**Olympia Railroad Opening.**  
OLYMPIA, W. T., April 8, 1874.  
EDITOR DISPATCH:—According to previous notice the citizens of Olympia and Tumwater turned out in strong force yesterday, to begin the work on the Olympia and Tenino Railroad. The morning, though cloudy and cool, was auspicious. Nearly all the business houses and offices in Olympia were closed, and every profession and department of industry was represented in the gathering; the laborer, the mechanic, the artisan, the merchant, the lawyer, the doctor and the preacher.  
At the hour of 8 o'clock the bells were rung as the signal for gathering at the Public Square. The band discoursed music, and about 8 1/2 took up the line of march towards Tumwater. The procession embraced both old and young, and were it not for their natural good looks might have been considered rather a motley crew, with their spades and shovels, their picks and axes and mattocks. Very few were clad in their usual garb, as seen upon the streets or at their offices and usual places of business, but their pants in their boots, or clad in overalls with overshirt or blouse their very appearance showed they meant business. Appearances however were not sufficient, the demonstration of realities on the line of the road proved they were in earnest.  
A long line of boats filled with ladies and provisions, proceeded shortly after from Marshville bridge to the point of beginning, on the West side of the Bay, at or near Warren's point, about half-way between Olympia and Tumwater. The men who formed the procession for labor were ferried across in a large flat boat from the East side, immediately opposite to the place where the work was to begin.  
Quite a number both of ladies and gentlemen had formed the idea that it was to be a picnic party, that some speeches would be made, a few shovels of earth be thrown out, the beginning be formally made, and all have a good time generally. But the majority went for the purpose of work, and work they did. Assistant Engineer Brooks estimates that there were not less than twelve hundred cubic yards of earth removed by this volunteer force, and done carefully and judiciously, besides the cutting and removal of timber and logs on the line from the place of beginning to Tumwater.  
The citizens of Tumwater started on their end of the line, about the time that the citizens of Olympia started from town, and their work chiefly was the cutting of trees and removal of logs, whilst those from Olympia were engaged in grading, removing at the same time in their route, such trees and logs as were in the line, grubbing both trees and stumps where necessary. The estimate of the engineers is that the voluntary work, thus done on yesterday, would at contract prices have cost the company about \$800. The entire work for was about two hundred men; and it was remarked that if they had been hired to do the work, they would not have accomplished near so much. Every one seemed to work with a will, and the results were astonishing to all concerned.  
At noon the ladies provided a plentiful and substantial repast, consisting of bacon and beans, cold meats, bread and butter, flanked with excellent coffee and tea, and many of them worked as hard in their department, as did the men on the road.  
Many a one-to-day is complaining of being sore and stiff, many have blistered hands, but none regret the work done, or the record they made in the beginning of this important enterprise. It is said that never before were there so many stiff and sore people in Olympia as are to be found in it to-day.  
It would not surprise me if the people would make another such demonstration in a week or two, as they are determined to put the road through.  
The action and results of yesterday have been telegraphed to Hon. O. B. McFadden, with the hope that such action on the part of the people will show to Congress how earnest they are in the prosecution of this work.

**SEATTLE.**—One of the editors of the Tacoma Tribune, after spending a day in Seattle, gives the town the following, for him, complimentary notice:  
"The town is rather dull, but withal looking much better than it did a month ago. One or two little houses are in process of construction, and a number of old ones painting; fences, sidewalks and gardens are receiving the usual spring attention, and this is about everything in the way of improvements at present going on. A number of houses there are doing a very good business, judging from appearances, and the statements and pleased expressions of the managers."  
This is pretty well for a paper which has been telling its readers that Seattle is nearly played out; that has represented its population as having been reduced one half since its last census, and predicted that its population which was

2,500 a year ago would be reduced to 300 a year hence; that it was already a town of vacant tenements and broken business. After seeing things as they were, the writer had not the assurance to repeat these statements, nor the honesty to represent the facts as he found them; so he compromised the truth by drawing it mild. He might have said with truth that he saw more merchandise landed upon our wharves and delivered at our stores, in one day, than he ever saw delivered to the Tacoma merchants in a month. He might have seen from the water front, in the process of construction, instead of "one or two little houses," no less than four private residences, equal to the best now being built at either of the two towns of Tacoma; namely: one for Capt. Randolph, one for Capt. Wright, one for John T. Stuart, one for George Foster; preparations going on by Hillary Butler for a building two stories high, 30 by 60 feet upon the ground, opposite the Occidental Hotel, besides several "little houses," and many additions to old ones. By passing out to the northern and eastern portions of the town, he would have found more buildings and a better class of improvements in progress than in both of the towns of Tacoma; he would have found also many mechanics and laborers employed who had been starved out of Tacoma. He might have passed all over Seattle without finding a habitable house unoccupied, or a man willing to work unemployed. All there is of Seattle belongs to its own people; it owes none of its prosperity to foreign capital; it is not dependent upon any foreign corporation for its future success; its people are united and determined to stand by their own. Tacoma resembles it in none of these particulars.

