GEO. H. RICKER, Sec.-Treas.  
401 Tower Avenue  
SUPERIOR WIS.

Box 1873, Seattle, Wash.

November 7, 1919

John Pico,  
Goodyear Log. Co., Camp 3,  
Clallam Bay, Wash.

Fellow Worker:

Your letter to Fellow Worker Moran also article for publication has been turned over to this office. With reference to article will say that this is hardly good propaganda or news and would suggest that if you really want to take some constructive action to get out literature, you bring up the matter at some business meetings and lay out a plan of action whereby the literature can be effectively distributed. Anything of that nature both the Worker and Bulletin will be glad to print.

As regards literature, card cases, gold buttons, etc., these have been sent out of this office just as fast as we get them from Chicago or 500 headquarters. You say that Port Angeles Branch has been unable to get any literature from here. I will quote you a letter from Fellow Worker Ross dated October 19th in which he says "I have about 2000 Industrial Communism and the I.W.W., so do not send any more or "Proletariat and Petit Bourgeois" or "Industrial Democracy" or "Advancing Proletariat" as the loggers here do not want to get brain fever but want something that has some pep and reading that hits the spot." You can look over the list of literature which is given on the inside back-cover of the O.B.U. monthly. It is all the standard literature (with a few exceptions) which Ross says he doesn't want. We can only send out what we get from headquarters as this is not a publishing bureau.

As for papers, which you say you have not been able to get enough of, branch secretaries are supposed to order them direct and order as many as they can use. If they don't order enough it is not the fault of the district office.

I notice that your letter to Moran bears also the signature of George H. Schmidt, Delegate 3049. You might notify him that I have been advertising for him for two weeks, asking him to communicate with this office. Our books show him to owe \$45.50. If this is correct, have him carry this amount as cash balance on his next report, and if he does not owe anything, ask him to write to this

office and explain when and where he remitted this amount or any part of it.

Fellow Worker Spear now has taken over the job of District Secretary but I am answering you because this concerns matters that took place during my term of office.

Yours for Industrial Freedom,

Jack McVeigh

John Murray.

Fellow Worker.

Received your letter of the 4th and note what you say about writing me before in regards to a clearance. I did not received this letter. Possibly it went astray. In regards to the clearance will say that for the present at least I will be unable to look this up. At the present time or rather since Fellow Worker left here I have been so busy with the work in this office that I have not had time to go over the old records of #700 and consequently in order to get these supplies out and go over the records for your account will necessitate several days. There had been a new Sec'y elected here for #700 and I will take it up with him right away and see what he intends to do about getting out the old records and getting them in shape.

It might be a good idea if you would request Fellow Worker Whitehead to send you a statement in duplication of the one he sent to Mayham, stating you had cleared yourself up to the date Whitehead send it from here. Write him and ask about it.

I am going to keep your letter in mind and when the supplies and records of #700 are dug up will have a clearance sent in to you right away. Write in a couple of days so that we will be sure and remember it.

Yours for Industrial Freedom.

GENERAL EXECUTIVE BOARD  
MEMBERS

Henry Bradley	Chas. H. Miller
John Jackson	James King
George Bradley	Fred Nelson
	George Speed

Thos. Whitehead  
Gen. Secretary-Treasurer

October 6, 1919.

Wm. Ferguson,  
8 No. Fir St.,  
Toppenish, Washington.

Fellow Worker:

Your letter without date received all right, and note what you say in regard to not being active lately, and why. Note, also that the slaves there are awakening out of their lethargy. Also that you saw Chas. Downey and Harry Feinberg recently.

Note that you want supplies and credentials, and want to get active again. Now, we have considerable difficulty in getting supplies from Chicago to the Coast and I would suggest that you get credentials and supplies from either of the following, accordingly as you size up the situation and the possibilities where you are in lining up members in any particular industry: Construction Workers Industrial Union No. 573, apply to A. L. Emerson, Box 3 6 5, Seattle, Wash. Lumber Workers Industrial Union 500, apply to Jack Mc Veigh, Box 1873, Seattle, Wash. Shipyard Workers credentials apply to Thos. McKinley, Box 3 6 5, Seattle. The credentials now are universal, and you can line any man up with these credentials, but you must send in your report to who you get your supplies from.

