

\$5.00 PER ANNUM, IN ADVANCE.]

WALLA WALLA, WASHINGTON TERRITORY, FRIDAY EVENING, APRIL 9, 1869.

NUMBER 17.

Walla Walla Statesman. PUBLISHED EVERY FRIDAY EVENING, BY WILLIAM H. NEWELL, EDITOR AND PROPRIETOR. Office Statesman Building, Third Street. U. S. Official Paper for the Territory. TERMS INVARIABLE IN ADVANCE.

RATES OF SUBSCRIPTION: One Year \$5.00, Six Months \$3.00, Three Months \$1.50. Rates of Advertising: One square (ten lines or less) four insertions, \$2.00.

TO CITY SUBSCRIBERS: On and after this date, the STATESMAN will be sent to city subscribers at 50 cents a month, payable in advance.

Democratic Territorial Convention. The Democratic Territorial Convention for the nomination of a candidate for Delegate to Congress, to be elected next June, and for the nomination of a candidate for Delegate to the Territory, will be held at Vancouver, Clark county, on Thursday, 22d day of April next.

Democratic Central Committee. At a meeting of the Democratic Central Committee, held at the Court House, on Thursday, March 11, the following proceedings were had: The number of Delegates to said Convention was fixed at 24, apportioned as follows:

Table with 2 columns: Name of County, Number of Delegates. Includes Walla Walla, Pacific, Lewis & Clark, etc.

At a meeting of the Democratic Central Committee, held at the Court House, on Saturday, May 8th, the Committee recommended that all proxies be given to residents of the precinct in which the Delegate resides.

WIFE IN A STATE PRISON.—But one thing would strike the looker-on, and that is amid the hum and clamor of machinery, no human voice is heard, no voice rises up to join chorus with the din of toil to relieve the burdened mind or the strained muscle.

MONARCH ON TREES.—The Eucalyptus, a remarkable Australian tree, attains a height of nearly five hundred feet, and exceeds in this respect the far famed "big trees" of California.

Who is the more pious worker, he who digs the gold from the mine, purifies and stamps upon it its true value; or he who only passes it from hand to hand? There are miners in the moral as well as the natural world.

ECHO.—The shadow of a sound—a voice without a mouth, and words without a tongue. Echo, though represented as a female, never speaks till she is spoken to, and at every repetition of what she has heard continues to make it less, an example recommended to the special imitation of chatter-boxes and scandal-mongers.

THE GIRL WHO LIVED NEXT DOOR.

Oh, happy dream! Oh, holiday, Bright day of all the past, Brimming with tender summer light, Too full of sun to last. One childish figure mid the haze Still beckons evermore. To I, a loyal slave, obey The girl who lived next door. Sweet eglantine has bloomed since then, Red maples filled and flushed, The nightingales since then have sung When coarser sounds have hushed; No bird-song sweeter, None will seem, as when I sat beside The girl who lived next door. For her I ran the student race, For her I won the prize, For love of her came home again To read her lovely eyes: And when the stars came trooping out, Methought my cares were o'er, And I need only ask to win The girl who lived next door. The summer eye grew strangely dark, The stars shone dim to me, And roses withered as I saw Beneath the maple tree, My idol circled by an arm Which band and chevron bore; A soldier's bride (I knew it all) The girl who lived next door. When wand'ring far, some impulse strange, Drew home my vagrant feet, Once more, beneath the eglantine, Some guidance bid me meet, Under the window—white and still, I saw my love once more, When burial blossoms, sweet and white, Unstirred her bosom bore. She was not mine to win and lose, But ever mine to keep, Mine to remember lovingly On twilight's dreamy sleep; The gladness of a day gone by Is mine for evermore. And life is sweeter having loved The girl who lived next door.

MATERNAL INSTRUCTION.

In this cold and hollow world a fount Of deep, strong, deathless love, save that within A mother's heart.—Mrs. Hemans. It takes a long time for the world to grow wise. Men have been busying themselves these six thousand years nearly to improve society. They have framed systems of philosophy and government, and conferred on their own sex all the advantages which power, wealth and knowledge could bestow. They have founded colleges and institutions of learning without number, and provided

and, after all, the masses of mankind are very ignorant and very wicked. Wherefore is this? Because the mother, whom God constituted the first teacher of every human being, has been degraded by men from her high office, or, what is the same thing, been denied those privileges of education which only can enable her to discharge her duty to her children with discretion and effect.

If half the effort and expense had been directed to enlighten and improve the minds of females which have been lavished on the other sex, we should now have a very different state of society. Wherever a woman is found excelling in judgment and knowledge, either by natural genius or from better opportunities, do we not see her children also excel? Search the records of history, and see if it can be found that a great and wise man ever descended from a weak and foolish mother. So sure and apparent is this maternal influence that it has passed into an axiom of philosophy; it is acknowledged by the greatest and wisest of men; and yet, strange to say, the inference which ought to follow, namely, that in attempting to improve society, the first, most careful and continued efforts should be to raise the standard of female education, and qualify women to become the educator of her children, has never been acted upon by any legislators, or acknowledged and tested by any philanthropists.

MONARCH ON TREES.—The Eucalyptus, a remarkable Australian tree, attains a height of nearly five hundred feet, and exceeds in this respect the far famed "big trees" of California. Attention has recently been directed to the great economic value of the tree, its extreme rapidity of growth, the compactness of its fiber and its adaptation to the arid and waterless regions of the warmer portions of the globe.

Who is the more pious worker, he who digs the gold from the mine, purifies and stamps upon it its true value; or he who only passes it from hand to hand? There are miners in the moral as well as the natural world. Echo.—The shadow of a sound—a voice without a mouth, and words without a tongue. Echo, though represented as a female, never speaks till she is spoken to, and at every repetition of what she has heard continues to make it less, an example recommended to the special imitation of chatter-boxes and scandal-mongers.

BRAIN AND MUSCLE.

BRAIN WORKERS.

It has been proved by an analysis that the more active the brain, the more phosphorus is used up and thrown off by the system. Clergymen using up more on Sundays, and lawyers on court days, than at any other times, and yet our professional men have lived as long as other men live—eating what has come before them without thinking whether the elements they take are adapted to develop stupidity or mental vigor; eating, perchance, such stupefying articles as ham, or fat pork, and not a word of warning or warning or preaching a sermon, and such phosphatic food as trout and other fish, with unbolting bread, vegetables and fruit, when idle or rusticated. But a little observation would show a vast difference in the quality of sermons, whether made and preached on carbonaceous or phosphatic diet, and the estimate of the old divine, "If the number of tons of beans and pork preached to every Sunday while the owners were asleep might be offset by an estimate of the number of congregations, not only in new England but in Old England, and all the rest of the fat and starch-eating world, who are put to sleep by sermons made from stupefying principles extracted from fat pork, fat beef, and superfine flour." The nitrates and phosphates of meats and vegetables are partly insoluble and, therefore, in soaking in cold water, all lose much that is important, especially to the thinking man. In cold water, albumen is dissolved or lost, but in albumen is coagulated, and mostly retained; but in hot water as well as cold, the soluble phosphates are lost. Neither fish, nor meats, nor vegetables should, therefore, ever be pickled in brine, nor should they be boiled, unless in a little water, as in the admirable arrangement of Zimmerman or Durckle, where all the soluble materials, as all the flavor, are retained in the water that is necessary to keep up the steam, and being used as gravy or soup, all the elements are saved as nature intended.

In roasting, or boiling, or, indeed, in any manner of cooking, care must be taken not to burn up or otherwise destroy or lose any of the juices of either vegetable or animal food; especially is this important for thinking men, and for those whose digestion is full—the power of the stomach, as well as the power of the brain, being dependent on soluble phosphorus. And especially is the power of the stomach dependent on the flavor of the food. Let any one try the experiment of cooking meats, fish, potatoes, carrots, turnips, in a steamer in which the flavor and all the essence are distilled back and saved, and compare the taste of these with that of the same food cooked so that all these elements are lost, and he will be astonished at the difference in flavor, digestibility and mental and physical energy imparted by it.

