Attorneys for Claims, Penions, Bounty Lands, &c.  
Reference to any of the Heads of Departments,  
Washington City, Dec. 20, 1859. 4-12

## The Castle on the Mountain.

BY GUYTON.

There stands an ancient castle  
On yonder mountain height,  
Where, fenced with deer and portal,  
Once tarried stout knight.

But gone are deer and portal,  
And all is hushed and still;  
O'er ruined wall and rafter  
I chamber as I will.

A cedar with many a vintage  
Once lay in yonder room;  
Where now the collector's sages,  
And where is his jocular loom?

No more he sets the beakers  
For the guests at the wassail feast;  
Nor fills a bowl from the oldest cask;  
For the dainties of the priest.

No more he gives on the staircase  
The step to the thirty squire,  
And the hurried call for the hurried gift  
Receives, not more require.

For burned oak roof and rafter,  
And they bring begimed and black;  
And stair, and hall, and chapel,  
Are turned to dust and wreck.

Yet, as with song and cithara,  
One day when the sun was bright,  
I saw my love ascending  
The slopes of our rocky height.

From the bush and desolation  
Sweet music did issue,  
And out from the prime of that glorious time,  
A youth a maiden led.

And, standing in the chapel,  
The good old priest did say,  
"Will ye wed with one another?"  
And we wedded and we answered "Yes."

We sang, and our hearts they bounded  
To the thrilling lays we sang,  
And every thought was doubled  
By the echo's catching tongue.

And when, as we descended,  
In what a large and what a host,  
The setting sun looked upward  
On that great castle hill!

Then far and wide, like lord and bride,  
In the radiant light we shone—  
It was a scene that never more  
Shall fade and be forgot!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

And now, as I stand here,  
I see the ruins of that castle,  
And I think of the days when  
The sun shined on that castle hill!

## Mr. Peters's First Wife.

BY GUYTON.

"Dear, dear! no toast, eggs boiled as hard as  
bricks, and the coffee stank cold," and Mr.  
Peters rose from the table in a temper by no  
means amiable, and rang the bell violently. There  
was no answer. He rang again, a third, a fourth  
time, still no answer. Out of all patience, he  
went to the door and called—"Maria! Maria!"

A slight, pretty woman, dressed in a soiled,  
tumbled wrapper, with hair in a state of direful  
confusion, answered this summons. She had  
one of those round, bright faces, which Nature  
intended should be decked with continual smiles,  
but now, with all its roses in bloom, it was drawn  
out its full length, and the large blue eyes had  
a serious, or rather, useful expression, totally  
at variance with their usual joyous look. Her voice,  
too, had lost its melodious ringing sound, and  
was subdued to a dismal wail.

"What is it, Joseph?"  
"Where's the bridge?"  
"Gone out for me. I want more white ribbon  
for my ascension robe."

Mr. Peters said a very naughty word, and  
then continued, "Cold coffee, hard eggs, break-  
fast not fit to eat."

"I wish," whined his wife, "you would think  
less of temporal matters, and turn your attention  
to the great end of life."

"Hang it all, man! I would like to enjoy  
my life while I do have it. Here was I, the hap-  
piest man in the United States, with a pleasant  
home, a chatty, cheerful, loving wife, and good,  
quiet children; and now, since you have joined  
the Millites, what am I?"

"Oh, Joseph if you would only come into  
that blessed circle."

"Where are the boys?"  
"I am sure I don't know."  
"Are they going to school to-day?"  
"My dear, their teacher has given up the  
school, and is turning her mind to more exalted  
objects. Oh, Joseph! turn now while there is  
time. You have still a week for preparation  
and repentance."

"Repentance! Well, when I take up the  
subject, it will take rather more than a week to  
put it through."

Mr. Peters put on his coat and took up  
his hat.

"Joseph," said his wife, "you need not send  
home a-y dinner. I shall be out, and I'll take  
the boys over to their uncle's to dine."

Joe made no answer, unless the violent, em-  
phatic manner in which he closed the door, was  
one. Muttering with anger, he strode into a  
restaurant, to make a breakfast. Here he was  
halted by one of his bachelor friends, Fred Somers,  
who looked up as he heard Joe's order.

"Hallo!" he cried. "You here! Why, what  
are you doing here at breakfast time?"

"Wife sick?"  
"No."  
"Had a quarrel?"  
"No."  
"Gone out of town?"  
"No."  
"The why don't you breakfast at home?"  
"Chimney on fire?"  
"No."  
"Servants all dead?"  
"No."  
"Children sick?"  
"No."  
"Well, what in thunder is to pay?"

"Maria's joined the Millites!"  
Fred gave a long whistle, and then said, "Go-  
ing to ascend next week?"

"Yes, and if I don't commit suicide in the  
meantime, you may congratulate me. I am al-  
most distracted. Can't get a decent meal, chil-  
dren running riot, servants saucy, house all in  
confusion, wife in the blues, either quoting the  
speeches of the elders at me, or sewing on a  
white robe, and groaning every third stitch.  
Hang it all, Fred, I've a great mind to take poison,  
or join the army."

"If I had you give an enchanting picture,  
but I think I can suggest a cure."

"A cure?"  
"Yes, if you will promise to follow my ad-  
vice, I will make your home pleasant, your wife  
cheerful, and your children happy."

"Do it!" cried Joe. "I'll follow your word like  
a soldier under his officer. What shall I do?"

At ten times Mr. Peters entered his home  
withered. Maria was seated at the table, sew-  
ing on her white robe, and there were no signs  
of preparation for the evening meal.

"Maria, my dear," said Mr. Peters, cheerfully,  
"is tea ready?"

"I don't know," was the answer; "have been  
out all day, attending meeting."

"Oh, very well, never mind. Attending  
meeting? You are resolved, then, to leave me  
next week?"

"Oh! Joe, I must go when I am called."  
"Yes, my dear, of course. Well, I must re-  
sign myself, I suppose. By the way, my dear,  
has it never occurred to you that I shall be left  
a widower with three small children? I think I  
am a handsome man, yet, my love, and Joe  
walked over to the glass, passed his fingers  
through his hair and pulled up his collar. Ma-  
ria looked up rather surprised.

"You see, my dear, it is rather a relief for  
you to go quietly, you know. It is so wearing  
on the nerves to have a long illness; and be-  
sides, my dear, there will be no funeral expen-  
ses, and that is quite a saving."

