

THE PUGET SOUND HERALD

Is published every FRIDAY MORNING, at \$5 per annum, in advance; if paid within six months, \$4; after the expiration of six months, \$5; for six months, in advance, single copies, 15c. Advertisements, to insure insertion without delay, should be handed in on or before Thursday of each week.

The Herald can be found in San Francisco at the Depot of J. W. Sullivan, adjoining the Post Office; at the office of our Agent, 111 1/2 Washington street, at the Merchants' Exchange and the principal Hotels; and also at the leading Hotels in the Atlantic cities.

We shall be pleased to furnish masters of vessels and others, covered boats, with files of the Herald, on application at this office.

L. P. FISHER,

171 1/2 Washington st., San Francisco, is authorized to act as Agent of this paper in receiving advertisements and subscriptions in San Francisco and elsewhere, and collecting and receiving for the same.

CHAS. PROSCH.

PUGET SOUND HERALD,

STELLACOOM, W. T., FRIDAY, JUNE 8, 1860.

CELEBRATION MEETING.

As stated in our last issue, preparations are making on a liberal scale for an appropriate celebration of the coming Fourth, in Stellacoom. Everything has been put in good working order, and the steps taken thus far promise the most happy results. Contributions generous beyond expectation have been made, and there will be no scarcity of substantial edibles for the occasion. A feast will be prepared for a million, and we hope to see a million present to partake of it. From Victoria and every town on the Sound we shall look for guests, all of whom will be alike welcome. We have no space for remarks. The following minutes indicate the progress made:

Stellacoom, W. T., June 1st, 1860.

The meeting was called to order pursuant to adjournment. On motion, Wm. H. Wood was appointed Secretary.

The committee appointed to devise suitable ways and means for the celebration of the approaching anniversary of our Independence, submitted their report, which, on motion, was adopted and the committee discharged.

Thereupon the following committee was appointed:

On Salutes—Messrs. Chas. Prosch and J. M. Bacheider.

On Music—Messrs. Sam'l McCaw and G. Ford.

On Orations, &c.—Messrs. John M. Chapman, Wm. H. Wood and J. S. Jaquith.

On Dinner—Messrs. A. P. Delin, A. B. Robinson, A. F. Byrd, P. H. Hughes and D. V. K. Waldron.

On Grounds—Messrs. E. A. Light, Stephen Johnson and Samuel Willoughby.

On Ball—Messrs. Geo. Gallagher, J. D. Laman and Egbert H. Tucker.

On Motion, Mr. E. B. Rogers was appointed Treasurer, and Dr. J. B. Webber Marshal.

On motion, the Secretary was instructed to request the Sheriff to appoint several competent persons to act as Deputy Sheriffs, for the preservation of good order.

On motion, Mr. Hanson was authorized to collect all moneys subscribed and not paid for the approaching festival.

On motion, it was ordered that the programme recommended by the committee just discharged, and adopted by this meeting, be published in the Puget Sound Herald.

On motion, Messrs. S. McCaw, J. B. Webber and J. D. Laman were appointed a committee to wait upon Capt. Wright, of the steamer *Eliza Anderson*, for the purpose of making arrangements with him for the transportation of visitors to Stellacoom.

On motion, Resolved, That the chairman be and he is hereby authorized to fill all vacancies that may occur in the various committees.

On motion, the meeting adjourned until Friday next, 8th inst., at 7 o'clock P.M.

CHAS. PROSCH, Chairman.

Wm. H. Wood, Secretary.

LUCAS NATURE OF THE PYRALID.

The Pyralid is a wonderful creature! We have been repeatedly assured of this fact, and now have no reason to doubt it. As will be seen by the following, Dame Nature not only rises riot there in the vegetable kingdom, but plays some queer pranks in the animal, as well.

Mr. J. W. McCarty informs us that he has a calf, one month old, with only three perfectly formed legs; the place for the fourth being occupied by a protuberance six inches long, resembling a miniature leg, with a single hoof like that of a horse. This miniature leg is round, between two and three inches in circumference, with two joints. The shoulder above is perfect. The little leg seems to grow, but not at a rate which will enable it to catch up with the big legs.

Mr. McCarty also has a calf, two months old, which came into the world with crop ears. The job of cropping the ears, in this case, has been done much more neatly than it is usually done by men with shears. The ears remain the same as at the birth, with no apparent growth.

A hermaphrodite pig concludes the list of unnatural animal productions in the possession of Mr. McCarty. This pig is three months old; beyond the combination of the sexes, it possesses no peculiarity.

Here is a catalogue of natural curiosities rarely vouchsafed one man in the short period of three months. Should his luck continue through another season, Mr. McCarty will have a more attractive collection for exhibition than had the great showman, Barnum, when he commenced business.

THE WEATHER AND THE CROPS.—Seldom has so long a period of uninterrupted pleasant weather been experienced in this country as that through which we have passed in the last two months.

With a temperature neither hot nor cold, and under a genial sunny sky, not only has everybody been happy, but vegetation has been enlivened and stimulated to a degree not often witnessed. The vegetable as well as the cereal crops never were more forward nor looked more promising than they do at present. The yield will far exceed the expectations of the farmers while planting, should the weather continue as propitious until harvest time. Never was a more flattering prospect presented to the tiller of the soil than that which greets him here now.

REVENUE OF A MERCHANT.—It is said that the Hon. Moses H. Grinnell, of New York, is about to withdraw from active business, with the design of spending much of his time with his family in Europe. Mr. Grinnell has been known for many years as one of the wealthiest merchants of New York city.

