

SOFTWARE NOTES

The first step in the Library eBook process is downloading the appropriate software (Adobe Digital Editions for computers or Overdrive Media Console for mobile devices).

For practical reasons, Adobe Digital Editions is already downloaded to the media kit's laptop computer. If your kit contains an iPad2, the Overdrive Media Console app and the Kindle app are already installed.

Therefore, this training does not include downloading the software, just downloading the books themselves.

Please keep in mind that a patron will need to go through the very necessary step of downloading the appropriate software to their computer.

This process to download Adobe Digital Editions is covered in the Overdrive video tutorial (which you can view via the link on the kit laptop) as well as a handout in the kit.