Mrs. Peters' lip quivered, and her large blue  
eyes filled with tears. Joe longed to stop his  
heartless speech and comfort her; but he was  
fearful the desired effect was not gained yet.

"So, my dear," he continued, "if you must  
go, I have been thinking of getting another  
wife."

"What?" cried Mrs. Peters.  
"Another wife, my love. The house must  
be kept in order, and the boys cared for."  
The grief was gone from Maria's face, but the  
teeth were set with a look of fierce wrath.

"Another wife, Joe! Another wife!"  
"Yes, I think I have selected a good suc-  
cessor. I deliberated a long time when I was  
a bachelor, between her and yourself. You will  
like her, for she is your bosom friend."  
"My bosom friend!"  
"Yes, my dear, I think on the day that you  
ascend, I will marry Sarah Ingram."

"What, that god-for-nothing, silly, empty-  
headed old maid the mother of my children!  
What!"  
"Well, my dear, it seems to be the best I can  
do. I don't want to leave my business to go  
a-courting, and she will have me, I know."  
"No doubt! Oh! you great, brutal, hateful  
man!"  
"Stop, my dear, don't fly into a fury! We  
will try to spend our last week in happiness.  
Oh, by the way, I have a proposition to make."  
"Go on, sir! Don't spare me."

"Ah, yes, this is the very thing I wish to do.  
I know your mind is engrossed with your ascen-  
sion, and I wish to spare you the care of the  
house. Suppose you invite Sarah here to-mor-  
row to spend a week?"

"Then we can arrange our matrimonial prepa-  
rations in the evening while you are at the  
lecture."

"What?"  
"And, my dear, one little favor. It may be  
the last I shall ever ask. Stay at home one  
or two days, won't you, and show her round,  
where you keep things, and so on, so that she won't  
have any trouble in keeping order, after you go."

</

THE PUGET SOUND HERALD

Is published every FRIDAY MORNING, at \$4 per annum in advance; if paid for six months, \$2; after the expiration of six months, \$5; for six months, in advance; single copies, 12 1/2 cents. Advertisements, to insure insertion without delay, should be handed in on or before Thursday of each week.

The Herald can be found in San Francisco at the depot of J. W. Sullivan, adjoining the Post Office; at the office of our Agent, 11 1/2 Washington street, at the Merchants' Exchange and the principal Hotels; and also at the leading Hotels in the Atlantic cities.

We shall be pleased to furnish masters of vessels and others, outward bound, with lists of the Herald, on application at this office.

L. P. FISHER,

11 1/2 Washington st., San Francisco, is authorized to act as the Agent of this paper in receiving advertisements and subscriptions in San Francisco and elsewhere, and collecting and receiving for the same.

CHAS. FROSCHE,

The columns of the PUGET SOUND HERALD are open to communications on all questions of public policy and interest, and the advocacy of all sides of every question shall be freely heard; but such communications as are not of a general public nature, or are intended for the furtherance of individual ends, will be charged advertisements. This rule will in no case be departed from.

PUGET SOUND HERALD.

STELLACOOM, W. T., FRIDAY, JULY 20, 1860.

CITIZENS VS. SOLDIERS.—Since our celebration of the Fourth, in Stellacoom, a report has been circulated at the garrison to the effect that soldiers, whether well behaved or otherwise, were to have been excluded from any participation in the festivities of the citizens on that occasion, should they manifest a disposition to do so; and it is said the subject was introduced at one of the meetings held relative to the celebration, and decided there adversely to the soldiers. Now this is a lie made out of whole cloth, and we are reluctant to think that anybody was sufficiently credulous to believe it. A contradiction direct is found in the fact that several of the soldiers obtained tickets for and attended the ball, while the committee were ready to dispose of more to the associates of those who did attend. As presiding officer of all the meetings held in reference to the celebration, we deny positively that any such subject was broached at any one or more of the meetings, and would like to meet the man who will assert the contrary. To put this matter right, we have perhaps been at more pains than its importance will warrant; but our respect for truth and justice would not permit us to pass it by.

SEMIABANDONED TOTALLY ABANDONED.—Though the Boundary Commission and military escort have withdrawn from Simlahoo, we understand that the place is not permanently abandoned. With a view to the temporary occupancy of the same site at a future time, the buildings belonging to the escort have been left standing; only those properly belonging to the Commission having been removed. The escort quarters will be required for future use, in constructing the monuments to indicate the initial point of the boundary line. When the Commission shall have completed its labors, the escort will return to Simlahoo, and remain until such time as the work mentioned may be finished. It is desired that parties who have heretofore been in correspondence with those on duty at Simlahoo will hereafter address their letters to Fort Stellacoom.

SUGAR-CRATED LEAVES.—A very interesting curiosity was left at our office, a few days since, by Mr. Hugh Pattison, in the shape of a branch of a fir tree, the leaves of which were coated with sugar in a manner precisely similar to that in which confectioners coat or frost cakes. A gentle pressure of the thumb and fore finger readily removed this coating from the leaves, and its application to the tongue proved it undeniably to be sugar. Mr. Pattison's attention was attracted to it on the tree by its resemblance to frost, and, on examination, he was agreeably surprised to find it as above described. It has long been known that a honey like substance exuded from the leaves of the fir tree in this Territory, but it had never before, we believe, been found crystallized, nor in such quantity, as in this case. This is surely a land of milk and honey!

THE RANGER.—This busy little steamer has worked herself into a fit of sickness, and is obliged to lay up in the hospital at Fort Madison. So debilitated had she become that, on her last passage up the Sound, she fainted at the mouth of Chambers Creek, and was unable to proceed further for the space of twenty-four hours. Under the treatment of Engineer W. G. Grant, her very capable physician, she will be convalescent again in two or three weeks, when she will resume her accustomed visits to this and other places.

A NEW BARBER.—The steamer Ranger, on her last passage hence for Seattle, had in tow a large scow freighted with three-inch plank, designed for the construction of a substantial bridge across Black River, in King County, just above the forks of Cedar and Black Rivers. The bridge will be sixteen feet wide, and will be created with a view to strength and durability. When completed, it will open direct communication, through a large tract of fertile country, to the Cascade mountains by way of the Snoqualmie Pass.

THE TWO WHARVES.—A few days will witness the completion of an addition of twenty feet to the length of Dr. Webber's wharf, which will increase the depth of water at extreme low tide to about sixteen feet at its terminus. Keach's wharf, which is designed to reach the depth of thirty-two feet at low water, and will, of course, be proportionately longer, will be finished in about a fortnight. We shall then have two of as good wharves as the Pacific coast boasts of.

