San Francisco Correspondence.
SIX FRONTSIDE. Feb. 1, 1867.
EDITOR STATESMAN.—We have had all kinds of weather, cold, rain and sun, since I last wrote you. There is quite a number of Washingtonians and Idahoans in this city, among whom I noticed Messrs. Linkton and Adams of Walla Walla, John M. Conroy, of Pioneer City, and J. M. ...

Journal of an Overland Trip to the Atlantic States.
WABSBORR, KANSAS, January 17th, 1867.
Arrived at Junction last night by coach, four days and nights from Denver, 475 miles, and came down here this morning by rail—138 miles. We were pretty well tired out, having been in the coach for most of the time, for 10 days and nights, with but little sleep or rest. After leaving Denver our course was due east, over beautiful rolling prairie.

THE BUFFALO COUNTRY.
Next day we came into the buffalo country, and at times it certainly was four thousand in sight at once. They were very so numerous that in crossing the road the coach had to stop all they passed.

ON THE WAR PATH.
The Cheyenne and Arapahoe Indians are again on the war path. We found down the Smoky Hill River, at every alternate station, soldiers stationed to protect the mail coach. But about the only safety for the coach, between the stations, was a splendid guard team, and keep a sharp lookout not to be waylaid, and then, in case the Indians came down on the coach to put whip to the team and run into the next station before them—the stage stock being so much finer and superior than the Indian ponies they could run a mile from them. Two days after we had done on this and the Platte routes, and was the only way the coach could be saved. The company have five large, fat horses on this route, and as one of the passengers told me, had been over this route nine times, and had been frequently in Indian fights, and if they could get 400 yards the start of the Indians, they considered themselves good for the station. I was surprised at the number of graves and amount of destruction that the Indians committed on this route within two years past.

MINERALS.
The route from Denver to this place passes over a beautiful rolling country, affording the finest grazing, and extending most of the way through a rich agricultural valley, with a plenty supply of timber.

WYANDOTTE AND KANSAS CITY.
This place and Kansas City, (two miles below on the Missouri) are enterprising, thriving, well built towns with locomotives running and hauling through the streets at nearly every hour during the day, and night.

JUNCTION CITY.
The present terminus is a prosperous little place, just now. Two houses have sold about \$150,000 worth of gold, each this season. The road is graded nearly 100 miles further west, and the track will be laid very early in the spring; and, of course the business will move up to the next terminus.

LOOKING AROUND.—Reader, says the Napa Reporter, if any of your male acquaintances, who have not hitherto been "overly sociable," should meet you with a bland smile, a hearty shake of the hand, and an earnest inquiry concerning your health, or about the way you are getting on, you can safely conclude that they have an eye on some office at the next general election. It is astonishing what a change takes place in the demeanor of a man when he becomes a seeker of office, and aiming to win all the little ones, at a very early date, and for all your kindred, and becomes very socially indeed. He grins and bows at you on every street corner, a dozen times a day. He stops every ragged urchin within a rod of him, speaks a kind word, and two to one slyly sticks a penny or a few cents in the pockets of the grins, and passes to the next one. There is no about meeting a lady acquaintance. With him! The fatherly look is vanishing. His mouth is quickly drawn to a broad pleasant grin. Now see his hand awkwardly raised to lift his hat. Great heavens! what a rascal he has "made a point," and passes on, without consulting himself as to the cost, at the opportune time. He sees a group of men at a distance, and makes for them. Elong into all the little ones. Thus it goes all day long, day after day. What an agreeable comradery it would be to live in were all seeking office!

