

THE PUGET SOUND HERALD is the oldest and largest newspaper published in Washington Territory, and has the largest circulation.

Published every THURSDAY MORNING, at \$5 per annum, in advance; if paid within six months, \$4; after the expiration of six months, \$5; for six months, in advance; single copies, 12 1/2 cents.

The columns of the PUGET SOUND HERALD are open to communications on all questions of public policy and interest, and the advocacy of all sides of every question shall be freely heard; but such communications are not of a general public nature, or are intended for the furtherance of individual ends, will be charged as advertisements.

L. P. FISHER, 600 Washington St., San Francisco. Is authorized to act as the Agent of this paper in receiving ad- vertisements and subscriptions in San Francisco and elsewhere, and collecting and remitting for the same.

EUROPEAN AFFAIRS.—Garibaldi has opened the ball on the continent, and France, Spain and Austria are deliberating upon the propriety of taking part in the dance, which promises to engage their attention for some months, if not longer.

MATERIAL WEALTH AND VARIED RESOURCES OF OUR TERRITORY.

In our last issue, we claimed for Washington Territory favorable geographic position for commercial enterprise, and invited the attention of agriculturists to the fact that large bodies of rich land, accessible to market, were yet unoccupied.

The coal mines of Bellingham Bay are already known to the world for their surpassing richness, extent, and the character of the coal. On the Straits of Fuca and some of the islands of the Archipelago of Arro, several rich veins have been discovered.

With great satisfaction we may refer to the infinite variety of edible fishes in our Sound and rivers. No part of the world can surpass this Territory in affording opportunity to employ capital in this very important element of commerce.

But we are not yet done. We must yet allude to our vast lumbering wealth—to the tall forests of fir, cedar, hemlock, spruce, all the pine family—of oak, alder, maple—spruce tall and erect, everywhere around us, and sufficient in number to supply the navies of the world for centuries.

Again let us refer to the various locations and sites for mills. At convenient distances mountain streams and fine water powers are found, furnishing opportunities, as unequalled for the erection and working of lumber mills, adequate to give employment to many thousands of laboring men.

There is a future to such a Territory; so bounteously supplied by nature with such elements of material wealth, possessing such varied capacity to afford employment to many, so many channels for the investment of capital, and so lending to every class. We occasionally find among us some (there are more or less of them in all communities) who seem disappointed and discontented; to such we say, be not discouraged.

GREEN CORN.—Decidedly the most palatable morsel of green corn we have had. This season came last week from the garden of Mr. Chas. Egan, in the upper town. It was of the sweet white variety, the grains large, and seemingly ready to burst with their milky substance.

GREEN CORN.—Decidedly the most palatable morsel of green corn we have had. This season came last week from the garden of Mr. Chas. Egan, in the upper town. It was of the sweet white variety, the grains large, and seemingly ready to burst with their milky substance.

WOOLEN FACTORY.

Our attention has been directed several times, during the past two years, to the importance of establishing in or near Steilacoom a woollen factory. No one can question the advantages to be derived from such an establishment, nor the peculiar adaptability of this place for it.

In Oregon and in California the most successful enterprises of late years have been the woollen factories. A few days since, Government paid to the California factory the sum of \$150,000 for a portion of its fabrics, supplied to the volunteers of that State.

Now here is an enterprise, citizens of Pierce County, which promises a handsome return for the investment of a limited capital, and a material improvement, directly and indirectly, in the value of your real and personal property. It would affect beneficially the property of every man, but more especially the poorer farms of the county—those which, though admirably calculated for sheep-raising, are scarcely fit for anything else.

NEGROES WILL STAY SOUTH.—Many Northern people have manifested anxiety lest the North should be overrun by negroes, in the event of their general emancipation at the South. Read what Gen. Hunter says in a recently written letter: "None of the carefully fostered delusions by which slavery has been sustained, exist in the North more abundantly than the bugbear of a general migration of negroes to the North."

NORTHERN AND SOUTHERN ENDURANCE.—A distinguished surgeon of the army of the Potomac, says the Rockford (Ill.) Republican, who is here for a few days, and who worked faithfully day and night for three days after the battle of Fair Oaks, says that in all the operations performed upon the amputation table, the "Yankees" showed more grit, more true courage, than the rebel soldiers. A surgeon considers this one of the highest tests of courage. One rebel Lieutenant fell into our hands, who was shot forever blind by a ball which hit both eyes, and broke the bridge of his nose. He behaved himself very well, not complaining in the least. He is recovering rapidly, but will never see again.

A CONGREGATION PHYSICIAN.—By the mistake of an apothecary at Winchester, Ind., recently, a quantity of antimonial wine was sold to a Methodist society near that place for sacramental purposes. It was a quarterly meeting occasion when the wine was taken, and the effect was frightful. Although it was a serious matter, the sinners, owing doubtless to the hardness of their hearts, did laugh excessively as the brethren and sisters, in gangs of from half a dozen to a dozen, were leaving the church, depositing the contents of their stomachs in their hats and aprons as they went.