JAMES TERRY ACCUSED.—The trial of Terry for the murder of Hendrick has ended in a farce. The case was called at 9 o'clock on the morning of the 15th, and was decided in favor of the prisoner at twenty minutes to ten! No witnesses were examined, although they were not at hand, as the judge refused to allow them to be brought into Court! The name of this incorruptible Justice is James H. Hardy.

THE ELECTION.

The election in this County, on Monday, 9th inst., for local officers and representatives, resulted in the success of the "Regular Democratic" over the "People's Ticket," with the single exception of the County Assessor. Though the polling was conducted with considerable spirit, we were highly pleased to notice throughout the utmost good feeling between the rival candidates; so remarkable, indeed, was this feeling, that one could hardly realize that opposite parties were striving for the success of their respective candidates. The vote was not a full one; it is estimated that about fifty voters did not vote at all, either through indifference or absence from home at the time, engaged in haying, logging, &c. Appended is the vote of the county, complete, for which we are indebted to Mr. Geo. Gallagher, County Auditor. Those in the first column only are the officers elect:—

- John A. Settle, (Dem.) 276 Thomas Tolleman, (Ind.) 25
John M. Chapman 147 Lemuel Hill, 105
N. H. Cunningham 129 B. S. Spaulding, 9
County Commissioner.
Andrew F. Hyde, (Dem.) 220 Thom. M. Chambers, (Ind.) 28
E. H. Tucker, (Dem.) 161 George Williams, (Ind.) 108
County Auditor.
George Gallagher, (Dem.) 158 H. G. Williamson, (Ind.) 50
County Treasurer.
Samuel McCaw, (Dem.) 165 Philip Krach, (Ind.) 118
County Assessor.
Henry W. Jahn, (Ind.) 120 George Morrow, (Dem.) 123
Judge of Probate.
James F. Stewart, (Dem.) 100 J. C. Storey, (Ind.) 10
Superintendent of Schools.
W. H. Wood, (Dem.) 147 George W. Sloan, (Ind.) 153
Coroner.
Daniel Collins, (Dem.) 159 Chas. Stewart, (Ind.) 71
Treasurer.
Thomas Dean, (Dem.) 166 Wm. Tada, (Ind.) 151
A. B. Robinson and Miles J. West were elected Justices of the Peace for Stellacoom precinct.
Joseph F. Whitman and Chas. Bradley were elected Constables for Stellacoom precinct.

In justice to Mr. Shorey, People's candidate for Probate Judge, we are requested to state that a report was widely circulated in the country, and generally believed, that he had withdrawn from the contest. Had not this trick been resorted to, there is no doubt he would have been elected.

From the Pioneer & Democrat we learn that two Republicans (Messrs. Hays and Hale) have been elected to the House from Thurston County, against four Democrats, (Messrs. Phillips, Warburton, Ruth and Hennessy.) A Republican Sheriff (Wm. Billings) is also elected. The remaining County officers elect are Democrats.

We take the following from the above paper: In Sawamish County, Dr. Elson is defeated by five majority by Purdy, republican, a member of the House year before last. It will be seen that the five withheld votes secure the election of a republican.

In Cowlitz county, W. H. Harris and Nat. Stone, republicans, are reported as elected over Dr. Ostrander and C. La Du, democrats. Two precincts were yet to be heard from, which may change the result.

In Lewis County, J. W. Anderson, republican, and T. R. Winston, democrat, are said to be elected by small majorities.

L. Shaffer, democrat, is reported elected by two-thirds of the vote of Chehalis county over Dr. Goodell, democrat, his opponent. The census in this county was upon an entirely local issue.

An extra from the Port Townsend Register of Sea informs us that Paul K. Hubbs has 56 majority for the Council, in Jefferson County. Hastings is elected Representative and Chenoweth Prosecuting Attorney by handsome majorities. The extra before us does not indicate the political complexion of the County officers elect.

TRAIN FOR THE SIMILAKOON.—Chas. Plummer, of Seattle, is actively engaged in preparations to start with a pack train from that place on the 24th inst., for the Similakoon. He has already secured twenty animals, and is now busily employed getting together the requisite goods for the trip. Mr. Plummer is a gentleman of enterprise and spirit, and we cannot doubt the successful issue of his venture. The people of Seattle seem to have lost not a jot of their old faith in the mines over the mountains, from the interest which is felt there in Mr. Plummer's undertaking. We are informed that Mr. L. M. Collins, of that town, has been absent in the mines for some months, and it is generally supposed that he is doing well.

DEPARTURE.—We are requested to state that Dr. H. D. Longaker will be in Stellacoom the latter part of next week, and will stop about ten days in pursuit of his profession. This will afford an excellent opportunity to those who need or desire dental operations, from the drawing of a tooth to the substitution of a set of new for a set of old worn-out restorations. A practical knowledge of Dr. Longaker's skill warrants us in recommending him to the confidence of the public. During his stay here, he can be found at Galliber's hotel.

IMPROVEMENT OF ROADS.—In no former year was the improvement in our roads, consequent on the working out of the road tax, so perceptible as at present. Last year this labor was in a great measure thrown away, owing to its being devoted to the opening of new roads which were not completed when the tax was worked out. The large number of men at work, with pick, wheelbarrow and shovel, gives the town a very lively appearance. Our excellent Road Supervisor, Mr. McCaw, deserves much praise for his wise disposition of the labor entrusted to his control. Pelestrians as well as owners of vehicles will owe him thanks when the work is done.

MILITARY MOVEMENT.—The U. S. steamer Massachusetts arrived at Stellacoom on Wednesday last, with the late escort of the Northwest Boundary Commission, under command of Lieut. D. B. McKibbin; Capt. Woodruff having gone to the States on leave of absence. This increases the force at Fort Stellacoom to five companies, one or two of which, however, are only half full, owing to many recent discharges.

PUBLIC MEETING.—We are requested to announce a meeting of the citizens of Stellacoom, on a matter of public import, this (Friday) evening, at seven o'clock, in Mr. Goodburn's building. A general attendance of the citizens is desired.

THE ECLIPSE.