**A PLEASANT REMEMBRANCE.**—An old friend of thirty years standing, sent us by Capt. Wright, of the steamer Zephyr, a splendid editorial chair, manufactured by Pressey & Estery, manufacturers of cabinet work and furniture, Tum Water, W. T., for which Mr. Pressey has our grateful acknowledgments. Taking this chair as a specimen of their work, we can commend the firm to public patronage.

**OLYMPIA MUNICIPAL ELECTION.**—The election in Olympia, on the 6th inst., resulted in the election of I. C. Ellis, Mayor; A. R. Elder, J. M. Lowe, Justices of the Peace; Councilmen, First Ward, S. D. Howe, Rice Tilley; Second Ward, Nat. Crosby, T. T. McElroy; Third District, D. S. B. Hoehny. F. A. Hoffman and J. S. Dobbin have the same number of votes for councilman Third Ward.

**PRIVATE HOSPITAL.**—Dr. Weed, who has charge of the County Hospital, has established a private hospital in connection therewith, which supplies a want long felt by many sick and wounded, from the mills and logging camps, who are brought to this city for medical or surgical treatment. The hospital is located in the most pleasant portion of the city, abundantly supplied with pure water, the rooms light and airy, comfortably furnished, kept scrupulously clean, and the attendance of the best character.

If any farmer will try the experiment of distributing the proceeds of his labor over two or three countries, with an additional one to two or three distant States, for one year, we will guarantee that he will never, after that year's experience, ask a publisher to supply him with a paper a year or two without the pay for it."

Patented June, 1866, to Peter Poncin  
THIS VALUABLE MEDICINE, IN USE for several years past in the Eastern States with marvelous success, has just been introduced in this place by the patentee. The first person who tried it here, offers the following testimony to its merits:  
SEATTLE, August 10, 1873.  
I have been a sufferer for several years from chronic bilious affections from which no medicine tried by me afforded any relief. As an experiment, I tried Mr. Poncin's Egyptian Bitters from the effects of which I have experienced the most gratifying results. I can sincerely commend it to others similarly afflicted.

Seattle W. T., April 16 1874.

PARTY PARAMOUNT TO COUNTRY.—The two party conventions recently held in Oregon, have demonstrated beyond peradventure that party politicians, as a rule, subordinate all considerations of public interest to questions merely of party character, relating exclusively to party discipline, and party rewards and punishments.

THE CLIMATE OF MINEOTA AND WASHINGTON COMPARED.—The Minnesotaian of March 21, says: The New York Tribune, the Boston Advertiser, and other papers, print, as a rather striking item of news, the following: "Minnesota has had seventy days of continued sleighing."

So it will ever be so long as the great majority of the voters yield an unreasoning obedience to caucus dictation, and demand no guarantees against abuses. It leaves the majority, practically, without voice or opinion in the matter, placing the nominations in the hands of the few interested and unscrupulous politicians, who make the division of the spoils of office a matter of bargain and sale.

SEATTLE AND WALLA WALLA RAILROAD.—The first quarterly meeting of the stockholders of the Seattle and Walla Walla Railroad Company was held at the office of the Company, in this city, on Monday, the 13th.

Hon. John Denny made a stirring and telling speech, urging the immediate commencement of the work as not only practicable with the means at hand, but the only certain way of ensuring ultimate success; that they could not command or expect help from others until they had first exemplified their own faith in the project by investing their own means in the enterprise.

After further remarks in the same strain, by several other stockholders, it was, on motion, voted that proposals be issued for bids for clearing, grubbing and grading the first fifteen miles of the road: said bids to be opened on the 10th day of May next.

On motion, a committee of five was appointed to devise ways and means to aid in the construction of the road, with authority to call public meetings for that purpose, under instructions to report as soon as practicable. The following named gentlemen were appointed said committee: W. N. Bell, E. G. Farnham, John Leary, Thomas Mercer, and J. R. Robbins.

This begins to look like business.—That the people of this city are abundantly able to build fifteen miles of railroad without seriously embarrassing themselves, there can be no serious doubt. There is not a successful business man who has not undertaken and successfully accomplished a greater venture in proportion to his means than this would be to the whole, and no one doubts that the accomplishment of this project would advance the market value of the real estate of the city in amount far greater than the cost of the road, beside paying good dividends upon the stock.

An artesian well has been sunk at Yreka, Siskiyou County, in the vicinity of salt springs, by a gentleman who desires to engage in the manufacture of salt. At the depth of five hundred feet there was fourteen cubic inches flowing from the well, or 450,000 gallons per hour. It is said that gas escapes in a sufficient quantity to light the town of Yreka.