HOW TO CURB THE "BLUES"—Rev. T. De Witt Halmage, in a lecture, November 28th, says: "I do not know any array of horrors that can withstand an attack from a regiment with balls and hats. From the ball that the boy of four years rolls across the carpet to that which is flung up by the muscular arm of the sportsman, in the sight of five thousand people come out in the suburbs to see the contest, there is some thing about it that makes it place for this exercise. France had horses built especially for ball playing. Henry VII and Maximilian of Austria engaged in this sport. German professors, in making their dictionaries, came out to join in it, and we all, at school, used to take the ball, put the spittle on one side of it, and then throw it up to see who should have the first stroke, and have had many a sharp sting from the ball that struck us before we got to the ground. People who have spent former at Saratoga and Sulphur Springs and Baden-Baden, and other places, and come home unimpaired, have found out afterwards that their ailments were unable to keep up with them in their swift turns at cricket, and the inveterate in attempting to catch the ball, have actually taken their last breath on the fly."

VALUABLE INSECTS.—Great Britain pays annually £200,000 for dried carcasses of that tiny insect called the cochineal, while another insect, which produces a red shell, is scarcely less valuable. More than 1,500,000 human beings derive their sole support from the culture and manufacture of the three spinnings of the silk worm, of which the annual value is \$200,000,000. England exports \$50,000,000 worth of the product of her silkworms, and the imports annually 10,000 pounds of bees wax. There are three insect productions of gall-nuts, used in dyeing and making ink, and dandiarthoid Spanish fly; used in medicine.

COULDN'T SMOKE.—Napoleon could smoke the Alps but he couldn't smoke.

THE ARCHANGEL'S TRUMP.
A good story is told in Paris at the expense of a very rich and handsome widow, of the most exemplary character, who has a small and elegant retreat in Versailles, in addition to her own residence. This pretty rascally she was passing the week at the close of the Autumn, having for her guest a lad in his teens, who was a distant relative, and who was thus passing his vacation. Madam's housekeeper and cook was a respectable female, who, however, had an admirer, a trumpeter, stationed in the barracks near by, and the stolen pleasure of whom was to come in and dine stealthily on the remaining dishes of the mistress's luxurious table.

THE CHEYENNE AND ARAPAHOE INDIANS ARE AGAIN ON THE WAR PATH. We found down the Smoky Hill River, at every alternate station, soldiers stationed to protect the mail coach. But about the only safety for the coach, between the stations, was a splendid guard team, and keep a sharp lookout not to be waylaid, and then, in case the Indians came down on the coach to put whip to the team and run into the next station before them—the stage stock being so much finer and superior than the Indian ponies they could run a mile from them. Two days after we had done on this and the Platte routes, and was the only way the coach could be saved. The company have five large, fat horses on this route, and as one of the passengers told me, had been over this route nine times, and had been frequently in Indian fights, and if they could get 400 yards the start of the Indians, they considered themselves good for the station. I was surprised at the number of graves and amount of destruction that the Indians committed on this route within two years past.

AGENTS FOR THE STATESMAN: L. P. FISHER, THOS. BOYCE, Rev. J. W. McHEE, J. M. VAN DYKE, Col. N. H. GATES, HENRY A. NORTHROP, PARK WINANS.

THE WALLULA ROAD.—We have already adverted to the fact that Wallula is likely to be made the landing point for merchandise designed for the various mining districts in the upper country, and in this connection we have to urge that measures be immediately taken to place the road between Walla Walla and Wallula in good repair.

WHERE TO TRADE.—A lady friend living in Wallula, and who has frequent occasions to visit Portland, informs us that larger and better stocks of goods are to be found at Walla Walla than at the "emporium," and that she can trade here to better advantage than she can at Portland.

Iron.—We have elsewhere referred to the discovery of a coal mine within the limits of this county. We have to add that a gentleman whose statement can be relied upon, assures us that he knows of an iron vein within twenty miles of Walla Walla, and that it is his intention to arrange for its working in the course of the coming season.

COAL.—Madame Rumor has been busy during the week circulating a report that a coal vein had been discovered somewhere not far from this city. Charley Brooks is said to be the fortunate discoverer. Specimens of what appears to be the croppings of coal are exhibited in proof of the statement, and are a sufficient evidence of its truthfulness.