The recent event of most interest, especially to scientific men, throughout the world, was the eclipse of last Wednesday morning. Astronomers have come to Oregon and Washington Territory from the Atlantic States to witness and note the peculiar character of this the most important eclipse of the present century. The interest felt in regard to it has not been confined to private and old-time individuals; the Governments of the United States and of Europe sent their chief astronomers to all the most favorable points, in Europe and here, to take observations of it. We indulged the hope of being able to present to our readers in this issue the result of the observations taken by the astronomers at Fort Stellacoom, sent hither specially by our Government, but we have been disappointed.

The following sketch, from the Washington National Intelligencer, conveys information of the course, duration, &c., of the eclipse:

It will be visible as a partial eclipse throughout the United States, but will be total only in a small part of Oregon and Washington Territory. The central line of the moon's shadow will strike the coast fifteen miles north of the mouth of Columbia River (lat 46° 25' N.) soon after sunrise, and the breadth of the shadow will be eighty miles. Moving thence in a northeast direction, it will pass near to Olympia; across the southern extremity of Freshwater lake, and north of Lake Winipeg; to York Factory, in latitude 57° N., and on the southwest side of Hudson's bay. At Fort York, the breadth of the shadow will be one hundred and five miles. It will have this extent at Cape Chilly, (or Chudleigh) the northeast point of Labrador, in latitude 61° N., and, bending first eastward and afterward to the southeast, after traversing the Atlantic ocean, it will reach Spain near to Santander, on the Bay of Biscay. The shadow will next pass over the entire surface drained by the waters of the River Ebro; nearly all of the Balearic islands, except Minorca; strike Algeria near Cape Carbon; pass to the south of Tripoli; and finally, at 10:45 A.M. (mean time Washington) it will leave the earth at Moscow, on the Red Sea. The end of the eclipse will be about an hour later. At Astoria, the duration of the total eclipse will be 1 minute 54 seconds; at Cape Chilly, 2 min. 50 sec.; in Spain, 3 min. 30 sec.; and in Algiers, 3 min. 12 sec. It is during this phase, and when the whole of the direct line is cut off from observation, that protuberances, sometimes rose-colored, sometimes black, and on other occasions resembling luminous clouds, are witnessed as appendages apparently to the sun.

It is known that the astronomer royal of England will go to Santander, and other parties will accompany him thither, to occupy stations at Portogalete, Bilbao, Pampluna, etc. The Bavarian astronomer proposes to place himself near the mouth of the Ebro, on the Mediterranean, and the French will occupy Palma, in Majorca, and Burga, in Algeria; so that there will be near a hundred European observers stretched along the center of the shadow in Europe and Africa; a force ample to gather a rich harvest of physical results as well as of corresponding data for our geographical position.

PLANNING MACHINES.—By no means the least of the recent valuable additions to our town is the planning establishment of Mr. Robert Goodburn, who seems imbued with the same go-ahead spirit that animates the rest of our people hereabouts. After an unavoidable delay in obtaining the necessary machinery to work his power plane, he finally succeeded in putting it in motion on Tuesday last. Owing to a want of knowledge of the machine, he has experienced much difficulty in getting it to work properly; but all obstacles have at length been overcome, and everything now works to a charm. Mr. Goodburn says he can plane three or four thousand feet of lumber a day. He has also put up a circular saw in the same building, which will find as much employment as the plane. In addition to the above, he will soon have complete a gig-saw, to saw out brackets, cornice pieces, etc. All of these will be worked by the same power. So complete in every part will be this establishment of Mr. Goodburn's, that every variety of the finer work pertaining to house building, including sash-making, can be done by him with a rapidity and cheapness unequalled on this coast. With this addition to former facilities, we may reasonably expect to see Stellacoom in future growing faster than ever before.

H. B. M. STEAMER PLUMMER.—This steamer arrived in Nisqually River on Sunday evening last, from Victoria, with astronomers to witness from Nisqually Plains the great eclipse of the 18th inst. After an exchange of courtesies with the officers at the garrison, the steamer sailed again for Victoria on Wednesday evening.

SOCI-SLEEPERS.—This is the name of a new religious sect, which has recently made its appearance at Fairfield, Iowa. Four men and one woman, apostles of the sect, have been marrying at that place, and sleeping in a tent. They are opposed to churches, deny the divinity of Christ, teach that the soul is a material substance, and sleep with the body until the resurrection.

THE PUBLIC LANDS.—They can no longer be regarded as a source of revenue. Last year nearly nine millions of acres were sold, bringing \$1,628,187 1/2, and the expenses of the land offices, clerks, surveyors, etc., \$1,510,758 47; leaving but a comparatively small balance. Is not this an argument in favor of a liberal homestead law, such as passed the Lower House of Congress?

INDIAN TROUBLES AT PIKE'S PEAK.—The people in the vicinity of Pike's Peak were making great preparations, at the last accounts, to repel an attack of the Indians which was daily expected to take place. Some considerable excitement prevailed, but the whites were sanguine of a complete victory.

RE-BUILDING.—The ill-fated Pemberton Mill, in Massachusetts, which we noticed as having been destroyed some time since, and hurrying a large number of operatives, both male and female, to an awful and untimely end, is now being rebuilt in the most substantial manner. The foundations are composed of large stones laid in cement.

ANOTHER ORDER.—Another mystical organization has been established in California, under the attractive title of the "United Ancient Order of Druids." Their subordinate branches are styled "Groves." Some two or three Groves are already under full operation in that State; No. 1 being at Placerville.

ARMY NEWS.

We extract the following from the Vancouver Chronicle of the 14th instant:—

General East on steamer Pacific—Gen. Wm. S. Harvey, Surgeon S. K. Barnes, Medical Dep't; Major John G. Reynolds, 3d Artillery; Capt. Alfred Plesanton, 2d Dragoons.

Arrived here per Pacific—Major Gabriel Hains, 4th Infantry, and family; Capt. Thom. Topographical Engineers, and family.

We learn that Major G. Hains, the present commanding officer of this Post, has been appointed Lieut. Colonel in the 5th Regt. U. S. Infantry.

The detachment of Engineers that left Vancouver on Friday, July 6th, encamped on Salmon Creek until Monday the 9th; on the morning of which, a party of sixteen, under charge of Lieut. Roberts, left for the Kallama River, to reconnoiter from thence to the Kowitiz Landing; the remainder of the detachment are as yet encamped on Salmon Creek, and are prosecuting with vigor the construction of the wagon road to the East Fork of Lewis River.

Companies A, B, and M, 3d Artillery, under the command of Brevet Major Geo. P. Andrews, left here on Monday the 9th inst. for Fort Dalles, and to proceed from that point to join Major Steen's command on Smith's Springs, in the Snake River country.