When lining up a member, place the number in which the Fellow Worker belongs in the second column on the reverse side of the report, and then the transfer is made in the office of the Industrial Union, and thus all supplies and stamps are accounted for where they are charged. For duplicate card, fill out the enclosed application for duplicate and forward to Thomas McKinley who is secretary of 325, and has the records for that Union. I might state that the new leather duplicate cards are 50 cents each now.

Trusting you will be able to get busy in the near future, I am

Yours for Industrial Solidarity.

# BOYCOTT NOTICE

All clothing, drug and jewelry stores east of Howard Street, in the City of Spokane, are hereby declared unfair, and not worthy of our patronage. If the business men of Spokane are going to let the lumber companies run their town, then it is up to us to let lumber companies to support the business men. The business men have declared war on the Lumber Workers of the Spokane District. We, the members of the I. W. W., have accepted their challenge and we are going to have our constitutional rights, even if we are obliged to put every business man in the City of Spokane on the bum.

Other classes of business will be put on the unfair list when conditions permit.

Remember, an injury to one is an injury to all. Now is the time to learn the business men of Spokane we mean business.

Watch where you trade when in Spokane. Ask and be sure you are not scabbing on your Fellow Workers in jail. Last but not least, the following are unfair: Elk Hotel, Raymond Hotel, Haven Hotel and the famous stool pigeon outfit Gordon Hotel.

# SHAPING THE THOUGHTS OF A GREAT NATION OR HOW THE PUBLIC SENTIMENT IS CREATED AND MAINTAINED.

EXTRACTS FROM THE CONGRESSIONAL RECORD  
FEBRUARY 9, 1917, PAGE 3320.

Discussion of One of the Great War Bills H. R. 20632.  
Entitled, the Navy Appropriation Bill.

MR. CALLAWAY from Texas. Mr Chairman, under unanimous consent, I insert in the Record at this point a statement showing the newspaper combination which explains their activity in this war matter, just discussed by the gentleman from Pennsylvania (Mr. More):

"In March, 1915, the J. P. Morgan interests, the steel, shipbuilding and powder interests, and the subsidiary organizations, got together 12 men high up in the newspaper world and employed them to select the most influential newspapers in the United States and sufficient number of them to control generally, the policy of the daily press of the United States.

"These twelve men worked the problem out by selecting 179 newspapers and then began by an elimination process to retain only those necessary for the purpose of controlling the general policy of the daily press throughout the country. They found it was only necessary to purchase the control of 25 of the greatest papers. The 25 papers were agreed upon; emissaries were sent to purchase the policy, national and international, of these papers; an agreement was reached; the policy of the papers was bought, to be paid for by the month; an editor was furnished for each paper to properly supervise and edit information regarding the questions of preparedness militarism, financial policies, and other things of national and international nature considered vital to the interests of the purchasers.

"This contract is in existence at the present time, and it accounts for the news columns of the daily press of the country being filled with all sorts of preparedness arguments and misrepresentations as to the present condition of the United States Army and Navy, and the possibility and probability of the United States being attacked by foreign foes.

"This policy also included the suppression of everything in opposition to the wishes of the interests served. The effectiveness of this scheme has been conclusively demonstrated by the character of stuff carried in the daily press throughout the country since March, 1915. They have resorted to anything necessary to commercialize public sentiment and sandbag the National Congress into making extravagant and wasteful appropriations for the Army and Navy under the false pretense that it was necessary. Their stock argument is that it is 'patriotism.' They are playing on every prejudice and passion of the American people"

## WALL STREET AND PROFITEERS.

Wall and profiteers rule all this land  
They gather gold with a bloody hand;  
Its patriotism is taught in public schools  
That makes American children silly fools

They send their political brallers out  
The ignorant child will wave and shout  
They yell for blood, with great delight  
While profit munglers urge on their fight.