The best purifier of the blood, Hall's Sarsaparilla, Yellow Dock and Iodide of Potass.

WAR AMONG THE INDIANS.

On Friday last, 20th ult., at 10 o'clock A.M., says the Port Townsend Register, an attack was made by a party of Snohomish Indians upon a Hyder canoe containing eight women and two men. The attack took place between Volcano Point and Skagit head, and was witnessed by two white men in a boat who were passing at the time, but who took good care to keep out of the reach of the balls. They state that the Snohomish canoe ran alongside of the Hyder canoe, and after a short talk they commenced firing guns; the northern canoe was then shored ashore and no persons were seen in her. Directly another canoe with three men came up to the Northern canoe and fired several shots into her, as if there were either concealed or wounded persons in her. The two canoes then were paddled ashore and the Northern canoe went adrift.

On Saturday, about 5 o'clock P.M., C. A. Hare, of the schooner *Eley*, discovered the canoe ashore on a spit making out from Whidby's Island, nearly opposite Marrowstone point. On examination he found three dead bodies in her, two men and one woman. Capt. Hare reported the fact on his arrival here, a short time after. During the night Messrs. Howard, Rose and another man went over in a Whitehall boat to see the bodies, and on Sunday afternoon Justice Swan, accompanied by Messrs. Albrecht and Sutton, went to the canoe in the sloop *Kate Jennings*, on invitation of Capt. Griffith Thos. Jenkins, her owners. They found the canoe broadside on the beach, with her starboard side split nearly from stem to stern. In her were three bodies, one man in the stern and a man and a woman side by side lying down covered with a mat; all the bodies were nearly naked, and were cut and mangled in the most savage manner, not revolting for description.

As the Justice had no jurisdiction over the case, it being in Island county, the bodies were decently covered up in the canoe and left for the authorities of Island county to take care of.

On Monday Mr. Swan again went to the canoe to endeavor to identify the bodies, accompanied by Mr. Newsum of San Juan, who had just come over with five Simonsen Indians. Both Mr. Newsum and the Simonsen recognized the dead persons as Hyders. One of the deceased, who was called Bearskin, was a brother to the Hyder who was shot at San Juan on Sunday week.

Capt. Robertson, of Whidby's Island, has the bodies in charge, and will have them decently buried.

It has been fully ascertained that there were seven women besides the three dead persons in the canoe; here the attack was made. The Port Maitland Indians, who were somehow connected with the affair, got three of the women as prisoners, and the Snohomish Indians took four, and they are all by this time probably on their way across the mountains to be sold as slaves to the tribes of the interior.

On learning the facts of the case, Capt. Fay, Local Indian Agent, immediately sent information to Col. Simmons at Olympia, who will take such action to the matter as he shall consider expedient. The Snohomish Indians say that this was on their part only as act of retaliation upon the Hyders for killing some of the Snohomish tribe last summer.

We predicted, in our issue of the 16th, that if the Northern Indians were not stopped from coming here, it would not be long before there would be trouble with them, either with our own Indians or else with the whites. They have already had trouble with both, and unless we take decent steps to prevent these people coming here, it is, in our opinion, but the beginning of a nice little time for the coming summer.

From the *British Colonist* and *Victoria Gazette* we learn that a state of general war exists among the tribes on Vancouver's Island. A battle took place a fortnight since, between the Hyder and Tongas tribes, which lasted an entire day and night. There has also been a great fight between the Simonsen and other tribes, up north, in which a large number are said to have been killed.

In response to the proclamation of Gov. Gholson, calling upon the military and naval authorities to aid in their expulsion, Col. Casey promptly took a detachment of troops on board the *Massachusetts*, last week, to drive off such parties of Northern Indians as might be found about the shores of the Sound. The *Register* of the 30th ult. calls for a requisition on the naval authorities of San Francisco for one or two frigates, to be stationed at Port Townsend.

THE ENGLISH REVIEWS.—We have been frequently called upon for our opinion respecting the merits of the magazines of the day, with the view of subscribing for the most useful of them. In reply to such inquiries, we have invariably recommended the Reviews reprinted by Leonard Scott & Co., 54 Gold street, New York city. We give again to-day; for such is the character of these Reviews, that they never deteriorate in value or interest. All subjects, whether pertaining to the arts and sciences or to morals and religion, politics or history, laws or agriculture, medicine or literature, indeed everything that is new and valuable to information-seeking readers, is treated of in these periodicals by the masters of the age; not only the most learned men of Great Britain, but also occasionally the first talent of our own country, contributing to their pages. They are not local in their sympathies and views: they present quarterly an epitome of the literature of Europe and America. They have long been justly celebrated for their elegant and able criticisms, their learned, brilliant and attractive essays, and their chaste and classic style. They represent respectively all the great parties of England, both in Church and State; the *London Quarterly* representing the Conservatives, the *Edinburgh Review* the Whigs, the *Westminster Review* the Liberals, the *North British Review* the Free Church of Scotland, and *Blackwood's Magazine* the Tories. Although each is thus the organ of a great party, none of them are illiberal or narrow-minded. *Blackwood*, which takes the first rank among the magazines of the world, is said to have a circulation of 40,000 copies in England. Again we commend these publications to the attention of the public. *Blackwood* and the four Reviews for a year contain a whole library of practical knowledge—and all for \$10. In England, the price of the same works is \$21. If you cannot afford alone the expenditure of \$10 for this purpose, unite with one or more of your neighbors, and you will not regret the trouble or the outlay. See the advertisement, under the head of "Useful Publications," on the fourth page, for further information.