The squadron of 1st Dragoons from Fort Walla Walla, under command of Major Orier, are ordered to take the field, immediately, for the Snake River country, and co-operate with the movements of Major Steen against hostile Indians, and meet and protect the emigration on the northern route.

JAPAN TEA, &c.—An exchange, in speaking of the various reports of Japan in a commercial point of view, among other articles mentions that of tea, which it says is exported in great quantities and commands an extra recommendation on account of the superior natural purity of the herb. This will be acceptable news to our tea-drinkers, in view of the speedy opening of trade with the Japanese. As to the growing of rice, the country can hardly be surpassed. Grapes, peaches, plums, and other temperate fruits are said to thrive luxuriantly and in great abundance. Already there are a number of enterprising American merchants settling in some of the coast towns, and among them we notice the names of several old Californians. When the country is opened to our people in accordance with the Perry treaty, which will be now in a short time, we may reasonably expect that America will be well represented among the Japanese.

LUCKY FELLOW.—The Marysville Democrat learns that a man named Denton was chopping wood, the other day, near Timbuctoo, when he found in the butt of a hollow tree a bag of gold dust worth \$7,000. It had been there, evidently, for a long time, and the owner is probably dead—otherwise he would have returned for it. Denton is well known at Timbuctoo, and has been, we believe, engaged until recently in the butchering business. He has made his \$7,000 with more ease than the generality of men can ever expect to realize a like sum. The above is but a moiety of the treasure secreted in a similar manner in California. The aggregate amount buried by miners will reach hundreds of thousands of dollars; most of the original owners having met with sudden natural or violent deaths, and carried with them into the grave the secret of their buried gold. We expect to hear in the future of many like discoveries.

ROCK CREEK GOLD MINES.—The reports from the newly discovered mines, says the Mountaineer, continue to be in the highest degree favorable. Our dates from the new diggings are to the 20th ult. At that time not less than two hundred men were at work on the creek, and making all the way from \$5 to \$20 to the hand. Parties had been out prospecting various small streams in the neighborhood of Rock Creek, and uniformly with favorable results. The amount of dust that has reached the Dalles within the last week from these mines is quite large—one gentleman, a trader, having brought in \$2700, nearly all of which was from Rock Creek. As an evidence of substantial prosperity, a correspondent writes us that a town has been laid out at a central point on the creek; two commodious store houses were already completed, and a number of other buildings were approaching completion. Very many of the miners were engaged in staking and sluicing.

WHAT A PRINTER MUST BE.—Punch, in speaking of how nice it is being a printer, says he is always expected to know the latest news, is styled "muggins" if he is not always posted; must please everybody, and is supposed never to need the one thing needful; must trust everybody, and is thought a great bore if he presents a bill; must be a ladder for all political aspirants to step into office, who very soon become independent, don't owe him anything, consider the printer at best a sorry dog, who cannot expect any better treatment than kicks and cuffs, and finally summing it up, he is expected to be a man without a model and without a shadow.

INDIAN ATTACK.—The Santa Fe advices report an attack on Fort Defiance, the last of May, by the Navajo Indians, in which the attacking party were nearly victorious in consequence of the garrison having been surprised. Through their mismanagement the Indians were discovered and repulsed. There seems to be a general feeling of hostility on the part of the different tribes of Indians between this and the Atlantic, towards the whites, and nothing short of an immense number of military stations at different points through the interior of the bordering country will make it safe for emigrants or others.

SHOOTING APRAY.—Two men at the Dalles, says the Mountaineer, by the name of Jas. Warren and A. Hines, became somewhat ruffled under the influence of bad whisky, and during the altercation Hines drew a revolver and shot Warren through the thigh. Hines was held to bail in the sum of \$700.

DEPARTURE OF GEN. HARNETT.—Gen. Harnett took his departure on the 19th inst., on the steamer Pacific, en route for Washington. A salute of thirteen guns was fired in honor of his departure. His absence is very generally regretted by the press and people of Oregon.

The best purifier of the blood, Hall's Sarsaparilla, Yellow Dock and Iodine of Potash.

GOLD HUNTING.

The papers by the last steamer contain accounts of a little stir in San Francisco respecting a new gold region way up north, and an expedition has been fitted out to search for it. A schooner was to have sailed on the 26th ult., with ten men on board, to proceed to about 65 degrees north latitude, in search of the new gold locality. The San Francisco Telegraph of the above date gives the following history of the first discovery:—

In the year 1850 a whale ship touched on the coast, and several men landed. In a ravine the second watch and one of the boat steers discovered large quantities of yellow metal, several specimens of which they took on board, one of them laughingly remarking to the captain that they had discovered a gold mine. None of the parties had seen gold in its natural state, and they were so ignorant of metals as to pronounce the metal brass. The specimens were kicked about the deck as refuse matter, and nothing more was thought of the discovery until a year or two later, when the second mate happened to be in Australia, and saw the gold from the mines. Its close resemblance to the mineral discovered on the northwest coast, satisfied the mate that the latter was gold. He made several attempts to get up an expedition, but every one laughed at him for his folly. Meanwhile the captain had written home to a brother, mentioning the discovery, and appointing to meet him in California. The captain died, however, but the story of the discovery became known to some parties in this city, who, for the last seven years, have endeavored to find some one who could point out the locality. A month or so since, they were fortunate enough to find one of the officers of the vessel first alluded to, who was enabled to designate the exact locality. A joint stock company was then formed, a vessel chartered, and the Jassons are now afloat in search of their golden fleece. Only two men in the company know the exact spot where the gold is said to have been discovered. One great drawback is, that the earth in the gold country is covered with snow most of the year. The company, however, expect to be able to mine during the month of August—say for thirty days—which they calculate is sufficient time to fill the schooner. By the first of October we shall probably learn what fortune the adventurers have met with. It is frequently known that the country have frequently been known to have gold in their possession, and that the Russian Fur Company has obtained from them considerable quantities of the metal in the way of trade.

ALMOST A MURDER.—The Mountaineer says that on the 6th inst., while Wm. Bunton, accompanied by his wife and daughter, was going from his house to a garden, near the Dalles, he was suddenly confronted by one John Brownlee, who had been lying in wait with a loaded gun, and who threatened to take his life. The wife threw herself between the parties and induced a parley, thus giving the daughter time to procure a gun and slip it unobserved to her father, who instantly raised it and fired, wounding Brownlee in the face and hands. On an examination Bunton was cleared, as he was acting in self-defence. A warrant was issued for Brownlee's arrest, who will no doubt recover from his wounds. A grudge growing out of a dispute as to the title to land is said to be the cause of the affray.