MUSCLE WORKERS.

The kinds of food most wanted, because eaten when not wanted, by the system, are the most expensive. The article most used when not wanted, is superfine flour, out of which has been boiled a large portion of its nitrates and phosphates. This being used with butter and sugar, furnishes very little but heating material. The next article on which most money is expended and wasted, because most used with other articles containing enough of carbonaceous elements, is butter, which contains not a particle of strength or life giving material, and therefore useless except with food deficient in carbon. And another article most extensively used and for the same reason wasted is sugar, which, though useful with too acid fruits, and as a part of a meal in which is too large a proportion of nitrogenous food, is worse than useless in confectionery, cakes, &c., especially if eaten between meals, and when food is not wanted, as it not only adds to the superfluous heat, but causes fermentation in the stomach and bowels, and causes, or tends to cause, flatulence, colic, dyspepsia, and the thousand and one troubles of the digestive organs which we are apt to impute to green vegetables and fruit, when the fact is, these extra carbonaceous substances, in their passage out of the system, embarrass the digestion of natural food, and cause it to give us these troubles; and this is proved by the fact that those who avoid these expensive and useless articles may eat as much as they choose of green vegetables and fruits, and they give them no flatulence, produce no irritation.

Our Puritan forefathers, who lived on beans, pears, unbolting grains, and the meats, vegetables, and fruits as they came from their fields and gardens, cooked in the simplest manner, best calculated to develop their natural flavor, and prepare them for digestion, were not troubled with flatulence, colic, or digestion. And our forefathers were not the pale faced, flabby muscled, toothless, chlorotic, consumptive and sentimental race as their degenerate daughters of the present generation. Even our farmers and their wives and daughters have become terribly degenerated. Instead of the robust and healthy men, and the full-chested, healthy, rosy-cheeked, beautiful women of former generations, we see a people almost as feeble and sickly as the city people. And the reason is apparent. The outer crust of the wheat and the buttermilk, which contains the nitrogen, phosphorus and iron, on which strength and energy, mental and physical, and beauty of complexion depend, is given to the cattle and the pigs, while they themselves, eat, instead, the butter, fine flour and sugar, which contain only the heating and disease-producing carbonates.

The robust Irishmen and Scotchmen, who come here with strong, energetic muscles and sound teeth, from their oatmeal, wheat and barley cakes, with their potatoes, buttermilk and cheese, soon fall into our starch and grease-eating habits, and become, or at least their children become, as pale, puny and toothless as pure-blooded Yankees.

It has been proved by an analysis that the more active the brain, the more phosphorus is used up and thrown off by the system. Clergymen using up more on Sundays, and lawyers on court days, than at any other times, and yet our professional men have lived as long as other men live—eating what has come before them without thinking whether the elements they take are adapted to develop stupidity or mental vigor; eating, perchance, such stupefying articles as ham, or fat pork, and not a word of warning or warning or preaching a sermon, and such phosphatic food as trout and other fish, with unbolting bread, vegetables and fruit, when idle or rusticated. But a little observation would show a vast difference in the quality of sermons, whether made and preached on carbonaceous or phosphatic diet, and the estimate of the old divine, "If the number of tons of beans and pork preached to every Sunday while the owners were asleep might be offset by an estimate of the number of congregations, not only in new England but in Old England, and all the rest of the fat and starch-eating world, who are put to sleep by sermons made from stupefying principles extracted from fat pork, fat beef, and superfine flour." The nitrates and phosphates of meats and vegetables are partly insoluble and, therefore, in soaking in cold water, all lose much that is important, especially to the thinking man. In cold water, albumen is dissolved or lost, but in albumen is coagulated, and mostly retained; but in hot water as well as cold, the soluble phosphates are lost. Neither fish, nor meats, nor vegetables should, therefore, ever be pickled in brine, nor should they be boiled, unless in a little water, as in the admirable arrangement of Zimmerman or Durckle, where all the soluble materials, as all the flavor, are retained in the water that is necessary to keep up the steam, and being used as gravy or soup, all the elements are saved as nature intended.

PRACTICAL INFORMATION.

If you desire to be certain that your eggs are good and fresh, put them in water. If the buttermilk spurs they are not fresh.

It is said that castor oil makes shoe leather very soft and pliable, and quite impervious to water.

From chemical analysis it appears that the seeds of asparagus, when dried, parched and ground, make a full-flavored coffee, containing, in common with tea and coffee, the principle called theine.

A horseman says he has cured the worst case of scurvy he ever saw, by the application of ointment of white pine in turpentine, thoroughly rubbed on.

Dr. Richardson says that iodine placed in a small box with a perforated lid, destroys organic poisons in rooms. In cases of small-pox he has seen this method used with great benefit.

During the war the rebels made horse-collars of bass wood, and now they are recommended for general use, for they are light, they do not get heavy with rain, nor freeze, or wear out, or gall.

A CERTAIN CURE FOR SMALL-POX.—Sulphate of zinc, one grain; foxglove (digitalis), one grain; half teaspoonful of sugar; mix with two tablespoonfuls of water. When thoroughly mixed, add four ounces of water. Take a spoonful every hour. Disease will disappear in twelve hours. For a child, smaller doses according to age.

TO REMOVE SALT FROM PORK.—Take a piece of pork from the brine, and place in cold water a short time, and you will return it almost to its former freshness.

TO KEEP INSECTS FROM SMOKED MEATS.—While smoking your meat, with chips or sawdust, put on the fire a few red peppers. The fumes will prevent all insects from attacking your meat.

TO DESTROY TICKS.—A correspondent of Country Gentleman says that if a sheep or a calf is covered with a rubber or leather spread, or thick blanket, and a tobacco smoke made under this cover, every tick and nit will be destroyed in half an hour or less.

TO MAKE MATCHES WATER-PROOF.—Friction matches can be made perfectly waterproof under any circumstances, by dipping them, when completed, in the ordinary way, in a solution formed by adding two parts of glycerine to one of collodion.

HOW THEY KEEP EGGS IN FRANCE.—By placing in wire baskets about a dozen at a time, and immersing them for about a minute in boiling water. A thin layer of the egg coagulates on the inner surface of the shell, forming a film impervious to air.

POOR MAN'S RICE.—One quart of milk, four table-spoonfuls of flour, stirred up with a little milk, the stirred into the boiling milk. Take from the fire and pour into a dish; beat four eggs and stir in while hot. After it becomes a little cool, sprinkle over the top one cup of white sugar and a little grated nutmeg; pour over that one cup of wine.

TO KEEP A STOVE BRIGHT.—Make a weak alum water, and mix your 'British Luster' with it; put two spoonfuls to a gill of alum water; let the stove be cold, brush it with mixture; then take a dry brush and luster and rub the stove until it is dry. Should any parts, before polishing, become dry so as to look gray, moisten with a wet brush and proceed as before. By two applications a year it can be kept as bright as a coach body.

DRYING GREEN WOOD RAPIDLY.—A new method for drying green wood in a very short time consists in boiling it for some hours in water and leaving it then to cool, by which the soluble substances are removed. It is then boiled in an aqueous solution of borax, by which the insoluble albumen of wood is rendered soluble and escapes from the pores. The wood is then placed in drying chambers heated by steam, and allowed to remain three days. Wood thus treated is more compact than it would be by ten years of ordinary exposure; it does not shrink or warp, and is secure against decay; on account of its greater density it is more easily polished, and better fitted for articles of furniture and musical instruments.