RELIGIOUS SERVICE.—Rev. Mr. Kendig, of the Protestant Episcopal Church, will preach in Stellacoom, at the School-room, on Sunday next. Services will commence at 11 o'clock, A.M.

THE PENNSYLVANIA OIL REGION.

Glowing accounts continue to be received from the Pennsylvania oil region, where speculators are actively engaged in sinking wells. None of those completed have been abandoned as hopeless, while many of them are yielding a rich return. One yields steadily a barrel per hour, and another, just started, is expected to give out fifty to seventy-five barrels per day. Mr. L. D. Williams, Professor of Natural History in Alleghany College, says it is probable, from the geological formation of the country, that the valleys of all the tributaries of the Alleghany river, for a great distance, will yield this oil in abundance. He says the "half has not been told" of the richness of the oil region.

The *Pittsburg Post* thus speaks of a remarkable discovery of solidified coal oil in Ritchie county, Virginia:

"It has been tested by various chemists, and has been found to be as it were crystallized mineral oil, being without stratification, and free from any foreign substance. The tests have shown that it will yield one hundred and sixty-five gallons of crude oil to the ton. After one refining process, eighty-two per cent. of refined oil was obtained; after a second distillation, sixty-one per cent. of the whole amount was obtained in pure oil, and thirty per cent. of lubricating oil and paraffine. By taking a portion of the coal and laying it on a hot stove or shovel, its extraordinary quality is obvious. It melts and runs like wax. The vein which has been developed is upon the land of Mr. William Campbell. The position of the vein is different from that in which coal is usually found. It is not horizontal, but in cone-like or vertical shape, running over a hill. The vein is not more than four feet wide, though unfathomable in depth, as a shaft sunk in the valley for over thirty-four feet still found it, and it has been traced in its narrow, comb-like shape from both sides of the hill towards the top."

It is considered probable that if shafts be sunk deep enough, a reservoir of mineral oil, similar to that in Venango county, Pa., will be reached, from which this vertical vein of solid oil has originated.

The oil excitement in Pennsylvania still continues, and new wells are started almost every day. At Kiceville, one of the wells throws the oil and water from four to twenty feet above the surface. A *Pittsburg* company has just opened a well at Franklin, which yields forty-two barrels of superior oil daily.

An interesting report has arisen from these oil discoveries in Pennsylvania. Mr. Peterson, owner of a farm at Parentum, in the oil region, in 1857 leased a portion of the same to Mr. Kier, with the privilege of opening salt wells thereon. Lately, in sinking a new well for salt, Mr. Kier struck upon a fine flow of oil. Mr. Peterson contends that having leased the land for the purpose of opening salt wells, as stated in the lease, Mr. Kier cannot take oil from it. He has therefore brought a suit against Mr. K., laying the damages at \$23,000.

MILITARY ROADS IN WASHINGTON TERRITORY.

The present Congress have passed a law authorizing the construction of a Military road in Washington Territory, to run upon the following line: Commencing at Fort Vancouver, it runs along the North bank of the Columbia river to the mouth of the Cowlitz, thence up that stream about twenty miles, thence west in the direction of Olympia, Stellacoom, Seattle and Bellingham Bay. This road, if properly and substantially completed, says the *Portland Daily Advertiser*, will do much to develop the resources of Washington Territory, and will also materially aid in the progression of the commerce and settlement of the country. This road runs through the most populous portion of the Territory, and we hope the work of its construction will at once be undertaken.

THE PRAIRIE FARMER.—We are in regular receipt of this sterling and wide-awake agricultural paper, which increases in interest and value. The proprietors have made an extraordinary effort—that is, to send the *Prairie Farmer* one month free to any person or club of persons, who will send their addresses to them. We can cordially recommend this paper to all who have and feel an interest in improved agriculture. As it is devoted to the real interests of the producers, and is ever found to advocate their best interests, don't fail to send, and send at once, remembering that it is a Western and home paper. The paper is published strictly on the advance pay plan, and will not be sent longer than offered unless ordered and paid. Address, Emery & Co., Chicago, Ill.

NEW GOLD DISCOVERY.—We are informed, from a reliable source, says the *Dallas Mountaineer*, that gold has been discovered on Rock Island, a small affluent of the Columbia, on the trail between Colville and the Similkameen. A miner by the name of Haynes brought into Colville \$100, the product of three days' work. He came in for provisions, and one of his partners returned at once. Our informant saw the gold. Now, we hope on the faith of this, people will not look there with the expectation of finding the gold by the shovel full on the surface of the earth. Assuredly they will not find it so plenty or so had without effort and labor; besides we don't think the Quartermaster at Colville will be able to employ all the disappointed as herdsmen.

PURSER LOWELL has our thanks for late Victoria papers, brought up by the *Eliza Anderson* last week. We were grieved to learn that he was too ill, on Monday last, with putrid rose throat, to go his accustomed round on the Sound; but hope to see him again at his post on the next passage down.

NEW STEAMER ARRANGEMENT WITH THE EAST.—From the first of July next, three steamers will be dispatched monthly from this port for New York, and three from New York for San Francisco. They will sail on the 1st, 11th and 21st of each month, and will be as fully found in all respects as the steamers now on the line.

A CLEAR HARBOR.—On Monday, May 14th, there were but one ship, the revenue cutter, *Marcy*, and the steamer *Santa Cruz* at anchor in the harbor of San Francisco. Since the occupation of California by Americans, the anchorage ground of that port was never so clear, and probably never will be again.