The oyster beds of Virginia cover an area equal to 640,000 acres, and those great mines of submarine wealth are estimated to yield an annual money value of \$10,000,000.

The Daubury News says: There is a Daubury legend to the effect that a party desiring to transact some private business with another, was invited by the other to step into a neighboring store. "But we will be disturbed there," said the first party. "Oh, no," said the second party; "They don't advertise."

A young man named Frost, living at the village of Chrystal, in Michigan, became enamored of a Mrs. Harney a short time ago, and the other night shot her husband, who claimed the privilege of going home from a party with his own wife, inflicting a serious wound. A man does not know any more whose consent he must gain before he pays these little attentions to his partner which were once so common.

A FAMILY UNHAPPY.—A Detroit street fisherman started out of her house yesterday to stone a dog that was chasing her chickens. Her husband followed and threw a stone at the dog, but it struck his wife. His wife then picked up a stone and, throwing it at her husband, missed him and hit the dog. The dog gave one fearful yelp, and ran between the man's legs, spilling him on the pavement. There is now one unhappy family on Detroit street.—Daubury News.

A GOOD EDUCATION.—To read the English language well, to write with dispatch a neat and legible hand, and be master of the first four rules of arithmetic, so to dispose of at once, with accuracy, every question of figures which comes up in practice—I call this a good education. And if you add the ability to write pure grammatical English, I regard it as an excellent education. These are the tools. You can do much with them, but you are helpless without them. They are the foundation; and unless you begin with these, all your flashy attainments, a little geology, and all the other oblogues and sophisms, are ostentatious rubbish.—Everett.

The Albany Democrat soliloquizes: Wouldn't the present term of our Circuit Court afford a stunning argument to every sensitive woman against female suffrage? Of course, if women were permitted to vote they would be compelled to serve on juries, and as our present Court docket is composed chiefly of gross slander, nasty divorce and incest cases—the details of which would make the most hardened vagabond blush with shame for mankind—no intelligent, sensitive lady could tolerate the idea of being compelled to listen to a recital of these revolting crimes. One term of Court like our present would either "bust up" the woman suffrage business or completely demoralize female purity.

A singular shooting affray occurred in Jefferson place, near Palisade avenue, Union Hill, N. J., Tuesday evening. Delos Ackerman, the son of a well-known hotel-proprietor of the place, and a young lady named Mary C. Glackmeyer, were standing on the sidewalk engaged in seemingly pleasant conversation, when Ackerman suddenly struck the young lady a stunning blow on the head which felled her to the sidewalk. Before she could regain her feet he pulled out a revolver and fired at her. Fortunately his aim was bad, and the ball merely grazed the young lady's left arm, without inflicting very serious injury. The report of a pistol attracted a crowd, but Ackerman had succeeded in making his escape. A warrant has been issued for his arrest. It is said that Ackerman attacked Miss Glackmeyer because she refused to let him kiss her.

VANDEBILT'S FORTUNE.—One year after his wife's death, Commodore Vanderbilt married Miss Frances Crawford, of Mobile, with whom he lives very happily. His will has been made for nearly twenty years, and he is said to overhaul it every year, making additions or changing it as he thinks proper.—Some one once said to him: "You ought to be very careful about your will, Commodore, or, where there are such vast interests at stake, there may be endless trouble and litigation." To which he is reported as having replied: "What the—do I care what they do with my money after I am gone! I shall take good care of it while I am here and after that it does me no good." Still it is believed that he does care, and that his plan is to preserve the bulk of his fortune in the shape in which he will leave it, at least during the generation that next succeeds him.—N. Y. Tribune.

PERSIAN RESOURCES.—A correspondent writes that no country can be more thoroughly undeveloped than Persia is at present. That great mineral wealth exists is beyond question. The forests of Mabadan abound in timber of great value. Walnut trees of gigantic size cover the country; oak, teak, and boxwood are found in apparently inexhaustible quantities. But of what use is all this wealth while no roads for wheeled carriages exist except in the immediate neighborhood of Teheran, and when all the trade and traffic of the country is carried on by means of pack animals?—The great highways of the country are in a miserable condition for even a mule or horse, and many of them are worse than a deer-path. Occasional spasmodic attempts at road making are attempted; five or six miles of good carriage road are constructed, but as this piece of good road can only be approached by paths only fit for mules, its value may be readily imagined. Yet time and labor are constantly so wasted—in fact, everything in Persia is spasmodic.

No TIME FOR FOOLING.—The Postmaster General's dignity must have suffered, the other day, when he received a letter from Delta, Iowa, saying: "If you don't get some one to run this 'ere post office party soon, I'll be throwed in the river, for I'm going off on a bear hunt, and can't fool any more."