HOW TO CORN BEEF.—For each hundred pounds of beef use four quarts of butter salt, and four ounces of saltpeter; mix these two substances well together and rub each piece of beef with the compound. Pack the beef singly in a barrel, and add to it two quarts of molasses, or four pounds of nice brown sugar. Put a weight on the meat, but add no water; the juices of the meat will make sufficient brine to cover it. If designed for spring or summer use the barrel may be placed where the meat will become frozen. As the weather becomes warmer, a little more salt may be added. Beef kept in this manner will be tender and sweet, and its nutritive value will not be impaired, as in the ordinary method of preserving.

THE PRESERVE WOOD.—A process has been discovered in Paris for the prevention of the decay of wood. As the result of a five years' experience, a paint is recommended which at the same time possesses the advantage of being impervious to water. It is composed of fifty parts of tar, forty parts of finely crushed chalk, five hundred parts of fine, white, hard sand, four parts of linseed oil, one part of the red oxide of copper in its native state, and finally, one part of sulphuric acid. In order to manufacture the paint from this multiplicity of materials, the tar, chalk, sand, and oil are first heated in an iron kettle, the oxyd and sulphuric acid are then added with a good deal of precaution. The mass is then very carefully mixed and applied while hot. When thoroughly dry this paint is as hard as a stone.

OF WHAT USE?

Spiritualism has become one of the established institutions or creeds of the country. In this city it numbers its converts and adherents by hundreds, if not thousands. 'Mediums' abound in all directions, and call up spirits from the vast depths of the past. 'Spiritual circles' meet nightly in various quarters to fish up messages and 'manifestations' from the myriads who have gone before down into the dark and impenetrable shadows of death. Scores visit these institutions to see, and jeer, and scoff—then scoff and visit again. There is in human nature a strong and unaccountable longing to penetrate occult mysteries. There is something weird and fascinating in these attempts to raise the veil which separates the living from the shadowy realms of the dead. Even the strongest and best disciplined minds are not proof against this human desire to learn something, beforehand, of the road which all must travel; of the regions which all must inhabit, sooner or later. Hence it is that many who do not believe in Spiritualism are frequently visitors to the sanctuaries of its votaries. As months visit and revisit the destructive light, they go and go again to these places, only, perhaps, to get sinned at last. They may not become converts, but their faith in other creeds may be so shaken that they will be left, like vessels at sea, without rudder, chart, compass or pilot. But what good has been or can be achieved by Spiritualism, as a religious element? It professes to be able to communicate with the spirits of the departed. For years it has been engaged in this business, and what are the existing proofs of its excellence? The dead and gone have not sent anything back to make the living any wiser, better or happier. We are sorry to say that most of the messages they have given us, as published in the spiritual organs, are unintelligible gibberish. Everything professing to emanate from the Land of Shalowa, which is not gibberish, lacks evidence of its ghostly origin. If the spirits were wiser than we, and if they could see further into the future than we do, and could forewarn us of coming events, and advise us how to ward off unseen evils, and to gain unknown benefits, their messages might be productive of great good to the living world, and make it more fit for the world to come. Could the spirits, for instance, disclose the hidden secrets of Gen. Grant's brain, fore-shadow his policy, and thus warn us not to expect from his Administration, we would be put upon our guard and enabled to provide against such evils as most of the good will wish upon the nation and intentions are charged. They might, also, save much trouble and expense to whole armies of office seekers, by giving the names of those who will be the successful applicants. But orthodox Spiritualism does not profess to foretell future events. Only the quacks and pretenders, we are told, go to this extent. Orthodox Spiritualism does not, we believe, even pretend that the spirits can give us information we do not possess of current events. That is, spirits cannot tell us what is transpiring to day, either in Europe or Asia. They can only tell us of past events known to ourselves. Now, to what does such information tend? It can neither make us wiser nor better. We cannot conceive how it can make us any happier. The majority of mankind are attracted to the mysterious and the occult, and to the names of those who will be the successful applicants. But orthodox Spiritualism does not profess to foretell future events. Only the quacks and pretenders, we are told, go to this extent. Walla Walla Statesman.

FRIDAY EVENING, April 9, 1869.

LEADING republican papers published in Pennsylvania concede that the democracy will carry that State at the coming October election.

An exchange states that Mrs. Grant, the wife of the President, is afflicted with cross-eyes, and suggests that resort be had to surgery to cure the deformity.

E. G. RANDALL, the post-office thief, is again at large. His appearance on the streets of Portland created quite a sensation. In Randall's case, "loyalty served to unlock prison doors."

P. J. MALONE, formerly connected with the Oregon press, and well known to the early settlers, has been arrested at San Francisco on a charge of forging orders on the city treasury for large sums of money.

THE Port Townsend Message, heretofore supposed to be in the interest of Judge Denison, comes out in favor of Garfield, and emphatically a "dead cock in the pit," and, if anything, the "old Doctor" is dead.

CONFIRMED.—We have heretofore omitted to mention the confirmation, by the Senate, of A. B. Meacham as Superintendent of Indian Affairs for Oregon. Mr. Meacham is a confirmed radical, but outside of politics is an accomplished gentleman, and in every way an improvement upon the late incumbent of that office.

SUBSIDING.—The White Pine mining fever is rapidly subsiding in all parts of the country. The continued discouraging accounts received from that quarter are fastening the conviction upon the minds of the people that these mines have been greatly over-estimated, if, in fact, they are not, as many of the correspondents there assert, an "unmitigated bilk."

THE TENURE OF OFFICE BILL has been virtually repealed, and a substitute adopted which gives the President full authority to make removals—the appointments only being subject to the approval of the Senate. The radical majority in the Senate struggled hard to retain the power given that body by the tenure of office bill, but the opposition of the President and House was too strong, and the Senate was obliged to yield. Thus passes away the law for the disregard of which President Johnson narrowly escaped impeachment.

SIMEON WALTERS, the murderer of L. J. Bacon is to be hung at Boise City on the 12th of May. The evidence against Walters is altogether circumstantial, but so well connected as to render his guilt absolutely certain. The object of the murder was to obtain possession of an unimproved ranch, of little value. Walters is described as a young man of rather prepossessing appearance, and throughout the whole of the trial, which lasted four days, he maintained wonderful composure. The only time he gave any evidence of weakening was when sentence of death was passed.

THE UPPER COUNTRY MINES.—Consequent upon the decline of the White Pine mining fever the miners and "loose-footed" men herabouts are beginning to turn their attention toward the Moose Creek, Elk Creek, Perry Creek and Deer Lodge mines, and the indications now are that all the mining emigration from this section, as well as a large share of that from below, will go to these mines. Without feeling anything akin to pleasure at the disappointment of the thousands who have "sought for much and realized naught but blasted hopes" in going to White Pine, we can not but congratulate the producers, manufacturers and tradesmen of our valley that the tide of immigration is turning in their favor.

THE RADICAL NOMINATION.—Letters received from the Sound, as well as Clarke county, leave no room to doubt that Garfield will receive the radical nomination at the Claquato convention. Nearly all the counties on the Sound have instructed for him, and the counties on the lower river are understood to favor his nomination. Clarke county gives him her four votes, thus securing his nomination by a large majority. Upon a full review of the field, the conclusion at which we arrive is that Dr. Baker will have to continue in the business of "shaving notes" and "taxing peddlers" for a few years longer. After Garfield has run his course, possibly there will be a chance for our old friend.

AIDING THE CUBANS.—A large force of Americans, mostly men who served through the late war, have gone to Cuba for the purpose of aiding the revolutionists in that island and overthrowing the rule of Spain. This force is under command of Gen. Thos. Jordan, an officer who figured prominently in the rebel service, and who is known to be on unusually pleasant terms with Gen. Grant. Jordan's invasion of Cuba is supposed to have the full approbation of our Government, and after the Spaniards are driven out the next thing will be to arrange for the annexation of the Island to the United States. Gen. Jordan will be recalled as former Quartermaster at Fort Dalles, and his many friends in this country will be rejoiced to hear that he has reaped a rich harvest of gold.

