

Frequently Asked Questions

Below is a listing of questions asked and the responses that we have given. We will update this list as further questions are received.

1. Who should be listed as the contracting authority?

The contracting authority is the person who is able to enter into a contract between our agency and the school for \$1,000. It varies from district to district. If your principal has that level of authority then it's his information and he can sign as the contracting authority. In some districts, all grants have to go through the district business office. In that case they would be the contracting authority and would sign.
