode of some water nymph. In other places the pendants form penarch after arch, as the diver stands on the bottom of the ocean and gazes through the feep winding arenae, he finds that they will fill him with as sacred an awe as if he will fill him with as sacred an awe as if he were in some old cathedral, which had long been buried beneath old ocean's ware. Here and there the coral extends even to the surface of the water, as if the loftier were towers belonging to these stately temples that are now in ruins.

There were also fish which resembled plants, and remained as fixed in their position as a shrub, the only power they pos-sess is to open and shut, when in danger. Some of them resembled the rose in full bloom, and were of all lines. There were the ribbon fish, from four or five inches to

CHANGE

We have made a change in the form of our paper this week, from eight to four pages, and also increased its size. It has been our intention to make such improvements as the receipts of the office would admit of; but the scarcity of money in the country, making it almost impossible to collect what is due, connected with the fact that a considerable portion of the subscriptions were prepaid to the former publishers of the paper-the time of all which we have to fill without receiving anything thereforhas compelled us to drag on as best we could. The laws are also a hinderance, as they occupy considerable space to the exclusion of interesting reading matter, and we have thought it best to print as much as possible of them each week that they may the sooner be done with. We have to bear the effects of the depression in business alike with the community and do the best we can, and we would ask our friends to bear with us for a little while and we will endeavor to make them a better paper.

The Legislature convened again or Friday last ofter the holidays' recess, and is fairly at work. There is no great amount of important legislation to be transacted, and the principal business of members is working the wires for the nomination for Delegate to Congress. The names of the aspirants are legion-about every third man met at the Capital is putting on Congressional airs, fully pursuaded that the dear people cannot be so blind as to over look his great merifs, and that he will be the lucky man. Verily, Washington Territory has hosts of patriots, willing to sacrifice their convenince for the good of the people. Of course the little perquisites of the office -seventeen or eighteen thousand dollarsbave no weight in the matter, no charms for aspirants,

FENIAN COMBUSTIBLES - Recently a number of magistrates and town conneillors assembled at Liverpool police station to witness experiments with the Fenian combustible fluid recently scized. A portion of the fluid was poured on a quantity of loose cotton and sticks, and in about four minutes it spontaneously ignited. A bottle containing flu'd was then dashed against a wall, which immediately became a mass of flames. The spectators were deeply impressed with the destructive quality of the fluid. Many persons have doubted the existence of a Penian organization in Liverpool, but the Sasa, which are coming to light will undersive them. As an instance of the marvellone unextinguishable qualities of the fluid, we may state that a short time ago Superident Hewitt ponted some of it on cottoe-wool and chips, and placed the whole components and placed the whole completely in water, where it remained for a week; it was then taken out and placed on the floor, and in five minutes had burst into flames.

In New York city, on the 13th of June, by Rev. W. Newell. Charica E. Richards, formerly of Washington Terliney. to Henrietta Constance Folar, of New York city.

The following extract from a San Francieco paper, is a graphic description of the fate severe storm in that vicinity :

"The gale of Tuesday night contined on pight Wedn set y and y sterday morning. It was not quite as severe as the first, and the results along the water front were better ressels along the water frost were better prepared for it, having cables and chains inde fast and fenders hing between their a des and the piers. The Columbia, which was sink the night before, lurched forward and has almost wholly disappeared from sight. A large portion of the sind embank-ment on Fourth street, below Brannan, was washed away, and the planking upon it settled down so that people were not allow-ed to pass over it. The waves on Mission ed to pass over it. The waves on Mission Bay were black with mad, and rose almost eves with the surface of Long Bridge. The breakwater of the Mill Company's dock, and the dock itself, suffered again considerand the dock itself, sour-red again considerably. Several old scows were sink inside of Long Bridge, and the waves have cut into the embankment along Brannan street, clear up to the railroad track in places. A great number of bales of straw and hay were placed along the water's edge, which served to break the violence of the waves. Shortly after noon the copious rains fell and it abated considerably. Business along the city front, particularly on the lumber, grain and produce wharves, was nearly suspend-ed. The Alameda ferry boats at great risk managed to cross the Bay early in the morning, but dared not attempt to return. All along the city front the basement of the atores were converted into cisterns by the atores were converted into cisterns by the turrents of rain that fell without intermission for hours at a time. So heavy was the rain between 7 and 8 o'clock in the evening, that the streets were as deserted as if it had been middight. The oxtraordinary fall of rain caused perfect cataracts to be formed on some of the steep grades in the turns over a of the circ and the water, as it. formed on some of the steep grades in the sipper parts of the city, and the water, as it came coursing along tore up the loose soil, with which many of the streets had been graded, in a most extraordinary manner, esting gaiches in many places in a few minutes, as large as a hundred men would expayate in a week. Near the crossing of Pacião and Hyde streets, such a gulch was cut, nearly entirely across the street, twentyfeet wide and from ten to twenty feet deep. Another was formed at the corner of Hyde and Jackson streets. The quantity of med and water that was carried down of Hyde and Jackson streets. The quantity of mod and water that was carried down to Sutter street was so deep as to stop the cars. On Polk street the water washed away so much of the grading under the rails, that it was ensufe for the cars to run in the afternoon. The cars were also stopped from running at the corner of Sutter and Polk attreets by the mud and water. On Howard street, beyond Ninth, the cars by a decrease the sail having been washed from under the sleepes and four ears, of the track, were piled within a short distance of each other, cutting off all travel by rail. The Kearny street cars did not run south after 3 o'clock, in consequence of the damage done to the line.

WE THINK THERE IS no Medicine so efficacions in removing humors from the blood as SCO VILL'S BLOOD & LIVER SYR. UP. It is recommended by Physicians in all parts of the country, for the cure of Scrofula, and other diseases of the Cuticle. Pimples or Sores indicate that the system is out of order. Unless something is done to cleanse the blood of these impurities, the result may be a more serious disease, such as Scrofula, Syphilis, etc. Those who wish to find a most efficacious remedy, and yet have no confidence in Patent Medicines generally, will never regret a trial of Scovill's Blood and Liver Syrup.