YAKIMA COUNTY.—An act was passed by the late Legislature organizing the county of Yakima and appointing county officers. This has been done twice before, but the officers appointed have never qualified. The present list it is said will enter upon the duties of their offices and set the machinery of their county in motion.

The Wastuckna Wagon Road.

The Wastuckna wagon road is the direct route from Wallula to the Cow Creek House, at the forks of the Mullan and Colville roads. The road crosses Snake River at Jim Ford's Island, about half way between the Palouse Ferry and the mouth. A wire rope ferry has just been put in and is now ready to cross travel and trains.

From the Bend to the Ferry, a distance of ten miles, the road follows the general course of the river. For the first five miles it crosses a broad plateau, cutting off a great bend of the Snake, including Anchor Canyon, then striking the stream again, follows along its bank five miles farther to the Ferry.

Wastuckna Lake lies deep in a remarkable cove or canyon, that commencing near the junction of Cow Creek with the Palouse, extends in a south-west course to the lake, and thence bears nearly westward to the Columbia River, debouching some fifteen miles above the Yakima. It has served the Indians as a great thoroughfare between the Palouse and the Columbia, and is traveled through its whole length by their trail, four abreast.

SPRING TRADE.—Although from a month to six weeks earlier than usual, we discover unmistakable indications that the spring trade is about to commence. All through the Valley pack-trains are on the move, apparatuses are being repaired, and preparations generally being made for another season's operations.

Table with 2 columns: Location, Distance. From Wallula to the Columbia, 3 miles. Thence to Fish Hook Bend, 12 " " to the Ferry, 10 " " to Wastuckna Lake, 15 " " to the Spring, 8 " " to Cow Creek, 8 "

PARJURE.—Sanford Conover, the infamous wretch who fabricated the testimony connecting Jefferson Davis with the assassination of President Lincoln, has been convicted of the crime of perjury. It was on the statement of this perjured scoundrel, that President Johnson was induced to issue his proclamation connecting the chief of the rebellion with the greatest crime of this or any age.

THE DELEGATESHIP.—Private letters received from the Sound country, intimate that Governor Cole will be a formidable candidate at the meeting of the Territorial Democratic Convention. It is stated that the leading mill men, who in fact control politics on the Sound, will go for Cole, whilst it will be difficult to secure their support for any other aspirant on the democratic side of the question.

STEVENS COUNTY contains the largest number of square miles of any county in Washington Territory. Walla Walla is second in size. The western boundary of Walla Walla extends to Rock Creek, some twenty miles below Umatilla City. Walla Walla county contains nearly one-third of the population of the Territory and pays nearly one-third of the tax paid into the Territorial treasury.

DAILY LINE.—The new schedule of the O. S. N. Company provides for a daily line of steamers between Portland and Wallula—the schedule to go into operation on the 1st of March. There is to be no delay at any point on the route, and passengers and freight are to be put through with a celerity heretofore unknown.

OLD SET NEW.—The new revenue law of the Territory, so far as the same relates to liquor licenses, and the manner of obtaining them, is an exact copy of the old law.

Ford's Island, has been a favorite crossing place of the Indians. Their broad trails from Walla Walla to the Yakima, Priest's Rapids and other resorts on the Columbia cross here. These trails cross Dry Creek about six miles from Walla Walla at or near Estie's place, and the Touchet at Knight's. The distance to the Island Ferry is thirty-two miles; the route practicable to wagons which have frequently been taken over it by the farmers living on the Touchet. The only place where the wagon track leaves the trail is plainly marked. From Walla Walla to Cow Creek, by the Island Ferry, the distance is a few miles shorter than by Palouse Ferry, and the long drive without water is avoided.