Gov. Banks, of Massachusetts, has dismissed three aides, who, at a military dinner, took occasion to criticize some of his military appointments.

CAUSE OF THE WASHINGTON WAR.

The *Sacramento Union* gives the following account of the causes which led to the outbreak of the Indians at Carson Valley:

Omer Darst, who resides at Gold Hill, near Virginia City, says, under date of May 10th, that his partner, Mr. Harris, who lives on the Stockton trail, about ten miles from Sacramento, the following facts, which disclose, as he alleges, the whole truth as to the real cause of the late massacre at Williams' Station in Carson Valley. The number of white men said to be burned died slightly from the accounts first given, but those accounts also differed from each other.

Omer Darst states that an old Indian went to Williams' house with a squaw, when four white men tied the buck Indian, and then each committed an atrocious outrage upon the Indian woman. They then let the buck go. He afterwards came back with other Indians, and put a white woman, who was in the house, out of doors, and also three white men who had nothing to do with the outrage. They then bound the four white men who abused the squaw, and burned them in the house.

Mr. Darst gives the above facts to his partner on the authority of the white woman, who is now stopping at Silver City. They show that the Indians were more angry against than sinning from the beginning; and it is very probable that the Indians at the fight near Pyramid Lake first held out the flag of truce in order to relate the facts as they occurred at Williams' Station. The bearer of the flag was wantonly shot down against all the rules of civilized and even those of barbarous warfare. The story of an unwieldy battle-axe being exhibited by an Indian to two Russians for comment, this weapon might have figured in the hands of Robert Bruce, at Bannockburn, but hardly at the battle of Pyramid Lake.

To the Editor of the Puget Sound Herald:

PORT TOWNSEND, June 1st, 1860.

The nominating Stevens caucus closed their important labors at this place on last Saturday evening, by nominating Paul K. Hubbs (a California importation) for Council Representative for this District. I think I am justified in using the term "Stevens caucus," from the fact that the appointment of the delegates was made (by a self-constituted committee of some half dozen Stevens wire-pullers from Whatcom, Island, and this county, a few weeks ago calling this District meeting) on the vote cast for Stevens last year. This, of course, rules out all Democrats who are not worshippers of Isaac I., and leaves only a caucus of Stevens' friends—not a Democratic convention, as the managers claim. But three counties—Jefferson, Whatcom and Island—sponsored this caucus, and I am not sure, if I am not mistaken, that the managers (Hubbs, and Jefferson) made the nomination, and, in fact, made it at the preliminary caucus, several weeks ago; and the only apparent object of the late caucus seems to have been to give the second fiddlers a chance to come in and say that everything was right which they did, as quietly as lambs. This fact will become apparent by examining the votes a little.

Whitcom has eight votes, (all previous year's voters, of course) Island five, and one of them (Phillips) pledged for Hubbs, and Jefferson four. This gives nine votes pledged to Hubbs, and but eight unpledged. A feat was made to put H. Z. Wheeler, Esq., a gentleman in every way qualified for the office, in nomination, but it only being intended for a gull-trap, failed, of course. Hubbs and his allies had a dead thing, and he was accordingly declared to be the unanimous choice of the Democracy (God save the mark!) of the Territory.

In the evening a ratification meeting was held, when the orators delivered themselves to the few denizens of Port Townsend beach who were present. There was a sickly attempt made by the managers to get up some enthusiasm, which was exhibited, when the orators got off some good stuff, by sundry vigorous thumps on the floor, with feet and sticks; but the crowd could see the point, and the stale jokes of the writings audience seemed evidently reflecting on the god and the good editor turned on, in which they were soon accommodated; the night ending in a glorious spree, destroying much Stevens whisky—and so ended the affair.

Of the nominee I am able to say but little. It is reported that in days long past he was a prominent California politician; but the only tradition that has been handed down to the present day, with any tolerable certainty, is of a certain bill introduced by the gentleman into the California Legislature, covering some thirty quires of fool-cap, and which has remained from that day to this a standing comparison for anything that is supposed to be superlatively stupid. In this place the gentleman has succeeded admirably in his character as a third-rate petty-fogger. On the whole, I think the nomination of the fortunate man that could have been made for the gentleman's opponents. There will undoubtedly be a good man and true chosen to represent the people of this Council District, but his name will scarcely be Paul K. Hubbs, the defunct California politician. The second Monday of July will disclose much that is interesting. In the meantime we shall see what we shall see, and the country will probably be safe. I hope so, at least.

UNITED STATES PROPERTY

FOR SALE

AT CAMP SIMIAHMOO.

THE QUARTERS OCCUPIED BY THE U. S. Boundary Commission, consisting of the following frame buildings, boarded upright and battened. The houses are one story high, not celled; height from floor to eaves, 10 feet; viz.:

One BUILDING 40 feet long by 15 feet deep;

One BUILDING 40 feet long by 15 feet deep, with partition 6 feet wide in front, full length of building;

One BUILDING 84 feet long by 15 feet deep, with kitchen in rear and partition six feet wide in front, full length of building;

One BUILDING 150 feet long by 15 feet deep, with kitchen in rear and partition six feet wide in front, full length of building;

Four WHALEBOATS, (3-named) with oars, anchor, sails, &c.

One YAWLBOT;

One small HOWBOAT;

One SAILBOAT, double, carrying about six tons, with anchor, (No. 15) chain, &c.;

One SAILBOAT (single) carrying about two tons.