'These same hell born looting profiteers  
Has kept blood flowing now for years;  
In their rotten press, send out the lie  
That its brave for the soldier boys to die.

Then Pinks Bulls and Hor Pimps Stools  
Do the rotten bidding for the high up fools  
While City Hall trash in their rotten career  
Help guard the interests of the profiteer.

Rape robbery and lies, with their old sports  
Are always protected by bot up courts;  
Priests and profiteers in their age long song  
Preach to the workers they can do no rong.

But sweat-box jails and dungeons dark  
A thin ghastly face, that is their mark  
Of the blood thirsty robbing Profiteer  
But in One Big Union, they will disapear.

## THE THINKERS

Over the earth comes a whisper, from under  
the sea it is heard

The press with its millions of readers and  
thru the air comes the word,

That down trodden labor is thinking is rising  
from silence to might,

Chained thru past strugling ages, will claim  
all the earth now in sight.

The kings and tyranical rulers, the priest  
and his ignorant hord

The jails and dungeons of torture, the can-  
non the rifle and sword,

The sweat-shops mills and factory, where  
child life is blighted by need,

Slave mothers ground into dollars, to satisfy  
parasites greed.

When murder slavery and grafters shall be in  
the shades of the past,

Then sunshine of freedom and gladness will  
come to the strugglers at last,

For the brain of the toilers are wakening the  
groans down thru ages are heard

The chains that have fettered are breakin  
for thinkers are passing the word.

*C Mailed to William Ferguson, Toppenish  
from Yakima, 6 Nov. 1919*

Seattle, Wn., Nov. 5th, 1919

Fellow-Workers:

At a regular business meeting of C.W.I.U. #573, Seattle Branch, the following motion was passed:

"M&S that the matter of mass or delegate convention be referred to the D.O.C. Carried."

"M&S that we recommend to the D.O.C. that we call a delegate convention December 22nd. Carried."

"M&S that we recommend that the D.O.C. get in communication with the different branches and jobs as to whether they want a mass or delegate convention on Dec. 22nd, and that the membership decide where the convention is to be held. Carried."

At a regular business meeting of C.W.I.U. #573, Portland Branch, the following motion was passed:

"M&S that the Portland Branch go on record as favoring a job delegate district convention of C.W.I.U. #573, either in Seattle or Portland-----Carried."

This office does not feel justified in calling a district convention without first getting the opinion of the membership. If the members of the different jobs and branches will send in their ideas we will act accordingly. Let us know if you want a delegate or mass convention, and where you want it held.

Owing to the great expense connected with a convention of this kind the District can not pay the expenses of the delegates attending. All expenses will have to be met by the jobs and branches sending delegates.

If the #573 District convention can be held on December 22nd, arrangements can be made for the same delegates to attend the joint district conference to be held on December 27th, and will also give ample time to send delegates to the #573 General Convention which will be held in the east on January 1st.

Expecting prompt attention and replies from all jobs and branches we remain yours for Industrial Freedom

**C. W. I. U. N° 573. I. W. W.**

## **An Open Letter to Construction Workers.**

The man who is doing construction work is working in one of the most essential of the industries in the present scheme of production. The wheels of all industries would soon cease to turn if the construction workers were to remain idle for any length of time. Rich deposits of coal and iron would be valueless if the construction worker did not bridge the streams, pierce the mountains and build the railroads over which the raw material is transported to the industrial centers.

Millions of acres of desert waste would have never been reclaimed if the construction worker had not built the reservoirs and the miles of irrigation ditches so the life giving water might flow over the land. Of what use

would be the great quantities of foodstuffs grown on the rich farm lands if the workers did not build the roads and the high-ways so the grain and vegetables might be hauled to the railroads and then to the markets to be distributed among the great masses of people who are so far removed from the soil. Think of the millions of people who would soon be without a roof over their heads if the construction workers were to build no more houses to shelter them.