THE DALLES.—In the course of a hurried visit to the Dalles, we noticed that although the town was suffering under the general depression which pervades the whole coast, there were yet many signs of business activity. What is better, too, the leading men of the town were hopeful, and confidently looking forward to the "good time coming." The Dalles has greatly suffered from Indian depredations in the country south of her, but the measures now being taken to rid the country of these pests are such that it is scarcely possible that they can fail, and with these savages removed, a great improvement in the trade of the town is sure to follow. The people of the Dalles have at all times been noted for their enterprising spirit, and having advantages of position, they cannot fail to succeed. Sections of country which of necessity are tributary to the Dalles, will be explored this season, and should anything like expectations be realized, the result will be to greatly enhance the prosperity of the town. Already the conviction obtains that property has reached its lowest ebb, and anticipating a revival, capitalists from other sections are investing in Dalles property. Between Walla Walla and the Dalles there never can be anything like a spirit of rivalry, and hence it is that our people are glad to hear of the prosperity of the town that holds the key to the great Valley of the Columbia.

ITEMS FROM FORT SHEPHERD.—A private letter addressed to Dr. Shell, and dated Fort Shepherd, January 9th, furnishes the following items: "We have new diggings on a tributary of the Kootenai River, within 47 miles of this place. About thirty claims have been recorded on Forty-Nine Creek, but the stream has not been thoroughly tested. The discoverers took out \$45 worth prospecting. Another stream a little below Forty-Nine prospects well, and so I think we may expect a small mining camp up there somewhere. A man named King, was drowned whilst running a rifle on the Kootenai. No particulars. Another man named George Tinline, was found dead on the Salmon River trail, about three weeks since. He had been out trapping and had starved to death, at least we think so, as he had not an ounce of food on him when found. By letters from his person it was ascertained that he had a brother living at Union, Union county, Oregon. We have had a very mild winter; no frost to hurt, and only four inches of snow."

MORNING CHINESES.—On the 13th inst., in San Francisco, a crowd of workmen, estimated at six hundred, assembled and proceeded to mob a number of places in which Chinese men were employed to the exclusion of white laborers. The whole movement seemed to have the tacit assent of the authorities, no attempt being made to arrest the rioters until they had accomplished their work of destruction. The loyal citizens of San Francisco seem to forget that according to the gospel of Sumner, John Chinaman is as good as the "Maltese man."

CHARLES CHARBOT, for hauling lumber from Creek, \$25 coin. A. B. Roberts, hauling gravel and work, \$30 coin. Wm. Phillips, services as Fire Warden, \$24. S. Linkton, lumber for bridge, \$20 coin. On motion, a warrant in favor of S. D. Cook, for \$135 coin, in payment of money advanced by him for the repair and material for Sumner Main street; as per receipt roll, ordered filed. Bill of C. F. Kraft, \$150 coin, for material and work on 5th street bridge, was referred to Finance Committee.

On motion, a resolution was adopted, that all work done for the city should be by special contract only. Resignation of W. J. Tompkins, as a member of the Police force was accepted, and the Committee on Health and Police was instructed to make arrangements with policeman Lucy to perform duty from 6 A. M. to 6 P. M.

On motion, the seat of Councilman Baggs was declared vacant, on account of absence from the city over thirty days. The following communication from Mr. McKee was read: "GENTLEMEN:—Circumstances make it necessary that I should leave the City for an indefinite period of time, and I therefore tender my resignation as President and member of the Common Council of this City; and with my highest regards for the future welfare of your City, I hope the same will be accepted."

On motion, Council proceeded to election of Councilmen to fill vacancies, which resulted in the choice of Wm. Phillips and B. F. Stone.

Cleanings from Our Exchanges.

The new Lead Office at La Grande, Oregon is to go into operation as soon as the officers are prepared to transact business.

A town site has been laid out at the iron mines on the Willamette River, six miles above Portland, which the proprietor expects will become the Pittsburg of Oregon.

Carr. D. W. Porter, at one time stationed at Fort Walla Walla, has received the appointment of Assistant Quartermaster in the regular army.

The party of prospectors now fitting out at Portland and Dalles to prospect the Malheur country, will start for their destination about the 1st of April.