Private bids for the above are invited. Unless the property is sooner disposed of, it will be sold at public sale on the 20th day of June, instant.

ARNOLD CAMPBELL,

U. S. Commissioner N. W. Boundary Survey.

Notice—All who are in favor of organizing a Brass Band in the town of Stellacoom will assemble on Tuesday evening next, at half-past 7 o'clock, at Egan's Hall.

It is desirable that the instruments be sent for as soon as possible.

MURCIN.

PUGET SOUND HERALD. STEILACOOM, W. T., FRIDAY, JUNE 8, 1860.

LATEST NEWS.

The latest dispatch from Washington states that Lord Lyons had a protracted interview with the Secretary of State in regard to the San Juan Island affair. It is very evident that the matter is not to be so easily settled as Lord John Russell supposed.

A dispatch from Boston, dated 11th May, states that a Spanish brig had been taken into Providence, R. I., by the schooner Elvira. She was found drifting to sea with all sail set, and no one on board.

Alexander H. Stevens, of Georgia, has written a letter in favor of non-intervention, and finding fault with the seceders from the Charleston Convention.

France proposes that Switzerland shall relinquish her rights to the neutral provinces of Savoy for 50,000,000 francs.

A desperate battle, lasting three days, took place at Caranci, between the Neapolitan troops and the insurgents. The latter were defeated.

Heenan has written letters to Bell's Life in London, formally demanding the "champion's belt." Bell's Life rejects the claim as preposterous, and asserts that the chances of the late fight were in favor of Sayers.

The "strike" in the shoe trade down East has resulted in throwing out of employment the poorer class of workmen, who are seeking other employment. Many are entering the fishing fleet.

A lady in Lowell has received \$10,000 damages from the Boston and Worcester Railroad Company, for the loss of a leg. This is not too high; the leg is said to be well worth the money.

A Mr. Payne died at Frankfort, Ky., and his father-in-law, Mr. Dryden, when sitting up with the corpse, cut his throat and died. Both gentlemen were prominent citizens of Frankfort.

The last Overland Mail reports a blacksmith and two other employees of the Mail Company as having been murdered by the Indians at Mustang Spring.

Green & Russell's surveying party, numbering 24 well armed men, are reported to have been murdered by the Diowas on the Smoky Hill route to Pike's Peak.

It is thought that from the action of the House of Representatives, on the Sickles contested election case, that Sickles would go by the board.

The Pike's Peak gold region is covered with snow. Several emigrant trains, becoming discouraged, have left Denver City for the States.

The bi-centennial anniversary of the settlement of Marlboro', Mass., is to be celebrated on the 18th June.

Capt. Elliott, of Mayville, Ky., has died of wounds received by being shot by Frank Hurd.

The Boston Traveller has 250 ships in the India and Pacific trade at the present time.

The British Government is negotiating for the laying of a telegraph wire between Singapore and Hongkong.

Frauds committed by Paltenger, the Chief Cashier of the Custom Bank, of London, amount to \$268,000. Another cashier of the same bank had been arrested. The deficiency was £1,300.

Baron Bruck, the Austrian Minister to France, had committed suicide by cutting his throat.

It was confirmed that Victor Emmanuel would make a triumphal march through his new dominions, following in this advice of the Emperor of France. He will not now assume the title of the King of Italy.

A Congress of the great Powers, to take into consideration the relations of France and Switzerland, was spoken of.

It was rumored at Paris that several arrests have been made in consequence of a plot by Italians against the Emperor.

MISCELLANEOUS ITEMS.

A most horrible rencounter took place in Powell county (Ky.) lately, on the land of Harvey Hall, some eight miles from Stanton, between Hall and his sons, and Henokiah Bowen and five of his sons.

Five hundred and ninety-four Mormons arrived in the ship Underwriter, lately, at New York, en route for Utah. Of spinsters there were 92; wives, 96; widows, 16; children under 12 years, 148.

A few days ago, as the Hon. Fayette McMillin, ex-Governor of Washington Territory, was riding in the vicinity of Marion, Va., his horse got frightened at an approaching train, and attempted to cross the track.

PAINTING, GLAZING AND PAPER-HANGING.

The band of Free Lovers who some time last summer sailed from San Francisco for the purpose of making a settlement somewhere in South America, have broken up. Some of the infatuated mortals have died and the residue of them have become the victims of disease and starvation in some port in Mexico.

A young man from Bristol, R. I., son of agents of the highest respectability, has been arrested in Havana for forgery, but was saved from the chain gang by the American Consul General, who is of the opinion his father will refund the money obtained.

The New York Herald is informed that no less than six vessels have left that port for the African coast within the past fortnight, all of which expect to have negroes for their return cargoes. Among these was a fine clipper ship and a fast sailing brig.

The young ladies of Hopedale, Ill., met to trim a church for some festival occasion, and two men named Findley and McDowell, getting into a fight relative to an alleged insult towards one of the ladies, McDowell drew a knife and killed Findley on the spot.

One Stone, a Plymouth (N. H.) lawyer, killed himself with strychnine, leaving her \$15,000 worth of forged paper, and the names of the sureties on his notes all were forged. The knowledge of his crimes were becoming public.

It is a curious coincidence to the death of Ex-Governor Robinson at Charleston, that in 1840 the Vermont delegation to the Democratic National Convention lost their Chairman, F. W. Billings, by death in the same manner.

A man named Cook attempted to shoot a man named Leonard at the breakfast table at the Broadway Hotel, Lexington, Ky. Two shots were fired, and Leonard's arm shattered. Cause—woman.