MR. KALLOCH.—This noted clerical individual seems to have raised up a host of admirers in the good city of Boston, who have agreed to raise \$75,000 to build a church for him, provided he will remain there. He recently preached his farewell sermon in the City of Notions, and will soon take his flight into Kansas to become a member of the Baptist Home Missionary Society. Verily there is no accounting for the curious fluctuations in public sentiment. Whiskey, other men's wives, &c., must be a proof of theological worth in Boston.

APPROPRIATION.—Congress has made an additional appropriation for the Walls Walls and Fort Benton military road, of one hundred thousand dollars. The work is progressing, and will be continued under the charge of Lt. Mullan.

MARRIED.

In Stellacoom, on Thursday, July 19th, by Rev. George W. Ross, Mr. WILLIAM MCCABER to Miss CATHERINE MALLEN, both of Fort Stellacoom.

MISCELLANEOUS.

\$10 REWARD.—Lost, on Sunday evening last, \$10 in bank notes, a large POCKET-BOOK, containing a pair of keys, a watch, a pocket watch, a watch, and twenty-four cents) besides a soldier's discharge and several letters in German. The contents of the pocket-book are now in the hands of anybody but the owner. The above reward will be given for the return of said pocket-book, with its contents, to this office. 10c

IMPORTANT NOTICE!

NOTICE IS HEREBY GIVEN TO THOSE indebted to the late firm of H. G. WILLIAMSON & CO. that all accounts not settled by the 15th of July next will be placed in the hands of the proper parties, to be collected by law.

I am compelled to adopt the right course in order to satisfy certain claims against the firm to which these accounts must be appropriated.

H. G. WILLIAMSON, 25

THE following letter, which emphatically speaks for itself, was written by the Dean of the Faculty of the Philadelphia College of Medicine to the editor of the "Pacific Medical and Surgical Journal," for publication: PHILADELPHIA, Jan 17th, 1859.

To the Editors of the Pacific Medical and Surgical Journal: I have been called to an article in the December number of your journal, in regard to the ad eundem degree granted by the Philadelphia College of Medicine to Dr. L. J. Caspary. When the application for the degree was made to this Faculty, it was accompanied by affidavits and testimonials to the effect that Dr. Caspary was a regular ex-ante M.D. of the University of Pesth, had served as Surgeon in the Hungarian army, and was a regular practitioner of medicine. On the strength of these the degree was granted. The ad eundem degree, as its name implies, is conferred on graduates only, and gives no special privilege, and the slightest degree of irregularity, the application would have been refused. By its being thus in your journal, you will do an act of justice to the College, and confer a favor on me.

Yours, very respectfully, H. RAND, Dean of the Faculty of the Philadelphia College of Medicine.

CERTIFICATE. I, the undersigned, Governor of Hungary, do hereby certify, that Dr. L. J. Caspary has served, during the contest for Hungarian Liberty, as Chief Surgeon in the Hungarian army, with faithful perseverance; whereon I have given him this certificate, and do recommend him to the sympathy, attention and protection of all those who are capable of appreciating patriotic self-sacrifice and unswerving fidelity. KOSSUTH, Governor of Hungary, Washington City, January 6th, 1852.

DR. L. J. Caspary's Medical and Surgical Institute is on Sacramento street, below Montgomery opposite the Pacific Mail Steamship Co.'s office, San Francisco, California. The Doctor offers free consultations, and asks no remuneration unless he is prevailed upon to attend. Persons not wishing to lose time in correspondence, please enclose \$10 in their letters, and they will get immediate attention in their cases. L. J. CASPARY, M. D., San Francisco Cal.

TIME! TIME! A WATCHMAKER IN STELLACOOM!

JAMES E. D. JESTER, PRACTICAL WATCHMAKER.

HAS LOCATED IN STELLACOOM, where he hopes, by strict attention to business and superior work, to merit the confidence and patronage of the citizens of Pierce County and vicinity.

A good assortment of CLOCKS, WATCHES, AND JEWELRY.

Constantly on hand. Repairs thorough and warranted. Work from adjusting loose jewels, and resetting free of expense charges. Shop on Commercial street, near Balch. 46c

DRESS TRIMMINGS, HATS, ARTIFICIAL FLOWERS, RIBBONS, ETC.

CHEAP CASH STORE!

MRS. F. PARKINSON, LATE FROM THE M. Atlantic States, has opened in Stellacoom a FANCY AND STAPLE Dry Goods Store.

Where she will keep constantly on hand a large assortment of LADIES' DRESS GOODS of every description. Head Dresses, and every article in the Fancy Goods line, for sale cheap and on the shortest notice.

Store on Commercial street, next door to McCaw & Co's new brick store. 5c

BOOK, STATIONERY, WALL PAPER AND Seed Store.

THE UNDERSIGNED RESPECTFULLY GIVE notice that they will keep constantly on hand a good assortment of POCAL, MISCELLANEOUS AND SCHOOL BOOKS; Also BLANK BOOKS and BLANK FORMS of all descriptions. Stationery, Wall Paper, and Seeds.

All of the best quality, and cheap for each, at our new store, adjoining Balch & Webber's Wharf. LIGHT & PACKARD, STELLACOOM, W. T. 5c

TURNING. J. C. CHAPMAN & CO. WOULD INFORM their friends and the citizens of Washington Territory that they are now prepared to do all kinds of LATHING, TURNING, STAIR BANISTERS, NEWEL POSTS, BALUSTRADES, COLUMNS, HILLIARD and RALLA, &c., &c. Also keep on hand a good assortment of lumber, from which we manufacture PLAIN and FANCY BENTHAULT. Orders from every part of the Sound promptly attended to at San Francisco prices. J. C. CHAPMAN & CO., STELLACOOM, W. T. 5c

MARANCY & THIBAUT, PRACTICAL GARDENERS, STELLACOOM, W. T. OFFER THEIR SERVICES TO THE PUBLIC in all kinds of Gardening, including the planting and cultivating of all kinds of fruit trees, shrubs, and flowers, and the laying out of lawns and grounds. They will also have constantly for sale, from the earliest to the latest period of each season, every variety of Vegetables grown in Washington Territory. Orders respectfully solicited and promptly attended to, at Mrs. Clark's Garden, Seattle, Wash. 5c

Agriculture.

