

Walla Walla Statesman.

FRIDAY EVENING, December 13, 1867.

END OF VOLUME VI.—The present number of the STATESMAN, closes the sixth volume. The writer of this is not in a position to enlarge much upon the subject.

All for Grant.

It is stated by the republican papers that all the Union papers in California support Grant for the Presidency.

The republican papers of Oregon, appear to be all for Grant. Our republican exchanges (and we get lots of 'em), are unanimously for Grant.

That Grant, as President, would prove a refractory member of the radical party, we certainly think probable, to say the least.

THE PUBLIC DEBT.—The Oregonian is a distressingly queer and inconsistent paper. In its mauling way, it berates the STATESMAN for advocating that the National Debt ought to be paid in legal tender currency.

From the Capitol.

From a private letter from Olympia we are permitted to extract the following: At eight o'clock on Sunday morning, I was up and out, and proceeded to reconnoitre the political situation.

Railroad Meeting. The citizens of Idaho Territory are requested to send delegates to a convention to be held at Boise City on Monday, the 6th day of January, 1868, for the purpose of memorializing Congress in favor of a grant for a railway connecting the Union Pacific railroad with the navigable waters of the Columbia, by way of the Snake River Valley.

We suggest that each county send delegates in the proportion of two, for each member of the Territorial Legislature, and we recommend that meetings be held in each county, on the last Saturday of December, 1867, to choose delegates for the convention called.

We also ask the aid of our fellow-citizens of Eastern Oregon, and Washington Territory, in the movement, and respectfully urge upon them the propriety of holding public meetings in their several localities, to consider and memorialize Congress upon the subject.

We get the above from the Boise Democrat. It looks like business, and we have no doubt the people of Idaho mean business in this matter. Exactly what is meant in the above, by 'connecting the Union Pacific Railroad with the navigable waters of the Columbia, by way of the Snake River Valley,' we do not fully understand.

THE PUBLIC DEBT.—The Oregonian is a distressingly queer and inconsistent paper. In its mauling way, it berates the STATESMAN for advocating that the National Debt ought to be paid in legal tender currency.

Washington Correspondence.

WASHINGTON, Nov. 12th, 1867. EDITOR STATESMAN.—I am again called upon to chronicle another brilliant and triumphant victory for the cause of constitutional liberty. The people have again spoken, and a such tone that there can be no mistake as to the meaning of the recent elections in the States of New York, Massachusetts, New Jersey, Kansas and Minnesota.

CONGRESS. Congress will meet on the 21st of the present month. It should be borne in mind that the present session can only last eleven days, including Sundays, and therefore but nine working days remain before the constitutional December session commences.

A RECONSTRUCTION CONVENTION. The recent elections in the South under the reconstruction acts of Congress, have resulted, without exception, in favor of the formation of State conventions to reconstruct the rebel States on a thorough loyal basis.

EASTERN NEWS.

NEW YORK, Nov. 30.—The Commercial special says the President's message is moderate and conciliatory, but argues that the Congressional plan of reconstruction is a failure, that the country has pronounced against it, and the elections Economy and retrenchment and uniform taxation are advocated.

CHICAGO, Dec. 3.—Chicago papers print the President's message in advance of its delivery. It is quite a lengthy document. A large portion is devoted to the review of the President's policy. It is principally statements of the views embodied in veto messages of various reconstruction bills.

OWYHEE ITEMS.—From the Avalanche of Nov. 30th we clip the following:

Wells, Fargo & Co. have shipped below by the Railroad stage, from this place, during the month of November, \$70,000 in gold and silver bullion.

A friend reports lively times in Flint.—The Iowa mill is constantly at work and Black's mill will be running by next Monday.

The proprietors of the Ida Elmore placed an engine on their works the beginning of this week, for pumping and hoisting purposes.

It commenced snowing moderately, night before last, and is snowing as we go to press, it being about four inches in depth.

MARRIED.

At the residence of the bride's parents, on the 7th inst., H. Parker, Esq., of Walla Walla, W. T., and Miss Mattie A. Boone, only daughter of Mr. and Mrs. John S. Boone, of Portland, by Rev. H. C. Benson.

A nice cake was sent in with the above notice, with a special request from the groom that he be "light on him." All right; matrimony is too grave an affair to make light of. We are mum. Go thy ways, Parker, and a—parker.

DIED.

In Charlestown, Nov. 6, Lizzie Kent Flanders, 8 years 10 months, only child of Alvan and Lizzie G. Flanders.

Oregon and California papers will please copy.

THE EMIGRATION OF ELEPHANTS.—A writer in the London Spectator asserts that the elephant is a highly imaginative animal, and proceeds to cite numerous facts to prove the assertion.

How strong the conventional imagination of the elephant is, is seen, even without respect to man, in his intense respect for the organic unity of a single herd or family, which he shows both positively. One herd will never, even when united by a common danger, admit another herd, or even a single individual of another herd, into the limits of its own group.

A GOOD JOKE.—Many years ago when church organs first came in use, a worthy old clergyman was pastor of a church where they had just purchased an organ.

"Boo-woo woo," went the bull again, as he drew a little nearer the church. The parson paused again and addressed the choir.