A Nebraska judge, not long since convicted and fined a man in the following manner: There being no evidence against the prisoner the judge declared he knew something of the case himself. Whereupon he solemnly administered the oath to himself, gave his testimony and convicted the prisoner.

The relations between the Government of Japan and foreign ministers, excepting the representative of the United States, are becoming more and more inharmonious. Japan still resists the pleas for opening the country, and requires the strict enforcement of the treaties as they stand, until the revision shall have been agreed upon. Mr. Bingham acquiesces, and the other envoys are vehement in their opposition.

A very charming daughter of one of the "solid men" of Boston, being at a ball a few evenings since, was solicited by a combination of mustache, starch and broadcloth for the honor of her hand in a dance, to which solicitation she returned an affirmative answer. In a subsequent conversation the combination inquired her father's business.—"He is a wood sawyer," she replied. The fellow smiled, feeling that he had let himself down a foot or two by the association. The lady's father was a wealthy dealer in mahogany, which occasionally has to be sawed.

DEATH OF KENNETH MCKENZIE, ESQ.—We regret to announce the death yesterday, at his farm on the Saanich road, of Kenneth McKenzie, Esq. The deceased gentleman had been an invalid for some months, and the cause of his death was heart disease. Mr. McKenzie came to Victoria some 23 years ago from Scotland, and filled for many years a position of high trust for the Puget Sound Agricultural Company at Craigflower, and at the time of his death was proprietor of the Craigflower Bakery and a Naval Contractor. Mr. McKenzie was universally respected by all classes, and his estimable family have the sympathy of the entire community.—Colonist.

THE DECKWARD'S WILL.—"Know all men by these presents, that I—of the county of Mecklenburg, and State of Virginia, being of sound and disposing memory, in view of the uncertainty of life, and the certainty of death, do make this last will and testament, to wit: I die a wretched sinner; and I leave to the world a worthless reputation, a wicked example and memory that is fit to perish.

I leave to my brother and sisters shame and grief, and the reproach of their acquaintances. I leave my widow a broken hearted wife a life of lonely struggle with want and suffering. I leave my children a tainted name, a reviled position, a pitiful ignorance and the mortifying recollection of a father, who, by his life, disgraced humanity, and at his premature death, joined the great company of those who are never to enter the kingdom of God. I pray God that those who are yet living may take warning and profit by the above."

FASHIONABLE MUSIC.—Oliver Wendell Holmes has the following to say in reference to music: "I don't like your chopped music any way. That woman—she has more sense in her little finger than forty middle societies.—Florence Nightingale—says that the music you pour out is good for sick folks, and the music you pound out isn't. I have been to hear some music pounding. It was a young woman with as many white muslin flounces around her as the planet Saturn has rings, that did it. She gave the music stool a twirl or two, and fluffed down on it like a whirl of soap-suds in a hand basin.—Then she pushed up her cuffs, as if she was going to fight for the champion's belt. Then she worked her hands to limber them, I suppose, and spread out her fingers till they looked as though they would cover the keyboard, from the growing end to the little squeaky one. Then those two hands of hers made a jump at the keys as if they were a couple of tigers coming down on a flock of black and white sheep, and the piano gave a great howl as if its tail had been trod on. Dead stop—so still you could hear your hair growing. Then another jump and another howl, as if the piano had two tails, and you had trod on both of them at once; and then a grand clatter and scramble and string of jumps up and down, back and forward, one hand over the other, more like a stampede of rats and mice than like anything I call music. I like to hear a woman sing, and I like to hear a fiddle sing, but these noises they hammer out of their wood and ivory anvils—don't talk to me, I know the difference between a bullfrog and a woodchuck."

QUEENSTOWN, April 7.—The steamer Egypt, from New York, arrived here this morning, and brought the first officer and salvage crew of the French Trans-Atlantic Co.'s steamer Europe, which they endeavored to save, but were compelled to abandon in a sinking condition. The first officer of the steamship Greece reports they encountered the Europe on the 2nd of April in a sinking condition, and took off passengers and crew, numbering 400, and proceeded on their way to New York. The officers, with a crew of 20 remained on the Europe. On the 5th, the Egypt took them in tow, but a heavy sea parted the hawsers, and as the water was gaining constantly they were compelled to abandon the wreck and were safely taken on board the Egypt. The Europe sailed March 27 from Havre for New York.

He exhorts the people to maintain composure, and promises the severest policy toward the enemies of Spain, protection of her friends, and justice to all. He considers the closest union of Spaniards important under the circumstances, and will not permit the existence of any political parties of any kind. He declares his conviction that peace will be restored under the flag of Spain, and says he will wait for a more peaceful time to settle the grave question of slavery.

