POETICAL SELECTIONS. OUR OWN. If I had known in the morning, How woefully all the day, The words which would trouble my mind,

Impending European War. Despite the efforts of diplomatists it is clear that the danger of an European war has not been averted, and there are abundant indications that the state of the weather is the most effectual hindrance at present to the commencement of hostilities between Russia and Turkey.

STATE PRIDE. A Story Made up of Two Knaves and an Ass. A man who had evidently never before met any of the business agents of "Canada Bill" related to a "Times" reporter, with great accuracy of detail, on account of the clever operations of a slick brace of knights of the road, of which he was a witness.

STORIES OF BLITZ. The Great Ventriloquist and Some of His Experiences. At Exeter, England, in the early part of 1826, he was summoned before the Archbishop and Church Council, prior to a performance, and called upon to answer various charges of irreligion, and as being an "idle, mischievous person."

American Meat in England. The United States and Canada have been turned to sources of a supply of meat and during the past summer, and even up to the present time, both live stock and meat in carcasses have been sent over in considerable quantities.

Winter Quarters of Joseph. We are informed that Joseph and his band have been for several weeks past camped in the valley of a small creek emptying into the Grande Ronde river from the east, and a short distance from the junction of Grande Ronde with the Snake River.

Who Destroyed Richmond?—This is a question they are trying to decide before one of the Virginia Courts. It will be remembered that when the Confederate army evacuated that city before the entrance of the Federals it was discovered to be in flames, and that it was partially destroyed before they were arrested.

IMITATED.—It is noteworthy that ever since Senator Bayard, with dignified scorn and ineffable contempt, a few weeks ago, rebuked Rod West, the few weeks ago, rebuked Rod West, whose criminality in that State is notorious—that degraded specimen of what radicalism is in his State has been remarkably reticent in the Senate.

Real Estate & Insurance Agents. COLLECTIONS A SPECIALTY. Conveyancing & General Agency Just and Equitable.

ROPES AND BELTING FROM THE ENTRAILS OF SHEEP.—Cut belting, a new species of rope, very tough and much stronger, in proportion to thickness, than hemp, is being manufactured at the Willows, North Oakland, from the entrails of sheep.

THE ONLY PROTESTANT SCHOOL EAST OF THE Cascades. The Fifth Year opens MONDAY, September 10, 1876. TERMS: Board and tuition, including fuel, lights, &c., per quarter of ten weeks, \$30.00.

TEAM AND BUGGY HARNESS. Saddles, Whips, Spurs, Harness, Collar Combs, Brushes, &c. And everything usually kept in a first class Harness Shop.

THE PAYMASTER arrived here on Wednesday, and the following day he gladdened the hearts of the soldiers by a liberal distribution of greenbacks.

SINGER SEWING MACHINES are being imported into this valley at a rate that indicates every head of a family as likely to become the owner of a machine.

DIPHTHERIA.—A number of cases of diphtheria still linger along, but no new cases to report. The epidemic is undoubtedly checked, and with warm weather we may expect the disease to disappear entirely.

A HINT.—We would recommend our young friends from the garrison to get passes on an evening when they want to visit town, or we shall miss their genial faces for a time. Company "Q" will be increased.

JOHN MAGUIRE, a new performer in these parts, gave entertainments at Central Hall, on Tuesday and Wednesday evenings. On both occasions he had full houses, and considering that it was a one-horse show he gave very general satisfaction.

CHURCH BELL.—The new bell for the use of the Episcopal Church was hoisted to its place in the bell-tower, Wednesday afternoon, and in future its clear tones will regularly ring out to summon the faithful to worship. This is much the largest bell in the city, and on a clear day its tones will readily penetrate many miles into the country.

OVERDING IRON.—The "local" of a Portland daily rather overdoes it when he devotes full half a column to a "lady fiddler." Space must be cheap when he can afford to spin out a description of a "first appearance" to such an inordinate length. Camilla Uno may be well up in her art, but we think stout "stick fall" would have set her up.

BUSINESS AT DAYTON.—We learn that Mr. S. Gallraith's new brick building at Dayton has been leased by a firm who will at once put in a full stock of general merchandise. Another gentleman is looking for a suitable business stand, and when obtained he proposes to open out a full stock of goods. Both these parties represent large capital, and if they take hold of business at Dayton the town is sure to go ahead. Much of the trade at Dayton has heretofore come to Walla Walla, but with the establishment of new stores our gains from that quarter are likely to be diminished.

ARTESIAN WELLS.—We understand that the experiment of boring an artesian well is now being tried on the bench land a few miles out from town. The experiment is being made on land owned by Messrs. Baker & Boyer, and promises to be a success. The borer works well until it comes in contact with boulders, when very little headway is made. The men in charge of the auger have had little or no experience in that kind of work, and hence any and all failures may be attributed to their ignorance. The borer is owned by a joint company, and if successful in getting water, no way can be quite a number of artesian wells to be sunk this season.