Value of an Agricultural paper.

A subscriber to the Country Gentleman writes to the editor that he has been benefited by it more than \$500 within two years. This has been done by making a practical use of the information it contained. He has worked as well as read. He says:

"To it my cows, about sixty in number, owe the comfort of standing in a warm and comfortable house, protected from the chilling rains, snows and winds to which our country is subjected.

"To it my family is indebted for an abundance of milk, while before we could have none. To it my family is indebted for a comfortable nice dry cow-house to feed and milk in, in place of wading about in the snow, rain and mud to accomplish the same.

"To it I am myself greatly indebted, for saving me, through the advantages of a cow house, producing double the quantity of grain to winter my cows.

"To it I am greatly indebted for being able now to turn my cows out in the spring in fine order and healthy condition, instead of being engaged in lifting them up through the month of March.

"To it I am indebted for raising cattle that will command almost my own price, while before there was difficulty in selling them at any price.

"To it I am indebted for having a good garden, which supplies my family with delicious vegetables, and a plenty of them, for the whole year.

"And, in conclusion, I will say that I now have a calf eight months old, that weighs 800 pounds, and has received no extra treatment, but the comfort of standing in a warm house during the winter."

FARMING IN MICHIGAN.—C. W. Davis gives the following as the results of his experiments in raising Hungarian grass and common millet, for feed for stock: He says:

"From 15 acres of Hungarian grass and 3 acres of common millet, we have fed 27 cows, 1 bull, 2 oxen and 3 horses, from December 1st until the 6th day of March, and we have enough feed left to carry them to the middle of April. Our stock have had all the hay they could eat. We have no desire to have anybody believe that we would try to winter a parcel of milk cows without a good supply of roots. Our stock will have consumed something over 3,000 bushels turnips, mangolds, and parsnips by the 1st day of May, and are now in much better condition than when we commenced feeding them in the fall. The Oregonian says:

"We copy this to show the value of the Hungarian grass as food for stock. We are satisfied that it will produce well in Oregon. On account of the wetness of the season, the seed could be sown now, if it could be had, with a fair prospect of success. It is not too late to sow mangel wurtzel seed, though the roots will not grow so large as if sown within two weeks, and the sooner the better. The seed of the common turnip can be sown later. We want our farmers should have plenty of food for their animals in winter. They will pay you well for the food you give them. They will be likely to be lean, lank, scrawny animals unless they can have necessary food."

APPLES ONE HALF SWEET AND THE OTHER SOUR.—The Milwaukee Democrat, referring to a statement of Hon. Anna Walker, that trees may be so grafted as to produce an apple, one-half of which is one of kind of fruit and the other of a different kind, says that "in an orchard in Cass county (Mich.) may be found a tree bearing apples which are composed of alternate sections or layers of sweet and sour, each apple containing perhaps six distinct sections, the former being yellow and the latter green. We have gathered apples from the trees, and examined, tasted, and eaten them." Which singular phenomenon the editor of the Buffalo Republic confirms by citing a similar and no less remarkable one within his own knowledge. He says: "There is a tree in the town of East Hamburg, in this county, which bears apples, alternate quarters of which are sweet and sour, and each section plainly marked, one being of a yellowish cast and the other a dark green. For three years in succession we have eaten apples from the tree, and can testify to the fact.

VERTIGO IN HORSES.—It is contended that "Vertigo" or "Chest Stagers" in Horses is caused by fermentation of food in the stomach—in other words dyspepsia. A writer in the Country Gentleman says, that he had an animal affected by this disease, put under his charge, watched every symptom, and was satisfied that his disease was dyspepsia, treated him for dyspepsia and cured him. He had hitherto been kept on cut feed—hay and corn-meal mash for a year, when this Vertigo appeared. The remedy was this: His hay was cooked by steaming, and instead of corn meal used fine feed—one quart of each of mash with twenty of the little Belladonna pills of Homopaths, three times a day for three days, giving him water but once in twenty-four hours, and that late in the evening. He followed this with cut hay and fine feed (one quart at each feed three times a day) and added a tea-spoon of mustard seed for one week, all this time barely exercising him about the house. He was then put to his work, using a double quantity of ground oats, viz. two quarts to each feed, and from that time forward he was in a sound state of health.

LOSS OF THE HORSE.—The question has been properly asked, if the age to which any particular breed of animals, especially horses, will live to retain their usefulness unimpaired, is not a matter of some importance and worthy the attention of breeders? We think that, in raising horses, animals should be selected for breeding whose ancestors have been long-lived, and which have themselves arrived at full maturity, and therefore are likely to produce healthy offspring. There is no reason why, by judicious breeding and care, the horse should not be able to retain his vigor and usefulness to a much greater age than is now the case.

SALT ON LAYING DOWN MEADOW LAND.

S. Pierce, writing to the Maine Farmer, relates that in his youth he met with the statement that one part of the English method of laying down land to grass, was to "plow or harrow in seven bushels of salt per acre, and the result was, they got a heavy crop of hay for ten years." He has employed salt on potatoes and corn with good results, but having only a few acres of land, and no permanent meadow, had not thoroughly tried this experiment. But one of his neighbors, who was noted for cutting almost invariably a heavy crop of hay, and generally two crops in a season, told him (in reply to his mention of the English method mentioned above) "that is the very secret why I get so much hay." His mode of applying was to put on six bushels per acre, and harrow it in before sowing his grain and grass seed.

HOW TO MAKE SWINE PROFITABLE.—A successful farmer in Canada West thinks it a bad practice to keep Hogs over winter. He keeps only the breeding sows, which bring the litter in March. The young pigs, when two or three weeks old, will begin to eat, and can have a separate apartment from the sow, where they can go in at leisure, and be fed milk and a little meal. They are weaned at eight weeks old, kept well fed and allowed the range of a small clover pasture convenient to the pen. After harvest they have the run of the stubbles; as soon as they have gleaned these, they are at once shut up and fattened on chopped barley and other grain, and boiled potatoes; and when killed, at from seven to eight months old, they average: from 200 to 250 pounds. His pigs are a cross between the Byfield and Suffolk. Those pigs that come in the fall can be allowed to run with the sow till three weeks old, and then killed for hams.