RADICAL RULE.—One of the beauties of radical rule is exhibited in the tax on pig iron. Under the influence of an almost prohibitory tariff, the iron men enjoy a high degree of prosperity, and furnaces continue to multiply, but the community at large—the consumers—are compelled to pay an unnecessary profit to the manufacturers of from \$7 to \$10 per ton which on the entire annual product, estimated at 1,500,000 tons, amounts to from \$10,000,000 to \$15,000,000. This is what the prosperity of the pig iron manufacturer of Pennsylvania cost the country, and we have here the explanation for the unanimity with which that class of persons supported the radical ticket at the late election. The whole idea of radical rule is to legislate in favor of the rich man at the expense of the poorer classes, and carrying out this principle we have gold for the bondholder and paper money for the plowholder. So, too, in adjusting the tariff all the regulations are in favor of the rich manufacturer and adverse to the poor consumer. This is the testimony of David A. Wells, the special Revenue Commissioner, an authority that will hardly dare to question.

ANDREW JOHNSON.—The reported death of Andrew Johnson turns out to be a mistake. On his arrival at Greenville, Tennessee he had a stroke of paralysis, and for a day or two it was feared that death would follow. At last accounts he had fully recovered his health, and was preparing to canvass Tennessee in opposition to the radicals. He will run as the democratic candidate for Governor, and is confident that he can carry the State in opposition to Brownlow and his thieving followers. The democracy of Tennessee look to Andrew Johnson as the only man who can lead them to certain victory. Since his return to the State they have taken new hope and now confidently look forward to the overthrow of the carpet-baggers and a general rout of radicalism. Andrew Johnson never yet has been defeated in an appeal to the people of his State, and hence the confidence felt in the success of his present movement. Should he succeed in carrying the State, part of his programme is to take the place of Fowler in the U. S. Senate, when warm times may be expected in the Senatorial menagerie.

HANGS FIRE.—The nomination of Longstreet for Collector of Customs at New Orleans hangs fire in the Senate. Longstreet was one of the most gallant Generals in the rebel service during the war; but since the surrender at Appomattox Court House, he has evinced a willingness to eat any amount of dirt if thereby he might propitiate radical favor. His letters in favor of negro suffrage are still fresh in the public mind, and were scarcely less disgusting than his apologies for radical outrages upon the Southern people. It now turns out that no amount of self-abasement will entitle an ex-rebel to hold office under a radical Administration, and accordingly we find the entire republican press protesting against Longstreet's appointment, and calling upon the Senate to reject his nomination. This is right. Had Longstreet's abasement been rewarded, we should have had the spectacle of hundreds of others exhibiting their proficiency in "dirt eating" if thereby they could secure an appointment to a cross-roads post office.

We learn from the Walla Walla Statesman that the Legislature of Washington Territory expect to have the word "Territory" changed to "State" of Washington. Would it not be well to get a name for the new State less backneyed—thus, "Walla Walla State"?

We clip the above from the Erie (Pa.) Dispatch, which is only another evidence of how entirely ignorant the newspaper press at the East is of all that relates to this coast. If the scope of country known as Walla Walla was all of Washington Territory the name suggested would be proper enough, but with our present boundaries, including the whole of Puget Sound, it would be rather too much to ask that this valley give the name to the new State. This is the suggestion of modesty, but if the people of other parts of the Territory are willing to accept the name proposed by the Dispatch, then Walla Walla "goes."

A REBEL PROMOTED.—By reference to the telegraphic dispatches it will be seen that Longstreet has been confirmed, and is to hold a good fat office, to the exclusion of one of the "trooly loil." If Johnson had appointed a rebel to office the country would never have heard the last of it, but when Grant goes out of his party to promote a gallant soldier and ex-rebel, an obsequious Senate ratifies the appointment. What will the rampant radicals of the Cox order, who have been shouting "rebel!" "rebel!" for the past eight years, say to the appointment of a leading rebel to a lucrative Federal office? We fear that Grant has committed the unpardonable sin.

BUTLER GOING TO SPAIN.—It is announced that Butler will be nominated Minister to Spain. If so, international courtesy and good faith demand that Spain be advised of the fact a few months in advance, that her people may have time to remove their silver ware and other valuables to places of safety. Should the new Minister, says the Stockton Gazette, pounce down upon them suddenly, there would not be a teaspoon left in Madrid, in twenty-four hours, nor in the kingdom in a week. Let the Spaniards have notice of his coming.

IMPROVED.—Recently we notice a very decided improvement in the editorial department of the Vancouver Register. If we mistake not, our old friend Struve has mounted the tripod.

THIEVES IN OFFICE.—Jenkes, of Rhode Island, in a speech in the House of Representatives made this declaration: "I hope that every voter will remember that out of every four dollars raised in taxes one dollar goes to thieves." Jenkes is a shining light in the radical camp and hence may be presumed to know whereof he speaks. Applying this rule to Washington Territory, we find that the sum of \$80,000 per annum is collected off our tax payers in the shape of internal revenue, and of this sum one-fourth, or \$20,000, is stolen by the collectors, and this, too, in addition to being paid liberal salaries for their services. With this explanation of the radical Congressman we can understand how it is that the radicals can always raise plenty of money for campaign purposes. Half the stealings in the Revenue Collector's department for a single year will pay all the expenses of a delegate election. Democrats, remember that at the June election the money wrung from the people in the shape of taxes will be used to secure the return of a radical to represent you in Congress. By proper effort on the part of the people, the Revenue Collector's office can be carried against the combined influence of the "thieves in office."

WASHINGTON ITEMS.—A private letter from Washington, dated March 20th, has the following items: The name of E. C. Ross, of Walla Walla, has been up for the position of Judge of the first Judicial District, but encountering opposition from a certain quarter has been withdrawn. Mr. Flanders had not started home overland as was reported, but remained at Washington, and at last accounts was seriously ill—the result of a "big drunk." The removal of Secretary Smith had been determined upon, but his successor was uncertain. [The telegraph announces James Scott as the lucky hombre. Who is Scott?] Cox's chances were weakening, and it was feared that the old renegade would be unable to get his nose into the public crib. Flanders was doing his best to have him appointed Governor, but the President was unwilling to remove a gallant soldier to make room for a mousing politician. [A telegraph states that Flanders, and not Cox, has received the appointment. We discredit this last report and incline to the opinion that Gov. Moore will be retained in office.]

SINCE the reception of the news of the confirmation by the Senate of ex-rebel General Longstreet as Collector of Customs at New Orleans, we have heard radicals magnanimously express the opinion that it is time concessions were being made to the people of the South by placing them upon an equality with the "loilists" of the north. If the radical leaders in Congress should "break" with Grant as they did with Johnson, how long would it be before those fellows would be branding their President as a traitor and reasserting their late doctrine that the people of the South have no rights that "we" are bound to respect? Look out for your records, gentlemen, for we distinctly remember that every mother's son of you (before Stevens, Sumner, Stanton, et al. told you that you must) proposed to be just as magnanimous as you are now.

LAND MATTERS.—A letter from Joseph S. Wilson, Commissioner of the General Land Office, states, in response to an application made by H. Parker, of Walla Walla, that the instructions to the Land offices at La Grande and Vancouver have been so modified as to render it unnecessary for the witnesses in proof of settlement to make their personal appearance before the Register and Receiver. Depositions made before an officer authorized to administer oaths is all that will be required in future. This arrangement will prove a great saving to persons having lands to enter, and at the same time there will be ample protection against fraud.

THE WAY THEY STAND.—When the African-Mongolian Suffrage Amendment was pending in Congress, and uncertain of being passed, every radical paper on the Pacific coast that came under our notice, opposed the measure more or less vigorously—most of them with extreme bitterness. The moment the amendment was passed, says the Stockton Gazette, the opposition ceased by common consent. Some few never alluded to the subject again; but nearly all wheeled about, and made violent haste to get back into the party trees, and, to prove their zeal, have since advocated the amendment more vehemently than they at first opposed it.

