PUGET SOUND MAIL,

La Connor, W. T.

JAMES POWER, PROPRIETOR.

SATURDAY, MAY 6, 1882.

THE CHINESE BILL, which originated in the House, has passed the Senate, and if the President should veto it a second time, it will doubtless be passed over his head by a two-thirds vote so quickly as to make his executive cranium swim, as it were. He will have the House to deal with this time and that body is not noted for a disposition to hesitate or mince matters, and to the question, "Shall the bill pass notwithstanding the objections of the President?" a shout of "Ayes" will go up that will echo from the Capitol to the White House. The Senate will not dare hesitate to do likewise.

Speaking of this Chinese question, we regret to observe that certain Democratic papers are strenuously endeavoring to make political capital out of the fact that a Republican Executive vetoed the bill, while certain Republican papers are profuse in their explanations and apologies. Neither of these extremists appear to grasp the "true inwardness" of the question. It is a case of Labor vs. Capital, and vice versa. Sam Tilden would have vetoed the Chinese Bill quicker than Arthur did—undoubtedly quicker, being more of a capitalist and associate of that class—for the President of the United States, no matter what his political affiliations may be, is always on the side of Capital. Disguise it as we may, Capital controls our political system. Capital is "ever strong upon the strongest side," whether that side be Republican or Democratic. The fact is, that instead of "a government for, and by the people," we have a government of and in the interest of capitalists. Look at your U. S. Senate, nearly all millionaires, hedged in from all sympathy with the people by the manner of their selection and a six years' tenure, and then look at an Executive vetoing a bill passed by an overwhelming majority of Congress, and which if submitted for popular approval would receive the endorsement of at least nine-tenths of the people of these United States—and then say whether we have a government of and by the people.

THE JESSE JAMES excitement has reached the shores of Puget Sound and is discussed in and out of the press. One of the Seattle papers has been taken to task for expressing approval of the unceremonious manner of his taking off. Jesse was one of the most desperate outlaws that ever lived, and being charged with innumerable murders and outrages in and about Missouri, the Governor of that State offered a large reward for his arrest dead or alive. A man by the name of Ford watched his opportunity and, finding James unarmed, without any attempt at arrest shot him dead and then claimed the reward. Instead of the reward he was tried and convicted of murder in the second degree, but the Governor immediately pardoned him. Then a cry of indignation went up from the chivalrous Missourians, and the Governor's life stood in peril of lynching or assassination. The better class of citizens approved the Governor's action, while the so-called chivalrous class denounced it. Previous to this a big demonstration was made at Jesse's funeral. The remains were taken to his home where his aged mother wept bitterly over him, and assured the assembled multitude that her son was happier in heaven than he had been on earth. How affecting! We have some doubts about this, unless, indeed, the dozens of sheriffs, constables, bank cashiers, railroad conductors and other victims of his murderous pistol went to the other place, for they no doubt would have protested vigorously against his admission to the heavenly abode. And yet this immortal Missouri highwayman and outlaw received due Christian burial. His remains were escorted by a concourse of mourners to a Baptist church and two ministers of the gospel took turns about in praying and singing for his eternal salvation. And now we learn that Vinnie Ream, once employed by Congress to chisel out a statue of Abraham Lincoln, has been retained to do up Jesse James in lily white marble. Altogether this Jesse James business favors of a linge of romance.

VERY ABSURD.—This, from the Philadelphia organ of the N. P. R. R., is all both as every Post-master in the land is familiar with the distinction referred to. Most of the letters and papers from all parts of the country even now come addressed "Washington," and it being always understood to stand for State or Territory on the address, no one but the merest ignoramus would take it for "Washington City, D. C." But here is what the New Northwest has to say about it, all the same: "The consideration that ninety-five per cent. of the letters addressed to any town and county in the State of Washington would be sent to Washington, D. C., should arrest the purpose to give to the proposed new Pacific State the name of the capital of the nation now bears. It will not be possible to estimate the annoyance and loss which this confusion of post-office names will induce. The division Cascade range of mountains provides for two Territories and ultimately two States. The western should be called Tacoma, from its highest snow-capped peak, 15,000 feet high, a landmark at sea and on Puget Sound; the eastern should be called Columbia, after the mighty river which flows through it."