The "strike" in the shoe trade down East has resulted in throwing out of employment the poorer class of workmen, who are seeking other employment. Many are entering the fishing fleet.

CHAS. SALT—In this and for sale by M. McCaw & Co.

San Francisco.

PARTICULAR NOTICE TO PURCHASERS OF EUREKA WHISKY.

THIS WHISKY HAS ACQUIRED A REPUTATION far more enviable than any Whisky ever offered in Barrels or Half Barrels in California. Its SUPERIOR AND UNIFORM QUALITY, has become so fully appreciated, that the demand for it has largely increased, and the quantity now sold is much greater than any other brand of Whisky on the Pacific Coast.

CAUTION. The great reputation of the EUREKA WHISKY, imported exclusively by ourselves, has induced parties in San Francisco to put up a cheap article of Whisky, in imitation packages, branding it "EUREKA WHISKY," using the same style of letter as on the genuine imported article, and also, using our shipping mark "J. T. D.," sometimes transposing the letters to avoid detection.

This common Whisky is palmed off, to a large extent, on the unsuspecting purchaser, for the GENUINE EUREKA, thus enabling the seller to make large profits on a cheap imitation Whisky, which is sold on the reputation of the genuine article.

To protect ourselves, and enable purchasers to guard against imposition, every package of the GENUINE EUREKA WHISKY will, in future, have the following brand, viz: "W. H. NEWELL & CO., S. F." burnt into the head.

Purchasers will please take particular notice of this brand, as none other is genuine. W. H. NEWELL & CO., Sole Agents, San Francisco.

NOTE.—The genuine EUREKA WHISKY is for sale by most of the Liquor Houses in San Francisco.

DALY'S Aromatic Valley WHISKY, FOR MEDICINAL USE, HAS NOW TAKEN THAT POSITION in the world's estimation which justifies its Proprietor in claiming for it A SUPERIORITY UNRIVALED, Produced, as it is, by a process known only to the Manufacturer, and extracted from the choicest grain, which grows nowhere but in a favored locality in the Valley of the Monongahela, and containing no particle of deleterious admixture; it has acquired a reputation for perfect purity and intrinsic excellence, based solely upon its inherent merit, which the Proprietor does not intend shall ever be forfeited. Its universal use by the MEDICAL PROFESSION, is most urgently recommended. Already has it found its way into the principal public and private Hospitals in the country, and wherever it has been once used, it forthwith becomes a necessity.

The attention of consumers is called to the certificates of the following well-known Chemists: STAIR ALEXANDER'S OFFICE, 25 SOVEREIGN ST., Boston, Mass., April 17th, 1858.

Dear Sir—Your "Aromatic Valley Whisky," and find it to be a pure article, of fine flavor, and without any deleterious admixture. JAMES H. CLARK, M.D., Chemist, New York, April 15th, 1858.

Dear Sir—Your "Aromatic Valley Whisky," is a pure article, entirely free from the adulterating ingredients so frequently used. JAMES J. MARR, Chemist, New York, April 15th, 1858.

CAUTION. It has come to my knowledge that parties in San Francisco have resorted to the base artifice of attempting to forge my label, with some slight alterations, using the name "DALY'S" instead of DALY'S Aromatic Valley Whisky, and also using the word "COLUMBIAN" instead of "MONONGAHELA."

These Dupes Labels have been put on bottles of entirely different shape from mine, containing the common trash, and packed in cases intended to imitate and hoodwink the public, with some slight alterations, using the name "DALY'S" instead of DALY'S Aromatic Valley Whisky.

DEALERS as well as consumers are cautioned not to be imposed upon by this base artifice. Particular attention is called to the shape of my Bottle, which is unlike any other, and also to the name—WILLIAM H. DALY, New York, &c. I have a few more of this or any other spurious article lying on hand, which I will sell at a low price, to those who wish to purchase.

AROMATIC VALLEY WHISKY, but I cannot allow such a base fraud to be practiced upon honest merchants and the unsuspecting consumer without noticing it. W. H. DALY, Sole Proprietor, NEW YORK.

NOTE: DALY'S AROMATIC VALLEY WHISKY is for sale by most of the respectable Liquor Houses in California. W. H. DALY & CO., Sole Agents, San Francisco.

Agriculture.

Cheese—How to Make it.

The following directions are given by Edwin Pitcher, of Martinsburgh, N. Y., a noted maker of good cheese: "The way to make a mild, rich, good-flavored, sound cheese, is to work the curd carefully, so as not to start the whey, or, in other words, work out the cream; second, cook it well, salt even and enough to make it good-flavored, press it well and keep it cool and dry, when made. A neglect in part will spoil the whole. We set our milk at 80° as near as we can; and put in rennet enough to bring the curd in half an hour.

We use a cheese cutter. Cut the curd carefully over once, and let it stand 15 or 20 minutes, till the whey begins to rise; then work it fine with a cheese cutter; then put hot water enough under the tin vat to raise the heat to 90°. Stir often so as not to let it pack down. We then dip off about one-third of the whey and increase the heat to about 100°; and keep it at that heat till it is well cooked, keeping it fine all the time. When it is done, it will fall apart in the hand like wheat. We dip out of the tin vat (when it is cooled down to 90°) into a sink, and when the curd is dry, put in a teaspoonful of salt to 15 pounds of curd after it is pressed. If the curd is a little too soft, put in a little more salt to harden it. We cool in the vat in hot weather by putting in cold water under the vat to 90°, before dipping out. I think it hurts the cheese very much to dip it out too hot.