RADICAL MORALS.—A private letter from Salem, Oregon, states that when Huntington received the news of his removal and the appointment of Meacham as Superintendent of Indian Affairs he (Huntington) went on a "big drunk" and kept beastly intoxicated for over a week. Huntington is a nice specimen of the party of "high moral ideas."

R. GUICHARD, Esq., a well known Walla Walla merchant and pioneer settler, has gone to San Francisco. Mr. G. is in bad health and finding no relief at home visits the Bay for the purpose of placing himself under medical treatment.

POINTED.—The Willamette Farmer comes to us this week endorsed as follows: "Why in—don't you X X." Altogether an oversight, for which we tender an apology.

SUSPENDED.—The Polk county Signal has suspended publication. The editor was taken down with the White Pine fever and hence the suspension.

FLANDERS FOR GOVERNOR.—A dispatch of April 4th says that Alvan Flanders has been appointed Governor of this Territory.

JACOBIN TACTICS.

There has been no campaign since the organization of the republican party, in which its party press has not within a few weeks before an election or the commission of some grievous legislative wrong, raised false issues, and made false charges against the people of the South and the democratic party. We apprise our readers now that they shall read in the Jacobin papers, from this time forward until the full measure of this radical scheme is complete, all manner of crimes, of murders, arson, robberies, rapes, and the whole catalogue, which will be ascribed to the unruly and turbulent disposition of the white people of the South, and this for the express purpose of engendering, keeping alive and promulgating a feeling of hate and bitterness, not only between the people of the sections, but between the negroes and their former masters. This kind of tactics and argument are the shield and buckler of republican party. Without principles, they fail to reach the reason and judgment; without regard for law and order, they seek to engender contention, strife, hate, and bitterness, aiming by an appeal to the baser passions to detour reason, overwhelm the judgement, and retain their party power, the monarch of destruction and desolation. This course is pursued upon an assumption of the ignorance of the people of the North, who have heretofore been taught by the same pernicious teachers, to regard the people of the South as the very essence of all that is hellish in human nature. But if no other lesson has been learned by Northern men and soldiers in the war, this one will not soon be forgotten, that they met a brave, generous, honorable, high-minded foe, and one whom to know aright, is to love and respect. It was this same lying, false, intolerant, bigoted, proscriptionist spirit of the Northern press, supported by Northern fanatics and fools, which goaded on the people of the South to the first overt acts of revolution. The pretense then was the wickedness of the institution of slavery.—It is now the assumption of the right to sit in judgment and deal out punishment for the sins of the past. This party of fraud, usurpation and corruption have for its history and record since the war: A violation of the terms of surrender of the Confederate armies. A thousand violations of faith pledged a thousand times. A covert armed assault upon the Constitution. Base usurpations of the Constitutional powers of the Executive. An attempt to destroy the Supreme Court. A destruction of all the rights of ten millions of white people. The creation of a strong, centralized government, controlled by Congress exclusively, at the expense and destruction of the rights of the States and a government by the people. A lying, deceptive promise of place and power to a debased and degraded race for partisan purposes. A mortgage of thousands of dollars on every man, woman and child in the country, in the shape of a National debt. A system of rewards for corruption and bribery for crime. The creation of monstrous monopolies. The attempt to seize State institutions at pleasure and to trifle with the rights of States. This is but a faint outline of the exploits of the radical party within its short life, and it is but natural that the only argument of its members should be the robbery of your money, or your life.—Democratic Watchman.

DEMOCRACY.—The political calendar has commenced being thoroughly. There is good deal of feeling and anxiety manifested in a quiet way by the untried democracy. Judge McFadden and Governor M. F. Moore are the principal candidates on the Sound. The latter would be the strongest man, were it not for his record during the rebellion, which is odious in the eyes of the pure, unadulterated Copys. Frank Clark has entirely collapsed and is not spoken of as a probable candidate. Judge Lancaster, the sage from Lewis River bottom, will undoubtedly turn up as usual at the nominating Convention, and will, perhaps, carry Pacific and Columbia counties, but that is all. At Walla Walla there is a good deal of strife among a host of aspirants. Mr. Newell, of the Statesman, heads the list. He is decidedly the best speaker in the democratic ranks, and stands fair with the party throughout the Territory. Next comes Judge Mix, a pleasant, affable gentleman, and a fair lawyer, but not sound politically. Then there is Dugan, Lassater, and divers one-horse candidates. It seems improbable that a Walla Walla democrat can get the nomination on account of the envious contentions existing among democrats in that County. As an outsider, we nominate Jay D. Potter, Esq., of this town, as a democratic candidate for Congress. He has fair abilities as a lawyer and has done faithful service in the ranks of the party without any political reward. In the event of the election of a democrat to Congress from this Territory, which, however is very improbable, we should decidedly prefer the election of Mr. Potter.—Vancouver Register.

CALICO PARTY.—The managers and others interested in the "Calico party," to be given at the Bank Exchange Hall on the 15th, promise their friends a rare evening's enjoyment. As the title of the party indicates, we presume the quality of dresses worn on the occasion, by the ladies, will be calico. This will afford an excellent opportunity for a display of beauty, for who does not think that beauty in a ball-room, as well as in a kitchen, is most adorned when unadorned by costly fabrics, long necks and short sleeves? Where is the old collector who does not cherish more pleasing recollections of times when he has come upon his "dimity unawares" and found her encased in a neat calico dress, apron and white collar, than at any time when he has seen her "gotten up for the occasion" in gauzy tulle or India silk and other eyes gazing at more of her arms and neck than he instinctively felt any one but himself might ever claim a right to inventory?

"THE FACTORYMEN."—It is amusing to see the Transcript style the friends of Garfield and other republicans, that are not led by the nose by the crowd that run the Bolters' organ, as "the factorymen." These "factorymen" have carried by large majorities the following counties: Thurston, King, Kitsap, Jefferson, Whatcom, Chehalis, Clallam, Mason and Wahkiakum, casting in all eleven votes, out of thirty, in the Convention. Other counties in the Convention will follow suit, with, perhaps, a single exception. The party in this country is thoroughly harmonious, and there will be no opposition to Garfield, unless, perhaps, Judge Denison should become a prominent candidate. Flanders is D. D. The Transcript has murdered him, and the republicans party will attend to the immediate execution of "My Lord" and the one-horse saucers that "make up the Bolters' brigade."—Vancouver Register.

RADICAL FRUITS.—An exchange says that it is no uncommon thing for white girls in Illinois to marry negroes, and that the number of mulatto children is fearfully on the increase. This is the legitimate result of radical teachings, and as such is accepted by the Illinois negro worshippers.

Spirit of the Republican Press.

As the nomination of Garfield is conceded to be a foregone conclusion, we copy brief extracts from articles in the Transcript and Tribune, the leading organs of the party, as indicating the estimation in which he, and his mongrel clique are held by the straight-out republicans. The Transcript says: "In justice to the most respectable portion of our community, whose feelings were so grossly outraged by the action of a majority of the Good Templars last Saturday, we deem it our duty to truthfully expose them, so that all temperance men, whether belonging to the order or not, can judge of the motives. Not because these men have had different political preferences, but to show the position in which they placed themselves, and in justice to those few who did not desert their principles or violate their pledges. These men placed themselves shoulder to shoulder with the most obnoxious of the intemperate of our community, saloon keepers, gamblers, whisky drinkers; organizing a political ring in which the lowest dregs of society were combined, placing their names for suffrage with them, upon tickets headed with insults to the party opposing; and voting these tickets in direct violation of their honor and obligations. Thus they worked with a persistency deserving a better cause. The proportion of temperance men on the opposing ticket although not as many Good Templars, out numbered them. But this mattered not. They had been promised to receive numerous county offices and other places of profit; they had been bought and sold like sheep at the shambles."