The construction worker is the pioneer of industry. Step by step the progress of the wall of civilization can be traced by the forging ahead of his work. Foremost to him are only those engaged in agricultural pursuits.

The construction worker builds the trails and the wagon roads into the new and undeveloped country, the houses that shelter pioneers, next the railroads that connect them with the outside world and finally the schools, the hospitals, the paved streets, the skyscrapers, and all that make the great cities of today.

By this we cannot fail to see that the construction worker does an important part in the work of production and distribution.

We will now look into the manner in which the construction worker lives, dealing especially with those, who owing to the nature of their work, have no permanent place of abode. It was only until quite recently that the contractors in the western states furnished as much as a dirty blanket for the worker to sleep under. Nor as yet do they all provide bedding of any kind. In many camps springs and mattresses are unknown and white sheets are only associated with the beds in the vermin infested lodging houses where the worker sleeps when on his periodical trips to the cities.

His only shelter from the elements is a torn and leaky tent or a shack of rough lumber and tar paper, often with only one opening called a door, windows being entirely forgotten. The first has its advantages in fair weather as we all know that a tent at least provides for plenty of fresh air, but in stormy weather the rag house is a decided failure. For the last we can speak no good word, for the tar paper shack is unbearably hot under the summer sun and with the wintery winds blowing through the numerous cracks no number of stoves will furnish heat enough to make them comfortable. The only light to be had in these miserable holes is generally candles bought by the worker from his meagre wages. Where such is furnished the best is a smoky kerosene lamp or a broken lantern.

No bathing facilities are provided for the worker who is often engaged in the dirtiest kind of work. Miles and miles from the nearest laundry, the only way he can wash his clothing is in a tin can with water heated over an open fire. The food the worker in a construction camp must eat is often of the worst kind. Fresh fruits and vegetables are rarely included in his bill of fare. Such food as he has is in many instances poorly cooked and eaten at a table over which swarms a multitude of flies and in arid regions both table and food are likely to be generously covered with a thick coating of dust.

In addition to living and working conditions such as afore mentioned the construction worker receives a wage

that is on the average lower than the wages received by men engaged in work of a like nature, such as those employed on the farms and in the woods.

We know that the construction worker is engaged in useful labor and is a necessary factor in carrying on production. Has he not a right to share the good things of life on the same basis as the workers in other industries? We do not mean to infer that any group of workers have begun to receive the returns they should from their labor. In the struggle for better things the construction worker has been unduly slow in helping himself and as a consequence is not enjoying the many concessions that workers in other industries have forced the employing class to yield.

As a comparison the eight hour day is established in practically all industries and in the more progressive industries the workers are planning as the next step the six hour work day. This does not hold true for those engaged in construction work. Granting that in some of the western states and in a few of the eastern ones state laws specify that eight hours shall be the work day on public work, the major portion of the workers who are building the railroads, the highways, and other large projects are now working nine, ten and even twelve hours a day.

The city worker has at least some choice in where he lives and from whom he buys the necessities of life. The worker in the camp must sleep in the place provided for him and eat such food as is furnished him and buy his clothing and necessary sundries from a commissary run by the contractor and at which the most prohibitive prices are charged. The city worker has some place for amusement and recreation, such as the moving picture show, the theater and the parks; the camp worker is far away from anything such as this. The city worker has some facilities for keeping his body and clothing clean; the camp worker has none.

In many of the industries the worker is insured of steady employment. The worker in the construction camp is never sure of employment from one day to the next. Many construction jobs are of short duration, all are subject to be shut down on account of inclement weather and numerous other things, so the worker is continually on the move from the slave market to the job and back to the slave market, with no chance of ever having a home of his own or enjoying the companionship of the rest of his fellow workers.