EXECUTION OF DR. LAMSON.—Dr. Lamson, whose reprieve was vigorously urged by the Government at Washington through the mediation of influential friends in this country, was hanged in England on Friday of last week. It will be remembered we published a few weeks ago an account of his trial and conviction on a charge of poisoning his brother-in-law who held a life interest in an estate which would revert to Lamson's wife in case of death. The following is a cablegram account of the execution, dated the 28th. ult.: "Dr. Lamson was hanged at nine o'clock to day. He was calm and composed. Only three reporters were present at the hanging. The procession entered the prison yard at 8:55 when the death bell was tolling the death-knell. The chaplain headed the procession. He was followed by two prison officials. Their ward prisoner, who, until the time of the starting had been calm, looked awfully pale, dejected and nervous. He was supported by wardens on either side, and was with difficulty able to ascend the steps of the scaffold. He was met by Marwood, the executioner, at the foot of the steps. The operation of poisoning him seemed interminable. He submitted without a word, and hardly seemed to appreciate what was going on. From the steps there was a distance of about sixty yards to travel to the gallows. Lamson was supported with difficulty. From this point he swayed backward and forward, and stared wildly around him when placed under the noose. The chaplain also appeared affected when he began reading the burial service. Lamson meanwhile was supported by two jailers. Just before the cap was drawn he cast down his eyes in extreme despair. Death ensued the moment the drop fell. The chaplain remained by the gallows repeating the Lord's prayer, the body remaining hanging an hour."

The Philadelphia New Northwest says: "Fools who had the conceit that they were wise, laughed and made dull jokes of the project to build the Northern Pacific Railroad through an unsurveyed and unoccupied region across the continent. How little they knew! Where five years ago the buffalo grass, untouched by the plow, cocklebed the present city site of Fargo, a great paper mill is building, a great manufactory of car wheels is preparing, gas-works and water-works have already been established, and that luxury of an overgrown town, street cars, are contracted for. Nothing in history can match the Northern Pacific as a civilization. A Dakota paper states that Charlemagne Tower, of Philadelphia, recently sold his quarter section lying west of Fargo Slough, for \$700 per acre. This land is adjacent to the addition on which the foundry is to be located, and the price is the highest yet paid for any body of land in Dakota. Lots in Fargo, bought two years ago for \$50, have been sold recently for \$5,000."

McLEAN, the man who attempted to shoot Queen Victoria, has been declared insane by an English jury, after a deliberation of only five minutes. The wretched man is said to have had a homicidal mania for several years past, and has imagined that the whole English nation was against him. He is to be detained in custody during the pleasure of the Queen. The manner of the shooting and the actions of the man all confirm the opinion that he really is insane, and that the plea was not an after thought. Had Guiteau not possessed a motive for committing the devilish act of murdering the President, an American jury would have acquitted him just as speedily as the crazy assailant of Victoria has been by an English jury. But as it is, he will have to answer for his too methodical madness.

THE MAIL AND CHRONICLE.

THE NEW STEAMER. — The Seattle Post-Intelligencer has an extended description of the new steamer which Capt. Brittain is having built for this mail route, mention of which was made in last week's Mail. Estimated cost, \$25,000; length, 120 feet; 22 feet beam and 6 1/2 feet depth of hold. She will be a stern-wheeler, differently constructed and arranged from any boat on the Coast; with a double wheel propelled by a single powerful engine, capable of propelling her 16 miles an hour when desired, though the ordinary speed will be 12 knots an hour. This steamer will be ready about 1st of August.

Hurrah for Brittain and his new steamer!

TIMBER LAND CLAIMANTS have considerable trouble about their proofs which could just as well be avoided — this on account of the testimony of witnesses in regard to their knowledge and inspection of the land. Such inspection must be as recent as possible, and it would be all the better if they would come direct from the land to make proof. At most, the time elapsing between the inspection and the making of proof should not exceed ten days. Timber claimants should note this requirement and by strict compliance therewith save themselves much vexatious annoyance in furnishing additional proofs. This requirement is imperative and must be complied with, however unreasonable it may seem to claimants.

LA CONNER has now three large and well-stocked stores of general merchandise, where the average settler or country trader can purchase supplies of as good quality and on as reasonable terms as anywhere in the Territory, which is saying a great deal; and this because our merchants buy chiefly in San Francisco, and having no heavy rents, insurance or city taxes to pay. To the people of the neighboring and northern districts we say, Whenever your local trader or merchant cannot supply your wants, come or send to La Conner for it, and our word for it you may send further and fare worse. Patronize home enterprise, all other things being equal or nearly so. On the other hand, our merchants should be prepared to take all marketable produce at the highest prices. This is what makes a country prosperous and self-sustaining.

GOVERNOR NEWELL has gone on a visit to the Eastern States, and during his absence the general Secretary Owings will occupy the Executive Chair. We know Gov. Newell will represent us aright to our Eastern brethren. To merely speak of us as we are, without a particle of exaggeration, will serve all practical purposes and "fetch the crowd" every time; and this the Governor can do to great perfection. Bon voyage to his Excellency.

SCARLET FEVER prevails to some extent up the Skagit, but the only death we have heard of is that of a lovely little girl belonging to Mr. and Mrs. H. Mills, whose name, if we are properly informed was Annie, and aged about six years, dying on the 21st inst.

We regret to learn that one or two other children of this family are dangerously ill with the fever.

QUITE AN EARTHQUAKE was felt here at about 11 o'clock last Sunday night, doing no damage but sufficiently impressing those who were up or awake with the fact that some mysterious agency was disturbing the equilibrium of this mundane sphere. The shock was more distinctly observed at Olympia, Seattle, Port Townsend and Victoria, and the oscillation is estimated to have lasted 22 seconds.