CHICAGO, April 8.—Washington dispatches say bill of Military Committee on Army was in regular order to-day, but was crowded out of place by Curcy bill. The members of the Committee are of the opinion that the House will pass a bill more sweeping in its reductions than the one reported. The pending bill gives to heads of various staff departments rank and pay of Brigadier Generals. It is thought that that rank of officers will finally be fixed as Colonels. In many other respects the rank of staff officers will be somewhat reduced.

WASHINGTON, April 8.—General Butler appeared before the Ways and Means Committee. He complained that witnesses had been examined in relation to his private affairs while he was not present and that he had not been notified that such testimony would be taken. Daves explained that all reference to him, Butler, that the testimony had been incidental, and that the Committee could not know in advance what witnesses would testify. Beck informed Butler that Sauborn would be examined to-morrow, and would probably be questioned with regard to his operations during the war, when he held some commission under Butler. Butler said he could not be present to-morrow. He said the only office Sauborn held was that of provost messenger, to keep order on a boat running between Baltimore and Fortress Monroe. Solicitor Bancroft made an additional statement to the Committee defending his official acts in the matter of the Sauborn contracts against reflections made by Secretary Richardson and Assistant Secretary Sawyer.

WASHINGTON, April 9.—Sauborn appeared before the Ways and Means Committee to-day with an itemized statement of the receipts and expenditures under his contract, showing that, in round numbers, the receipts were \$213,000, and disbursements \$156,000. The chief items of the expenditure were:—\$44,000 to W. S. Morrison and 2 assistants in Europe; \$28,000 to Prescott for services and legal expenses; similar sums to Presbury and Green; \$40,000 for the salary of a secretary; \$3,200 to the district attorney, Bliss; and \$9,000 to Waddell. Sauborn testified that nothing was paid for obtaining the contracts or in connection with legislation, or in the allowing of claims at the Treasury Department; and that although nothing had been realized by the syndicates of the Treasury from his disbursements to Morrison in Europe, yet if all owed to the continent he ought, he could turn in over five millions from information furnished by him.

NEW YORK, April 9.—The new combination between the Pacific Mail, the Union Pacific, and the Panama Companies, is regarded as almost an accomplished fact. Yesterday there was an informal caucus of representatives of the three corporations at the Pacific Mail Company's office, Russell Sage and Geo. Scott representing the Panama and Pacific Companies, and active directors representing the U. P. Advocates and promoters of these enterprises say these several interests will be subserved by equitable working arrangements, where-

by a disastrous and ruinous competition will be avoided. In view of the proposed extension of facilities to outside organizations Geo. Scott will go to Europe at an early date, to make arrangements with the English and German Sub-Atlantic Companies, with a view to benefitting the Panama Railroad Company. Sidney Dillon regards the proposed combination as a desirable arrangement, and says it is probable the agreement will be consummated.

WASHINGTON, April 9.—The President has received the resignation of Governor Lowe, Minister to China, taking effect upon the appointment of a successor. Strong efforts are making to secure appointment of Geo. F. Seward, the consul at Shanghai, who is favored by Fish because he is a relative of the late Secretary Seward.

BOSTON, April 9.—The 18th ballot stood: Dawes, 91; Hoar, 72; Curtis, 74; Adams, 15; Sanford, 9; Banks, 7; Washburn, 4; Whittier, 1.

The announcement is made of the acceptance by the President of the resignation of Special Treasury Agent Jayne, dated March 9th. The letter of acceptance, it is said, compliments Jayne for his zeal in the service of the Government.

NEW YORK, April 9.—At Pattenburg, N. J., last evening, one of the boilers used for compressing air for the use of the drills in the Jutugton tunnel, exploded. Four men were instantly killed and several injured. A Mrs. Summons, who was driving in a carriage at the time, was fatally injured by being thrown from the vehicle.

The new combination between the Pacific Mail, the Union Pacific and the Panama Co. is regarded as an accomplished fact.

The steamer Europa was valued at one and a quarter millions and was insured in a French Company at about two-thirds her value. Her cargo was very valuable, chiefly silks, wines and sardines. The agents think the value of her cargo was not less than one million, probably insured.

Yesterday morning Dooney Harris, a well known pugilist, quarrelled in Clark's saloon on Amity Street, with William Clough, the son of Professor Clough and was fatally shot. Clough escaped.

PROVIDENCE, April 8.—The bankruptcy proceedings against the Sprague Manufacturing Company were discontinued to-day.

LONDON, April 9.—The trial of John Luie for perjury began to-day.

10.—A Berlin dispatch to the Daily News represents that the Conservatives and Ultra-montanes are actively intriguing to supplant Bismarck by Gen. Mautniff.

A steam boiler in a factory near Glasgow exploded yesterday with terrible effect. A large portion of the boiler was driven several hundred feet through the air and crashed into a school-house.—3 children were instantly killed and 30 reported more or less injured. 3,000 colliers are on a strike in Somersetshire.