PATRIOTIC.—At a meeting of the Directors of the American Express Company, held in New York, July 9th, 1862, it was unanimously resolved that any of their present employees who may promptly enlist under the present call for troops shall continue to receive one-half of their pay during the term of service in the war, and their situation restored to them on their return. Two thousand men are in the regular employ of this company, at an average salary of over \$600 per annum.

OUR NAVY.—In 1861 the number of vessels in the United States navy was only 88; in 1862 the number is 907. Of these, two are iron-clad frigates; 23 iron-clad gunboats, large sails; and 9 rams. There are now only 28 sailing vessels in the navy—last year there were 48.

DESTRUCTIVE FIRE.—The town of Jackson, Anderson county, Cal., was totally destroyed by fire on the 23d ultimo. Two thousand people are rendered homeless, and near three hundred thousand dollars worth of property destroyed.

NO DRAFTING.—The latest advices from the East indicate that there will be no necessity to resort to drafting to raise the requisite number of men to crush out the rebellion. A few more volunteers will still be left at home, after the President receives all he has called for.

MISCELLANEOUS ITEMS.

The shipments of rock oil from the United States to Europe, during the first half of this year, amounted to more than a million dollars.

The citizens of Lynn, Massachusetts, are raising a fund of one million dollars, for the families of soldiers. In a few minutes after the proposition was first made, the subscriptions amounted to \$350,000.

The Germans of New York are enthusiastic admirers of Sigel, whom they regard as the hero of the war. It is proposed to organize a Sigel Brigade, composed entirely of Germans, who want to "fight mit Sigel."

A squad of rebel prisoners fell into Gen. Sherman's hands, the other day, and in answer to "what they were fighting for?" replied, "to sustain the gentlemen who got us into it."

Hollow metallic canes, filled with condensed gas, are now used in some of the European cities. The bearer has only to turn a small nipple, and apply his match, when he will instantly find himself furnished with a torch that will light him several hours.

Presuming that the debt and liabilities of the United States will be eight hundred millions of dollars at the commencement of 1863, it will then be less than one fifth of the national debt of England, less than one-half that of France, and about one-half that of Austria.

We have before us, says the Boston Journal, a letter from an army officer of experience, a native of Massachusetts, and well known among his present friends for his conservative views upon the subject of slavery. He has been for several months past in the heart of Secession, and has seen the spirit which animates the rebels set out to perfection, and as the result of his experience he writes these words: "Slavery goes under with this war. The war only ends when slavery ceases throughout these United States."

The Louisville Journal comments in very severe but just terms upon the silence and inaction of Gov. Beriah Magoffin during the recent raid of Morgan and his guerrillas into Kentucky. The Governor is impliedly charged with complicity in the outrages perpetrated. Magoffin has since resigned, much to the satisfaction of the loyal men of Kentucky.

Mr. Singer, the manufacturer of sewing machines, has left this country, with the intention of spending the rest of his life in the Holy Land. At the great International exhibition in England, the first premium—a medal—has been awarded to the Wheeler & Wilson Sewing-Machine.

The Hartford Post says it is a suggestive fact that there is now more demand for spinning wheels than at any time in the past twenty years. Farmers are returning to the old-time economy, and producing at home as many as possible of the necessities of life.

There are 411 females in the United States holding commissions as Postmasters. The casualties of all kinds in the army of the Western Department (late Halleck's) since it went into the field are stated at 68,500, of which 40,000 are charged to death and absence from sickness, and 28,500 to various casualties by battle.

The census of 1860 represents that the annual value of our manufactures reaches the enormous sum of nineteen hundred millions of dollars. The profits in the amount are computed at 48.48 per cent. This amount of wealth was created by one million three hundred and eighty-five thousand persons, assisted by improved machinery, which gives their skill the greatest possible amount of productive power. A people who can produce wealth as fast as this, need not fear being exhausted in its means of putting down rebellion.

An idler boasted to a farmer of his ancient family, laying much stress upon his being descended from an illustrious man who lived several generations ago. "So much the worse for you," replied the farmer; "for we find the older the seed the poorer the crop."

Government is still feeding from 1800 to 3000 poor families in New Orleans. Flour was \$12 per barrel. Elias Howe, of Bridgeport, inventor of the sewing machine, and one of the wealthiest men in Connecticut, after giving \$2000 to the enlistment fund, has enlisted himself, unconditionally, and announced that he will not procure a substitute.

Gen. Pope has issued an order putting a peremptory stop to the business of guarding private property, loyal or rebel. He advances the refreshing bit of common sense that soldiers are employed to fight the enemy and not to protect their treasuries.

Morgan came very near being captured at Paris, Ky. While he was at breakfast, Gen. Smith's cavalry dashed into town, and was shooting down the horse thieves in the streets. Morgan escaped in his slippers, leaving his breakfast uneaten.