The Tribune says: "It seems that, for some days prior to the time fixed for the convention, the friends of Mr. Garfield had their agents scouting through all the country bordering on the shores of the Sound, in logging camps and elsewhere, drumming up recruits, regardless of their political proclivities. It mattered not whether they were republicans or democrats, one was as good as another, if he could be relied upon to vote for the Garfield delegate. That was the only consideration. Nor did it matter whether any of these men would be in the Territory on election day, in June next; they were obtained for present—not future—service. "The Garfield faction carried this precinct, on Saturday last, by a coalition of the temperance men, the gamblers, and the drunkards. A most wonderful fusion, surely; and one that proves the truth of the old adage that 'politics makes strange bedfellows.' But gamblers are smart, and they always win when they take a hand with greens. "Not for this disreputable transaction, as unworthy of professors of religion as it was of Good Templars, all the votes imported from the surrounding country and logging camps would have availed them nothing."

PROPERTY.—If the large amounts of goods now being daily discharged from freight wagons at the stores on Main street can be taken as an indication of prosperity, our merchants are certainly reaping a bountiful harvest. We are told by several of the business firms that they are this season bringing up larger stocks than ever before, a fact which must be apparent to the casual observer, even from the unusual bustle and activity about their establishments, caused from the unloading of boxes, opening, marking and shelving of goods. A glance at the brilliant displays made in the show cases and on the shelves also shows that the merchants are keeping pace with the advance of the country and the requirements of the people by the importation of finer and more fashionable goods than formerly. While those requiring plain goods, or anything in the agricultural or mining line, have been bountifully provided for, the "Fiona McMillens" and "Beau Brummels" can also find, among the new stocks, almost as good opportunities for a display of taste in the selection of adornments for their "human forms divine" as in the "Emporium" and "Bay" cities.

Odd Fellows' Celebration. The fiftieth anniversary of the Odd Fellows in the United States will be celebrated by the Odd Fellows of Walla Walla by a grand procession of the Order on the 26th day of April, 1869. All members in good standing are requested to meet at the Hall at the hour of 2 o'clock P. M. of said day. The procession will form under the direction of the Marshal and march through the principal streets to the Methodist church, where a public address will be delivered by Hon. F. B. Johnson. The whole to conclude with a grand ball in the evening. By Order of the Committee. Walla Walla, April 8, 1869.

CALICO PARTY! WILL BE GIVEN At the Bank Exchange Hall, THURSDAY EVENING, APRIL 15TH. Floor Managers, JOHN JUSTICE, H. E. TAYLOR. Tickets, (Including Supper) - - - \$2.50. Music by the Walla Walla Band. April 8, 1869.

PAINTS & PAPER HANGINGS. THE UNDERSIGNED takes pleasure in announcing to the citizens of Walla Walla and vicinity that he has just received and will keep constantly on hand a complete and well selected stock of WALL PAPER, BORDERS, WINDOW SHADES, FIRE BOARD PATTERNS, WINDOW CORNICES, AND FIXTURES. English & American Paper & Borders, (All shades and prices.) GILT AND ROSEWOOD MOULDING. Also, Paints, Oils, Turpentine, Brushes, Glue, Lime and Kalomine. COACH, COPAL, DANMAR and PAPER VARNISHES. Paints Mixed to Order. WINDOWS, WINDOW SASH, AND GLASS, ALL SIZES.

FURNITURE. Walla Walla and Eastern-made. At Prices to suit the Times. Those wishing anything in my line will do well to give me a call before buying elsewhere as I intend to get the best assortment and will sell CHEAP FOR CASH. Orders from a distance promptly attended to. A. W. ROBINSON, Main street, Walla Walla, Third door above the Oriental Hotel. April 9, 1869.

NOTICE. HAVING received instructions from the Land Office department in relation to the purchase of State Lands in Umatilla county, Oregon, I am now prepared to furnish all necessary information to parties wishing to purchase the same. W. H. ANDREWS, New Book and Variety Store, Walla Walla, April 7, 1869.

TO KOOTENAI: Man and horse, round trip, per animal, \$1.40. SETH L. POPE, Agent.

J. BAUER, IS A CANDIDATE FOR THE OFFICE OF COUNTY TREASURER OF WALLA WALLA COUNTY. Subject to the decision of the Democratic Convention. JESSEE DRUMHELLER IS A CANDIDATE FOR THE OFFICE OF SHERIFF OF WALLA WALLA COUNTY. Subject to the decision of the Democratic Convention.

SWIFT'S NEW STORE, ON THE UPPER UMATILLA. IS NOW COMPLETED AND IS WELL STOCKED WITH A NEW STOCK OF GOODS. Go and See Him, Everybody! Oct. 30, 1868.

Money Market. San Francisco Legal Tender rates..... 117 1/2 @ 118 1/2 New York Gold Quotations..... 113 1/2 @ 114 1/2

THE NEW PAPER.—The press and type for the Walla Walla Statesman arrived in town on Saturday last, and the printers are now engaged in setting it up in newspaper shape. It is expected that the first number will be issued on Saturday week.

INFORMATION WANTED OF Geo. W. Beck, by his father, James W. Beck. When last heard from he was near San Jose, California. Any one knowing his whereabouts will confer a great favor on his father by writing to him at Hamilton, Nevada. (White Pine.)

NEW STORE.—An advertisement for Jordan & Co.'s new store, opposite I. T. Reese's warehouse, was handed in too late for this week's issue. It will appear in our next. In the meantime, the public are informed that they have on hand a superior quality of dry goods, groceries, liquors, hardware, etc., which they are selling at greatly reduced prices.

DELINQUENT TAXES.—For the month ending March 31st, 1899, Sheriff McAuliffe collected and paid over to the County Treasurer an amount of delinquent taxes the sum of \$1968.92. Of this amount \$1156.78 was in legal tenders, and \$812.14 in county orders. Our people begin to understand the advantage of having a thoroughly competent business man in the Sheriff's office.

MANIFESTO.—It would be a great convenience to our merchants and business men if on the arrival of the steamers at Walla Walla the Agent would forward copies of their "manifesto" to this city. As it is, business men have no means of knowing when their goods arrive at the landing—a matter which at times is of great importance. We trust that the Agent will give heed to this suggestion.

MR. A. W. ROBINSON advertises, this week his new stock of painter's materials, wall paper, moulding, windows, sash glass and furniture. We have taken a look at his stock, and can cheerfully vouch for the correctness of his claim that it is the largest and most varied assortment of goods of the kind ever offered to the people of this place. Read his advertisement.

NEW DRINK.—The bar-keepers at Walla Walla have introduced a new kind of "nipper." It is called the "Beast's Cock Eye." It is made something like the ordinary cocktail, but differs in this—you stir it with a spoon, against one eye while swallowing, then slip the spoon in your pocket. It is decidedly an excellent "eye-opener" and renders it necessary that the bar-keepers should be sleepless and vigilant.

Fruit Crop.—The prospect is yet favorable for the most abundant fruit crop in this valley for the coming season that has ever been raised here. The peach, pear and plum trees are now in full bloom, giving to the orchards and yards heretofore a decidedly floral appearance. It will be recalled that last year (which was an exceptional one for late frosts) considerable of the fruit was killed as late as the 15th of May.

NEW STOCK.—Mr. W. P. Adams, of the old "Brick Corner," has just returned from San Francisco with a large and very fine stock of ladies' and gentlemen's dress goods, dry goods, etc., including all the latest styles and fashions, which the Messrs. Adams will sell at the very lowest rates. Persons wanting fresh and fashionable goods, should call and examine the new stock.

