

discuss questions of a purely economic nature. For the first time in the past quarter of a century the people of the United States are in a condition to examine these questions upon their merits and study their bearing upon our common welfare. During the excitement of war of course such questions could not be calmly discussed, and in all the turmoil and confusion which followed in its wake there was no room in the public mind for such considerations; nor have the bitterness and prejudices growing out of that strife permitted dispassionate discussion until of recent date. The days of this prejudice, bitterness and excitement have passed away, and the time has come for calm reasoning about things which make for our common peace and common good.

The enormous system of taxation which was inaugurated under the necessities of a state of war, and which has been kept alive and increased under the cover of prejudices growing out of that conflict will now be examined and criticized with impartial judgment by the present generation. The examination will determine whether these great economic questions shall be dealt with in a manner to satisfy the greed of a favored class or for the best interests of the great majority. It is well to capture and punish criminals, but when such methods are adopted as Sullivan resorts to, it smacks too much of the adage "set a thief to catch a thief."

It is said a glass of beer taken through a straw will intoxicate a man. The liquor taken in small quantities is spread over the coating of the stomach, and the alcohol is at once vaporized, the fumes rising to the brain. It takes some time to drink half a pint of beer through a straw, and the intoxicating ingredients are in full activity for several minutes. It is this continuity, and not the amount of alcohol, that causes intoxication from so harmless a draught.

our industries are hoary with age and owned principally by foreign capital, under Republican high protection, they are wretchedly mean, clamorous and un-American. In our early history, when we were all Democrats, a drink a day was sufficient; but since politics have changed, we have become drunken and want to drink all day and kick all night. Oh, when shall true, genuine American patriotism be able to shake off this infant from the public nursing bottle?

When our fathers threw off British supremacy, in 1776, and established the American Union, they thought they had thrown off also all the ideas and institutions of aristocratic Europe which tended to create artificial and unnatural distinctions. (Continued on Fourth Page.)

EDWARD ALBERTSON and Fred N. Chandler, who succeeded in getting away with \$20,000 in cash from a Tacoma banking house, were captured in Oregon last Saturday. Albertson was shot, but seriously it is impossible to ascertain, and over \$10,000 of the money was recovered. "Detective" Sullivan still comes in for a great deal of censure, and has succeeded in materially widening the already broad breach between Tacoma and Seattle. It is well to capture and punish criminals, but when such methods are adopted as Sullivan resorts to, it smacks too much of the adage "set a thief to catch a thief."

WE DON'T HAVE TWO PRICES.

EVERY ONE THAT THIRSTS

Come and Drink of the Waters of Democracy Freely.

Wm. D. Bynum, of Indiana, Jan. M. Beck, of Pennsylvania, and others will address the people of Yakima.

To-morrow (Friday) evening, at 7:30 o'clock, Mason's opera house will be graced by those flowers of democracy, Wm. D. Bynum, congressman from Indiana, and James M. Beck, ex-attorney general of Pennsylvania.

The great state of Washington is not to be neglected for the record of the opposing party here in the past few years is of such rotten and a reckless character as to call not only for public condemnation, but prompt and concerted action to preserve the reputation of our commonwealth, as well as to aid in the purification of national politics.

The eminent gentlemen who are to speak at the opera house to-morrow evening should be given a rousing reception and a big audience, for they will give the people something to think about.

This Year's Election. Seattle Telegraph: On the 3d of November elections will be held in ten states.

New York chooses state officers, legislature, supreme court judges and a congressman to fill a vacancy. There is little doubt that the Democracy will be successful.

Ohio elects state officers and legislature. The republicans ought to be successful, unless they have permanently lost their hold upon the state.

Pennsylvania elects treasurer, auditor and votes on the question of calling a constitutional convention. The republicans are opposing the convention, and seeking to hold their party vote on national issues.

Mississippi elects railroad commissioners and legislature. The only interest attaching to the result is the amount of strength that may be shown by the Alliance.

Maryland elects state officers and legislature, and votes upon several constitutional amendments. The democracy will stay on top.

Massachusetts chooses state officers and legislature. There will be a hot struggle between the parties, with the chances in favor of the republicans.

Iowa will choose state officers and legislature. Next to Ohio the liveliest campaigning will be done there.

Nebraska elects supreme judges and university regents. This contest will be interesting as showing whether the Alliance holds its great strength of last year.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Royal Baking Powder ABSOLUTELY PURE

Science in Bread Making.

At the recent annual meeting of the American Chemical Society, held in Washington D. C., the question of the value of carbonate of ammonia as a leavening agent in bread, or as used in baking powder came up for discussion, in which Prof. Barker, of the University of Pennsylvania, and president of the society; Dr. Richardson, late of the United States Department of Agriculture in Washington; Dr. Wm. McMurtrie, late Prof. of Chemistry in the University of Illinois; Dr. E. H. Bartely, late Chemist of the Brooklyn, N. Y., Board of Health, and Prof. of Chemistry of the Long Island College, and others took part.

The consensus of opinion was overwhelming in favor of the employment of ammonia. It was stated as a fact that ammonia rendered the gluten of the flour more soluble than the original gluten, and that the bread in which this action was produced by carbonate of ammonia must be more digestible and hence more healthful, and because of the extreme volatility of carbonate of ammonia, and its complete exulsion from the bread in the process of baking, it is one of the most useful, most healthful and most valuable leavening agents known.

These conclusions are borne out by the very elaborate and exhaustive experiments made by Prof. J. W. Mallet, of the University of Virginia, which show conclusively that bread made with baking powder in which one per cent. of carbonate of ammonia is used, in connection with cream of tartar, but a product more wholesome, because ammonia serves to neutralize any organic or lactic acids present in the flour.

Saved From Death by Onions.

There has no doubt been more lives of children saved from death in croup or whooping cough by the use of onions than any other known remedy. Our mothers used to make poultices of them, or a syrup, which was always effectual in breaking up a cough or cold. Dr. Gunn's Onion Syrup is made by combining a few remedies with it which makes it more effective as a medicine and destroys the taste and odor of the onion. Sold by Janek's Pharmacy.