The Idaho Statesman says a man named Wm. Little was murdered in his own house, near Boise City, on the 4th inst. A son of Mr. Little, who has been subject to fits of insanity, is supposed to have been the murderer.

The Oregon papers say that considerable damage was done by the late high waters in that State. Southern Oregon has been the worst sufferer.

"Cook, the Cripple" and impostor is still perigrinating through Oregon and receiving complimentary notices from the press wherever he goes. The Salem Review says he was egged out of that town weeks ago.

The steamer between Portland and the Dalles are already beginning to bring up large droves of cattle for the upper country market. The Herald says a drove of 400 were to have arrived in Portland on the 13th for shipment to Lewiston.

The steamer Okanogan started to run the Cascades on last Saturday week. When about half way down she struck a rock which knocked a hole in her hull and her commanders were compelled to "jank shore" with her. At last accounts she was lying water-logged awaiting repairs, about half way between the upper and the lower Cascades.

JOHN McCloskey reports to the Mountaineer that he recently visited Crooked river—the country where the company is organizing at Portland and Dalles propose to go prospecting—and found favorable indications of a rich gold country.

The Portland Herald publishes a rumor that some of the business men of Portland are discussing the possibility of putting on a line of steam propellers to run between Portland and the Atlantic coast. A "game of bluff," we suppose.

THE DELEGATESHIP.—The Walla Walla correspondent of the Idaho Times furnishes the following: "It is reported, and the Walla Walla Statesman affirms, that a legion of aspirants and candidates are resident within this Valley, for the position of Delegate to Congress from Washington Territory; but I believe there are only two prominent men here, who are spoken of as candidates, to-wit: Judge Wyche, republican, and Dr. Ed. Shell, democrat. These gentlemen have little to say upon the question at issue, but there are numerous outside track candidates, who by stating that there are a host of candidates—too many altogether to ret at the same time to their own hour, telling others to stand from under, and whisper in the people's ear, vote for me if you want to save the country, I'll run the outside track, you know. Being no politician, not even a jail keeper, I have nothing to do but watch the tracks, and cast my vote. Judge Wyche is an old official in the Territory, and considered a kind and just judge. Dr. Shell, although a democrat, is yet no fire eater, neither a wooden man, but he is a learned, generous and upright gentleman, and while, standing a prominent man here, I greatly doubt whether he has one enemy. This side of the Cascade mountains having the choice for Delegate this term, Dr. Shell's nomination is very likely if not certain."

TURNED UP AGAIN.—The man Robinson, who led off the San Francisco party after quartz last season, in the vicinity of the Palouse, has again turned up in San Francisco, with a large amount of rich quartz, and is "hand" and "glove" with those whom he spirited away last season. Person in this town saw him, and reports that his representations there produce much excitement among quartz men. He declares he will not define the locality of his lead, till he can do so without being followed by a crowd, but only by those whom he chooses.—Lewiston Journal.

PRINTER SENATORS.—Anthony, of Rhode Island, and Ross, of Kansas, are practical printers, and when occasion requires it can take a hand at the "case."

EASTERN NEWS.—Telegraphic dispatches from the East bring nothing of special importance. Congress is still quarreling over the question of reconstruction and apparently making little headway.

Council Proceedings. February 19th, 1887.—Council met at the usual hour. Present Messrs. McKee, Winsett, Guichard and Cook. Mr. McKee in the chair. Minutes of the previous meeting read and approved.

Committee on Streets and Public Improvements reported the completion of water main and bridge on 5th street. Report adopted.

Committee on Finance to whom had been referred bills of Charbot & Roberts, reported the same correct, and recommended payment; and also recommended that the Territorial Warrant for \$175 offered by S. L. Roberts, be placed to his credit and his communication filed.

The following bills were allowed and ordered paid: Charles Charbot, for hauling lumber from Creek, \$25 coin. A. B. Roberts, hauling gravel and work, \$30 coin. Wm. Phillips, services as Fire Warden, \$24. S. Linkton, lumber for bridge, \$20 coin.