SENATOR'S INJURY.—A week or two since a youth named Frank, eldest son of Frank Stone, whilst in attendance at the lower district school, accidentally fell, and although knocked senseless at the time nothing serious was apprehended. He was at once removed to his father's house, and notwithstanding every thing that medical skill can suggest has been done for his relief, the little fellow has continued to sink until at this time but slight hopes are entertained of his recovery.

JOHN CHAMBERS.—For the past two weeks there has been a steady stream of Chinamen pouring through this valley on their way to the mines. To all appearance they come like locusts, and should the deluge continue for any considerable length of time they are quite sure to overstock the labor market and drive white workmen out of the country. It is part of the radical policy to encourage the influx of the inferior races, and just so long as that party is kept in power we may expect to see negroes and mongolians fed and petted and white men driven to the wall.

LOOKS BLUE.—We regret to notice that our old friend Baker looks decidedly blue. The old gentleman should not take his disappointment so greatly to heart. The fact is that politics, at best, is a lottery in which the blanks greatly outnumber the prizes, and if Garfield has got the inside this time, probably the Doctor's time will come next. Take courage, Doctor, and if your radical friends have bled you to the tune of over two thousand, you have only to raise the rate of interest and in that way make yourself whole on your political investment.

PERRY CREEK MINES.—Several parties of miners left this city during the week for the new mines in the Kootenai district, among them the Mereworth brothers, who were mining in the new camp two months last fall. They report to us that they mined with rockers along the banks of the creek and made from \$12 to \$20 per day to the hand. They are very sanguine of the extent and richness of those diggings. They formerly mined in the Kootenai and Cariboo mines, but are now content to spend this season in the new camp, believing they are justified in so doing.

RADICAL PRIMARY.—At the radical primary meeting, held at the Court House on Saturday last, two tickets were run—the defeated one understood to be in the interest of Garfield. The following are the names of the delegates elected: Wm. Stephens, J. D. Cook, B. C. Stephens, P. B. Johnson, J. H. Day, J. O. Smith, B. F. Stone, Chas. Moore, J. F. Boyer, D. S. Baldwin, Wm. Kaseberg and L. Day. All these gentlemen are understood to favor the nomination of Dr. Baker. In the course of balloting the Garfield men charged their opponents with "stuffing." A true blue republican, establishing his character by such claiming to be "a full-blooded, blue-bellied Puritan Yankee," arose in his place and stated that he had seen six tickets placed in the hat by one individual, and that if this sort of thing was countenanced he would retire from the party. The managers of the meeting heard this in silence, after which a motion was made and seconded to recast the vote and very decidedly negatived by the meeting. The democrats occasionally play it somewhat fine in their primaries, but for downright dishonesty command us to the radicals.

LATEST EASTERN NEWS.

Dates to April 2d.

(COMPILED FROM THE CONGRESSIONAL RECORD.)

Washington, April 1.—In the Senate, Sumner presented the petition of Jose Casanovo, a citizen of the United States, setting forth indignity received from the Spanish Government of Cuba, and asking the intervention of the United States Government.

In the House, Schenck, from the Committee of Ways and Means, reported a resolution to examine and revise the tariff laws and regulations relating to custom houses and bonded warehouses, to sit during vacation and examine witnesses, etc. The House then resumed the consideration of the Mississippi bill. After debate, Butler moved the previous question, which was agreed to. Butler in the closing speech criticized the course of his colleague, Dawes. He warned the republican members that if Mississippi and Georgia were not reconstructed with loyal legislatures, the Fifteenth Amendment could not be passed and they would lose half a dozen States. Farnsworth moved to postpone the bill till the first Monday in December, which was agreed to—103 to 62.

Paine, from the Committee on elections, reported that Semple, from the Fourth District of South Carolina, is ineligible.

WASHINGTON NEWS.

Chicago, April 1.—The Post's special says the House Committee on Foreign Affairs have agreed to report a joint resolution declaring the sympathy of the Americans with the Cubans in their struggle for independence, and pledging their support to the President whenever he deems it expedient to recognize their independence. But one member of the Committee dissented.

The warrants issued by the Treasury for March to support the Government were \$20,580,000. The remainder of the executive session was occupied in a discussion of the nomination of Longstreet as Surveyor of the port of New Orleans.

It is stated that there is no doubt of the adoption by both Houses of the Cuban sympathy resolutions. Friends of Cuba say they will exercise an important influence on the war, securing to the revolution physical as well as moral support. It is expected the Spanish Minister will present a remonstrance to the State Department against the recognition of Cuban independence and will leave the country in case of the adoption of the resolutions.

New York, April 2.—A Washington dispatch says correspondence has been in progress some time between prominent men in the British Provinces and leading men here, relative to the prospective annexation. Many members of Congress believe if the matter could be reached in an official way, proposals looking towards annexation, would eventually be made. An attempt was made yesterday to introduce a resolution in the House directing the Committee on Foreign Affairs to inquire into the expediency of investigating the relations, present and prospective, with Nova Scotia. An objection was made that the resolution could not be presented.

The Army of the Potomac Association propose to give Grant a banquet at the Academy of Music, July 6th. Generals Grant, Sherman, Sheridan and Farragut, are to be present. A fire has been raging some days in the woods between Sag Harbor and East Hampton. It has burned over 500 acres and caused a vast amount of damage.

A stand meeting of the Vigilance Committee in this city was held last night, when a proposition was made to call out the ward organizations and march to the Tombs and demand the surrender of the murderer Real, into their hands. After a stormy debate it was resolved to await the action of the Court and keep a close watch on the movements of politicians in this case.

The Times says no doubt that the House has been overreached by the Senate in the Tenure of Office business. Judge Davis and Hoar construe the new bill as leaving in the hands of the Senate a continued check upon all removals by the President.

Chicago, April 2.—Specials say the Senate in executive session considered Longstreet's nomination. Kellogg and Spencer favored his confirmation. Cameron strongly opposed it. The debate is likely to be protracted, and the result is very uncertain.

Washington, April 3.—The Senate Judiciary Committee was instructed to report a bill defining the eight hour law. The House resolution of adjournment was taken up and an amendment fixing the time to adjourn to April 15th was almost unanimously rejected.

Mr. Sherman opposed fixing a day for adjournment till Congress disposed of the amendments to the tax law and Indian appropriation bill. Mr. Thayer wanted to fix the status of Georgia before adjournment. An amendment fixing the 10th as the day of adjournment was adopted, and the resolution was passed by 25 to 19.

The House went into Committee of the Whole to consider the miscellaneous deficiency bill, and after discussion till half past four the committee reported the bill and amendments to the House. The amendments were adopted and the bill passed. The Senate amendment fixing the time of final adjournment at April 10th was concurred in, and the House adjourned.

WASHINGTON NEWS.

Washington, April 3.—In the Senate today, Sherman, from the Committee on Finance, reported the House bill to amend the supplementary tax law with amendments. The sections relative to tobacco are stricken out, and the bill otherwise changed. Chicago, April 3.—Washington specials say the Senate Pacific Railroad Committee, considering the question of fixing the junction of the Pacific roads, has agreed to prepare an amendment giving the President of the United States the power to designate the place of junction and if he deems it expedient to appoint a board of civilians not interested in any Pacific road to make a thorough examination and report what should be done to make the Pacific roads, efficient, and that the bonds are to be withheld in order to carry out the provisions of the law to make the roads first-class. The Republican's special says the Senate confirmed Longstreet's appointment today

by 25 to 10. Most of the Senators dodged the vote.

The bill authorizing the Northern Pacific Railroad to extend a branch line from a point near Portland to Puget Sound, but not to be entitled to any subsidy in bonds or lands except such land was included in the right of way, was passed after the adoption of an amendment requiring at least twenty-five miles of the extension to be completed by July 1, 1871, and forty miles yearly thereafter.