PRESERVE THE BIRDS.—The owners of land can have birds, or they can have destructive insects—it depends upon them to choose which. If they like vermin on their trees and crops, on the tops, the branches, roots, everywhere, then they will get rid of the birds, of course. But if they prefer, singing, hopping, chirping, flying, bright-eyed birds as preferred to caw-cawing, curculios, grubs, and all manner of unwholesome worms and bugs, why then they must get rid of or punish the boys and girls that hurt the one and cause the other to increase, and multiply, and devour. They will even take particular pains to put up boxes and houses for wrens and sparrows, and the like; to live in, and to feed those who stay among us in winter.

TREATMENT OF SPAIN.—Confirmed spavin is never radically cured. Firing and blistering are the old remedies, and sometimes produce apparent relief, but they are now discarded by careful practitioners. Dr. Dadd recommends rest during the inflammatory stage, and the application of cooling lotions to the parts. He uses a mixture of four ounces of muriatic acid, and six ounces of tincture of blood root, in two quarts of water, and apply this daily with a sponge. Or another remedy equally good, is a mixture of four ounces of very strong vinegar, two ounces of proof spirit, and three ounces of common salt, dissolved in a quart of water. This is applied by fastening a sponge on the affected part and keeping it saturated till the inflammation subsides.

DRIVING POSTS FOR BOARD FENCES.—A correspondent of the Ohio Farmer says that he can set posts better and far more rapidly by driving with a maul or iron sledge, when the ground is just a foot from frost and still wet and soft, than by digging holes. His posts are sowed seven feet long, an inch four by five inches in size, and then carefully and regularly sharpened, so as to put the "top end down." The posts are held steady or turned when necessary, by using a long handled iron wrench, made just large enough to slip over the top of the post. On loamy or clayey land, free from large stones, posts can be driven with great expedition and will stand firmly, the earth around them being well packed by the crowding of the post.

CUCUMBERS.—Plant seeds in small squares of turf. Keep them in the hot-bed, or in a pan in the house until May, when they can be transplanted without disturbing the roots. Plant in open ground, if sufficiently warm, in hills of rich sandy soil raised six inches above the surface, and six feet apart each way. Put in plenty of seeds, planting in each hill several times at intervals of a few days. The bugs will attack the tender and younger plants, and leave the more vigorous unharmed. They can be thinned after the insects have finished taking toll.

FORMULA FOR EGG-NOG.—A correspondent of the Baltimore Sun gives the following formula for egg-nog:

Take the yolks of sixteen eggs and twelve tablespoonful of pulverized loaf sugar, beat them to the consistency of cream; to this add two-thirds of a nutmeg, grated, and beat well together; then mix in half a pint of good brandy or Jamaica rum, and two wine glasses of Madeira wine. Have ready the whites of the eggs beaten to a stiff froth, and beat them into the above described mixture. When this is all done, stir in six pints of good rich milk. There is no heat used.

Egg-nog made in this manner is digestible, and will not cause headache. It makes an excellent drink for debilitated persons, and a nourishing diet for consumptives.

LIME.—Lime will descend down as far as the earth is pulverized, and it should therefore be placed on the top of the ground.—When land has been limed for a number of years, sub-soil plowing is as good as a new coat of lime, as it brings it up again to the surface. Eight per cent of the leaves and bark of the apple tree is lime, which should be applied to the soil, and unless it is replaced, the orchard must suffer or the want of it.

DRIED APPLES.—Franklin county, Maine, sent last year \$62,000 worth of dried apples to market.

PUGET SOUND HERALD

BOOK AND JOB PRINTING

STEILACOOM, W. T.

CHAS. PROSCH, Proprietor.

HAVING ON HAND, AND BEING CONSTANTLY IN THE PRESS, LARGE ASSORTMENTS OF BOOKS, CARDS, AND OTHER JOB PRINTING MATERIAL, WE ARE NOW PREPARED TO EXECUTE ALL KINDS OF JOB WORK WITH NEATNESS AND DISPATCH.

BOOKS, PAMPHLETS, CIRCULARS, BILL-HEADS, CARDS, HAND-BILLS, CATALOGUES, PROGRAMMES, ELECTION TICKETS, &c., &c.

Will be executed promptly and at reasonable prices. Terms—Cash must accompany the order in every case.

By late arrivals we have received a large assortment of printing cards of all colors and sizes, which enables us to fill any orders in that line, however extensive, at much less than former charges. Orders solicited from all parts of the Territory, which will be filled to the satisfaction of our patrons.

WHEELER & WILSON'S

FIRST PREMIUM

FAMILY SEWING MACHINES

AT REDUCED PRICES!

THE HIGHEST PREMIUMS WERE AWARDED these machines in 1858, at the following Fairs and Institutes:—

Missouri, Wisconsin, Illinois, Michigan, Mississippi, Indiana, New York, Chicago, New Jersey, St. Louis, Maryland, Baltimore, Virginia, Richmond, Pennsylvania, Mechanics' Institute, Kentucky.

These machines having taken the first premium at all the State Fairs held last Fall throughout the Union, in every instance where they have been introduced, over all other Sewing Machines, must be received as

Conclusive Evidence of their Unqualified Superiority.

Among the undoubted advantages of these machines are:—1st. Ease and simplicity of construction, and consequently less wear and tear, and less liability to break. 2d. Durability. 3d. Unexcelled ease and rapidity of operation. 4th. Comparative noiseless movement. 5th. Board of stitches and firmness of seam. 6th. Economy of Thread. 7th. Applicability to a variety of purposes and materials.

They are especially adapted to every variety of Sewing for Family use, from the lightest muslin to the heaviest linen. It works equally well upon silk, linen, woolen and cotton goods, and is equally adapted to gathering and filling, performing every species of sewing, such as making button holes, stitching buttons, and the like. Various appliances are furnished for regulating the width of hem. The hemmer is an appendage to which fabric, after being passed through, is turned down and handily stitched. Thousands of these machines are used by families, seamstresses, dress-makers, tailors, milliners, &c., in cities, villages, towns, parades, and all kinds of shops, with complete success, and some from one to two hundred are used in a single millinery.

Read what the Scientific American says:—"We are having a great many inquiries for Sewing Machines from various parts of the country, and as we cannot conveniently supply to them all by mail, we have thought it proper to state our opinion in regard to them in this public manner. We have used Wheeler & Wilson's patent, manufactured by the Wheeler & Wilson Manufacturing Company, No. 405 Broadway, and we can say, in regard to it, that it is without a rival. It is simple, not easily put out of order, and, in point of efficiency and finish, is superior to them all by mail.
