1. Introduction: Grant Cycle and Project Overview

The recent recession resulted in many school districts tightening their budgets. School library resources were hard hit and many have yet to recover. Since materials in science, technology, engineering, and math (STEM) fields date more quickly, collections need to be renewed more frequently. The Washington State Library (WSL) is wants to help school libraries update their STEM collections. We have put together 230 STEM book collections from lists of award-winning books aimed at elementary, middle and high school students. An advisory committee of teacher-librarians selected the books.

2. Library Eligibility

Libraries of all public and non-profit elementary and secondary schools are eligible. These libraries, or "resource centers," or "instructional media centers," must include books and print and non-print resources. They must have an ongoing funding source and designated staff responsible for library operations and services.

3. Availability

We are awarding 230 STEM book collections. Each has 50 books preselected from awarding winning STEM booklists, plus three professional titles for teachers. The collections will be shelf ready, i.e. the books will have jackets and appropriate spine labels. The collections are materials from the 500 and 600 Dewey numbers. Most copyrights are post 2012. There are:

- 120 elementary school collections.
- 55 middle school collections.
- 55 high school collections

6. Requirements

WSL plans to use the grant award to draw attention to both school libraries and WSL using social media (Facebook, Twitter). Digital photos are essential to this process. We would like digital photos documenting the beginning of the project. (Such as the librarian and students unpacking the collection or a photo of a new book display highlighting this new collection.) This will highlight the school library's contribution to STEM education. These photos (2-5) are due February 20, 2016.

We also require a one-page final report, due March 31, 2016. This report will show detail how you are using the book collection to meet the needs detailed in your application. In addition, the report must have five to ten digital photos that document a class and/or individuals using the new materials. We would love photos of projects that result from using the materials. If these photos include recognizable individuals, be sure to include a release form.

7. Assurances