OTTAWA, Ont., April 9.—The excitement concerning Riel is somewhat subsiding, and it is now believed that he will not take his seat and subject himself to expulsion.

CHICAGO, April 9.—The weather for the past few days has been extremely cold throughout the West and as far south as Little Rock. Snow fell to-day in Southern Ohio to the depth of five inches. At Cairo the ground was white with snow. At Little Rock snow and cold rain prevailed. Great fears are entertained for the safety of the fruit crop.

WASHINGTON, April 9.—Houghton has been authorized by the House Committee on Pacific Railroads to report a bill requiring the U. P. R. R. Co. to operate the bridge across the Missouri river, at Omaha, as part of its continuous line of road. This bill is designed to put a stop to the present extra charge for freight and passengers, exacted for transferring them across the river by this bridge. Ten dollars a car is now charged for bridge tolls, and much inconvenience is occasioned to passengers by compelling them to change cars.

WASHINGTON, April 10.—In the Sauborn investigation this morning, Judge, Chief of Special Agents of the Treasury, stated Sauborn's connection with the Department, which, it appears, was to detect smuggling between Canada and Boston. Witness appointed A. G. Fay, a friend of Sauborn's, a special agent to Europe, paying him \$3,000 expenses and some \$14,000 on account of undervaluation of imports he recovered thro' Fay's investigation, and there were suits for some \$80,000 more pending. He admitted that Sauborn had an interest in the case in the shape of moities, which seemed to be a new revelation to the Committee. He also admitted that the Blue Book, which is supposed to contain a list of all the Government employees, did not contain the name of Fay, because Fay did not want it known that he was engaged in the secret service.

Representatives of the Panama, Union Pacific, and Pacific Mail, held a meeting yesterday and outlined the proposed agreement. The Union Pacific Directors wished tea to be raised to the former standard of five cents per pound.—This was opposed by the Pacific Mail and Panama Directors, who think there is more money in carrying it at four cents, as by this rate traffic will be attracted.

ALBANY, N. Y., April 10.—Lowenstein, convicted of murdering a peddler last fall, was hanged at 2 20 this afternoon, protesting innocence.

NEW YORK, April 10.—A dispatch from St. Johns, New Foundland, says

the steamer Tigris, of the Polarix expedition, while seal fishing, exploded her boiler. Two officers and twenty of the crew killed.

WASHINGTON, April 10.—In the District investigation to-day Thomas Lucas was examined to prove the priority of the contract awarded to him for paving the street, which was subsequently awarded to Bidgeman, Postmaster at Philadelphia, who was said by Governor or Shepherd to be President of the Bid-die Keystone Paving Company. The object of the memorialists was to prove that Bidgeman sold or sub let his contract, and the Governor gave the work his personal attention.

John Collins testified that his partner, Jones, handed him the contract for paving the streets one morning and he was surprised because he had never made application for the contracts. Jones told him that Murtagh, president of the National Republican Committee of this city, had given them; that Murtagh claimed one-half of the profits, and asked him if he proposed to furnish any means. He said he did not. Jones & Collins built the new Republican building for Murtagh, and were pressed by him for a claim and interest in the contract because of his alleged interest in securing it. No work was done under the contract because Collins refused to recognize the claim of Murtagh.

LONDON, April 10.—Jean Luie was convicted this morning for perjury on the Tichborne trial. Captain Brown, for a similar offense, is now on trial.

The Dutch have open several Acheen ports to trade.

Sir John Arslake has resigned the Attorney-Generalship in consequence of illness and Sir Richard Bagally succeeds him.

Captain Brown, a witness on the Tichborne claimant, was found guilty of perjury, and he and Luie were sentenced to 5 and 7 years penal servitude respectively.

BERLIN, April 10.—The report telegraphed hence of the Conservative and Ultramontane intrigue to supplant Bismarck by Mautniff is wholly unfounded.

AN HONEST MAN.—Mr. Peter A. Dey was the engineer who surveyed and located the first hundred miles of the road. He estimated its cost at not over thirty thousand dollars a mile. When this estimate was shown to the directors, it was returned with orders to retouch it in higher colors, to put in embankments heavier, and increase the expense generally; and then he was requested to send his estimate that it would cost fifty thousand dollars a mile. When Mr. Dey found that this part of the road was to be let to Mr. Hoxie at \$50,000 per mile, for work which he knew could be done for \$30,000—this difference of \$20,000 a mile amounting to two millions of dollars on the first hundred miles, and to five millions on the two hundred and forty-six miles—he resigned his position as chief engineer of the road, with a noble letter to John A. Dix, president of the road. He closed the letter with this statement: "My views of the Pacific Road are, perhaps, peculiar. I look upon its managers as the trustees of Congress. You are doubtless informed how disproportionate the amount paid is to the work contracted for. I need not expiate on the sincerity of my course, when you reflect upon the fact that I have resigned the best position in my profession this country has offered to any man."—Scribner's Monthly.

