

DOH employees combine to make cost-cutting suggestion

Joel Freeman and Gary Soderberg are both currently working in the Community and Family Health Division of the Department of Health. They recently discovered a more cost effective way of inventorying and ordering stock room supplies that will provide the agency thousands of dollars in first-year savings.

Currently, the Department of Health contracts the services of Central Stores to inventory, order, and stock their supply rooms. Freeman and Soderberg suggested that a current Full Time Employee at the agency take on the duty. This innovative idea will save the Department of Health \$38,400 in the first year, and will also help decrease needless overstock.

The Productivity Board is committed to excellence in public service by demonstrating leadership. The Employee Suggestion Program and Teamwork Incentive Program encourage public employees to create, innovate and apply first-rate ideas.