I plastered my cheese-room, and let down my windows from the top in hot weather. I have a ventilator in the center, overhead, with a matched floor below, so as to shut it up in cool weather; with seven trap-doors to let up the cool air in hot weather. I think it is essential to make good cheese, to keep them cool. The cheese-room should never be over 75° or 80°, and it is better not over 70°. I use cold water on the floor, and a large piece of ice in a pan on the counter if the air is too hot. Keep cool is a great care for almost everything. It saves cheese from fermenting and becoming strong. You cannot very well cook your cheese too much in May or June. Be sure and keep your rennet sweet."

Renovating Old Orchards.

The failure of apple orchards is a subject of very general remark. In New York it is caused by insects, and the lack of proper nourishment in the soil, which has become exhausted. The fall is the best time to apply manure to renovate old trees. If the orchard is covered with turf, tear it up to the depth of three or four inches, by running a plow very shallow, or with a harrow or cultivator. The roots must not be injured. Now, how shall the manure be applied? I have seen several orchards where the manure was piled about the trunk of the tree, to the depth of a foot or more, extending but three or four feet from it. Is this right? The roots of a tree will always extend as far as the top, and therefore fill a circle with roots twice the diameter of it. Sometimes they will extend much further. The extremities of the roots supply the nourishment to the trees. Consequently the manure should be scattered evenly over this circle. In orchards where the trees stand thirty or forty feet apart, the whole ground should be covered. Trees seem to do well when the ground is rooted by hogs. It is doubtless poor economy to work them, but if they are allowed to root, they destroy a great number of worms. In the spring of the year, put straw, or very coarse manure, in small piles upon the ground to a sufficient thickness to shade the ground and keep it moist. The worms will collect under this. The hogs will soon learn to root over these piles, mixing them with the soil, forming an excellent manure and mulch, and destroying the worms which may have collected under them.

Hints on Poor Farming.

- 1st. Invest all your capital in land and run in debt for more.
2d. Hire money to stock your farm.
3d. Have no faith in your own business, and be always ready to sell out.
4th. Buy mean cows, spavined horses, poor sows, and cheap tools.
5th. Feed hog hay and mouldy corn stover exclusively, in order to keep your stock tame. Fiery cattle are terrible on old, rickety wagons and plows.
6th. Use the oil of walnut freely whenever your oxen need strength. It is cheaper than hay or meal, keeps the hair lively, and pounds out all the grubs.
7th. Select such calves for stock as the butcher shuns; beauties of rump, thin in the hams, and pot-bellied, but be sure and keep their blood thin with sooty herbage. Animals are safest to breed from that have strength to herd.
8th. Be cautious in the manufacture of manure. It makes the fields look black and mournful about planting time; besides, it is a great deal of work to haul it.
9th. Never waste time in setting out fruit and shade trees. Fruit and leaves rotting around a place make it unhealthy. The road to poor farming, though largely traveled, is not well understood, and these landmarks are thrown up for the common benefit.

How to Grow Peaches Every Year.

The following is by a correspondent of the Ohio Cultivator:—"Procure your trees grafted upon the wild plum stock. The tree partakes of the nature of the plum, being hardy, and will never winter-kill, and, putting out late in the Spring, will never be injured by the frost, and it is a certain preventive against the workings of the peach grub, while the natural life time of a tree is beyond that of our own; so you may depend upon peaches every year, and for a long period of time, without the destructive and discouraging influences attending the growth of the common peach. They can be obtained from fifty to seventy-five cents per tree.

Buttermilk and Longevity.

The constant use of buttermilk as food, it has been ascertained, would be the means of just doubling the term of a man's life—and woman's, too, we suppose, though nothing is said about that. On the subject of longevity, the New Orleans Surgical and Medical Journal contains some interesting facts:

It seems that an eminent French chemist, M. Ed. Robin, in a memorial presented to the Academy of Sciences, has expressed the belief that human life may be prolonged, and he gives his reasons for it. He thinks human life may be compared to a furnace always kindled: life exists alone in a state of combustion, but the combustion which occurs in our bodies, like that which takes place in our chimneys, leaves a residue, a detritus, of ashes. This detritus, which is always accumulating, is, according to M. Robin, the principal cause of old age and senile death. He thinks that the mineral matter which constitutes an ingredient in most of our food, after the combustion, is left in our system to encrust and stiffen the different parts of the body, and to render imperfect many of the vital processes.

M. Robin sets forth many facts to prove the reasonableness of his position, but proposes to institute a series of experiments on animals whose lives are of short duration, to verify his theory. Among the series of experiments which he proposes is one which consists in administering a lactic acid with ordinary food. The lactic acid is known to possess the power of dissolving the incrustations which form on the arteries, cartilages, and valves of the heart; and as buttermilk abounds in this acid, it is moreover an agreeable kind of food—its habitual use, it is supposed, may free the system from those diseases which inevitably cause death between the 75th and 100th year.

The author of one of the articles in the New Orleans Journal expresses his approbation of the labors of M. Ed. Robin, and gives, moreover, a reason, of his own as to the probability that the period of human life may be extended. He makes the following formula, viz: "every quality which appears to be an exception in a species, indicates a new rule, to which this species may be subjected. The author says—

"Applying this principle to the present subject, we say there are macrobites or centenarians in the human species; this macrobite is compatible with human organization, and since it exists, its cause may be determined. Now, to possess a knowledge of the cause, is to be master of the effect; and that which has heretofore been an exception, may become a general rule.