HOW FRANK PIERCE GOT THE NEWS OF HIS NOMINATION FOR THE PRESIDENCY.—Sitting one night in the Tremont House with the late Colonel Barnes, he said to me: "That was a queer thing about the nomination of Frank."—"Frank who?" I said. "Why Frank Pierce—General Pierce. You see, we intended to run Frank for the Vice-Presidency. We thought the South would concede that much to the North, and we pitched upon the General. He was very social in his habits, but very quiet. He spent his evenings with a set of good fellows, and the fact is, he drank a good deal, though it was not generally known. The day of the nomination it agreed between Frank and myself that he should spend the day at Mount Auburn, no one but myself knowing where his place of resort was. He was very nervous and greatly agitated. I agreed to drive out in the afternoon and tell him how things looked. When the news of the General's nomination came on, men rushed into the Tremont House in hundreds. They knew my intimacy with the General. But I kept my own counsel. I drove to Mount Auburn. It was a long time before I could find Frank. He was solitary and alone, leaning on the monument over the graves of the Webster family. As I sat, I saw him I shouted 'By—, Frank, you have got it!' 'Got what?' 'Got the nomination for the presidency!' 'Not the presidency?' 'Yes, you are nominated for the presidency by the great Democratic party of the States.' Pale as marble, Frank turned from me—half kneeling and half standing—grasping the sandstone shaft, he took a solemn vow that he would drink no intoxicating liquors during the canvass, nor, if elected, during his presidential term. That vow those who know him best know that he kept it."—Burleigh's Letter to the Boston Journal.

A veteran was relating his exploits to a crowd of boys, and mentioned having been in five engagements. "That's nothing," broke in a little fellow, "my sister Agnes has been engaged eleven times!"

LIE DOWN AND REST.—Dr. Hall says the best medicines in the world, more efficient than all the potations of the materia medica, are warmth, rest, cleanliness and pure air. Some persons make it a virtue to brave disease, "to keep up" as long as they can move a foot or wiggle a finger, and it sometimes succeeds; but in others the powers of life are thereby so completely exhausted that the system has lost all ability to recuperate, and slow and typhoid fever sets in and carries the patient to a premature grave. Whenever walking or work is an effort, a warm bed and cool room are the first indispensables to a sure and speedy recovery. Instinct leads all beasts and birds to quietude and rest the very minute disease or wounds assail the system.

The Danbury News says: The Fitchburg (Mass.) Sentinel, an excellent paper is going to start a daily. We are glad of it. We started a daily once. We ran it four months, and then paused. Since then we take a lively interest in such enterprises. We have no doubt the Sentinel people will make the daily work. A man who goes through life without having started a daily paper misses a rare and valuable experience. Falling down stairs with a cook stove will hardly compensate him.

OLD IRONSIDES.—The old Revolutionary frigate Constitution which some months ago, was brought to Philadelphia from Annapolis to be rebuilt, was drawn upon the stocks at the navy-yard for that purpose recently. Having been dismantled, she was raised in the floating dry-dock, and towed around to the south wharf. Here, by means of the greatest force, she was pulled from the dock upon the stocks. To accomplish this, 300 men were employed, huge cables from a half dozen capstanes, and a complication of enormous pulleys leading out to the vessel. When the capstanes were manned and the cables felt the tension upon them, the vessel moved gradually, though very slowly, from the dock up the well-greased ways. The Constitution was decorated with the national bunting, and all the officials of the yard and many citizens were assembled to witness the operation. The Constitution will be entirely rebuilt for service as a school-ship. Her model will not be changed, and no sound timbers will be removed. She will be refitted with all modern sailing appliances, and it is expected that, when completed, she will make a serviceable addition to the fleet.—N. Y. Times, March 7th.

CHARLES SUMNER.—Senator Sumner was the son of Sheriff Charles P. Sumner, a well-known and respected citizen. He had two sisters, Mary and Julia, and three brothers, Albert, Henry, and Geo. The only survivor of these brothers and sisters is Julia, now Mrs. Dr. Hastings, a resident of California. A. Two of the brothers were lost at sea; one of the same time that Margaret Fuller Ossoli met her sad fate. George died in a hospital in this State, from softening of the brain. On the 17th of October, 1866, the Senator married Mrs. Alice Hooper, widow of William Sturgis Hooper, who was a son of Hon. Samuel Hooper. Mrs. Hooper was a daughter of Jonathan Mason, Esq. The marriage ceremony was performed by the late Bishop Eastburn. On the 10th of May, 1873, a divorce was decreed between the parties by Judge Cook, of the Supreme Court of Massachusetts.—Boston Journal.