Commodore T. H. Jenkins has resigned the office of Chief of the Navigation Bureau, and will be assigned to other duties. Chicago, April 3.—The Tribune's special says General Stoneman was removed by the express direction of the President, because of his dissatisfaction of his course in Virginia.

The House Committee on Pacific Railroads continue the investigation of the affairs of the Central Pacific Railroad, and make slow progress. Some members of the House have discovered that the Conference report on the Civil Tenure bill, as presented in the House, differs slightly from that presented in the Senate, and propose introducing a resolution recalling the bill from the White House. Some members say the bill is not what Butler and Bingham represented. This is getting up some feeling in the matter. The President will probably refrain from signing the bill till the motion for recall is acted on.

HORRIBLE ACCIDENT.—A man named Jeremiah O'Connor was killed in the Ida Ella mine, on last Wednesday morning, by the accidental explosion of a can containing some giant powder. The facts of the unfortunate affair as we have gathered them, are these: The deceased and Robert Holman were employed at the windlass hoisting ore from the shaft; the miners working below being ready to prime, called up to the men at the windlass for a charge of powder; the deceased, in obeying the order, standing at the mouth of the shaft, placed a ignited candle beneath the can, for the purpose of thawing the powder some, before sending it below, as he had frequently done before, when the powder exploded with a terrific crash, blowing off one of the unfortunate man's hands and otherwise mutilating his body, and throwing him down the shaft, which is upwards of one hundred feet deep. The men in the mine imagined they heard him speak after the fall, but this is unlikely as it is most probable that life had fled even before the body reached the bottom of the shaft—at least such is the opinion of Dr. Hogg, who was called up. Holman received slight injuries from flying splinters. O'Connor leaves a widow and two small children, who were solely dependent upon the wages of the husband and father for support.—Oryzhee Aulanche.

DR. HUFELAND'S CELEBRATED

SWISS STOMACH BITTERS.

The first and most healthful Tonic ever introduced into the United States is still the leading article, and more of this sold than of all other so called Tonics or Bitters. For Sale to the Trade by TAYLOR & BRENDEL, Sole Agents, 409 and 411 Clay Street, San Francisco. 13-17

WALTHAM WATCHES! The extensive use of these watches for the last fifteen years by Railway Conductors, Engineers and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the strength, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects, it is decided the question as to the real value of these time-keepers.

More than 400,000 of these watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others. The superior organization and great extent of the Company's works at Waltham, enable them to produce watches at a price which renders competition futile, and those who buy any other watch, merely pay from 25 to 50 per cent. more for their watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said. These time-pieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every intention in watchmaking originating in this country, or in Europe, only those were finally adopted which severe testing by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring time-keeping.

Among the many improvements we would particularize: The invention and use of a centre-pinion of peculiar construction, to prevent friction of the train by the breakage of main springs, is original with the American Watch Company, who having had the refusal of all other contrivances, adopted Fogg's Patent pinion as being the best and faultless. Hardened and tempered hair-springs, now universally admitted by Watchmakers to be the best, are used in all grades of Waltham Watches.

All Waltham Watches have dust-proof caps protecting the movement from dust, and lessening the necessity of the frequent cleaning necessary in other watches. Our new patent stem-winder, or keyless-wratch, is already a decided success, and a great improvement on any stem-winding watch in the American market, and by far the cheapest watch of its quality now offered to the public.

TO CALIFORNIANS and other living in portions of the United States where watch-makers do not abound, watches with the above mentioned improvements which tend to insure accuracy, cleanliness, durability and convenience, must prove invaluable. Every watch bearing the trade mark of Waltham is guaranteed to be a thoroughly reliable time-keeper. To prevent imposition, buyers should invariably demand a certificate of genuineness. The trade supplied by Messrs. B. B. Gray & Co., San Francisco, Cal., and generally for sale at retail by all respectable dealers.

For other facts and information, address ROBBINS & APPLETON, Gen'l Agents, 9-2m 182 Broadway, New York.

NOTICE —TO— MECHANICS AND BUILDERS!! PLANING MILL! —AND— Sash, Door, and Blind Factory.

I DID NOT COMPETE AT THE LAST COUNTY FAIR, but I have re-planned, and I will compete for the truth of the above, I refer the public to Dr. J. M. DOUGLASS, who is in this place, and as I am competing with competitors in this place, and NOT with San Francisco competitors, I will do your work as CHEAP and BETTER than you can get it done in the Fremont, Wash. and P. Co. I am now, and will continue, to make Sashes, Doors, Window Frames, and Window Blinds, at greatly reduced prices. For the benefit of those who will keep the following sizes on hand: SASHES—8x10, 9x12, 10x12, 10x14, and 10x16, twelve lights. SASHES—10x14, 12x14, 12x16, and 12x18, eight lights. DOORS—two panels, 6x6x2 1/2, 6x8x2 1/2, and 7x3. DOORS—two panels, 6x6x2 1/2, 6x8x2 1/2, and 7x3.

WINDOW BLINDS, to match the above sizes. Pioneer Washers For Sale at from \$10 to \$12. UNDERTAKING. I have just procured a HEARSE, and am prepared to fill orders in the Undertaking line. Charges in all cases reasonable. Hearse Free of Charge.

All orders promptly attended to. Plans and estimates made, and contracts taken in town or country, and all work warranted. WM. GLANSFORD, 16-17 Alder street, Walla Walla, W. T.

Premium Sash and Door Factory. HAVING RECEIVED THE PREMIUM AT THE last County Fair on DOORS, SASH, MOULDINGS and BLINDS, I am prepared to call the attention of the public generally, that I am constantly adding on new machinery and am now prepared to do any work in my line as low as any one else in this place. I care how low they do it. My work will be done as well as it is done in San Francisco or Portland. I will keep on hand all the following sizes: SASHES—From 8x10 to 10x16, twelve lights; with and without glass. Other sizes made to order on Short Notice. DOORS—Of all sizes, two and four panels, always on hand.

WINDOW BLINDS made to order. I am also prepared to do all kinds of TURNING and CABINET WORK, Room brackets, Bedsteads, Tables, and Chairs, generally. DOOR and WINDOW FRAMES also made to order. My Planer, and Tonger and Groover are some of the best machines on the coast, and will not fall to do good work. I have a Patent Saw for sawing weather-boarding which will saw true and smooth. Also, an up and down saw, for sawing circles. WAGON WORK will be done at low rates. I will take in exchange for some of my work, Grain, Lumber and Shingles.

I am now prepared to take contracts for any kind of CARPENTER WORK. Having some of the best workmen in my employ, I am bound to give satisfaction. I hold myself ready at all times to GIVE BONDS for the performance of any contract I may take. J. S. WITTE, on the Upper Peninsula, Oregon, is my agent; those in want of SASH and DOORS in that part of the country will please apply to him. Remember John Davell's Premium Sash and Door factory, Walla Walla. 15-17 JOHN DOVELL.

NOTICE TO CREDITORS. NOTICE IS HEREBY GIVEN by the undersigned, J. M. LYNCH, Administrator of the estate of ALEXANDER GILBERT GOMEZ, deceased, to the creditors of said estate to all persons having claims against said deceased, to exhibit them with the necessary vouchers, to the undersigned administrator, at his residence in Walla Walla county, W. T., within twelve months of the first publication of this notice. Dated, Walla Walla, W. T., March 10, 1899. AMBROSE JOHNSON, Administrator.

NOTICE. THE UNDERSIGNED HAS THIS DAY TURNED over to P. M. LYNCH, all the book accounts, dues, materials, &c., connected with the BLACKSMITH BUSINESS, conducted in the name of VAN HORN & CO. I am also, connected with the business to P. M. LYNCH, who will continue the business. All persons knowing themselves indebted are requested to make prompt payment. A. S. VAN HORN, P. M. LYNCH. Walla Walla, March 3, 1899. 12-17m