MCDONALD, for years leading salesman for Schwabacher Bros., is revisiting his old stamping ground. Mat has been away some seven or eight years, and in the course of that time visited Europe, drifted through the Atlantic States, and finally brought up in San Francisco, where he flourished as a broker and stock operator. At one time by a series of lucky hits Mac was the happy owner of over \$100,000, but luck turned and he again went down to zero. Always irrepresible, Mac held on and succeeded in gathering enough up from the wreck to leave him "comfortably fixed." Rumor now has it that Mac comes back to take a position with the old house. We hope it may prove true.

IMPROVING MAIN STREET.—The city authorities have under consideration an ordinance requiring the owners of lots fronting on Main street to grade and improve the same. An ordinance of this kind can have no binding effect upon property holders, and the council should so understand. The decision of Judge Lewis in the Seattle case applies to Walla Walla, and practically annuls the city charter. Under this decision there is no law to compel the payment of city taxes, and if in future property holders pay taxes it will be an act of condescension on their part. Lawyers understand that the law of Congress, passed in 1867, expressly prohibits territorial legislatures from granting special charters, and the charter of Walla Walla coming within this purview has been practically a nullity for the past ten years. The members of the council in this and many other matters are ignorant, but certainly the city attorney understands the law in the premises and it is his duty to advise them that as a matter of fact they have no authority whatever.

SCHOOL LAW.—A scribbler in a local paper gives it as his opinion that the school law of this territory is the worst, and the law of California the best now in existence. As a mere matter of opinion this is well enough, but when a writer undertakes to instruct the public, he should give reasons for his conclusions. The school law of this territory is mainly based upon that of Iowa, in which State it has been found to work satisfactorily. The trouble about our law is that it fails to bring in sufficient revenue to pay 49 prices to teachers, and hence it is defective. The tax for school purposes, in proportion to the assessment, is higher in this territory than it is in California, but lacking the wealth of the Golden State, we of course have less revenue to keep up the schools. If ever the time comes for our admission as a State, and Congress makes the usual donation of public lands for school purposes, we may be able to do better by our public schools; but until that time comes, we shall have to be content with our present school system, however imperfect it may be. In this regard we are even now ahead of Oregon, where the tax for school purposes is 2 1/2 mills on the dollar, against 4 mills in this territory. In California the tax for public schools is even less, but with her great wealth the revenue is greater, and hence the public schools are more liberally supported. With a sparse population, and our resources lacking development, the most we can expect is to maintain a system of common school education, and this is all the existing law aims to accomplish.

THE WALLA WALLA TROUBLE.—We have it on competent authority that there is no intention on the part of the military to inaugurate hostilities with Joseph and his band of renegade Nez Perce Indians. As soon as the roads are in condition to travel, a couple of cavalry companies will proceed to the Walla Walla valley and the occupy same, much as they have for the past two years. The idea of using force to compel Joseph and his band to go upon the reservation is not as yet contemplated. This is a matter that more especially is under the control of the Interior Department, and as we understand, it is intended to use every means of persuasion, and if in the end all these fail, then a resort will be had to force. It is computed that Joseph can bring into the field full two hundred warriors, and that with his knowledge of the country he can maintain a defensive warfare that will possibly involve the expenditure of millions of dollars, to say nothing of the loss of life. Under these circumstances, the military will act with great circumspection, and in occupying Walla Walla valley the main object will be to maintain peace between the whites and Indians.

FIRE AT THE GARRISON.—About 12 o'clock on the night of the 1st inst. (Thursday) the alarm of fire was given by the sentinel at the Garrison, the troops responding in an unusual quick time. It was found that a large hay stack, containing about one hundred and fifty tons of hay, was on fire. The blaze was very soon subdued, and a continual supply of water kept on the stack to keep it down. Notwithstanding which it continued to gain headway towards the interior of the stack, dry hay when once on fire being most difficult to quench. A request was finally made to Mayor McAuliff for a fire engine from town, which was promptly responded to by the Mayor in person in charge of one of the handsome engines of the city, and in quick time a strong and heavy stream was brought to bear on the smouldering ruins of timothy, which together with a heavy shower, brought King fire to time. The boys at the Garrison had a night of it, as few of them got to bed before 4 o'clock, to get up again soon after 6 A. M. for reveille.