YEAST POWDERS.—Every housekeeper knows how difficult it is to make good bread, and we therefore take pleasure in calling attention to the fact that to insure uniformly good, light, sweet and nutritious bread, it is only necessary to use Redington & Co.'s Yeast Powders, which in every respect excel all similar preparations ever offered to the public. See advertisement, in another column.

HOLLOWAY'S OINTMENT AND PILLS.—Throat Affections.—In all cases of relaxed, inflamed, and ulcerated throats, safety may always be secured by rubbing Holloway's Ointment upon the glands under the lower jaw. Its curative powers may be accepted without doubt or dissent. In Diphtheria the most marked success has attended its use, in cases where the disease threatened to run a fatal course in spite of the ordinary treatment. The application of Holloway's Ointment fits it well for children's ailments, where internal medicines can with difficulty be administered. When Pills cannot be swallowed without pain, they should be reduced to a powder, and used conjointly with the Ointment, whose cooling, soothing, and healing action they augment by their purifying powers.

The Medical and Surgical Institute

Of Dr. L. J. CHAPMAN is already secured in a position which places it, as its proprietor, far above the assaults of envy and professional malice. In the schools of France, the highest prizes are often awarded to practitioners in this department of medical science, and they occupy with others an equally lofty position in the profession. Record in an illustrious example, a shining light among the philosophical stars of his age in Europe, and Dr. Chapman has fully equaled him in this country; as a proof of which, the Philadelphia College of Medicine complimented him with a Diploma, and the honorary degree of Doctor. Selecting this as his field of operations, although qualified as a graduate of the University of Pennsylvania, and the late Chief Surgeon of the Hungarian Revolutionary Army, for more extended labors. Dr. L. J. Chapman has bent his earnest attention to the cure of chronic and private diseases, in which he has become so great an expert that he is now regarded as the leader in this branch of his profession throughout the United States, and his portrait and biography are published as a matter of interest to his readers in the most exclusive journals. The Doctor's office are at his Medical and Surgical Institute, on Sacramento street, corner of Leaden-street, nearly opposite the buildings of the Pacific Mail Steamship Company.

Persons not wishing to lose time in correspondence, please enclose \$10 in their letters, and they will get immediate attention to their cases. L. J. CHAPMAN, M.D., San Francisco, Cal.

The Farmer's Corner.

Root Culture.

It seems to be far from a settled question in this country, to what extent the cultivation of the various kinds of roots is profitable to the farmer.

There are doubtless good reasons for moderating our anticipations respecting the cultivation of turnips for cattle.

There has clearly been a reaction in this country unfavorable to the extended cultivation of roots.

After all the experiments and trials of other roots, that good old American esculent, the potato, holds its own well.

There is great reason to believe that while some may have erred in going too largely into the cultivation of roots, still more have gone to the other extreme.

- 1. To think that the more a man eats, the fatter and stronger he will become.
2. To believe that the more hours children study while at school, the faster they learn.
3. To conclude that if exercise is good for the health, the more violent and exhausting it is, the more good it does.

15. To believe that warm air is necessarily more healthy than the confined air of a close and crowded vehicle.

16. To believe that warm air is necessarily more healthy than the confined air of a close and crowded vehicle.

or an attack of pleurisy or pneumonia, which will cause weeks and months of suffering, if not actual death within four days.

15 To "remember the Sabbath day," by working harder and later on Saturday than on any day in the week.

Facts in Physiology.

A man is taller in the morning than at night to the extent of half an inch, owing to the relaxation of the cartilages.

The human brain is the twenty-eighth part of the body, but in the horse but a fourth hundredth.

Ten days per annum is the average sickness of human life.

About the age of 36 the lean man generally becomes fatter and the fat man leaner.

Richter enumerates 600 distinct species of diseases in the eye.

The pulse of children is 180 in a minute; at puberty it is 80, and at 60 it is only 60.

Elephants live for two hundred, three hundred, and even four hundred years.

Bats in India are called flying-foxes, and measure six feet from tip to tip.

Sheep, in wild pastures, practice self-defense by an array in which the ram stands foremost in concert, with ewes and lambs in the center of a hollow square.

Three Hudson's Bay dogs draw a sledge, loaded with three hundred pounds, 12 miles a day.

One pair of pigs will increase in six years to 119,160, taking the increase at fourteen pigs each per annum.

A pair of sheep in the same time would be but sixty-four.

A single female house fly produces in one season 20,080,820 eggs.

The flea, grasshopper and locust jump 260 times their own length. Equal to a quarter of a mile for a man.

Evil Effects of Pampering Cattle.—We learn from recent English papers that Mr. Booth's celebrated short-horn cow, Queen Mab, which obtained either first or second prizes at the National shows both of England and Scotland, has proved, in consequence of too high feeding, incapable of breeding.