To show that people do sometimes live to be very old—whether owing to buttermilk, I cannot say—I condense some facts from the articles before mentioned:—
Ponce LaRue lived... 121 years.
Eleanor Spier... 121 "
Madam Barret... 123 "
Grandes... 126 "
John Newell... 127 "
John Bayles... 129 "
Folchard... 140 "
Thomas Parr... 153 "
Obst... 155 "
Joseph Surington... 160 "
John Bown... 173 "
Peter Zostan... 185 "

And many others of similar ages, who have lived in modern times, might be mentioned. The instances of longevity below 120 years are frequent. Some curious facts are related as to the habits of these individuals. Many of the old folks lived remarkably temperate lives. Jean Casser, who died at the age of 146 years, subsisted chiefly on milk food. The man Parr, who lived 152 years and 9 months, "subsisted all his life upon bread, old cheese, milk, whey, and table beer;" and Peter Zostan, who lived solely on vegetables—we think buttermilk must have been added to his fare—attained the remarkable age of 185.

After this statement, we have no doubt that all the churns in the country will be kept busy, and all the people converted to Oliver Twists crying incessantly for that beverage of life, "More, more!"

Planting.

The operation of planting a tree might be briefly stated as follows. Prepare a sufficiently wide basin for the reception of the roots; keep the surface, middle and lower layers of soil, in separate heaps, when taken out of this basin; set the tree in the basin to a depth about equal to the depth at which it stood before its removal, allowing a little for its settling after a heavy rain; prune off all the damaged roots, preserving all the sound fibres possible. Spread a little rich active soil in the basin; on this spread out the rootlets and fibres; then return a portion of the best of the active soil over the roots, or, what is better, have some rich compost mixed with this, composed of decayed leaves, &c., but not too rich, or in a state of rapid decomposition. On this, return first the upper layer of soil, and afterwards fill in the whole. It is seldom found necessary to water the roots of a fruit tree. In transplanting extra sized trees, it would be an indispensable appliance, in order to settle the roots properly. Having planted the tree, the next point is to keep it there. This must be done by stakes driven around the tree, from which several ropes are secured to the stem, binding a piece of woolen cloth around the tree before securing the cords, so that the bark may be protected from chafing. Tree-guards, or fences with various other devices for securing trees against disturbance, have been employed. The disturbance of the tree in the soil, is a great drawback to its growth.

DESTROYING VERMIN ON COLTS.—Take faxseed (linseed) oil, and rub the harboring places thoroughly to the skin, and the vermin will up, die, and drop off. It is very safe and sure.

REMEDY FOR WORMS IN HORSES.—Feed the horse for two or three days in succession on good bright corn-stalks, green or dry, and in the meantime give him nothing else to eat.

PUGET SOUND HERALD

BOOK AND JOB PRINTING

STEILACOOM, W. T., CHAS. PROSCH, Proprietor.

HAVING ON HAND, AND BEING CONSTANTLY IN THE RECEIPT OF LARGE ASSORTMENTS OF Book, Card, and other Job Printing material, we are now prepared to execute all kinds of Job work with neatness and dispatch.

BOOKS, PAMPHLETS, CIRCULARS, BILL-HEADS, CARDS, HAND-BILLS, CATALOGUES, PROGRAMMES, ELECTION TICKETS, &c., &c.

Will be executed promptly and at reasonable prices. Terms—Cash must accompany the order in every case.

By late arrivals we have received a large assortment of printing cards of all colors and sizes, which enables us to fill any orders in that line, however extensive, at much less than former charges.

Orders solicited from all parts of the Territory, which will be filled to the satisfaction of our patrons.

WHEELER & WILSON'S FIRST PREMIUM FAMILY SEWING MACHINES

AT REDUCED PRICES!

THE HIGHEST PREMIUMS WERE AWARDED these machines in 1858, at the following Fairs and Institutes:—

- Missouri, Wisconsin, Illinois, Michigan, Indiana, New York, Chicago, New Jersey, St. Louis, Maryland, Baltimore, Virginia, Richmond, California, Mechanics' Institute, San Francisco.

These machines having taken the first premiums at all the State Fairs held Fall throughout the Union, in every instance where they have competed, over all other Sewing Machines, must be received as

Conclusive Evidence of their Unqualified Superiority.

Among the undoubted advantages of these machines are—1st. Elegance and simplicity of construction, and consequent freedom from derangement and need of repair. 2d. Durability. 3d. Unparalleled ease and rapidity of operation. 4th. Comparatively noiseless movement. 5th. Beauty of stitch and firmness of seam. 6th. Economy of Thread. 7th. Applicability to a variety of fabrics. 8th. The Scientific American says:—"We are having a great many inquiries for Sewing Machines from various parts of the country, and as we cannot conveniently reply to them all by mail, we have thought it best to send you a copy of our Circular, in which we describe these machines as they are, and can say, in regard to it, that it is without a rival. It is simple, not easily put out of order, and, in point of effectiveness and finish, no other machine stands above it. We state, in regard to the Sewing Machine, that it is the best and most perfect of all the machines we have used, and we can say, in regard to it, that it is without a rival. It is simple, not easily put out of order, and, in point of effectiveness and finish, no other machine stands above it. We state, in regard to the Sewing Machine, that it is the best and most perfect of all the machines we have used, and we can say, in regard to it, that it is without a rival. It is simple, not easily put out of order, and, in point of effectiveness and finish, no other machine stands above it.