ATTACHMENT SUIT.—The Oregon Furniture Manufacturing Company, at Portland, telegraphed on Saturday last, that if Trumble & Warren, furniture dealers in this place, did not secure the amount due them for furniture, to foreclose the attachment. Upon examination and enquiry it was found that the furniture had been removed to the auction room of Davis & Gregory, for the purpose of selling the outfit on that day. No time was to be lost. Attachment papers are complicated, and at all times, require a considerable time for preparation. This is particularly the case where the attorneys have no printed blanks—which by the way, every lawyer ought to have—and hence before the process was served most of the articles had been sold, but the money was garnished. Last Wednesday a hearing was had before Judge Wiggins to dissolve the attachment, which was promptly refused.

NEW STOCK.—The San Francisco Cigar and Tobacco Store has just received a new stock of the finest cigars, tobacco, etc., embracing the choicest brands. Those who indulge in the use of the wood will find Sam prepared to supply them with the genuine Havanas. A puff at one of these cigars will at once transfer the smoker to Mahomet's paradise, where he will forget all the troubles of this world and revel in a sea of bliss. Try 'em.

ERAGON EVANS is still pouring out his history of Washington territory in one everlasting stream of words. We make it a rule to read nearly everything that comes along, and now after a careful perusal of all that Evans has published, we are constrained to say that his history is duller reading than last year's almanac. A perpetual flow of words—and that's all there is of it.

W. BYRON DANIELS is occasionally referred to as the editor of a Vancouver paper. We wonder if this is the antediluvian who at one time acted as Secretary of Idaho territory, and returned Wallace as elected delegate by several hundred votes. This fellow should emigrate to Louisiana and take a place on the returning board.

DOORS OPENING OUT.—Mr. Spansall, proprietor of the City Hall, has had the doors so arranged as to open out. In the event of a panic from any cause this change may be the means of saving life. The doors to all churches and places of public resort should open outward, and then in the event of a rush the means of escape will always be available.

STREET GRADING.—We notice that Mr. John Gaston is grading the street in front of his premises, on Fourth street. This is the proper way. Each property holder should grade his own lot, and not look to the city to do the work. In this way the work is done cheaper and better, and without piling up a public debt.

WASHINGTON TERRITORY is out of debt, and if the different county treasurers could make prompt settlements there would be \$10,000 surplus in the treasury. Walla Walla county, likewise, is out of debt, and county script is worth its face. This is all the result of honesty and good management on the part of public officials.

JOHN MAGUIRE, the great Irish comedian, will visit the towns of Dayton, Vaitsburg and Pendleton, at each of which places he will give a series of his highly popular entertainments. We advise our friends to be prepared to give him a cordial reception.

GENUINE NEGROES.—The Georgia Minstrels, a genuine band of negroes, are announced to appear at Walla Walla sometime next week. These are not blacked up negroes, but native born woolly heads, and genuine representatives of their race. There will be great curiosity to see the negro show.

UR FREIGHTS.—The boats now bring up from twenty to thirty-five tons at each trip. It is rather soon yet for spring stocks, and hence the light freight.

MART TAYLOR drinks nothing intoxicating, and for the future intends to avoid the flowing bowl. "Be firm, Mouser."

THEATRICAL.—The appearance of Mr. John Jack and his accomplished company of performers at the City Hall, Thursday evening, drew out a large and fashionable audience. The opening play, "The Child of the Regiment," with Miss Annie Firmin in the title role, and Mr. Jack as the Old Sergeant, was well rendered, and received with much applause. The stage arrangements, dresses, etc., were all excellent, and greatly in advance of anything of the kind heretofore witnessed in this place. We left the theatre at the close of the play, and hence are unable to speak of the after piece. Mr. Jack has brought to our town an excellent theatrical company and we trust that his enterprise will be liberally rewarded.

WALLA WALLA POST OFFICE.—The attention of the postal agent is directed to the Walla Walla Post Office. One of the gentlemen whose name appears on the Postmaster's bond has left the country, and previous to leaving was known to be insolvent. Of the bondsmen remaining two of them are known to be seriously involved, and so it is the government is literally left without security. It is the duty of the postal agent to look into matters of this kind, and hence we make the suggestion.

TEACHERS' PAY.—The teachers employed in the public schools in this city are paid by the month. A month consists of twenty days actual time taught, for which the compensation allowed is as follows: Principal, \$75.00; First Assistant, \$50.00; Second Assistant, \$40.00. The principals are males, the assistants lady teachers. Considering that there is but twenty working days to a month, these rates are deemed liberal, and above the average paid in other pursuits.

TREES AND GRAFTS.—We learn that Mr. Philip Ritz will return from California in a few days with over 13,000 trees and grafts, selected from nurseries on this coast and in the east. With this selection he will have the most complete assortment on this coast, and one of the very best in the United States. During this spring he will sell off a large number of trees at his nursery, to make room for this importation. This will be a good chance to get trees very low.