"I have requested the musicians in the gallery not to tune their instruments during the sermon. I now particularly request Mr. —, that he will not tune his double bass organ while I am preaching."

"It is— isn't it, Parson; it—it is that d—n town bull!"

PAPIS STRATEGY.—A young couple, says an Ohio paper, planned an elopement, the girl descending from her room upon the traditional ladder; but at the gate they were met by the father of the girl and the minister, by whom the young couple were escorted to the parlor, where, to their surprise, they found all their relatives collected for the marriage ceremonies, which took place at once.

MISFORTUNE TO A YOUNG LADY.—A young lady of Canandaigua, N. Y., went to a dentist to have some teeth extracted, and in the operation he cracked her jaw, but she being under the influence of chloroform, was insensible to her misfortune. The dentist did not discover it, but attempted to extract another tooth, pulling out a piece of the jaw bone of sufficient size to contain two teeth. By this time she began to recover from the effects of the opiate, and they were again administered, and a physician and surgeon being immediately summoned, her jaw was set. About six weeks after, her jaw was set. About six weeks after, her jaw was set.

BUTTER MAKING.—The following letter was received from a lady at Venice, New York: "Although so much has been said and written on the subject of butter making, still the complaints from grocers and genteel families in the city wax louder and louder. On a recent shopping excursion to a city in Central New York, I chanced to hear a remark, 'there has been more poor butter in the market this Summer than ever.' One baker affirms that he has bought a ton of butter at 12 1/2 cents per pound while a good article was bringing 30 cents. There is not one farmer in ten that has a suitable place to set milk! It is left (like geese) to shift for itself! Most dairies are too warm to set milk in for making good butter, while most cellars are too damp; for cream will not rise in a damp atmosphere. Added to these is gross carelessness about skimming the milk. Milk should be closely watched and skimmed before it gets very sour. A good milk house is as necessary as any other building. It should be built over a cellar four or five feet thick, the sides well lined up with brick or stone and white-washed, the bottom flagged with nice flat stone, laid in hydraulic cement. The windows should be made of fine slats, with wooden inside shutters. Then the temperature is easily regulated. No woman, however neat and careful, can make good butter in warm weather without a suitable place to set the milk. And until farmers generally provide better places to set milk, and dairy maids are more careful about skimming milk and working butter, we shall continue to hear the cry of 'poor butter.'"

MACAULY'S VIEW OF FREEDOM.—In an essay on Milton, published in the Edinburgh Review more than fifty years ago, Macaulay wrote as follows, seeming to have a prophetic forecast of the present condition of the negroes in America: "There is only one cure for the evils which newly acquired freedom produces—and that cure is freedom. When a prisoner leaves his cell, he cannot bear the light of day; he is unable to discriminate colors or recognize faces. But the remedy is not to remain him in his dungeon, but to accustom him to the rays of the sun. The blaze of truth and liberty may at first dazzle and bewilder nations which have become half blind in the house of bondage. But let them gaze on it, and they will soon be able to see it. In a few years more men learn to reason. The extreme violence of opinion subsides. Hostile theories correct each other. The scattered elements of truth cease to conflict and begin to coalesce; and at length a system of justice and order is deduced out of chaos. Many politicians of our time are in the habit of laying it down as a self-evident proposition that 'no people ought to be free until they are fit to use their freedom. The maxim is worthy of the fool in the old story, who resolved not to go into the water until he had learnt to swim.'"

WE clip the above from a 'loyal' paper. It will be observed, that in radical estimation, the English historian was a superb loyalist on the nigger question. Well, anything to 'make history,' whether truthful and good, or the reverse.

MIGHTY MEAN.—The last Radical Legislature of Pennsylvania, having discovered that the very few pensioners in that State of the war of 1812 were Democrats, repealed the law appropriating money—only \$7,000 per year—to pay the pensions.

IT is said that Sonora has eight women in the population to one man. Counting ought to be easy upon there.

Sir Isaac Newton was not called the Laughing Philosopher, until he discovered gravity.

THE RICHEST MAN IN THE WORLD! EXTRACT OF A LETTER FROM BARON SOLOMON ROTHSCHILD. Paris, 8th April, 1864, 25 Rue Faneur, St. Honoré. DR. PERRAULT'S studies have been almost exclusively devoted to the cure of the various forms of chronic and physical debility, the result of nervous habits acquired in youth, which usually terminate in impotence and sterility, and permanently injure the constitutional vigor of old age. Where a secret infirmity exists in the constitution, the happiness of life and that of others, reason and morality dictate the necessity of its removal, for it is a fact that premature decline of the vigor of manhood, matrimonial unhappiness, compulsory single life, &c., have their sources in causes, the germ of which is planted in early life, and the bitter fruit tasted long afterwards.

DR. PERRAULT'S studies have been almost exclusively devoted to the cure of the various forms of chronic and physical debility, the result of nervous habits acquired in youth, which usually terminate in impotence and sterility, and permanently injure the constitutional vigor of old age. Where a secret infirmity exists in the constitution, the happiness of life and that of others, reason and morality dictate the necessity of its removal, for it is a fact that premature decline of the vigor of manhood, matrimonial unhappiness, compulsory single life, &c., have their sources in causes, the germ of which is planted in early life, and the bitter fruit tasted long afterwards.