On motion, a warrant in favor of S. D. Cook, for \$135 coin, in payment of money advanced by him for the repair and material for Sumner Main street; as per receipt roll, ordered filed. Bill of C. F. Kraft, \$150 coin, for material and work on 5th street bridge, was referred to Finance Committee.

On motion, the seat of Councilman Baggs was declared vacant, on account of absence from the city over thirty days. The following communication from Mr. McKee was read: "GENTLEMEN:—Circumstances make it necessary that I should leave the City for an indefinite period of time, and I therefore tender my resignation as President and member of the Common Council of this City; and with my highest regards for the future welfare of your City, I hope the same will be accepted."

Walla Walla Domestic Market.

FRIDAY, FEBRUARY 22, 1887.

Our quotations for the week ending with this date are as follows: WHEAT, new, for milling, 9 bushels, 50. OATS, 9 bushels, 44. BARLEY, 9 bushels, 42. CORN MEAL, 9 bushels, 30. FLOUR, extra, 9 bushels, 85.00. GROUND FEED, 9 bushels, 30.00. BRAN, 9 bushels, 20.00. MIDDINGS, 9 bushels, 20.00. DOMESTIC BRANDY, 9 gall., 25.00.00. WHISKEY, Walla Walla, 9 gall., 75.00.00. APPLES, dried, 9 bushels, 18.00.00. PEACHES, 9 bushels, 12.00.00. PLUMS, 9 bushels, 12.00.00. BACON, 9 bushels, 14.00.00. HAMS, Walla Walla sugar cured, 9 bushels, 14.00.00. LARD, in tin, 9 bushels, 20.00.00. BUTTER, 9 bushels, 24.00.00. CHEESE, 9 bushels, 24.00.00. POTATOES, 9 bushels, 50.00.00. ONIONS, 9 bushels, 100.00.00. BEANS, 9 bushels, 15.00.00. HAY, 9 ton, 15.00.00.

FURTHER TESTS.—Parties have recently crossed the Snake and sunk shafts from 12 to 16 feet in depth, on the flat opposite this place, and about 2 of a mile from the river. They find gold in every strata, and in some the prospects were highly flattering—the gold being in grains and of good size, most of that found in this section, resembling that upon the bars adjacent to the river.—Lewiston Journal.

NEWS OF THE NEW PACIFIC.—Expressman Fairchild brought down some rock taken from the New Perce vein, as a newly discovered point which Mr. Hurly assayed with the following result: Gold \$1268, 15 gold and 93 silver to the ton. The lead at this new point of discovery is 24.25 wide and well defined. The lead is good for working and plenty of timber close at hand.—Lewiston Journal.

MARRIED: On Monday, February 18th, at the residence of the bride's father, by Judge Blewett, Mr. I. N. JOHNSON and Miss MARY S. KELLY, all of Walla Walla County. [Wilmington (Cal.) Journal please copy.]

On the 21st inst., at the residence of the bride's father, on the Touchet, by Rev. P. B. Chamberlain, Mr. JAS. S. DANSEN, of the firm of Dansen Bros. of Pioneer City, I. T., and Miss CONNELL R. NEWLAND. [Humboldt Times please copy.]

DIED: MARTIN A. MURRAY, died at La Grande, Union county, Oregon, on the 14th inst. Deceased was about 37 years old; was a native of Ireland. He lived several years in Philadelphia, Pa., and resided, previous to his coming to La Grande, in Walla Walla, W. T. He was at his death a member of the Fire Department; also, County Treasurer of Union county. Having been a resident of La Grande for four years, and one of her most active business men, and a man of generous impulses, he will be greatly missed by the community. He leaves a wife and one child. (Philadelphia papers copy.) J. H.

At the residence of Judge Wyche, on the morning of February 20th, TIMOUR, an Indian boy, aged, about 12 years. He will long be held by the family in affectionate remembrance.