SALE OF LAND.—Messrs. Ladd & Tilton, owners of an extensive tract of bench land, back a few miles from town, have sold 500 acres of the same to Mr. Robert Kennedy, who will put the whole tract in wheat. The price paid for the land is stated at \$10 an acre. Last year Mr. Kennedy tried the experiment of raising wheat on bench land, and met with unlooked for success. He now engages in the business permanently.

MAJOR FOWLER, pay department U. S. A., arrived on Wednesday, and paid off the troops at the Garrison on Thursday. He stopped at Colville yesterday. Acting assistant surgeon Callender, U. S. A., who has been here waiting an opportunity to proceed to Fort Colville, accompanied Major Fowler. Dr. Callender will relieve Dr. Stedling as post surgeon at Fort Colville.

J. G. Walker, representing one of the largest grocery and liquor establishments in San Francisco, is at Walla Walla, and makes his headquarters at the brick hotel.

NEW HARDWARE STORE.—Hawley, Dodd & Co., have leased the vacant brick building at the corner of Main and Third streets, and will occupy the same as a hardware store.

TINWARE.—Mr. W. O'Donnell has received several shipments of tinware from below, making his stock in that line unusually complete.

NICE TURN OUTS can always be had at Tom Tierley's livery stable, and at reasonable prices.

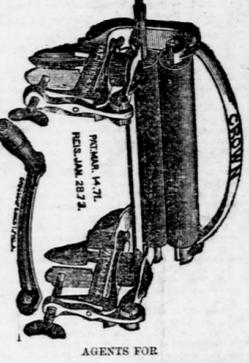

LEMONS, six bits a dozen at Tom Taylor's. No excise for whiskey punches without lemon peel.

YAKIMA MINES.—Our mining news is still more flattering; some parties who wintered in the camp, came out recently after supplies, and reported that they have tunneled into another ledge this winter, and tapped the lode about 70 feet below the surface; found the ledge about 3 feet in thickness, and rich with gold, and are preparing for work in good earnest. Have not yet had the ore assayed out of the last tunnel, but it shows pure gold and to all appearance is as good as any we have had tested. We expect good times this summer.

THE PORTLAND REPUBLICANS hung out a banner in honor of the action of the "counting in" board. The men who rejoice over the blackest crime of the nineteenth century could scarcely be trusted in the neighborhood of a hen roost.

A CARD.—To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a receipt that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the Rev. J. J. L. T. INMAN, Station D, Bible House, New York. 51-52

E. P. FitzGerald & Bro.,

FASHIONS IN HAIRDRESSING.—Very plain styles are now preferred for dressing the hair for the street and for mornings in the house. Cable cords or twisted ropes of hair in two thick loops are worn at the back of the head, drooping low, as chateaux.

Miscellaneous. The father of Abraham Lincoln is buried in a rural cemetery, ten miles southeast of Mattoon, Ill.

"Smoky Jones," known throughout the Black Hills as a vagabond, has become suddenly wealthy by discovering and selling gold veins. He gained his nickname by long disuse of soap, and wealth makes no change in his habits.

The Hon. Robert C. Winthrop, of Boston, has a clock, in good running order, in his house, which was made for Governor John Winthrop in London, about two hundred and fifty years ago, when he was Colonial Gov. of Massachusetts.

The Court of Appeals of Naples has declared against the abolition of the death penalty by a vote of 40 to 13. On the other hand, the Council of Orders, an association of lawyers in Leghorn, responding to a call made upon them by the Minister of Grace and Justice, pronounced in favor of the abolition of capital punishment by a vote of 9 to 1.

A LESSON FOR THE INDOLENT.—There was a duke once who disgraced himself and placed a great rock in the middle of the road near his palace. Next morning a peasant came that way with his ox cart. "Oh, these lazy people!" said he, "there is this big stone lying right in the middle of the road, and no one will take the trouble to put it out of the way."

How STATUES ARE MADE.—The bronze statue just now so popular is manufactured by a simple enough process. Over the clay marble is poured a coating of plaster of Paris, which, having been allowed to set, is taken off in sections—thus affording a hollow mold of the figure.

A man in Indianapolis, Indiana, who was formerly connected with the regular army, has a pair of gloves made from the tanned hide of an Indian who he killed in a desperate hand-to-hand encounter in the Black Hill country.

A CURE FOR DIPHTHERIA.—A correspondent of a Victorian paper writes: Should you or any of your family be attacked with diphtheria, do not be alarmed, as it is easily and speedily cured without a doctor.

LOVELL'S FAMILY WASHER. These Machines are admirably adapted to the purpose designed, and preferable to the more cumbersome Washing Machines. It is probably the simplest contrivance in the way of a Washer that ever came in the way of a man, and one of the most efficient. Equipped with the Machine, the family washing may be disposed of in half the time required by the old-fashioned method, and a great saving of labor to overworked wives and daughters.