MR. J. F. TERRACE and family have gone on an extended visit to relatives in Tacoma. Mr. T. recently sold his farm adjoining town, and is now taking a respite after several years close application to business. He will probably return in the course of the year and relocate among us. Hope so, indeed, unless he can do better at the terminus. We wish him all possible success whether here or there.

THE POSTAL BUSINESS of this (La Conner) office for the month of April was as follows: Money orders issued, 151, amounting to \$4,854.07; orders paid, \$106.30; stamps sold, \$50.87; stamps canceled, \$37.99; letters registered, 22; so reports Postmaster Jorgenson.

MR. McGLINN, finding his hotel facilities inadequate to accommodate his increasing business, has leased one of Mr. Conner's buildings across the street, and has set about furnishing it as an auxiliary branch of his popular establishment.

MR. JOHN M. LEZT, Inspector of Customs, spent a few days in town this week. While here, some five hundred gallons of oil came in from Point Roberts which he eyed very suspiciously, but there being no positive proof that it was contraband, made no seizure.

They are talking about the Fourth of July at Seattle already. Suppose we "whoop em up" some more this year. Shall we celebrate or not? That's the question. What do the people say?

THE DELINQUENT TAX LIST will appear in next week's MAIL.

REV. E. O. TADE is taking steps to organize a "Union" church at La Conner.

The steamer Josephine, mentioned last week as sunk, has been raised.

Concerning the Proposed Mail to New Westminster, B. C.

SPEAKING of the proposition in last week's MAIL for the extension of the semi-weekly mail service from La Conner to Sehome and Whatcom, the Seattle Post-Intelligencer asks "Why not at once press vigorously and unflinchingly for its extension to New Westminster?" We can assure our Seattle contemporary it would be utterly useless to try, for the Dominion Government has more than once refused to establish mail connection between New Westminster and Sehome — even by "star route" across the country, a distance of 18 miles, which would be comparatively little expense. How much more so would they hesitate about a steam service of 35 miles, for the most part over the rough and dangerous waters of the Gulf of Georgia. A year or more ago, our Delegate had the Department at Washington open correspondence with the Ottawa Government, with the view of establishing direct mail connection between our northern border station and New Westminster, and the Dominion authorities, after due consideration, replied that the wants of their people would not warrant the necessary expense incident thereto. The Department furnished Delegate Brents with a formal statement of the objections, which he in turn forwarded to us for publication in the MAIL, as we had previously urged the measure. Doubtless the postal authorities at Victoria, to whom it was referred from Ottawa, objected to the proposition, as it is well known they desire all regular communication with British Columbia to pass through that port. Our postoffice at Sehome being close to the national boundary, the entire distance of 18 or 20 miles to New Westminster would traverse British Columbia territory, and hence nearly all the expense of carrying the mail would devolve on the other side. Taking the water route around Point Roberts, however, the distance would be about equally divided between both countries — being some 15 miles to Point Roberts and a like distance from there to New Westminster. But the chief trouble is there is no custom-house on this side to enter or clear vessels, and until there is one a steamer service is out of the question. There being no regularly established trade or commerce between the sections, it is doubtful whether either government would now entertain the proposition of a steam mail service. The Fraser River people seem to be content with their connection with Victoria, the British Columbia entrepot; and as we have once or twice made overtures which were unfavorably entertained, we should not be so importunate, but rather wait for the overtures to come from the other side next time. The fact is, we have been disposed to overrate the importance of this connection. It is doubtful whether any of our steamers would undertake the route without a good road subsidy, which is obvious cannot now be secured. The Fraser River people are so wed to Victoria and San Francisco interests that we could not hope to have much trade with them in the mercantile line, and as they are gradually becoming self-sustaining in agricultural production, we cannot hope to sell them much of our surplus products. Then, where is the use in worrying about it; or handicapping a petition for increased facilities that are urgently needed with a proposition of doubtful practicability that will require tedious correspondence between two nations to arrive at a conclusion, besides taxing our self-esteem to the extent of renewing to a foreign government a proposition of intercourse once rejected.

The better — and, in fact, the only way of accomplishing the object desired is to first establish an entry and clearing station on the border; then let the O. R. & N. Co., for instance, put a steamer on the route so as to ascertain whether it will pay ordinary expenses, and otherwise demonstrate the necessity of the connection. Then if the British Columbians take kindly to and patronize the route, let the proposed mail service be established. We mention the O. R. & N. Co. for the reason that they can better afford to test the experiment; and yet it is not likely they will do so, as such a line would, in a measure, be competing with their steamers already running to Victoria. But, as before stated, the chief obstruction is lack of custom-house facilities on the northern border, which the Government will be loth to grant until we become a State. Then will probably follow annexation, which will do away with the occasion for a custom-house, and allow free and unrestricted trade and commerce.
