

**CERTIFICATION OF AN CENTRAL COUNT DIGITAL SCAN SYSTEM AND
DIRECT RECORDING ELECTRONIC VOTE TALLYING SYSTEM**

In November 2005, Hart InterCivic requested the review and examination of an digital scan electronic vote tallying system and a direct recording electronic system under RCW 29A.12.020, 29A.12.080 and WAC 434-333-107.

Having met all requirements of Washington State law, the Office of the Secretary of State hereby certifies the system as a central count digital scan vote tallying system and polling place based direct recording electronic system, and approves it for use by County Governments of the State of Washington when used in compliance with the procedures contained in this certification, the accompanying Report and Findings, and Washington State law.

As the federal independent testing authority qualified the eSlate DAU as meeting all standards of the FEC 2002 requirements, the Secretary of State also certifies it as capable of meeting the disability access requirements in Help America Vote Act Section 301.

This version of the system, federally qualified under NASED N-1-04-22-22-004 (2002), consists of:

- *Hardware* comprised of:
 - eSlate, Precinct Voting Machine (DRE), ver. 4.0.19,
 - Judges Ballot Counter (JBC 1000) device, ver. 4.0.19,
 - eScan firmware v.1.1.6,
 - VBO Firmware, v.1.7.5,
 - Mobile Ballot Box (MBB); PCMCIA flash memory card

- *Software Version 6.0.*, comprised of:
 - Ballot Now; version 3.2.4
 - BOSS; version 4.2.13
 - Rally; version 2.2.4
 - Tally; version 4.2.8
 - SERVO; version 4.1.6
 - Boss Util. 2.4.14

Certified on this March 28, 2006

SAM REED
Secretary of State