These conditions must be changed. The construction workers must get the things that are necessary for them to live as human beings should and not as beasts. Every concession wrested from the employing class has been gained only by the organized efforts of the workers. Nothing but absolute freedom from wage slavery will give the workers the things that they produce and the chance to enjoy the good things of life. In organizing to gain their immediate demands the workers should organize in such a way that chains of wage slavery can be shaken off and that production can be carried on when this end is attained.

The Industrial Workers of the World have as their final aim "the wresting of power from the Industrial Lords

and the ownership and management of the industries by and for the workers."

The foundation of the I. W. W. IS INDUSTRIAL UNIONISM. All workers in any industry are organized into an INDUSTRIAL UNION of ALL the workers in the entire industry, these INDUSTRIAL UNIONS in turn are organized into INDUSTRIAL DEPARTMENTS of connecting or kindred industries, while are brought together in THE GENERAL ORGANIZATION OF THE INDUSTRIAL WORKERS OF THE WORLD.

For the construction workers of the I. W. W. has the Construction Workers Industrial Union No. 573. All workers engaged in the construction of buildings, railroads, highways and bridges are organized in this industrial union. There is a free transfer from this industrial union to all other industrial unions. The basis on which the C. W. I. U. is formed is the group of workers on the job and the industrial union branches. These in turn form a district covering a given area. The membership of each district elect by referendum a Secretary-Treasurer who is under the immediate supervision of an organization committee of from five to seven members. Of the whole is formed the C. W. I. U. No. 573 with a Secretary-Treasurer and General Organization Committee of seven members elected by the membership of the entire industrial union. The connecting link between the men on the job and the branch and district offices is the job delegate. He is empowered to collect dues, initiate new members and transfer members into the industry in which they are working.

All members who have been in good standing in the I. W. W. for six months are eligible to carry credentials as a job delegate. This gives every member who has the interests and welfare of the organization at heart the chance to be an organizer.

With such a democratic form of organization the workers cannot fail in their struggle with the employing class. With as their demands the shortening of the work day and the improving of living conditions, they can wage incessant war against the industrial lords and have a form of organization that is adapted to their needs when the workers as a class are finally free from the bonds of wage slavery.

To the construction worker who is unorganized we ask that you come to the aid of yourself and your class and join the Construction Workers Industrial Union No. 573. The initiation fee is two dollars and the dues are fifty cents per mons. Join through the nearest branch or from the job delegate on the job where you work.

To you who are members of the organization we ask that you get credentials today, get them from the traveling delegate when he visits your camp, from the branch secretary or from C. W. I. U. No. 573, 1001 W. Madison St., Chicago, Ill.; Seattle District C. W. I. U. No. 573, Box 365, Seattle, Wash.; California District C. W. I. U. No. 573, Box 845, Stockton, California.

## NOTICE TO MEMBERS.

Every member who can read and write and understands why he himself has joined the I.W.W. should take out credentials and become a Job delegate.

Many of the members seem to think that the I.W.W.'s activity is confined to the I.W.W. halls which is a mistaken idea, as the I.W.W. functions on the job much better. And the time is now ripe to make it function in the Shipyards for with the agitation that has been carried on in the Shipyards the past few months, we have stirred up some new ideas in the minds of the slaves about Capital and Labor.

The industrial union idea is growing among the skilled workers as well as the unskilled. These workers are finding that it is impossible to express these ideas within the A.F. of L. and their looking for an industrial form of organization. So there is an eruption due which will mean a tremendous growth of the I.W.W. This is one opportunity that we cannot take any chances on missing.

So if you want to see the industry you are working in organized it is up to you to do the organizing right on the job where you get the raw material to work on. Even the rankest scissor will agree that the A.F. of L. is a joke as a labor organization. When he does admit it, you should hammer your ideas of unionism home and also be in a position to line him up on the job. If a few more members take out credentials in the Shipyards, it will not be long before we will be able to function on the job or off the job at all times.