LOVE, HONOR AND OBEY.—On the whole, married women, that is real women, prefer being ruled to ruling. It is natural to a woman to seek advice. It is scarcely in her nature to go speechlessly on doing what she has to do without aid or counsel. Almost any one of our sex is happier if she can "talk things over" with some man upon whose discretion she relies; and in married life most wives do, even in the smallest things, what "he" likes, and fancy that they like it themselves. Since independence has become the fashion, and strong-minded women have sneered at their more gentle sisters, there is a great affection of despising the opinion of the men, but it is all sheer pretence. All most every wife chooses her gloves and her ribbons of the tint her husband admires, and the man she loves almost invariably gives her political opinions, and biases even her religious views. Her speech, her dress, her manners change under his influence. What he desires her to do she does, in nine cases out of ten. The tenth case we find in the divorce courts. You may rule your wife as you please, good married reader, if you only love and pet her enough. Haughtiness and fault-finding alone will make her restive. And you, dear girl, remember that it will be well to choose a husband good, and noble, and upright, so that you may obey him to your heart's content without losing your own self-respect; for you will obey him if you love him; and if he be low and mean, you will sink to his level slowly but surely in the course of years.

A man having a bill against a distant merchant, sent a letter of inquiry to the banker of that locality. The reply was: "He is dead; but he pays just as well as he ever did."

The Governor of Virginia has pardoned a convict upon the novel condition that he shall abstain from intoxicating fluids for the next three years.

A man in Hartford has stopped his newspapers because his name was printed in a list of advertised letters, and his wife, happening to see it first, went and got it for him, and found it was from a young lady, who complained that he didn't meet her at Worcester as he promised.

A TERRIBLE SCANDAL.—A popular clergyman of Buffalo returned from an extended journey a few days since, and just as he alighted from the cars and was receiving the congratulations of a crowd of delighted parishoners, who had assembled to greet him, an imbricated individual following in his wake, seized him by the hand, and exclaimed: "Well, good-by, old pard, I'm going further, and shall keep up the same old drunk for a while yet, but you're pretty well sobered up and you better keep so! I 'spect, as drinkin' rough when a fel low's round home. But you know how to go on a gallus spree and have a rum time just as good as any pard I ever had, and you hes my respect. Day-day, old buster."

Before the astonished clergyman could gather his wandering wits the hail fell was off, leaving a terrible scandal for the delectation of the gossips of Buffalo, and a prospective candidate for the lunatic asylum.

OLNEY HALL'S DAUGHTERS.—The Home Journal says: "Ex-Mayor Hall, of New York, is blessed with five daughters, and is having each educated in some special pursuit, that she may thus be guarded against the vicissitudes of fortune. One of the daughters is a designer and etcher, having learned all the details of wood engraving at the Cooper Institute. Her designs for books and for some of Frank Leslie's publications have attracted much attention.—Another daughter is a writer of children's books, as well as an accomplished pianist. A third is receiving special training for the lyric stage, possessing a full, round, and sweet chest voice. Another is already distinguished as a soubrette and character actress in private circles, while the fifth is perfecting herself as a modiste and milliner. Their respective pursuits will perhaps never be utilized while Mr. Hall enjoys so large and lucrative a practice as at present, but it must be a comfort to him and his family to know that, if ever occasion arises, there are occupations open to the daughters beyond the usually forced and precarious ones of governesses, companions, etc."

It was a North Carolina landlord who posted the notice in his dining-room that members of the Legislature would be first seated, and afterward the gentlemen.

Assemblyman Higby, of Los Angeles, has introduced in the California Legislature a bill to allow civil damages against saloons where men buy liquor; and then commit deprecations against the lives or property of their fellow citizens. It first provides against the sale or giving away of liquor in any quantity of less than a gallon, by keepers of hotel or saloon. Before a license is granted, blanks being left in the bill for the amount to be paid for same, the applicant must enter into bonds for \$3,000, with substantial securities, possessed of freehold unincumbered estate of that value, to meet any damage that may arise from carrying on his business.—The bondsmen are to be liable to the husband, wife, parent, or other parties aggrieved for any injury or damage sustained if intoxicating liquor is sold to any minor, or habitual drunkard or other person in a state of intoxication.

NECESSITY OF SLEEP.—"A man who would be a good worker," says Henry Ward Beecher, "must be a good sleeper." The quality of mental activity depends upon the quality of sleep. Men need on an average eight hours of sleep a day. A lymphatic man is sluggish, moves and sleeps slowly. But a nervous man acts quickly in everything. He does more in an hour than a sluggish man in two hours, and so in his sleep. Every man must sleep according to his temperament—but eight hours is the average. Whoever by sleep, pleasure, or sorrow, or by any other cause, is regularly diminishing his sleep, is destroying his life. A man may hold out for a time, but the crash will come, and he will die. There is a great deal of impatience besides that of tobacco, opium or brandy. Men are dissipated who overtax their system all day, and under sleep all night.
